FUSION® POWER OF HUMAN CONNECT

FUSION CX LIMITED

(TO BE LISTED ON THE MAIN BOARD OF BSE AND NSE)

(Please scan this QR code to view the Red Herring Prospectus and the Abridged Prospectus)

Our Company was originally incorporated as *"Xplore-Tech Services Private Limited"* as a private limited company under the Companies Act, 1956, through a certificate of incorporation dated February 25, 2004, issued by the Registrar of Companies, West Bengal at Kolkata. The name of the Company was subsequently changed to *"Fusion CX Private Limited"* pursuant to a resolution passed by our Board dated March 27, 2024, and a shareholders' resolution dated April 26, 2024, and a fresh certificate of incorporation dated June 26, 2024, was issued by the Registrar of Companies, Central Processing Centre to reflect the change in name. The name of the Company was thereafter changed to *"Fusion CX Limited"* upon conversion to a public limited company pursuant to a Board resolution dated January 27, 2025 and a special resolution passed in the extraordinary general meeting of the Shareholders held on January 28, 2025, and consequently a fresh certificate of incorporation dated March 13, 2025, was issued by the Registrar of Companies, Central Processing Centre to reflect the change in name upon conversion. For further details, see *"History and Certain Corporate Matters – Brief History of our Company"* on page 232 of the red herring prospectus dated October 8, 2026 ("**RHP**" or "**Red Herring Prospectus**") filed with the RoC.

** To the extent ascertainable*
^ This excludes the value of the matters filed by (i) Steven Brown and others against our Company and our Subsidiaries, Ameridial Inc. and Sequential Technology International, LLC, (ii) Global Callcenter Solutions against our Company and our Subsidiary O'Currance, Inc, and (iii) Sequential Technology International Holdings LLC against our Company and our Subsidiary, Ameridial, Inc. For further details, please see the section titled "Outstanding Litigation and Material Developments" on page 461 of the RHP.
Note : For outstanding litigations where the amount involved is in foreign currency, we have assumed an exchange rate of ₹94.56 = USD 1, applicable as on March 31, 2026. (Source: www.fbil.org.in)

2. **Customer Concentration:** A significant portion of our business is attributable to top 10 customers that have contributed 49.84%, 52.17%, 45.30% and 41.04% to the revenue from operations for the three-month period ended June 30, 2026, Fiscals 2026, 2025 and 2024, respectively. Any deterioration in the financial condition of our top customers or the loss of such customers may have an adverse impact on our business.
3. **Cybersecurity Risk:** Our business model as a technology-enabled customer experience and business process outsourcing provider necessitates the extensive processing, storage, and transmission of sensitive and confidential information. If our information security measures are compromised, damaged or interrupted by cyber attacks, breaches, computer viruses or other security problems, our business, reputation and financial condition could be adversely affected. .
4. **Overseas Revenue:** Our Company generates a significant portion of our revenue from our customers situated outside India. 90.06%, 88.71%, 80.59% and 76.22% of our revenue from operations for the three month period ended June 30, 2026, Fiscals 2026, 2025 and 2024, respectively is derived from customers based outside India with a higher dependence on revenue from operations from North America. Adverse developments in these areas may increase our costs, disrupt operations, or impact the financial stability of these customers - potentially resulting in reduced demand, payment delays, or customer loss. The revenue from operations within and outside India for periods indicated, including as a percentage of revenue from operations, is provided below:

Particulars	Three month period ended June 30, 2026		Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (in ₹ million)	Percentage of Total Revenue from Operations (%)	Amount (in ₹ million)	Percentage of Total Revenue from Operations (%)	Amount (in ₹ million)	Percentage of Total Revenue from Operations (%)	Amount (in ₹ million)	Percentage of Total Revenue from Operations (%)
Revenue from India	487.48	9.94	2,051.87	11.29	2,579.67	19.41	2,357.80	23.78
Revenue from outside India	4,417.36	90.06	16,129.51	88.71	10,713.29	80.59	7,555.35	76.22
North America	3,902.38	79.56	14,855.74	81.70	10,014.31	75.34	6,892.13	69.53
Latin America	359.52	7.33	675.36	3.71	60.50	0.46	42.88	0.43
Southeast Asia	13.36	0.27	53.04	0.29	147.88	1.11	129.01	1.30
Europe and Africa	142.10	2.90	545.36	3.00	490.58	3.69	491.33	4.96
Total	4,904.84	100.00	18,182.38	100.00	13,292.96	100.00	9,913.15	100.00

5. **Intellectual Property Risks:** We rely on unpatented technology tools and platforms developed in-house as well as hold intellectual property rights relating to our brands, domain names, technology applications and services offered. Our existing trademarks may expire, and we cannot assure you that we will be able to renew the same in a timely manner or at all. Our pending and future trademark applications may not be approved. Additionally, certain logos including that of "Omind", "Boomsourcing", "Annotera" and "Scribe.ology" which is used by our Company and Subsidiaries have not been registered at all.
6. **Attrition Risk:** Our performance depends largely on the efforts and abilities of our skilled employees as well as Key Managerial Personnel and Senior Management Personnel. The table below sets forth the attrition data of our employees for the periods indicated:

Period	No. of CX Employees*	Average attrition rate**	No. of Field Workforce	Average attrition rate**
March 31, 2024	8,539	32.15%	8,723	4.83%
March 31, 2025	12,586	30.56%	10,747	5.38%
March 31, 2026	13,357	26.50%	4,077	5.31%
June 30, 2026	13,735	31.20%	3,829	5.10%

**Includes KMPs and SMPs*
***Voluntary attrition is calculated as the percentage of employees who voluntarily leave the organization (excluding those employed for less than 90 days), divided by the average monthly closing headcount of such employees over the preceding 12-month period*

7. **Goodwill impairment risk:** Goodwill and other intangible assets are our largest assets. Any impairment to our goodwill or other intangible assets may adversely affect our reputation and financial condition. Set forth below are details of our goodwill and other intangible assets as of June 30, 2026, and March 31, 2026, 2025 and 2024, in absolute terms and as a percentage of our total assets:

Particulars	Three month period ended June 30, 2026		Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (in ₹ million)	Percentage of total assets (%)	Amount (in ₹ million)	Percentage of total assets (%)	Amount (in ₹ million)	Percentage of total assets (%)	Amount (in ₹ million)	Percentage of total assets (%)
Goodwill	3,626.43	26.51%	3,622.02	26.15%	2,880.89	25.20%	876.39	11.41%
Other intangible assets*	1,017.70	7.44%	1,064.33	7.68%	1,156.53	10.12%	830.22	10.81%

**Includes computer software and customer list.*

8. **Foreign Exchange Risk:** Our reporting currency is in Indian rupees, and we transact a significant portion of our business in several other currencies, primarily the U.S. Dollar. Additionally, we do not have any hedging arrangements. Accordingly, changes in exchange rates may have a material adverse effect on our profitability and margins. Set out below are the details of the gains or losses on the foreign exchange fluctuations for the periods indicated:

Metric	Three month period ended June 30, 2026	Fiscal 2026	Fiscal 2025	Fiscal 2024
Gain/ (Loss) on foreign exchange fluctuation (net) (in ₹ million)	37.11	179.62	(14.41)	(25.45)

**In case of any delay in unblocking of amounts in the ASBA Accounts (including amounts blocked through the UPI Mechanism), exceeding two Working Days from the Bid/Offer Closing Date, for cancelled / withdrawn / deleted ASBA Forms, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher from the date on which the request for cancellation/ withdrawal/ deletion is placed in the Stock Exchanges bidding platform until the date on which the amounts are unblocked (ii) any blocking of multiple amounts for the same ASBA Form (for amounts blocked through the UPI Mechanism), the Bidder shall be compensated at a uniform rate ₹100 per day or 15% per annum of the total cumulative blocked amount except the original application amount, whichever is higher from the date on which such multiple amounts were blocked till the date of actual unblock; (iii) any blocking of amounts more than the Bid Amount, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the difference in amount, whichever is higher from the date on which such excess amounts were blocked till the date of actual unblock; (iv) any delay in unblocking of non-allotted/ partially allotted Bids, exceeding two Working Days from the Bid/Offer Closing Date, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher for the entire duration of delay exceeding two Working Days from the Bid/Offer Closing Date by the SCSB responsible for causing such delay in unblocking. The BRLMs shall, in their sole discretion, identify and fix the liability on such intermediary or entity responsible for such delay in unblocking. The BRLMs shall be liable for compensating the Bidder at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher from the date of receipt of the investor grievance until the date on which the blocked amounts are unblocked. The Bidder shall be compensated in the manner specified in the SEBI circular dated March 16, 2021, as amended pursuant to SEBI circulars dated June 2, 2021, April 20, 2022, June 21, 2023, and August 9, 2023 (each to the extent not rescinded by the SEBI ICDR Master Circular in relation to the SEBI ICDR Regulations), which for the avoidance of doubt, shall be deemed to be incorporated in the deemed agreement of our Company with the SCSBs, to the extent applicable.*

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON MAIN BOARD PLATFORM OF THE STOCK EXCHANGES

In case of any revision in the Price Band, the Bid/ Offer Period shall be extended for at least three additional Working Days after such revision of the Price Band, subject to the total Bid/Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar unforeseen circumstances, our Company, in consultation with the BRLMs, for reasons to be recorded in writing, extend the Bid / Offer Period for a minimum of one Working Day, subject to the Bid/ Offer Period not exceeding 10 Working Days. Any revision in the Price Band, and the revised Bid/ Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges by issuing a public notice and also by indicating the change on the respective websites of the BRLMs and at the terminals of the members of the Syndicate and by intimation to Designated Intermediaries and Sponsor Bank(s), as applicable.

The Offer is being made in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (the **"SCRR"**), read with Regulation 31 of the SEBI ICDR Regulations. The Offer is being made in accordance with Regulation 6(2) of the SEBI ICDR Regulations, as our Company does not fulfil the requirement under Regulation 6(1)(a) of SEBI ICDR Regulations, through the Book Building Process wherein in terms of Regulation 32(2) of the SEBI ICDR Regulations not less than 75% of the Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers (**"QIBs"**) (such portion referred to as **"QIB Portion"**), provided that our Company in consultation with the BRLMs, may allocate up to 60% of the Net QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations (the **"Anchor Investor Portion"**), out of which 40% of the Anchor Investor Portion shall be reserved within which: (i) 33.33% of the Anchor Investor Portion shall be reserved for domestic Mutual Funds; and (ii) 6.67% shall be reserved for Life Insurance Companies and Pension Funds, subject to valid Bids being received from domestic Mutual Funds and Life Insurance Companies and Pension Funds at or above the price at which allocation is made to Anchor Investors (**"Anchor Investor Allocation Price"**), in accordance with the SEBI ICDR Regulations. In the event of any under-subscription or non-allocation in the category of Life Insurance Companies and Pension Funds, the balance Equity Shares shall be added to the category of domestic Mutual Funds In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (excluding the Anchor Investor Portion) (the **"Net QIB Portion"**). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIB Bidders (other than Anchor Investors), including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining Net QIB Portion for proportionate allocation to all QIBs. Further, not more than 15% of the Offer shall be available for allocation on a proportionate basis to Non-Institutional Investors out of which (a) one-third of such portion shall be reserved for applicants with application size of more than ₹0.20 million and up to ₹1.00 million; and (b) two third of such portion shall be reserved for applicants with application size of more than ₹1.00 million, provided that the unsubscribed portion in either of such sub-categories may be allocated to applicants in the other sub-category of Non-Institutional Investors and not more than 10% of the Offer shall be available for allocation to Retail Individual Investors in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Offer Price. All potential Bidders (except Anchor Investors) are required to mandatorily use the Application Supported by Blocked Amount (**"ASBA"**) process providing details of their respective ASBA accounts, and UPI ID in case of UPI Bidders, if applicable, in which the corresponding Bid Amounts will be blocked by the SCSBs or by the Sponsor Bank(s) under the UPI Mechanism, as applicable, to the extent of the respective Bid Amounts. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For further details, see 'Offer Procedure' on page 503 of the RHP.

Bidders/ Applicants should ensure that DP ID, PAN, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID available in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/ Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorised the Depositories to provide to the Registrar to the Issue, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Issue. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders'/Applicants' sole risk. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020 and press release dated June 25, 2021, read with press release dated September 17, 2021 and CBDT circular no.7 of 2022, dated March 30, 2022 read with press release dated March 28, 2023 and any subsequent press releases in this regard.

Contents of the Memorandum of Association of our Company as regards its objects: For information on the main objects of our Company, please see the section ***"History and Certain Corporate Matters - Main Objects of our Company"*** on page 232 of the RHP. For **FUSION CX LIMITED**
On behalf of the Board of Directors
Sd/-
Barun Singh
Company Secretary and Compliance Officer

Place: Kolkata, West Bengal
Date: October 13, 2026

FUSION CX LIMITED is proposing, subject to applicable statutory and regulatory requirements, receipt of requisite approvals, market conditions and other considerations, to make an initial public offering of its Equity Shares and has filed the RHP dated October 8, 2026 with RoC and the Stock Exchanges. The RHP is available on the website of SEBI at www.sebi.gov.in, as well as on the websites of the Stock Exchanges i.e. BSE and NSE at www.bseindia.com and www.nseindia.com, respectively, on the website of the Company at www.fusioncx.com; and on the websites of the Book Running Lead Managers (**"BRLMs"**), i.e. Nuvama Wealth Management Limited, IIFL Capital Services Limited *(formerly known as IIFL Securities Limited)* and Motilal Oswal Investment Advisors Limited at www.nuvama.com, www.iiflcapital.com and www.motilaloswal.com respectively. Any potential investors should note that investment in equity shares involves a high degree of risk and for details relating to such risk, see ***"Risk Factors"*** on page 19 of the RHP filed with SEBI and the details set out in the RHP, when filed. Potential Bidders should not rely on the DRHP filed with SEBI and the Stock Exchanges for making any investment decision.

The Equity Shares offered in the Offer have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the **"U.S. Securities Act"**), or the securities laws of any state of the United States and may not be offered or sold in the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. The Equity Shares offered in the Offer are being offered and sold only outside the United States to persons who are not U.S. persons (as that term is in defined in Regulation S (**"Regulation S"**) under the U.S. Securities Act, such persons **"U.S. Persons"**) in "offshore transactions" as that term is defined in and in reliance on Regulation S. As a result of relying on the Regulation S exemption, the Equity Shares sold in the Offer will be 'restricted securities' under Rule 144 under the U.S. Securities Act, which means that such Equity Shares may not be resold/transferred into the United States or to a U.S. Person for a period of 12 months from the date of Allotment (the **"Distribution Compliance Period"**), unless the resale of the Equity Shares is registered under the U.S. Securities Act or an exemption is available.

Diwali bonanza: UPI MDR put off for now

The National Payments Corporation of India (NPCI) on Tuesday put off the rollout of a 0.4 per cent merchant discount rate (MDR) on Unified Payments Interface (UPI) transactions over ₹2,000 until after Diwali. It was due to take effect on October 15. The new date will be notified separately. The deferment offers merchants a breather during the festival season. An MDR is a fee paid by a merchant to the bank and payment company processing a digital transaction. AJINKYA KAWALE reports 4 ▸

Hyundai plans $15.5 bn investments in India

Hyundai Motor Group on Tuesday said its group entities will invest $15.5 billion in India over the next seven years through 2032. The initiative positions India as a strategic core market for the group's future growth, emerging market expansion, and next-generation automotive innovation. The announcement came after company's Executive Chair Euisun Chung met Prime Minister Narendra Modi in New Delhi. SHINE JACOB writes 12 ▸

₹ rallies to 1-month high on RBI curbs, but banks remain uneasy

ANJALI KUMARI
Mumbai, 13 October

The rupee strengthened 0.5 per cent on Tuesday to a one-month high, outperforming its Asian peers as measures by the Reserve Bank of India (RBI) to curb speculative bets helped support the currency. But the central bank's latest foreign exchange curbs have unsettled some banks, with uncertainty over implementation prompting a few lenders to hold back from quoting contracts that require them to buy dollars for clients, market participants said.

The rupee settled at 95.28 against the dollar, compared with 95.78 in the previous session, taking its gains over the past three trading sessions to 1.6 per cent.

The recovery has come as the RBI steps up efforts to ease pressure on the rupee, including by opening a dedicated dollar window for state-run oil marketing companies and tightening rules on foreign exchange derivatives to rein in speculative positions and curb spot-market dollar demand.

The uncertainty over the latest requirements has kept trading subdued, with exporters and importers largely limiting activity to essential transactions as banks seek clarity on their implications for hedging operations.

"The Indian rupee continued its upward trajectory for the third consecutive session, closing near a one-month high," said Dilip Parmar, senior research analyst at HDFC Securities.

He attributed the gains to the RBI's regulatory measures, the unwinding of long positions, broad dollar weakness, lower crude oil prices and a recovery in domestic equities.

The central bank added to its curbs in a notification issued late on Monday, restricting non-deliverablederivative contracts (NDDCs) involving the rupee offered to non-residents to hedging purposes only, which prevent non-residents from speculating.

"On a review, it has been decided that henceforth, Authorised Dealers shall offer NDDCs involving INR to a non-resident user only for the purpose of hedging," the RBI notification said.

"Overarching objective is to deter speculative activity and ensure that only genuine flows and hedges are undertaken," Abhishek Goenka, founder and chief executive officer (CEO) at IFA Global, said. Turn to Page 8 ▸

Regaining ground

₹ vs $ (inverted scale)

Source: Bloomberg; Compiled by Business Standard Research Bureau

■ The ₹ gained 0.6% in October, mainly due to a series of steps by the RBI in the last few days to curb speculative bets. In the past one year, the Indian unit fell close to 7% against $, and 4.5% since the West Asia conflict that started late February

RBI to continue efforts to contain ₹ volatility: FM

KRITY AMBEY
New Delhi, 13 October

The Reserve Bank of India (RBI) is likely to take further measures to contain rupee volatility, Union Finance Minister Nirmala Sitharaman said on Tuesday, after recent steps by the central bank helped the currency recover from near-record lows.

"The rupee has reached a low and the RBI is making a lot of efforts through its regulatory powers to make sure that the rupee stays stable. I am sure there are efforts which the RBI would take further to make sure that the rupee doesn't become too volatile," she said at the Bloomberg New Economy Forum.

The finance minister also said she would keenly hear discussions on long-term capital gains (LTCG) tax and the securities transaction tax (STT) on equities, amid a wider debate over tax treatment across asset classes. Domestic equities posted their biggest single-day gains in four months on Tuesday, helped by Sitharaman's remarks. Turn to Page 8 ▸

Corporate treasury centres queue up for GIFT-IFSC base

KHUSHBOO TIWARI
Mumbai, 13 October

GIFT-International Financial Services Centre (IFSC) is seeing a sharp pickup in corporate treasury activity, with 12 units approved or operational, nearly a dozen applications under review and around 20 companies in discussions to establish operations.

Investments by treasury centres nearly doubled in three months to around $496 million as of June, from $235 million in March, pointing to growing interest in the financial hub for cross-border funding, investments and risk management. Data for the July-September period is expected by the end of October.

Zydus Lifesciences, Sun Pharma, Indus Towers and Bharti Airtel are among the recent companies to have set up treasury centres. The expanding pipeline includes applications from global technology and semiconductor leaders, an international payments major, a Japanese trading conglomerate and a global tyre manufacturer, as well as Indian groups across energy, cement and engineering, sources said.

INVESTMENTS BY OPERATIONAL UNITS DOUBLE IN A QUARTER TO NEARLY $500 MILLION AS OF JUNE

The treasury centres, classified as Global or Regional Corporate Treasury Centres (GRCTCs), also reported loans and advances of $6.54 billion as of June, up from $5.61 billion at the end of March. Dipesh Shah, executive director at the International Financial Services Centres Authority (IFSCA), said the segment could become an important growth engine for GIFT-IFSC. Turn to Page 9 ▸

Sun Pharma board approves plan to raise up to ₹10,000 crore

Sun Pharmaceutical Industries has said its board of directors has approved a proposal to raise funds of up to Rs 10,000 crore through the issuance of non-convertible debentures (NCDs). The decision was taken at a meeting of the company's Board of Directors held on October 12, Sun Pharma said in a regulatory filing late on Monday evening. The board approved the issuance of listed, rated, unsecured, redeemable NCDs on a private placement basis in one or more tranches and/or series for an aggregate amount not exceeding ₹10,000 crore. The company said that disclosures required under Regulation 30 of the Sebi (Listing Obligations and Disclosure Requirements) Regulations, 2015, will be made at an appropriate stage upon the issuance or allotment of the debentures. Hilton debuts luxury brand LXR Hotels & Resorts in India

Global hospitality major Hilton has announced the debut of its luxury brand, LXR Hotels & Resorts, in India with the opening of The Den Bengaluru, a 226-room hotel, located in Whitefield. The hotel offers more than 21,000 square feet of flexible event space across seven venues, including a ballroom, auditorium, meeting rooms, and an open-air amphitheatre. Owned by Dan Hospitality India Pvt. Ltd. and managed by Hilton, The Den Bengaluru marks a strategic expansion for the company into one of the country's prominent businesses and internationally connected markets. Commenting on the launch, Zubin Saxena, senior vice president and regional head, South Asia, Hilton, said, "India is one of Hilton's most important growth markets, and the emerging expectations of the country's luxury travellers are creating significant opportunity for brands that offer individual and experience-led stays." Hilton is a global hospitality company with a portfolio of 28 brands. OUR BUREAU

CSM Tech secures $174K to develop digital infra

CSM Tech Limited has secured a $174,000 mandate from TradeMark Africa (TMA) for the design, development and deployment of the Mozambique Transport and Trade Observatory (TTO) for the Beira Corridor. The Beira Corridor is a strategic trade route connecting the Port of Beira in Mozambique with Zimbabwe and extending trade links to Malawi, Zambia and the Democratic Republic of Congo (DRC). As part of the project, a centralised digital platform will be created to provide corridor stakeholders with near real-time visibility into cargo movement, transport performance and delays. Shree Cement commissions 3 mtpa facility in UAE

Shree Cement Ltd on Tuesday said it has commissioned a 3 million tonnes per annum (mtpa) cement grinding facility for its UAE subsidiary, Union Cement Company, in Ras Al Khaimah, with an investment of AED 115 million (around ₹300 crore). With the addition, the company's cement manufacturing capacity in the UAE has risen from 4 MTPA to 7 MTPA, it said. The facility is equipped with a Vertical Roller Mill with an integrated grinding and separation system, modern material handling infrastructure and advanced dust collection systems, the company said. PTI

Tata Elxsi Q2 net rises 10% to ₹170.3 cr, revenue up at ₹1,056 cr

Design and technology services provider Tata Elxsi on Tuesday reported a 10 per cent increase in net profit to ₹170.30 crore during the September quarter of financial year 2027 (Q2FY27), aided by growth in key verticals. The company had posted a profit of ₹154.82 crore in the same quarter of the preceding fiscal, according to a regulatory filing. Tata Elxsi's revenue from operations rose 14.98 per cent to ₹1,055.66 crore in Q2 FY27, compared to ₹918.10 crore in Q2FY26. On a quarter-on-quarter basis, the company's revenue grew by 3.4 per cent. However, its net profit declined by 0.18 per cent. "We have delivered strong operational excellence and resilient growth across customers and industry verticals in a volatile macro environment,"CEO and MD Manoj Raghavan said. PTI

Auto revenue seen rising up to 28% in Q2

Input costs may squeeze margins; volume-led sales growth may outpace profits

SOHINI DAS
Mumbai, 13 October

Automobile manufacturers are expected to deliver a strong performance on several counts for the second quarter of 2026-27 (Q2FY27) but higher commodity costs could restrict profitability despite strong sales, according to brokerage estimates.

Revenues are anticipated to grow 26-28 per cent year-on-year (Y-o-Y). Earnings before interest, taxes, depreciation and amortisation (Ebitda) are projected to expand 14-16 per cent, while profit after tax (PAT) could go up 12-13 per cent.

Axis Securities expects a growth rate of 28 per cent, 16 per cent and 12 per cent, respectively, in revenues, Ebitda and PAT. Choice Institutional Equities forecasts growth of 26.3 per cent, 14 per cent and 13.1 per cent, respectively, for the three.

However, the estimates cover different sets of firms.

Q2 RESULTS PREVIEW

The demand for vehicles remained strong during the quarter, supported by affordability gains through reduced goods and services tax (GST) rates, new launches, and improving rural demand.

According to the data from the Federation of Automobile Dealers Associations (Fada), retail registrations rose 24.92 per cent Y-o-Y to 7.55 million units during the quarter.

Two-wheeler registrations grew 26.88 per cent, passenger vehicles 22.23 per cent, and commercial vehicles 25.16 per cent, while tractor sales increased 14.51 per cent.

However, Fada has sounded a word of caution that growth, particularly in September, was inflated by a low base because customers had deferred purchases ahead of last year's GST rate cuts in the same month. The dealers' body also flagged rising inventories in passenger vehicles, reaching 43-45 days by September-end, and said festival demand and affordability would be key moniterables.

Commodity inflation remains the principal headwind. Elara Securities said pricing by automakers had not fully offset earlier increases in commodity prices, keeping margins under pressure despite strong volumes.

It expects the impact to continue into Q3FY27. Prices of copper and rubber rose 6 per cent and 9 per cent, respectively, quarter-on-quarter, according to Elara.

Asit C Mehta Investment Intermediates (ACMIIL) expects price increases and operational efficiencies to mitigate some cost pressures, but indicated that a meaningful recovery in margins would depend on movements in commodity prices and the timing of the cost pass-through.

Strong growth in sales may not translate into equally strong profits for passenger-vehicle makers. Maruti Suzuki, India's largest carmaker, is expected to post revenue growth of 28-30 per cent, but PAT could fall 8-15 per cent, according to Axis Securities, ACMIIL and Mirae Asset Sharekhan.

A similar divergence is expected at Mahindra & Mahindra. While revenues could rise around 23 per cent, Sharekhan expects PAT growth of just 5.5 per cent, with weakness in the tractor business weighing on earnings.

Tata Motors' passenger-vehicle business could be an exception to the broader trend in margin pressure.

Two-wheeler manufacturers are expected to fare better. TVS Motor's revenues could grow 35-38 per cent and PAT 45-49 per cent, according to Axis Securities and Sharekhan.

Bajaj Auto's revenues are projected to rise 24-26 per cent, with PAT growing 21-27 per cent across brokerage estimates. Hero MotoCorp could report a revenue increase of 18-21 per cent, but PAT growth may be limited to 8-9 per cent. Eicher Motors is expected to record revenue growth of about 23 per cent and PAT growth of 15-21 per cent.

In commercial vehicles, Ashok Leyland's revenues are forecast to grow 33-36 per cent.

The revenues of auto-ancillary units are expected to grow 22.5-24.5 per cent, according to brokerage estimates.

Minda Corporation, Uno Minda and Sansera Engineering are among those expected to benefit from higher vehicle production and premiumisation although tyre manufacturers face pressure from elevated rubber costs.

Earnings forecast

	Revenue (₹ cr) Q2FY27E	Y-o-Y chg (%)	PAT (₹ cr) Q2FY27E	Y-o-Y chg (%)

Tata's chip bet is no short-term play, says Chandrasekaran

SHIVANI SHINDE
Mumbai, October 13

For Tata Sons Chairman N Chandrasekaran, the group's bet on semiconductors is not about getting the numbers right over the next two or three years, but about investing in a sector that will be critical to India's long-term growth. He said the group's experience had shown that investments made with the country's needs in mind had consistently proved to be the right decisions.

"Whether we get semiconductor chips right or we get the numbers right in two-three years, that is not the point. Chips are going to be fundamentally required for domestic consumers," Chandrasekaran said. He was speaking at a panel discussion titled *The End of Predictability* at the Bloomberg New Economy Forum 2026.

He said this investment philosophy had encouraged the Tata group to venture into the semiconductor and electronics sectors. Underlining India's opportunity in global manufacturing, he said the country had the talent and domestic market to become an important player in global supply chains. "We have the talent, domestic market, we can play a part in every global supply chain. We need partnerships because we do not have all the technologies."

He also cautioned that while companies must be willing to take risks, they should keep an eye on their balance sheets. "You have to be careful, and keep an eye on the balance sheet. One cannot be reckless. We need to see where the demand is," he said.

"WE HAVE THE TALENT... WE CAN PLAY A PART IN EVERY GLOBAL SUPPLY CHAIN. WE NEED PARTNERSHIPS BECAUSE WE DO NOT HAVE ALL THE TECHNOLOGIES"

N Chandrasekaran
Chairman, Tata Sons

Tata Electronics is establishing a fabrication plant in Dholera, Gujarat, in partnership with Dutch company ASML Holding NV. The company is also setting up a semiconductor facility in Assam, which is expected to produce 48 million chips a day.

Asked how the current global uncertainty differed from past events, Chandrasekaran said this was the first time so many disruptions were occurring simultaneously. These included geopolitical tensions, disruption from artificial intelligence, and commodity and supply-chain disruptions. "At the same time the connected world is trying to decouple itself. And tackling all of these things now is unique," he added.

He identified technology as a major near-term disruptor, particularly when it fell into the hands of bad actors, and pointed to the labour restructuring that would eventually follow. "The other thing that I worry about is the war situation. We are opening a war in every situation, and nothing is getting closed," he added.

Chandrasekaran said businesses should build resilience into their operations rather than focus solely on efficiency in an unpredictable environment. He argued that the two were not mutually exclusive.

"In a highly unpredictable, volatile environment, optimising for efficiency is definitely not the right thing," he said. "I believe that if you design for resilience in an unpredictable environment, actually you are optimising for efficiency."

He cited shortages of magnets that could disrupt vehicle production and the cyberattack that affected Jaguar Land Rover, saying the company had lost almost six weeks of production due to the incident.

The group had also faced an air crash and supply-chain disruptions, he said, but still expected to deliver double-digit growth while maintaining margins.

Data centre demand to outstrip supply as AI usage grows: Experts

AASHISH ARYAN
New Delhi, 13 October

Electricity grid capacity, energy storage and conversion, and the talent needed to run data centres remain the biggest bottlenecks to expanding data centres globally and in India, Abhijit Dubey, president and chief executive officer (CEO) of NTT Data, said on Tuesday.

"The biggest bottleneck nobody talks about is the hidden bottleneck of talent. So, if you think about electricians, skilled technicians, design, construction... their compensation today is more than most of the white-collar jobs," Dubey said at the Bloomberg New Economy Forum 2026 in New Delhi.

There was, however, no dearth of demand for new data centres or even the capital to invest in the sector, he said.

The narrative of the demand for artificial intelligence (AI), the compute, capacity, the energy and supply chain for AI being fragile is misplaced, and not connected to ground realities, said Connor Teskey, the CEO of Brookfield Asset Management.

"We hear about a more efficient model, and people worry about the demand picture, or we hear about one data centre being released and people worry about the demand picture. The demand so overwhelms supply at this point that there is going to be a supply-demand imbalance through the end of this decade and probably far beyond that," Teskey said.

"IT (AI) IS GOOD NEWS FOR INFOSYS, AND BY THAT SAME VIEW, GOOD NEWS FOR TECH SERVICES IN INDIA"

Salil Parekh
CEO & MD, Infosys

"THE BIGGEST BOTTLENECK NOBODY TALKS ABOUT IS THE HIDDEN BOTTLENECK OF TALENT"

Abhijit Dubey
President and CEO, NTT Data

Dubey and Teskey were part of a panel discussion that also included Infosys CEO and Managing Director (MD) Salil Parekh and Sajiv Ahuja, chairman and CEO of Tillman Global Holdings.

Responding to a question on the data centre capacity build-out, Parekh, however, said that as semiconductor chips were "massively expensive" and facing tremendous competition, it was unclear how long the data centre capacity being built would remain useful.

"Today the demand is fantastic, but these are some of the risks that could play out," Parekh said.

A second risk, he said, was the backlash against such massive build-out, and that the social response, especially in Western markets, needed to be balanced with the geography's economic drivers.

AI services are growing at a double-digit rate sequentially and are likely to drive almost half of Infosys' work in two to three years, Parekh said.

"It is growing at a fantastic pace. If you extrapolate that by a few quarters, you already start to see that's 20-30 per cent of our work in a few quarters, and maybe in two or three years, almost half of our work," he said.

On the viability of India's information technology services industry in the backdrop of AI advances, Parekh said, "My own sense is it is good news for Infosys, and by that same view, good news for the tech services in India."

Radisson group looks to unveil first branded residence project by Dec

Q&A Brussels-headquartered hospitality major Radisson Hotel group will launch its first branded residence in India by the end of the year, **Elie Younes**, executive vice-president and global chief development officer, told **Gulveen Aulakh** in a virtual interaction. With India set to become one of its top-five markets, Younes says the group is planning to double hotel count in the country to 500 by 2030. Edited excerpts:

Branded residences are coming up sharply in India. What is your strategy for this market?

■ Yes, we'll be launching the first branded residence project — Radisson Blu Residences — before the end of this year in India. It's a large project and probably in December we'll be announcing it. I think India is ready for that. Given the awareness of the Radisson brand in India that goes back around 30 years, it is a natural fit to have branded residences simply because our brand is extremely well recognised in the country. It will help the customer, us and the owners to explore that revenue.

What is the strategy that Radisson follows in branded residences in other markets? Will it be the same in India?

■ Historically, we had a mixed-use development approach. We only did branded residences if it were part or within the vicinity of a hotel project, or hotel over a branded residence. There has been demand from both investors and buyers to have more branded residences on a standalone basis, not necessarily always associated with a hotel.

We have selectively been venturing into those projects outside India so far, specifically West Asia. Our first branded residence project in India will be a standalone residential project and not a mixed-use one.

"THERE HAS BEEN DEMAND FROM BOTH INVESTORS AND BUYERS TO HAVE MORE BRANDED RESIDENCES ON A STANDALONE BASIS, NOT NECESSARILY ALWAYS ASSOCIATED WITH A HOTEL"

Elie Younes
Executive VP & Global Chief Development Officer, Radisson Hotel Group

Would India require a different strategic approach versus China, given its a growth market for all major global brands?

■ Yes, every market requires its own specificities. We have a legacy (of 30 years) in India, a benefit that we don't have in other markets like Southeast Asia or China. So, we do have an extra advantage here in terms of brand recognition. But this means we have to work harder to make ourselves more known in places like China and the rest of Asia. India is going through an economic boom, making it a fertile market for hotel development. We're excited with our plan of expanding in the next four years, from our current 250 to 500 by 2030.

What kind of an impact has the West Asia conflict had on the Radisson group, in terms of costs rising and impacting margins?

■ There are two impacts. One, the cost of running hotels has been going up and the cost of building hotels is also rising. The whole economics of investing in a hotel has been impacted. The other one is the return on investment to the owner and that is also impacted by revenues. We've been blessed with revenues going up. So, to some extent, part of that cost increase has been absorbed in many markets. In some places, hotel managers were able to translate that cost increase into a price rise, basically passing on the rise to the consumer who was willing to pay the extra price.

In some markets, the cost did increase more than the revenues, but in those markets, there has been no noticeable impact at this point in time. It's still under control but there are signs of cost increases and we have to keep a close eye on that so we don't run into challenges in the future.

With AI costs on the rise, Zoho freezes salary hikes

With a rise in infrastructure expenses due to growing demand for artificial intelligence (AI), global geopolitical uncertainties, and an uncertain software market putting pressure on the spending of software-as-a-service (SaaS) major Zoho, its founder Sridhar Vembu *(pictured)* has announced that employees will not receive their usual annual salary hikes this year. In a post on X on Tuesday, Vembu said the company is facing a sharp rise in server prices, which were up fourfold, adding to the costs of running data centres. In addition, higher expenses from increased AI usage and ongoing geopolitical challenges are affecting the company, and it has already reduced the marketing budget and informed employees that there will be no pay rise this year.

Alibaba unveils $450 AI glasses in expanding push into gadgets

Alibaba Group Holding on Tuesday unveiled the new generation of its smart glasses, deepening its foray into consumer electronics as an extension of its artificial intelligence strategy. The company, which models itself as China's full-stack artificial intelligence (AI) provider spanning everything from data centres and software to end-user products, detailed its new Qwen Glasses N1 series at an event in Hangzhou. With prices starting at 2,999 yuan ($450) before discounts, they're no cheaper than industry leader Meta 's Ray-Ban smart glasses, showing Alibaba's effort to compete on quality and features rather than just price. Mirroring Meta's strategy, Alibaba is endeavouring to turn smart glasses into an entry point for its AI tools and agents. Meta last month expanded its lineup of smart glasses with a simplified, camera-free model priced at $349, designed primarily for interaction with the new Muse AI assistant.

BLOOMBERG

AI helps Infy's Finale suite reduce sales process friction

AVIK DAS
Bengaluru, 13 October

Artificial intelligence (AI) is helping Infosys significantly reduce friction in its sales process for its flagship financial product and solutions suite Finacle. Company executives said that the technology has cut the time and effort required to demonstrate its banking software solutions to potential clients by as much as 60-70 per cent.

"Sometimes we would run a pursuit for six months, doing eight workshops. Today, such activities are getting done in two or three workshops, which compresses the whole journey by 60-70 per cent. Hence, we see significantly reduced sales friction because of AI," said Sajit Vijayakumar, chief executive officer of Infosys Finacle, in an interview with *Business Standard*.

The company is also embedding AI across its banking software suite, with a focus on improving operational efficiency, enabling more intelligent product pricing and offering personalised services to customers.

When asked which are some of the operations where banks are embedding the technology, Vijayakumar shared that while AI is being used across operations, what is proving to be a challenge is cost or token consumption.

> "WE HAVE AN OFFERING FOR OUR CLIENTS WHERE, BASED ON THE QUERY, IT WILL DECIDE WHAT MODEL TO CHOOSE DEPENDING ON THE COMPLEXITY OF THE QUERY TO OPTIMISE COST"
>
> Sajit Vijayakumar
> Chief Executive Officer, Infosys Finacle

"If you give an agent a broad set of instructions, it can still guide you, but it will cost a lot of money. If you automate a single transaction through AI without doing it in a very diligent manner, you could probably incur as high as $3-5 per transaction," he said.

To address this challenge, Infosys Finacle is adopting a multi-model approach. "When we use AI, we use a hierarchy of models. If we do not need world wisdom, we put it in a small language model. The AI journey is an agent, which will rely on multiple language models to deliver what is right for you," Vijayakumar said.

The firm also uses locally deployed open-source language models to ensure that sensitive banking data does not have to be transferred to the cloud.

"We have an offering for our clients where, based on the query, it will decide what model to choose from the back end, based on the complexity of the query to optimise cost," he said.

Infosys Finacle currently has a repository of around 200 AI skills that can function as agents within its banking software framework. These cover various banking functions, with the company aiming to make every function accessible through AI. Vijayakumar said he would prefer fewer agents, but the functions have been divided into smaller skills to improve precision and reduce token consumption.

Beyond operational efficiency, banks are also exploring AI to improve customer engagement and generate more value from existing transactions. According to Vijayakumar, payments are one area where banks can use AI to generate insights into customer behaviour and offer more relevant financial products.

While banks may not make money directly from certain payment transactions, these interactions generate valuable customer data. AI agents can analyse this information to understand what customers are likely to purchase and enable banks to make more personalised offers. He said some firms in the US collect as many as 800 characteristics of an individual and continuously monitor them to understand customer preferences.

Vigilance, not pause, answer to AI risks: IBM India & South Asia MD

PRESS TRUST OF INDIA
Mumbai, 13 October

No form of technology should be "artificially paused" and the need is to stay vigilant and think ahead on how to work with AI, so that innovation isn't stifled while the right governance and usage are built around it, IBM India and South Asia Managing Director Sandip Patel said on Tuesday.

In an interview to *PTI*, Patel said IBM India has always been a critical part of global operations, not only because the company continues to participate in the growth market here, but also because it is a "hotbed of innovation".

Innovations from India can be scaled up and applied anywhere in the world, he said, pointing to Indian innovations such as Unified Payments Interface (UPI). Citing a specific IBM innovation, Patel said the company was "very privileged" to be a part of the creation of YONO, the digital platform run by State Bank of India (SBI). He called it a fairly unique proposition that has emerged from India and can be applied around the world.

IBM India and South Asia MD Sandip Patel said innovations from India can be scaled up and applied anywhere in the world

As AI scales up, IBM expects to keep participating in the growth story with India as a strong base, Patel emphasised.

On the global chatter around harms of AI and fear of catastrophic outcomes for humanity, Patel said AI should be seen as "augmented" and not artificial intelligence. "I don't think any form of technology needs to be artificially paused. I think we just have to be vigilant and think ahead to see how do we work with it so that innovation isn't stifled but we are building the right kind of governance and usage around it, and that is what all of us have a challenge to do," Patel said.

Nandan Nilekani-backed Fundamentum raises ₹3K cr for AI, deeptech

PEERZADA ABRAR
Bengaluru, 13 October

Fundamentum Frontier Advisors (F2A), the investment-management platform, said that it has secured aggregate subscriptions of ₹3,000 crore for its growth-stage artificial intelligence (AI) and DeepTech strategy.

The capital has been raised from both Indian and overseas investors across two regulated vehicles. Nandan Nilekani, the architect of Aadhaar and co-founder of Infosys, has joined the fund as the anchor investor and mentor.

"We are seeing strong investor conviction in AI and deeptech companies being built out of India, and ₹3,000 crore in subscriptions reflects that," said Ashish Kumar, general partner, F2A. "We plan to deploy the corpus across 12-15 investments over the next two to three years, with cheque sizes of ₹100–200 crore. Our focus will remain on businesses with a clear technological edge, where AI and deeptech are building scale and defensibility."

"More Indian companies are now building deeptech products for global markets, with India as their engineering and commercial base," said Debraj Banerjee, general partner, F2A. "Having worked with such companies from their early years, I have seen how much the right capital matters once the technology is validated and customers start to scale. We believe that is the stage at which F2A can help them become category leaders."

Vivek Singla, general partner, F2A, said equity capital is only one part of what a growth-stage technology company needs. At this stage, he said founders are building for scale, yet are sometime away from a credible path to the public markets, and they look for investors who can bridge that journey with them. "We see that journey taking a few years for the companies we back, and we intend to stay invested through it. We will work alongside founders to open doors to customers, strategic partners and talent," said Singla.

Indigenous multi-purpose vessel *Samarthak*, the first of four such vessels being inducted into the navy, ahead of its commissioning on Friday at Naval Base Karwar PHOTO: PTI

Navy to commission indigenous warship *Samarthak* on Oct 16

Indigenous multi-purpose warship *Samarthak*, endowed with weapons and electronic systems specifically optimised for operations in challenging maritime environment, is set to be commissioned into the Indian Navy on October 16, officials said on Tuesday. The commissioning will mark another milestone in India's drive towards defence self-reliance and the vessel will form an "important component of the Navy's future and ideal 'utility' ship for strategically important operations", the defence ministry said. *Samarthak* will be commissioned at Karwar naval base in Karnataka. Built by Larsen and Toubro under the government's Make in India initiative, the warship is the first of four multi-purpose vessels being inducted into the Indian Navy. PTI

Former DFS secy appointed IL&FS CMD

Former financial services secretary Nagaraju Maddirala (*pictured*) has been designated as the Chairman and Managing Director (CMD) of IL&FS for two years, according to an official order. Maddirala retired as the financial services secretary in May this year. The tenure of Nand Kishore as the IL&FS Chairman and Managing Director ended on September 30. An order dated October 12, issued by the Corporate Affairs Ministry, said Maddirala has been designated as IL&FS Chairman and Managing Director. He was appointed as a director on the firm's board by the Mumbai bench of the NCLT on October 1. PTI

SC junks MMTC petition against NSEL settlement

The Supreme Court (SC) on Tuesday rejected MMTC Limited's challenge to a ₹1,950 crore settlement scheme for resolving claims arising from the 2013 payment default at National Spot Exchange Limited (NSEL), leaving the arrangement approved by the insolvency tribunals intact. A Bench of Justices P S Narasimha and Alok Aradhe dismissed the public sector undertaking's appeal against a March 30 order of the National Company Law Appellate Tribunal (NCLAT), which had upheld the scheme sanctioned by the National Company Law Tribunal (NCLT), Mumbai, on November 28, 2025. MMTC had argued that the arrangement was against public interest and public policy. However, the NCLAT, in its March 30 judgment, noted that the proposal had secured the support of more than 90 per cent of creditors. OUR BUREAU

Rail freight grew 6.1%, revenue increased 9.3% in September

Indian Railways recorded a growth of 6.14 per cent in its freight loading on a year-on-year (Y-o-Y) basis in September, ferrying 135.5 million tonnes (mt) of goods. Coal, which has been at the center of a debate over shortages at power plants, is predominantly carried by railways. The national transporter's revenue growth from commodities accounting for the bulk of its freight volumes grew almost double-digit in percentage terms in September to ₹1,266 crore Y-o-Y, a 9.3 per cent growth. The railway ministry said that coal loading grew by 9 per cent in September against the same period last year. "Indian Railways stepped up domestic coal supply to powerhouses in the month. The average number of coal rakes supplied per day rose to 443 rakes against 397 rakes per day Y-o-Y, registering an 11.6 per cent rise," the ministry said on Tuesday. Several major commodity segments recorded strong growth during the month. "Food Grain loading grew by 25 per cent, Clinker by 20 per cent, Domestic Container by 10 per cent, Coal by 9 per cent, Balance Other Goods by 8.2 per cent, Mineral Oil by 6 per cent, Finished Steel by 5.5 per cent and Iron Ore by 5.2 per cent," it added. The Railways intends to raise its freight volumes to 3,000 mt by 2031. It expects to end FY27 at 1,750 mt. OUR BUREAU

Diwali bonanza: UPI MDR put off for now

AJINKYA KAWALE
Mumbai, 13 October

The National Payments Corporation of India (NPCI) has deferred the levy of merchant discount rate (MDR) on select Unified Payments Interface (UPI) transactions until after Diwali, just two days before it was due to take effect, and said the new date would be notified separately.

The deferment offers merchants a breather during the ongoing festival season. The levy was originally scheduled to take effect on October 15.

"UPI and Services Steering Committee today decided that, keeping in mind the festive season, Merchant Discount Rate (MDR) on select Person-to-Merchant (P2M) UPI transactions, shall be implemented immediately post Diwali at a date to be notified separately," NPCI said in a statement.

There will be no change in the MDR structure, a source confirmed.

An MDR is a fee paid by a merchant to the bank and payment company processing a digital transaction.

THE DEFERMENT OFFERS MERCHANTS A BREATHER DURING THE ONGOING FESTIVAL SEASON. THE LEVY WAS ORIGINALLY SCHEDULED TO TAKE EFFECT ON OCT 15

The MDR will apply to UPI transactions made to merchants above ₹2,000. The MDR is set at 0.40 per cent and capped at ₹300. Some categories of merchant transactions, including bill payments, fuel and education, among others, will attract a flat fee of ₹5.

In the run-up to the October 15 deadline, there had been discussions about pushing the implementation date to January 1. NPCI's clarification, however, indicates that the levy will now come into effect shortly after Diwali. Retail traders' associations had called for a "No UPI Day" on October 2 to protest the proposed fee, but withdrew the protest after meeting Union Finance Minister Nirmala Sitharaman last month.

UPI recorded a record average of 802 million transactions a day in September, with an average daily transaction value of ₹97,913 crore.

Transaction volume rose 22.6 per cent from a year earlier to 24.07 billion in September, up from 19.63 billion a year earlier. The total value of transactions increased 18 per cent to ₹29.37 trillion from ₹24.89 trillion.

On a month-on-month basis, transaction volume fell 1.8 per cent from 24.51 billion in August, partly because September had 30 days compared with 31 in August. Transaction value fell 1.5 per cent to ₹29.37 trillion from ₹29.82 trillion.

IMF raises India's FY27 GDP growth view to 7% from 6.4%

Cites resilient demand, but warns of risks from war and AI investments

ASIT RANJAN MISHRA
New Delhi, 13 October

The International Monetary Fund (IMF) on Tuesday raised its FY27 growth forecast for India to 7 per cent from 6.4 per cent estimated in July, citing stronger-than-expected momentum in domestic demand and services activity.

"India remains among the fastest-growing major economies, with growth in 2026 projected at 7.0 per cent. This reflects stronger-than-expected momentum, supported by resilient domestic demand and robust services activity," it said in its latest World Economic Outlook.

The revision in growth forecasts by economic forecasters comes following unexpectedly strong growth of 7.8 per cent in the June quarter of 2026-27 (Q1FY27). Recently, the Reserve Bank of India (7.1 per cent), World Bank (7.1 per cent) and Asian Development Bank (7 per cent) also raised their growth forecasts for FY27. The IMF also raised its India forecast for FY28 to 7 per cent from 6.7 per cent estimated earlier.

"India stands out with upward revisions, reflecting sustained momentum and growing evidence of stronger growth potential supported by favorable demographic dynamics, a large and expanding domestic market, and continued structural reforms," it added.

While raising its forecast for 2026 by 10 basis points to 3.1 per cent, the multilateral lending organisation said two major transformative forces — geopolitics and technology — are reshaping the global economy, with their short-term impact gradually coming into view and their longer-term impact still largely unknown.

"Headwinds from a prolonged war and persistent geopolitical tensions could revive inflationary pressures, strain fiscal and external positions, and hit energy-importing and low-income countries hardest. At the same time, the current technology tailwind could stop abruptly if expectations about AI-related profits and productivity gains are reassessed, weakening investment and tightening financial conditions," it said.

The IMF advised policymakers to follow a two-pronged approach. "Contain the immediate risks from inflation, debt, and financial fragility while putting in place the infrastructure, skills, and competitive environment needed for technological transformation to translate into broader and more balanced growth, with the gains distributed more evenly across and within countries," it added.

It cautioned that a more protracted war that kept crude oil prices above $130 through the first quarter of 2027 would cut global growth in 2027 by half a percentage point.

In another downside scenario, the IMF said a steep drop in AI investment could lead to a sharp fall in asset prices, ultimately cutting global GDP by 1.1 per cent by 2028.

"We now have an economy that is standing on one leg, the AI leg," IMF Managing Director Kristalina Georgieva told a Bretton Woods Committee event. "What if it wobbles? What if there is disappointment and that leads to potentially a more difficult environment?"

The IMF emphasised similar risks in its separate Global Financial Stability Report, warning that policymakers needed to avoid "complacency" in guarding against a potential pullback in AI investment and stock valuations.

An ensuing AI market correction would feed back through the real economy, dragging down broader asset prices and overall demand through a reduction in the wealth effect, said Athanasios Vamvakidis, deputy director of the IMF's Monetary and Capital Markets Department.

It would also lead to reduced trade, IMF chief economist Silvana Tenreyro said. Trade in AI goods grew 29 per cent between 2023 and 2025, more than triple the 8.3 per cent growth rate of global trade over the same period. Without AI trade, overall growth in trade would have been only 4.6 per cent, she said.

However, the IMF maintained that the potential upside should not be dismissed. "The constellation of accommodative financial conditions, robust private sector adjustment, and AI-related investment could carry activity through the war shock and begin to lift productivity," it added.

Regulator floats 5% limit for H_2 blending in piped gas

SHUBHANGI MATHUR
New Delhi, 13 October

The Petroleum and Natural Gas Regulatory Board (PNGRB) has issued draft guidelines for blending hydrogen (H_2) in domestic piped natural gas up to a maximum of 5 per cent. The downstream petroleum regulator said hydrogen-blended natural gas (HNG) should not relax existing city gas distribution (CGD) obligations related to safety, integrity, gas quality, metering, billing, quality of service, emergency response or complaint handling.

PNGRB may reduce the set point, impose controls, suspend HNG or require a return to natural gas where evidence, incidents, complaints, billing errors or uncertainty undermine safety protocols.

"No commercial supply under these Guidelines shall exceed 5.0 percent," the regulator said. Consumers, local authorities and emergency services should receive advance information on concentration, billing, appliance or emergency guidance and rollout, it added.

The guidelines would apply from the hydrogen receipt and interface point, through the blending facility, to the downstream commercial deployment area and domestic installations. Hydrogen production, transportation, compression and storage upstream of the interface point, including upstream mobile cascade systems, remain outside the scope of these guidelines and would independently have to comply with applicable laws and approvals from competent authorities.

PNGRB has exempted hydrogen blending in compressed natural gas, automotive use, transmission pipelines, pure hydrogen supply, refuelling, deblending and non-domestic PNG. The guidelines have also set rules for gas quality, concentration, homogeneity, interchangeability and odorisation, emergency isolation, suspension and natural gas restoration.

India grows with the world, not at anyone's cost: PM

ARCHIS MOHAN
New Delhi, 13 October

Prime Minister Narendra Modi on Tuesday spoke of India's pursuit of the principle of "power to empower" and its commitment to the democratisation of technology. Referring to the country's strong economic growth, the PM said that in a world filled with uncertainty, India offers assurance, reliability and stability, and that reforms for his government were "not a compulsion", but its "conviction".

Addressing the Bloomberg New Economy Forum in the national capital, the PM flagged the weaponisation of resources and trade routes, calling for greater trust and cooperation among countries facing disruptions. He said India does not grow at anyone's cost. "We grow with the world, and for the world."

The PM said India's expanding economic and technological capabilities could help address global challenges amid geopolitical tensions, supply-chain disruptions and growing competition over strategic resources.

His comments come at a time when India and much of the Global South are facing challenges to their food and energy security, the threat of sanctions and supply-chain disruptions, including those involving critical minerals. India has raised these issues at international platforms, including with the United States and China.

In his speech, the PM spoke of India as the "mother of democracy". He said India has over a hundred languages, nearly 80,000 registered newspapers and publications, over a thousand satellite TV channels, in excess of 500 million YouTube users and over 500 million Instagram users.

"In our country, people openly debate different issues, and citizens discuss diverse viewpoints. In the present era, one factor that has played a major role in enabling this is digital power," he said. The comments come amid sustained protests across the country since July.

Modi detailed how his government, in the past 12 years, had placed great emphasis on making mobile data affordable, which has helped students, young people and small shopkeepers in smaller towns and villages, and termed it "power to empower".

On India's belief in inclusive technology, the PM said that today, technology is power. Data is power. Knowledge is power. Innovation is power. "But the real question is not who possesses power. Rather, the question is how that power is being used."

The PM referred to India's digital payments ecosystem and its sharing of its digital public infrastructure experience with the countries of the Global South as evidence of its belief in "power to empower".

The PM spoke of the 7.8 per cent economic growth recorded in Q1FY27, forex reserves exceeding $700 billion and reforms spanning taxation, insolvency and labour laws as evidence of India's resilience. "In a world filled with uncertainty, India offers the assurance of reliability and stability," he said. "India's reform express continues to move ahead at high speed. For us, reforms are not a compulsion. Reforms are our conviction."

On the current geopolitical situation, Modi said supply chains, energy, minerals, payment systems and technology are becoming instruments of pressure and dominance.

Tamil Nadu overtakes Telangana on inflation

HIMANSHI BHARDWAJ

Tamil Nadu overtook Telangana to record the country's highest retail inflation in September at 6.81 per cent, ending Telangana's run at the top of the state rankings in every month of 2026 so far, data from the National Statistics Office (NSO) showed. Tamil Nadu's combined rural and urban inflation rose from 5.91 per cent in August, while Telangana's climbed to 6.64 per cent from 6.27 per cent, its highest level this year.

Odisha and Madhya Pradesh moved ahead of Telangana to take the second and third spots, respectively. Tamil Nadu's inflation has more than doubled from 3.35 per cent in January, rising 90 basis points in September alone, compared with a 37-basis-point increase in Telangana.

Retail inflation accelerated in 27 of the 28 states in September. The all-India rate rose to 5.54 per cent from 4.83 per cent in August, with Assam the only state to record a fall.

Telangana also lost its lead in both the rural and urban inflation rankings. Tamil Nadu recorded the highest urban inflation, while Madhya Pradesh topped the rural table. Rural inflation exceeded urban inflation in 25 states. Nationally, it stood at 6.08 per cent, against 4.88 per cent in urban areas.

Food prices drove much of the increase. Tamil Nadu's food inflation surged to 10.62 per cent in September from 7.96 per cent in August, the highest among states. Andhra Pradesh was the only other state to record double-digit food inflation, at 10.18 per cent. National food inflation rose to 7.74 per cent from 5.97 per cent, with 10 states recording rates above 8 per cent.

The quality of our data influences the quality of our decisions, says P K Mishra

HIMANSHI BHARDWAJ
New Delhi, 13 October

India's statistical system must keep pace with the country's development ambitions to meet the goal of *Viksit Bharat* by 2047, P K Mishra, principal secretary to the Prime Minister said on Tuesday.

Mishra said India's statistical systems must evolve alongside an increasingly digital, formalised and interconnected economy. "Our statistical architecture must be as modern and ambitious as our national aspirations," he said.

"The quality of our data influences the quality of our decisions and development outcomes," Mishra said, emphasising the importance of credible statistics, data harmonisation and technology-enabled governance.

Speaking at the inaugural session of the Conference of State Planning, Finance and IT Secretaries, organised by the Ministry of Statistics and Programme Implementation (Mospi), Mishra noted that statistics are not merely an administrative requirement but a strategic national asset.

"What cannot be measured cannot be managed effectively. And what cannot be managed effectively cannot be transformed sustainably," he noted.

Calling India's development story "fundamentally a story of its states," he sought stronger institutional capacity and closer Centre-state coordination to improve the quality of official statistics. A robust statistical system, he noted, must enable governments to measure development progress across states and districts, assess policy outcomes, identify gaps and ensure that public resources deliver the intended results.

He said national averages alone would not suffice as India moves towards 2047, and granular data at state, district and local levels would be increasingly necessary.

Mishra said artificial intelligence (AI), machine learning, geospatial systems, satellite imagery and advanced analytics offer significant opportunities to improve official statistics, but cautioned that technology must remain guided by statistical quality, transparency, privacy, security and accountability. "Speed cannot come at the cost of accuracy. Greater use of data cannot come at the cost of confidentiality," he said.

He emphasised that AI and advanced analytics can strengthen official statistics but cannot substitute for statistical quality.

He called for a collective national effort involving Mospi, state statistical offices, finance, planning and IT departments, NITI Aayog, academic institutions and other stakeholders.

He said India needs a statistical architecture that is trusted, transparent, technology-enabled, interoperable and policy-relevant to help guide the country towards the Viksit Bharat goal.

"WHAT CANNOT BE MEASURED CANNOT BE MANAGED EFFECTIVELY. AND WHAT CANNOT BE MANAGED EFFECTIVELY CANNOT BE TRANSFORMED SUSTAINABLY"

P K Mishra, principal secretary to the PM

PHD CHAMBER OF COMMERCE AND INDUSTRY

ESTD. 1905

121ST ANNUAL SESSION

INDIA'S NEXT LEAP

नई सोच नई रफ़्तार

HELD ON

10 OCTOBER 2026

HOTEL LE MÉRIDIEN

NEW DELHI

A Landmark Gathering. A Vision for India's Future.

"As PHDCCI marks 121 years of contributing to India's economic and industrial development, the journey towards a US$ 10 trillion economy calls for turning adversity into opportunity through nimble thinking, timely decision-making and decisive action. Sustained investment, higher productivity, technological advancement and innovation will be essential to strengthening competitiveness and enabling Indian businesses to scale up."

- Shri Piyush Goyal
Hon'ble Union Minister of Commerce and Industry

"India's Next Leap – **नई सोच**, **नई रफ़्तार**" captures the vision for India's next phase of economic growth, driven by fresh thinking, renewed momentum and a forward-looking approach. As PHDCCI marks 121 years of contribution to the nation, its enduring legacy lies in evolving with changing times and continuing to support India's growth and development."

- Mr. Rajeev Juneja
President, PHDCCI

"India's technological progress will be defined by our ability to move beyond adopting technologies developed elsewhere to creating and manufacturing advanced technologies of our own. Early and active industry participation in government-supported initiatives is essential to accelerating this transition and building globally competitive, technology-driven industries."

- Dr. Jitendra Singh
Hon'ble Union Minister of State (Independent Charge) Ministry of Science & Technology and Ministry of Earth Sciences

"The completion of 121 years of PHDCCI reflects the Chamber's longstanding contribution to India's economic and industrial development. The next phase of India's growth must move beyond ease of doing business towards enabling enterprises to scale, innovate and generate employment. Aligning governance, infrastructure, skills, technology, investment facilitation and enterprise development will be critical to strengthening India's competitiveness as a destination for international business and advancing towards a more productive, innovative and globally integrated economy."

- Hon'ble Sardar Taranjit Singh Sandhu
Lieutenant Governor of the National Capital Territory of Delhi

Names of defaulting borrower(s), particulars of the pledged gold collateral, and the address of the concerned lending branch is displayed at the respective lending branch and at the above auction centre, and may also be obtained from IIFL Customer Care at 1860-267-3000 or www.iifl.com.

Right to Repay Before Auction: The borrower(s) / legal heir(s) may repay the entire outstanding dues, including up-to-date interest and applicable charges as disclosed in the loan agreement and Key Facts Statement (KFS), and close or regularise the loan account at any time up to the date of auction, whereupon the account shall stand withdrawn from the auction.

Proportionate publication charges shall be recoverable from accounts closed or regularised on or after the date of this publication.

Deceased Borrowers: Where a borrower is deceased, this notice and the auction terms shall apply to the legal heir(s) of the borrower.

Reserve Price: The auction shall be subject to a reserve price of not less than 90% (85%, for loan accounts where auctions fail twice) of the current value of the gold collateral, determined in accordance with the RBI Directions.

Basis of Sale: The auction shall be conducted on "AS IS WHERE IS", "AS IS WHAT IS" and "WHATEVER THERE IS" basis. Intending bidders are advised to inspect the gold collateral particulars displayed and satisfy themselves prior to bidding.

Postponement / Withdrawal: IIFL may postpone the auction or withdraw any loan account therefrom for reasons to be recorded, including repayment or regularisation of the account, orders of any court or authority, or operational exigencies.

Any change in the date or venue shall be displayed at the auction centre and the concerned lending branch.

Where the auction cannot be held or completed on the date stated herein, IIFL, at its discretion, with due notice may conduct or continue the auction on a subsequent date either in the same district or adjoining district or conduct an online auction.

No Conflict of Interest: IIFL and its related parties shall not participate in the auction, in compliance with the RBI Directions.

Auction Proceeds: Full details of the value fetched at auction and dues adjusted shall be provided to the borrower(s) / legal heir(s). Surplus, if any, shall be refunded within seven working days of receipt of the full auction proceeds (basis availability of the banking details of the borrower); borrowers are accordingly requested to update their latest bank account details with the concerned lending branch. Shortfall, if any, shall be recoverable in terms of the loan agreement.

For detailed information and terms and conditions, please contact the concerned lending branch of IIFL Finance Limited (address as displayed with the account list) or IIFL Customer Care at 1860-267-3000.

AKIKO GLOBAL SERVICES LIMITED

Akiko Global Services: Expanding Financial Distribution Through a Growing Consumer Fintech Ecosystem

About Akiko Global: Building India's Consumer Fintech Platform

Founded in 2018, Akiko Global Services Limited began as a financial distribution business and has since evolved into a technology-led financial services platform, expanding across credit cards, lending and digital financial services. The company operates through MoneyFair, which focuses on customer acquisition and matching customers with banks and financial institutions, while AkikoPay is being developed as a unified digital platform for payments, financial services and continuous customer engagement.

The Company operates as a technology-enabled financial distribution platform with digital and assisted acquisition channels, undertaking regulated financial product distribution activities as a Direct Selling Agent (DSA).

Credit Card Business

Scaled Credit Card Distribution Platform with Strong Digital Sourcing

Akiko Global has established a sizeable credit card distribution platform, supported by relationships with 40+ banking partners and technology-led customer acquisition.

The company currently sources approximately 17,000–18,000 credit cards every month and has cumulatively sourced 15 lakh+ cards. Its acquisition mix is increasingly digital, with approximately 70% of sourcing coming through the app and performance marketing, 20% through the website and 10% through offline DSA/tele-calling channels.

The company also has a diversified geographic sourcing profile. Approximately 70% of credit card sourcing comes from Tier-1 cities, while around 30% comes from Tier-2 and Tier-3 cities, reflecting the company's expanding reach into emerging markets.

Lending Business

Diversified Lending Distribution Business with Growing Disbursement Scale

Alongside credit cards, lending has become an important component of Akiko Global's financial distribution business. The company reports ₹450 crore+ in monthly loan disbursements, representing an annualised run-rate of over ₹5,000 crore, with cumulative disbursements of around ₹3,000 crore to date. The company reports a 3–4% blended yield on disbursals.

Its lending portfolio is diversified across personal loans (~75%), mortgage/home loans (~15%) and business loans (~10%). Loans are sourced through both digital (~40%) and DSA/offline (~60%) channels.

Pan-India Distribution Network and Financial Institution Partnerships

Akiko Global has developed a pan-India distribution network supported by a combination of digital and physical channels, with company-owned branch presence across Delhi (Head Office), Noida, Mumbai, Pune, Ahmedabad, Surat, Jaipur, Hyderabad, Bangalore, Patna, Lucknow, Chandigarh, Haryana and Punjab.

Its financial institution relationships span multiple leading banks and NBFCs, supported by a credit bureau partnership with Experian. These relationships allow the company to distribute multiple financial products across lending and credit categories.

Why AkikoPay

From Customer Acquisition to Long-Term Customer Engagement

Akiko Global has built its business by helping customers access credit cards, loans and other financial products through its banking and NBFC relationships. In a traditional distribution model, the relationship is often centred on a single transaction: a customer is acquired, a product is sourced and distribution revenue is earned. The customer may then continue to use other financial and lifestyle services outside that relationship.

AkikoPay is intended to extend that journey. By bringing everyday payments, wallet services, prepaid cards, credit information, travel bookings, gift cards and financial products together, the platform gives customers more reasons to return after their initial credit card or loan application.

For Akiko Global, this creates an opportunity to stay connected with existing customers, understand their evolving needs and offer relevant services over time. The aim is to complement the established distribution business with deeper engagement, more cross-selling opportunities and additional transaction-linked revenue streams where applicable.

MoneyFair continues to support customer acquisition and financial-product matching, while AkikoPay is being developed as the ongoing customer engagement layer. Together, they support a shift from individual product transactions towards longer-term customer relationships.

Traditional Distribution vs Connected AkikoPay Ecosystem

TRADITIONAL DISTRIBUTION

Acquire customer → Source card or loan → Earn distribution income → Limited ongoing interaction

CONNECTED AKIKOPAY ECOSYSTEM

Acquire customer through existing channels → Introduce AkikoPay services → Encourage repeat use and engagement → Cross-sell and transaction-linked opportunities

"One customer relationship, multiple opportunities over time."

This is an illustrative operating model, not a financial forecast.

AkikoPay Traction (Q1 FY27)

- Upgraded Android version launched during Q1 FY27; iOS rollout underway.
- 30,000+ Android downloads, with approximately 9,000 monthly active users and 1,000 daily active users.
- 3–4 transactions per user, with approximately 30% repeat users.
- Approximately 40% lower customer acquisition cost compared with traditional channels.

Multiple Services, Multiple Revenue Opportunities

AkikoPay can support potential income through applicable wallet and payment-related service fees, bank and NBFC distribution commissions, travel and gift-card partner commissions, and relevant cross-selling opportunities. Actual monetisation will depend on customer adoption, partner arrangements, applicable regulations and transaction economics. Credit information services can also support engagement and discovery of relevant financial products.

Industry Outlook: Financial Services Distribution & Digital Lending

India's credit ecosystem is undergoing rapid transformation, driven by rising digital adoption, increasing consumer spending and wider access to formal credit. The credit card base reached 122.9 million in July 2026, while FinTech NBFCs sanctioned around 10.9 crore personal loans worth ₹1.07 lakh crore in FY25. For players with strong customer acquisition capabilities and digital platforms, the opportunity extends beyond lending to cross-selling, customer engagement and building a broader financial-services ecosystem.

Robust Business Performance with Continued Growth Momentum

Akiko Global Services delivered strong financial growth in FY26, with consolidated revenue from operations increasing 126.4% to ₹172.73 crore from ₹76.30 crore in FY25, while profit after tax (PAT) rose to ₹17.42 crore from ₹7.91 crore. EPS increased to ₹14.23 from ₹7.56.

For Q1 FY27, Akiko Global reported revenue of ₹68.12 crore (up 130.6% YoY), EBITDA of ₹10.10 crore and PAT of ₹7.02 crore, according to its investor presentation. EBITDA margin stood at approximately 14.8%, while PAT margin was approximately 10.3%.

₹25.07 Cr	₹22.46 Cr	₹17.42 Cr
EBITDA	**PBT**	**PAT**
(+117.4% YoY)	(+116.6% YoY)	(+120.3% YoY)

Growth Priorities

- **Scale Cards and Lending:** Continue expanding credit card and loan distribution across the company's banking and NBFC network.
- **Deepen Digital Acquisition:** Strengthen digital customer acquisition to improve scalability and acquisition efficiency.
- **Grow AkikoPay Adoption and Engagement**: Increase usage, repeat engagement and cross-selling across the existing customer base.
- I**nvest in Technology:** Strengthen ERP, TeleCRM and mobile applications to support operational scalability.
- **Maintain Disciplined Profitability:** Focus on sustainable and profitable growth while expanding the consumer fintech ecosystem.

Management Commentary

Mr. Ankur Gaba
(Founder & Promoter)
Akiko Global Services Limited

"Q1 FY27 marked another strong quarter for Akiko Global Services, with robust revenue growth and healthy profitability supported by sustained momentum across its credit card and lending businesses. Monthly loan disbursements crossed ₹450 crore, while credit card sourcing reached 17,000–18,000 cards per month, driven by expanding distribution capabilities, technology-led customer acquisition and strong banking and NBFC partnerships.

The quarter also saw the successful launch of the upgraded AkikoPay Android platform, offering an integrated suite of financial services including wallet, prepaid cards, credit score, travel, gift cards and other financial products.

Our core credit card and lending businesses remain central to our growth. With AkikoPay, we are looking beyond the initial product transaction and working towards a longer relationship with each customer. The focus is on useful everyday services, repeat engagement and sustainable monetisation as adoption scales.

Management continues to focus on technology, digital capabilities and customer experience, while maintaining disciplined and profitable growth, and remains confident of achieving its FY27 revenue guidance of ₹300–325 crore."

Bagchi turns the page on 34 yrs at ICICI

SUBRATA PANDA
Mumbai, 13 October

Anup Bagchi's 34-year association with the ICICI group ended on Tuesday, his last day as managing director (MD) and chief executive officer (CEO) of ICICI Life Insurance, as he prepares to take the helm at HDFC Bank later this month.

Bagchi, who has led the insurer since June 2023, attended its 2026-27 (FY27) second-quarter (July-September/Q2) earnings call on Tuesday to introduce his successor, Siddhartha Mishra, before moving on to his next assignment.

Bagchi, who resigned as MD and CEO of ICICI Life Insurance on October 1, said in his opening remarks that the board had appointed Mishra as MD and CEO for a five-year term beginning October 14, subject to requisite approvals. Mishra took over as chief operating officer on October 6.

"As my tenure as MD and CEO comes to an end (on Tuesday), I want to sincerely thank each one of you for the trust and support you have extended to me, not just at ICICI Bank, but also over more than three decades with ICICI group," Bagchi said. He also wished Mishra success, expressing confidence that his successor would lead the company to continued growth.

Bagchi succeeded N S Kannan, another ICICI group veteran who led the insurer from June 2018 to June 2023. He will now move to the corner office at HDFC Bank.

Although he officially takes over from the current MD and CEO Sashidhar Jagdishan on October 27, Bagchi has been an additional director on the bank's board since October 2. Just as Bagchi introduced Mishra on the insurer's earnings call, Jagdishan is also expected to introduce Bagchi to the investor community during HDFC Bank's Q2FY27 earnings call on Saturday.

An alumnus of the Indian Institute of Management Bangalore and the Indian Institute of Technology Kanpur, Bagchi has more than three decades of experience across banking, capital markets, wealth management, and insurance. He has held several senior leadership positions, including MD and CEO of ICICI Securities and executive director of ICICI Bank. He will be the first outsider to occupy the corner office at HDFC Bank.

Bagchi served as executive director of ICICI Bank from 2017 to 2023, overseeing retail, business, and rural banking before moving to wholesale banking. During his tenure, the bank's retail mortgage portfolio crossed ₹2 trillion, making it the first private-sector lender in India to achieve the milestone.

He was earlier MD and CEO of ICICI Securities and served as chairman of ICICI Prudential Asset Management Company until May 2023. He was also a director of ICICI Pension Fund Management and ICICI Home Finance.

Bagchi's appointment as MD and CEO of HDFC Bank has brought clarity to the lender's leadership succession. The focus will now shift to execution, with deposit mobilisation, loan growth, and margin recovery emerging as priority areas, according to analysts.

Brokerages have said the appointment provides an opportunity for a strategic reset. However, continuity in senior management and clarity on the bank's medium-term growth strategy will be critical to sustaining investor confidence and supporting a rerating of the stock.

ICICI Life Insurance net rises 25% on higher premium income

AATHIRA VARIER
Mumbai, 13 October

ICICI Life Insurance, the third-largest private life insurer, recorded 25.05 per cent year-on-year (Y-o-Y) growth in net profit to ₹374.22 crore in the quarter ended September of the financial year 2027 (Q2FY27), supported by healthy growth in premium income.

The profit stood at ₹299.26 crore in Q2 FY26.

The insurer's net premium income grew 16.56 per cent Y-o-Y to ₹13,804 crore in the quarter from ₹11843.1 crore in the year-ago period. The annual premium equivalent (APE) rose 15.56 per cent Y-o-Y to ₹2799 crore. APE in the insurance industry is the sum of annual first-year regular premiums and 10 per cent of weighted single premiums and single premium top-ups.

Value of new business (VNB) grew 20.3 per cent Y-o-Y to ₹712 crore from ₹592 crore. The VNB margin stood at 25.44 per cent against 24.44 per cent in Q2FY26.

The expenses of the insurer increased 23.3 per cent Y-o-Y to ₹2,654.17 crore, with almost 14.3 per cent Y-o-Y growth in net commissions to ₹1,376 crore. The expense of management (EoM) ratio stood at 18.6 per cent, compared to 17.5 per cent in Q2FY26.

The solvency ratio stood at 229.9 per cent as opposed to 213.2 per cent.

The 13th month persistency ratio on a premium basis was 83 per cent as of September 30, against 79.9 per cent in the same period last year. The 61st month persistency was at 62.3 per cent as compared to 59.5 per cent.

In its post-result press release, the insurer said: "The company continues to focus on protection and annuity segments representing the under-served needs of Indians."

Nobel@125

Women account for only 7% of laureates, rarely win in science

Mother Teresa is the only woman from India to win a Nobel

SNEHA SASIKUMAR

The first Nobel prizes were awarded 125 years ago, in 1901. Since then, the prizes have been awarded annually with a few exceptions, including during World War I and II. Women make up half the global population, but have won just 70 of the total 1,034 awards (7 per cent). This year, Canadian author Anne Carson and South African jurist of Tamil origin Navi Pillay joined the list, winning in Literature and Peace, respectively. These are the categories where women have done relatively well, accounting for 15 per cent of the awards in each since the prizes began. But their share is much smaller in the sciences: 2 per cent in Physics, 3 per cent in Economic Sciences, and 4 per cent in Chemistry. Most of these awards are recent: Women won just 30 in the first 100 years, while the other 40 (57 per cent of the total) have come since 2001.

Nearly 60% of women honoured in past 25 years

Women Nobel Prize winners since 2021

2021	Maria Ressa (Peace)	2023	Claudia Goldin (Economic Sciences)

Average car loan size jumps 49% in 7 years as buyers shift to SUVs

AATHIRA VARIER
Mumbai, 13 October

The average passenger-vehicle loan size in India rose 49 per cent to ₹8.2 lakh between the first half of 2019 (H1 of 2019) and H1 of 2026, as buyers shifted towards higher-value vehicles, particularly sports utility vehicles (SUVs), and vehicle prices increased, according to a report by TransUnion CIBIL.

The average repayment tenures increased by five months to 62 months over the period, indicating that borrowers were spreading repayments over longer periods to manage higher loan amounts.

"Car ownership is increasingly being shaped by a combination of aspiration and affordability. Consumers are choosing higher-value and feature-rich vehicles, while larger loan amounts and longer tenures are helping make these purchases more manageable," said Bhavesh Jain, managing director (MD) & chief executive officer (CEO), TransUnion CIBIL.

The rise in loan sizes reflects both higher vehicle prices and a shift from entry-level cars to SUVs, said Rahul Kotabage, director and head of research and consulting at TransUnion CIBIL.

The trend is extending beyond metropolitan markets. Borrowers from semi-urban and rural areas accounted for 51 per cent of those financing upgrades to higher-value cars in H1 of 2026, up six percentage points from 2019.

Rural-origin borrowers moving from two-wheelers to cars grew at a compound annual growth rate (CAGR) of 15 per cent from 2019, compared with 8 per cent for overall passenger-vehicle loan originations.

The active passenger-vehicle borrower base reached 25 million in June 2026, around 1.7 times the level seen in June 2019.

Meanwhile, delinquency in loans 90-179 days past due declined by 95 basis points to 0.5 per cent.

Used cars accounted for 24 per cent of passenger vehicle loan originations in H1 of 2026.

Of the ₹11 trillion in outstanding passenger vehicle loans, ₹2 to 2.5 trillion was attributable to used-car financing, according to figures shared during the briefing.

TransUnion CIBIL executives said they were not seeing incremental stress in the 30-plus-day and 60-plus-day delinquency categories. Delinquency trends for newer passenger vehicle and two-wheeler loan vintages had also improved sequentially.

Non-banking financial companies (NBFCs) continued to gain ground in vehicle financing. Their share of live two-wheeler loans rose to 73 per cent in June 2026 from 63 per cent in 2019. In passenger vehicle financing, NBFCs accounted for 37 per cent of live loans, up four percentage points. Public sector banks had a 30 per cent share, while private sector banks accounted for 26 per cent.

Portfolio quality in two-wheeler financing also improved, with delinquency declining to 1.4 per cent in June 2026 from 2.7 per cent in June 2019. The borrower base is also becoming more credit-experienced. First-time borrowers accounted for 39 per cent of two-wheeler loan originations in H1 of 2026, down 19 percentage points from 2019, while borrowers with more than two years of credit history accounted for 43 per cent, up 16 percentage points.

Shipping ministry unveils 2 credit risk insurance products

The Shipping Ministry on Tuesday announced two specialised credit risk insurance products to support India's shipbuilding industry under the National Shipbuilding Mission.

The Shipbuilding Project Credit Risk Insurance Policy, developed by ECGC Ltd, will cover export projects, while the Business Credit Shield Policy Shipbuilders (BCSPS), developed by The New India Assurance Co Ltd, will protect domestic projects, Union Minister for Ports, Shipping and Waterways Sarbananda Sonowal announced at the concluding day of the 21st Maritime State Development Council (MSDC) held here.

The central government will subsidise insurance premiums and provide direct support to insurers in case shipyards file claims, the minister said.

Developed under the Shipbuilding Development Scheme (SbDS), these first-of-their-kind insurance policies aim to reduce financial stress in large-scale ship manufacturing. " With these new insurance policies, we are stepping in to give them a real safety net. We want our shipyards to focus on what they do best, building world-class vessels, without the fear of delayed payments or sudden global market shifts holding them back," said Sonowal. PTI

No price stability without financial stability: RBI guv

SUBRATA PANDA
Mumbai, 13 October

The Reserve Bank of India (RBI) does not normally use monetary policy to address financial stability risks, but the two cannot be separated completely, Governor Sanjay Malhotra said in an interview with *Moneycontrol*, amid pressure on the rupee over the past few weeks. "The mandate of price stability cannot be achieved without financial stability, as a stable financial system is essential for the effective transmission of monetary policy," Malhotra said.

Responding to a question on whether the monetary policy committee (MPC) would hike rates to defend the currency, he said the RBI generally follows a separation principle under which monetary policy is used to achieve price stability, while targeted regulatory, supervisory, and macroprudential tools address financial stability risks. "However, they cannot be separated completely," he said, adding that monetary policy can affect financial stability.

On the rupee, Malhotra said the RBI was determined to take all necessary steps to ensure orderly movement in the foreign exchange (forex) market and curb excessive speculation. "The RBI is determined to do whatever is necessary to ensure orderly movement in the forex market," he said.

"The purpose of these measures is primarily to ensure an orderly movement in the forex market. The measures taken — for example, disallowing the rebooking of cancelled forex derivatives contracts — will also check undue speculative bets. We have brought in a forex reserve requirement because we observed excessive speculative positioning on the buy side," he said.

The RBI has announced a raft of measures to ease pressure on the rupee, including a dedicated dollar window for state-run oil-marketing companies and tighter rules on forex derivatives. These steps aim to reduce spot-market dollar demand and discourage speculative positions.

While the measures announced on Saturday aimed to reduce immediate dollar demand in the spot market and restrict derivatives positions, the RBI's latest circular introduced further curbs. In a late-evening notification on Monday, the RBI restricted non-deliverable derivatives contracts involving the rupee offered to non-residents to hedging purposes only.

₹ should be allowed to find its own level, says Uday Kotak

SHUBHAM KUMAR
New Delhi, 13 October

Uday Kotak, founder and non-executive director of Kotak Mahindra Bank, on Tuesday said the rupee should be allowed to find its own footing. "My personal view is we should let the rupee find its own level. And over time, the true strength of the economy will play out," Kotak said in a panel discussion at Bloomberg New Economy Forum 2026.

After depreciating close to 7 per cent in the past one year, the rupee gained 1.5 per cent in the last two trading sessions after steps by the Reserve Bank of India, aimed at curbing speculative bets.

Kotak said a concentration in seven to 10 stocks globally is attracting the most portfolio flows, and that this might be reassessed by investors. Foreign portfolio investors have pulled ₹3.08 trillion out of Indian equities in just nine months of 2026 — nearly double the ₹1.66 trillion withdrawn in 2025.

Historically, Kotak said, India has tended to look to the West for investment. "But with the challenges, particularly from the US and overall a more transactional approach to investment, the time has come for India to keep all its options open."

Disclosure: Entities controlled by the Kotak family have a significant holding in *Business Standard* Pvt Ltd

₹ rallies to 1-month high on RBI curbs, but banks remain uneasy

"It also increases the effectiveness of the RBI's intervention, as we have seen over the past couple of days. Earlier whenever the RBI used to intervene, market used to wait for it to get over and then again position against the rupee," Goenka added.

The notification also requires authorised dealers to maintain a foreign exchange risk reserve (FERR) equivalent to 20 per cent of the notional amount of eligible rupee derivative contracts undertaken to hedge currency risks on their own assets and liabilities. The reserve requirement has raised questions among bankers over how it should be implemented, according to market participants.

Some lenders have responded by suspending quotes for client transactions involving dollar purchases, amid uncertainty over the operational requirements.

"The RBI issued a circular restricting NDF (non-deliverable forward) only for non-resident user that too only for the purpose of hedging. Also, banks that hedge their own assets and liabilities will also pay 20 per cent FERR for buying dollars," said Anil Kumar Bhansali, head of treasury and executive director at Finrex Treasury Advisors LLP.

"This caused a panic amongst a few bankers who stopped hedging for clients where they are required to buy dollars," he said, adding, "There were no further instructions from RBI regarding how FERR is to be operationalised."

The Foreign Exchange Dealers' Association of India (Fedai), the industry body representing authorised dealers, is seeking clarification from the RBI to ensure that banks apply the new requirements consistently. "We have sought some clarity on how to go about the new requirements because there has to be a uniform practice among all the market participants," said the treasury head at a state-owned bank.

The uncertainty was also reflected in sharp movements in forward premiums during Tuesday's session. The one-month premium rose to about 7 per cent before easing to 5.66 per cent, while the one-year premium climbed to 4 per cent before retreating to 3.65 per cent in the afternoon, after receiving interest from public sector banks.

RBI to continue efforts to contain ₹ volatility: FM

She declined to say whether the government was considering scrapping LTCG tax to attract foreign portfolio investment (FPI), citing the upcoming Union Budget. "We are very close to the Budget, and preparation for the Budget has started. It may not be the best time for me to say what I will or what I will not consider," she said.

Sitharaman acknowledged that India was facing capital outflows as investors increasingly channelled funds into artificial intelligence (AI) capabilities in the US. Foreign portfolio investors withdrew a record ₹3.08 trillion from Indian equities in the first nine months of 2026, nearly double the ₹1.66 trillion pulled out during the whole of 2025. In June, the government eased capital gains tax on foreign investments in government securities to help manage outflows.

Sitharaman said aligning the tax treatment of different asset classes remained a priority, arguing that differences in taxation should not purely drive investors towards one asset over another. "Two years ago, we had brought similarity in all the asset classes, and people thought I'm increasing the tax. I wasn't increasing the tax, I was bringing all of them to be at par... so that the investor is not speculating as to which one gives them greater leverage," she said. The RBI announced a series of measures over the weekend to curb volatility in the foreign exchange market. These included opening a special dollar window for three state-owned oil marketing companies, restricting the rebooking of cancelled foreign exchange derivative contracts and lowering the threshold for foreign exchange derivative transactions that can be undertaken without establishing an underlying exposure to $5 million from $100 million.

The rupee settled at 95.28 against the dollar on Tuesday; it was at 96.73 on Friday.

Sitharaman said policymakers remained focused on maintaining sound economic fundamentals through fiscal discipline and adequate foreign exchange reserves, attributing much of the rupee's depreciation to external factors. The currency has come under particular pressure since the West Asia conflict began in late February, weakening 4.5 per cent against the dollar.

Tejas Desai, partner and leader of financial services tax at EY India, said global factors, relative valuations and corporate earnings remained key drivers of foreign investor flows, but the combined burden of LTCG tax and STT also affected the appeal of Indian equities.

"India should undertake a holistic review of the tax burden on foreign portfolio investors, including the role of STT, to improve net returns and reduce friction costs," he said.

Naitik Doshi, director at Nangia Global, said listed equity gains in India attract LTCG tax of 12.5 per cent, in addition to STT, while competing financial hubs such as Singapore and Hong Kong do not levy capital gains tax on listed shares. "Any rationalisation, whether through LTCG relief, STT calibration or parity across asset classes, would improve post-tax returns, deepen domestic participation and make India more attractive to foreign investors," he added.

Resistance to continue, we will triumph: Rahul

Home minister says Oppn should be ready for a 'crushing defeat' in 2029

PRESS TRUST OF INDIA
New Delhi, 13 October

The Opposition INDIA bloc and civil society on Tuesday vowed to unitedly fight, what they called, "restoration of the democratic process in the country", with Rahul Gandhi asserting that the political and people's resistance would continue and will triumph.

Addressing reporters after deliberations with INDIA bloc and civil society members at his residence, the leader of the Opposition (LoP) in the Lok Sabha said this is the Opposition's commitment that the people who have indulged in "*vote chori*" would be brought to justice, naming Prime Minister Narendra Modi, Home Minister Amit Shah and Chief Election Commissioner (CEC) Gyanesh Kumar.

Gandhi had hosted Opposition leaders of the grouping together with civil society members and students leaders at his residence for tea.

The LoP also said that they had extreme respect for the Supreme Court and the Chief Justice of India (CJI) and hoped they would play their role in this process. "No matter what happens, no matter which institution plays a role or not, political resistance will continue, people's resistance will continue and it will triumph," Gandhi said. He said that it is not simple that some "destroy" India's Constitution and get away with it, and assured people of action against those who have indulged in "vote chori". "It is our commitment that the people who have done this —Mr Modi, who is the main architect, Amit Shah, who is implementor, Gyanesh Kumar and others — they need to understand that the net is closing around them...

LoP Rahul Gandhi, Congress President Mallikarjun Kharge, and other leaders of the INDIA bloc address a joint presser in New Delhi on Tuesday PHOTO: PTI

We assure you that all would be brought to justice," he asserted.

Gandhi also thanked people for participating in the massive protests on the streets, after they participated in the protest march to the Supreme Court.

He asserted that what they saw during the Monday protest was "an expression not of political parties standing here, but of the people of India".

"We thank them for their support," he said. He also said that there were no different protests and all were together in this fight to restore democracy in the country". After the more than one-and-a-half-hour meeting, Kharge said senior leaders of the INDIA bloc met and discussed the prevailing situation and how to carry forward this campaign to seek Gyanesh Kumar's resignation.

"People are ready to expose PM Modi's plan of 'vote chori'," he said. "We will carry forward this united fight (protests) against the Modi government and 'vote chori' Kharge said.

Tejashwi Yadav said one has seen the manner in which the CEC has tried to "crush" democracy at the behest of Modi and Shah, and the BJP.

"We all are united to save democracy and are ready to make any sacrifice."

Union Home Minister Amit Shah on Tuesday hit out at Congress leader Rahul Gandhi over the Opposition protests against CEC Gyanesh Kumar and said they should be prepared once again for a "crushing defeat" in 2029 as people of the country are with the BJP, NDA and Prime Minister Narendra Modi. Shah also said the kind of "negative politics" the Congress has been engaged in will not benefit it as the opposition party needs to understand people and connect with the public. Slamming Gandhi, Shah said people of India know his plans of "getting infiltrators registered as voters".

"I want to ask Shri Rahul Gandhi ji directly: Is this the result of the SIR? The SIR started only after 2024." "Ever since you became the principal leader of the Congress, and later its president, and now the Leader of the Opposition, the Congress party has continuously lost elections. You need to engage in introspections. You cannot win the trust of the country's people through fabricated media events and echoes of lies," he said.

SC seeks senior cop's presence over assault allegations

BHAVINI MISHRA
New Delhi, 13 October

The Supreme Court on Tuesday sought the presence of a senior Delhi Police officer to respond to allegations that women journalists were assaulted while covering protests in the national capital against Chief Election Commissioner Gyanesh Kumar and the Election Commission of India's (ECI) Special Intensive Revision (SIR) of electoral rolls.

Chief Justice of India (CJI) Surya Kant said a senior officer should appear before the court to explain the allegations after senior advocate Indira Jaising mentioned a petition filed by the Network of Women in Media, India (NWMI), seeking safeguards for journalists reporting on protests.

"We'd like some senior officer to remain present here and explain," the CJI said. The court also took note of contempt proceedings initiated by the Free Speech Collective over alleged police excesses against journalists, despite the Supreme Court's October 10 directions that mediapersons covering protests should not be obstructed or harassed.

The matters were scheduled to be heard on Tuesday but were adjourned to October 15 owing to the ill health of Justice V Mohana, who was part of the Bench comprising the CJI and Justice Joymalya Bagchi.

Nilekani panel for last-minute fix on question paper leaks

Also dismisses concerns that AI would lead to widespread job losses

AUHONA MUKHERJEE
New Delhi, 13 October

The Centre's task force on examination reforms is considering generating question papers at the last minute from a large question bank to prevent leaks. The panel is expected to submit its recommendations within three months of its formation on July 28, Nandan Nilekani, who heads the high-powered task force, said on Tuesday.

Speaking at the Bloomberg New Economy Forum 2026, Nilekani said the National Eligibility-cum-Entrance Test (Undergraduate), or Neet (UG), paper leak had raised questions about the need for conventional question papers, given the financial incentive to obtain and sell them in advance.

"So I think the question becomes, why do we need to have something called a question paper? Because the moment you have a question paper, that creates an economic incentive for that to be sold. So the way to do it is to really have a massive bank of questions. And only at the last minute, generate the question paper for that day," he said.

Nandan Nilekani, who heads the task force on exam reforms, said his team will use technology to address systemic weaknesses

Nilekani said artificial intelligence (AI) could also be used to generate question papers on the day of an examination to prevent leaks. The panel is also examining the expansion of computer-based testing, which would require a wider network of examination centres, he said.

India currently has around 150,000 locations where candidates can take tests, and this network needs to expand, Nilekani observed.

"We have 150,000 locations where a young boy or girl can take a test. That needs to be expanded. So I think these are all systemic issues which we will address in our committee," he said.

The committee would identify the root causes of examination-related problems and use technology to address systemic weaknesses, Nilekani said, adding that Prime Minister Narendra Modi was keen to implement its recommendations.

Modi announced the formation of a high-powered task force led by the Infosys co-founder on July 26, following protests over the Neet (UG) 2026 paper leak and demands for accountability in the examination system.

AI could help India improve literacy and numeracy among millions of people, Nilekani said.

AI tools could also make information more accessible by allowing people to interact with computers in their preferred languages, he added. Nilekani dismissed concerns that AI would lead to widespread job losses in India's information technology services sector, calling the argument "absolutely hogwash". Companies would need greater support to fundamentally transform their operations using AI, creating more work for technology services firms, he said.

"I think this is all disaster marketing to suit the interests of large capital. The fact of the matter is that the requirement for companies like Infosys or others is actually more than ever before because the transformation of enterprise is a very complex activity. And AI requires fundamentally reimagining the way you do business. And it's a root and branch surgery that is required. And this, in fact, even more requires firms like ours to show companies how to go about making those transformations, how to reimagine the future," he said.

India rejects China's claims on Ladakh

India on Tuesday rejected Beijing's objection to New Delhi announcing standard names of 28 places and features in Ladakh, asserting that the Union Territory (UT) is an "integral and inalienable" part of the country.

Last week, the Union home ministry assigned standard names to the places and geographical features in Ladakh, including key border friction points along the Line of Actual Control (LAC) such as Gogra and Hot Spring. India's reaction came hours after China strongly opposed New Delhi assigning the standardised names. "It is reiterated that the UT of Ladakh is an integral and inalienable part of India. No amount of denial by the Chinese side can change this established fact," External Affairs Ministry spokesperson Randhir Jaiswal said. He said the press release by the Ministry of Home Affairs that China referred to, is "self-explanatory". "The announcement mentions that the 28 places/features located in the UT of Ladakh have been identified with standard place and feature names on the official map of Survey of India, and it has been done in consultation with the UT of Ladakh and local stakeholders," Jaiswal said.

Chinese Foreign Ministry spokesperson Mao Ning said that China strongly opposed India's decision to assign standardised names to the locations and geographical features in Ladakh. "China has never recognised the so-called 'Union Territory of Ladakh' unilaterally and illegally established by India, and firmly opposes the so-called 'standardised names' publicised by India." PTI

Murugan third MoS since June to quit from council of ministers

ARCHIS MOHAN
New Delhi, 13 October

Bharatiya Janata Party's (BJP's) Tamil Nadu leader L Murugan on Tuesday tendered his resignation from the Union council of ministers, and also sought permission to quit his Rajya Sabha seat.

In a letter to Prime Minister Narendra Modi, Murugan said he wished to return to Tamil Nadu in order to strengthen the BJP there.

Murugan was Tamil Nadu state unit chief of the BJP before being inducted into the Union council of ministers in July 2021 and elected to the Rajya Sabha in September 2021.

Re-elected to the upper house from Madhya Pradesh in 2024, his term is set to end in 2030. As a minister of state (MoS), he handled the portfolios of information and broadcasting, and parliamentary affairs.

Murugan's resignation comes amid speculation over an impending ministerial reshuffle. He is the third MoS to quit in recent months after George Kurian and Ravneet Singh Bittu resigned in June and July, respectively, after the BJP failed to renominate them for Rajya Sabha elections.

PHOTO:WIKIMEDIA COMMONS

L Murugan said he wished to go back to strengthening the BJP in Tamil Nadu

Union Petroleum Minister Hardeep Singh Puri and MoS B L Verma were also not renominated by the BJP in the just-concluded Rajya Sabha elections from Uttar Pradesh. However, the two continue to be in office.

Two other MoS, Pankaj Chaudhary and Harsh Malhotra, were made chief of the BJP's Uttar Pradesh and Delhi units respectively in recent months.

They continue to discharge the twin responsibilities, although the BJP follows a 'one person one post' principle.

In his letter to the PM, Murugan said he wanted to "dedicate full time to strengthening the party in Tamil Nadu".

Murugan said that from being the son of daily wage labourers to serving in the Union Council of Ministers under the leadership of Modi has been the greatest privilege of his life.

Murugan, a Dalit leader, contested the 2024 Lok Sabha polls on a BJP ticket from the Nilgiris, Tamil Nadu, but lost to the Dravida Munnetra Kazhagam's A Raja. He lost the 2026 Assembly polls from Avanashi to the Tamilaga Vettri Kazhagam candidate.

Kurian contested the Kerala Assembly polls in April-May from Kanjirappally, which he lost.

He was the only Christian in the council of ministers.

ALL IN A DAY

Modi, Carney discuss ramping up ties on key bilateral issues

Prime Minister Narendra Modi had a "warm and productive" conversation with his Canadian counterpart, Mark Carney, on Tuesday, with both agreeing to build on the positive momentum in bilateral ties. Modi said the two leaders agreed to work towards concrete outcomes across key areas of the India-Canada Strategic Partnership, including trade, energy, technology, security and people-to-people ties. The conversation took place as Canadian Foreign Minister Anita Anand landed in Delhi for a two-day visit, where she will hold discussions with External Affairs Minister S Jaishankar and Minister of State (Independent Charge) Skill Development and Entrepreneurship Jayant Chaudhary. India and Canada have committed to double their bilateral trade by 2030. Modi is slated to visit Canada in mid-December. OUR BUREAU

FIR filed against Dipke, Ranka, Das

Delhi Police has filed an FIR against Cockroach Janta Party (CJP) leaders Saurav Das, Ashutosh Ranka and its other members for allegedly trespassing into the Jantar Mantar area without authorisation, officials said on Tuesday. A police source said FIR sections include breach of a peace bond the three leaders signed earlier.

The action came hours after the activists entered the heavily barricaded protest site and raised slogans demanding Chief Election Commissioner Gyanesh Kumar's resignation. Jantar Mantar was recently denotified as a designated protest site.

Das, Ranka and a few other CJP members were detained early Tuesday after they allegedly entered the area in defiance of prohibitory orders. PTI

RSS affiliate urges Centre to block Starlink

The RSS-affiliated Swadeshi Jagran Manch (SJM) urged the Centre on Tuesday to block permission to Starlink to roll out its commercial satellite broadband services in India, while condemning the "irresponsible" statements made by its owner, Elon Musk, against industrialist Mukesh Ambani and the government.

"The organisation is of the firm belief that blocking Starlink would send a message to trade partners like the US ... that India is certainly within its rights to block Starlink based on its genuine national security concerns," SJM National Co-convenor Ashwani Mahajan said. Musk on Saturday shared screenshots of reports alleging that a Reliance-funded firm helped boost the campaigns of the BJP. PTI

Terror networks must not find safe haven: Shah to Bimstec

Union Home Minister Amit Shah on Tuesday called for stronger regional cooperation among Bimstec countries to combat terrorism, disrupt terrorist financing and organised crime, and ensure that terrorist networks do not find a haven in the region. Addressing the first home ministers' meeting of Bimstec countries here, Shah said the trust underlying the partnership of the grouping is strengthened by the belief that each member country's security arrangements should contribute to the security of the other members.

Emphasising the importance of five key areas of cooperation-drug control, counter-terrorism and legal cooperation, repatriation of fugitive criminals, cyber-security and cybercrime investigations, and institutional cooperation and capacity building, he said there was a need for a coordinated regional approach to combat illicit financial transactions and terror financing. PTI

'Depletion of coal stocks at power plants a concern'

NANDINI KESHARI
New Delhi, 13 October

The depletion of coal stocks at power plants is a concern amid rising electricity demand, and the country must develop a judicious mix of resources for baseload power rather than depending on a single source, Ghanshyam Prasad, chairman of the Central Electricity Authority (CEA), an arm of the power ministry, said on Tuesday.

"We are very concerned about the enhancement of the fuel supply to these power plants because the stock is depleting almost every day. We are not finding time to put them on the maintenance cycle," he said, speaking at an industry event here.

He also said that the country's power demand is rising by 45-50 gigawatts (Gw) every day compared with last year, and therefore, a huge addition of coal-based generation is needed.

The CEA had initially targeted around 97 Gw of coal-based power capacity by 2036, but that estimate is now seen rising to 150 GW from the reference date of 2023.

While India added over 50 Gw of renewable energy generation capacity last financial year, it is important to add other resources to the energy basket, including nuclear and pumped hydro, to supplement coal-based plants, he said.

CEA data showed that the number of power plants with critical coal stocks stood at 87 on October 11, with actual stocks of 20.8 million tonnes (mt), around 34 per cent of the normative coal requirement.

Speaking at the same event, NTPC chairman Gurdeep Singh also expressed concern over rising power demand and coal stock depletion. "Our generation from coal-based plants has widened by around 10 per cent, with an 18 per cent rise this month. And it is difficult to maintain the coal stock," he said in his speech.

Singh also said that the company is planning an investment of around ₹17 trillion over the next decade.

Centre asks 5 states to go on 'mission mode' against stubble burning

Ahead of the peak crop residue burning season, the Centre on Tuesday asked Madhya Pradesh, Rajasthan, Punjab, Haryana and Delhi-NCR governments to work in "mission mode" to prevent stubble burning. A high-level inter-ministerial meeting, chaired by Agriculture Minister Shivraj Singh Chouhan and Environment Minister Bhupender Yadav, reviewed stubble management with state agriculture ministers and officials.

"Very little time remains between the harvesting of the current crop and the sowing of the rabi crop. Therefore, the administrative machinery must step away from paperwork and work directly on the ground on a war footing," the two ministers said.

States have been asked to hold immediate meetings with district magistrates to ensure strict monitoring and practical solutions, an agriculture ministry statement said.

Reviewing data for September 15 to October 12, Chouhan noted a significant fall in burning incidents over the previous year: 53.3 per cent in Haryana and about 32 per cent in Uttar Pradesh. Punjab also recorded a decline. However, he termed the rise in Madhya Pradesh (55 to 277 cases, up 452 per cent) and Rajasthan (20 to 60, up 200 per cent) "extremely concerning". He directed both states to identify affected districts and villages and put a action plan in place immediately. With most of the harvest still to come, states with fewer incidents must not become complacent, he said. PTI

Corporate treasury centres queue up for GIFT-IFSC base

"The ability to centralise cross-border liquidity, foreign-currency funding, forex management and investments in an internationally oriented financial centre within India is increasingly attractive to both Indian and multinational corporates. We see this evolving from a niche offering into a significant component of GIFT-IFSC's global financial-services proposition," Shah said.

The growth follows the IFSCA's revision of treasury-centre norms in April 2025. The framework allows treasury centres to undertake activities including group-wide borrowing, investments, liquidity management, foreign exchange transactions and both over-the-counter and exchange-traded derivatives.

"With progressive regulation, tax competitiveness, a growing financial ecosystem and access to talent, GIFT City (Gujarat International Finance Tec-City) can develop into a major regional and global treasury hub. This will bring international financial activity, capital, high-value employment and expertise to India, deepen our financial markets, strengthen economic resilience and enhance India's influence in the evolving architecture of global finance," said Sanjay Kaul, managing director and group chief executive officer of GIFT City.

Among the 13 entities already operational in the financial hub are JLL Finance Services, ArcelorMittal Treasury Centre India, ATSOL Global IFSC (subsidiary of Adani Energy Solutions), GAIL Global IFSC, ReNew Treasury and IOC Global Capital Management.

Jaiman Patel, partner at EY India-GIFT City, said: "With a 20-year tax holiday, nil withholding tax on eligible interest payments, and a business-friendly regulatory environment, it provides an attractive platform for investment, fund-raising, capital management, and regional growth."

The ability to consolidate these activities could allow companies to manage funding and surplus liquidity across Indian and overseas group entities through a single treasury platform. Smrithi Nair, partner at Juris Corp, said the increase in treasury centres indicated that corporates were no longer viewing the financial hub merely as a "tax-efficient" location. The updated framework, experts said, permits centres to undertake group-wide borrowing, including inter-company deposits and credit arrangements, as well as investments, liquidity management, foreign exchange transactions and exchange-traded derivatives. "This enables funding requirements and surplus liquidity across Indian and overseas group entities to be aggregated and managed through a single treasury platform, potentially reducing fragmented external borrowing, duplicative liquidity buffers and entity-level hedging arrangements," Nair said.

Commodity-related activities could provide another avenue for growth. Siddartha Karnani, partner at King Stubb & Kasiva, said formal recognition of commodity trading as a financial service could significantly expand the functions treasury centres can undertake. "If commodity trading gets formally classified as a financial service under the IFSCA Act, it won't just open a new product line, it will change what a treasury centre in GIFT City can actually do for a multinational group," Karnani said.

He said hedging, trade financing and re-invoicing for commodities such as crude, metals and agricultural products were still routed through centres such as Singapore, Dubai and Switzerland in many cases because of the absence of regulatory recognition onshore.

VINCENT VAN GOGH'S *CHÂTAIGNIERS EN FLEURS*

Wall Street banks see pockets of weakness

REUTERS
13 October

Mixed bag

Deal slowdown: Market volatility and economic uncertainty dampened investment banking activity in the third quarter

September slump: JPMorgan and Wells Fargo reported a meaningful slowdown in trading activity towards the end of September

Bond selloff: Rising bond yields and stock-market volatility disrupted corporate dealmaking

IPO slowdown: New listings lost momentum, threatening what could have been a strong year for investment banking

Equity surge: JPMorgan's markets revenue rose 15%, with equity trading revenue jumping 49% year-on-year

Mixed results: Goldman Sachs beat profit estimates as equity trading gains offset a 1% fall in fixed income, currencies and commodities revenue

Pipeline holds: JPMorgan said its investment banking pipeline remained strong, with deals more likely to be delayed than cancelled

Wall Street's investment banking and trading stalwarts posted an uneven third quarter, as both equity and bond markets were rocked by ongoing wars, rising inflation and jitters about the massive spending in the artificial intelligence (AI) buildout. The results from JPMorgan Chase, Wells Fargo and others followed a stellar first half of the year, as a grinding selloff in global bond markets and stock-market volatility started to have an effect on the nation's largest financial firms, particularly in the latter part of September, several executives said.

JPMorgan Chase, in particular, said market volatility and the uncertain economic outlook dampened dealmaking and reduced bond-market trading in recent months, and Wells Fargo also pointed to slowing activity in September.

"We saw... trading activity across our clients... slow meaningfully as you got in the last, you know, few weeks of September," said Chief Financial Officer (CFO) Mike Santomassimo on a media call, noting that the big jump in the benchmark 10-year yield has had an effect.

The bond market has experienced one of its worst selloffs in recent memory, driving yields around the world to levels not seen since early in the century. That, combined with the volatility in the equity market, has interrupted corporate dealmaking. The initial public offering (IPO) market has lost steam in recent weeks, threatening what could have been a banner year for the investment banking business.

Analysts have said the IPO market has been selective, not shut, and delayed offerings could still launch if conditions stabilise during the fourth quarter. JPMorgan executives said there had been a slowdown in investment banking activity, but the pipeline remained strong. "I think all the overall conditions for the investment banking pipeline remain very, very strong," said JPMorgan Chief Financial Officer Jeremy Barnum on a call with reporters. "Of course, we did see a slowdown I would say, kind of in the second half of September. So we'll see how that flows through into the fourth quarter. But fundamentally, the pipeline is robust."

Barnum said that during moments of market turmoil "the gap between buyers and sellers can widen temporarily before we find a new level." He said that "big picture, I would lean more on the side of delayed rather than cancelled."

Citigroup CFO Gonzalo Luchetti said the bank saw softer investment banking activity in the third quarter following record first-half volumes.

"There is no doubt that high interest rates and the threat of continued Fed hikes is weighing on trading and investment banking activity in a measurably negative vector," said Brian Mulberry, chief market strategist at Zacks Investment Management.

Still, banks saw strength in equity trading during a period of volatility. JPMorgan said revenue at its markets division climbed 15 per cent in the third quarter from the prior year. Equity markets revenue surged 49 per cent, as investors rejigged their portfolios on the back of uncertainty over global interest rates and surging energy prices.

Goldman Sachs beat third-quarter profit estimates, as dealmaking remained steady and volatile markets tied to West Asia conflict lifted its equities revenue, even as its fixed income, currency and commodities business revenue dropped 1 per cent from the year-earlier period.

QUICK READ

Saudi orders evacuation of Sana'a oil facility ahead of operation

A Saudi-led coalition urged civilians on Tuesday to evacuate the Yemen Oil Company's Sabah central station in the capital Sana'a ahead of a planned military operation. A statement from the coalition's joint forces command identified the site on a map and said civilians should leave the area for their own safety. A military spokesperson for Yemen's Iran-aligned Houthis, Yahya Saree, warned that any strikes on Sana'a would be met with a "harsh and painful" response in the Saudi capital Riyadh. The Houthis also warned employees and civilians near Saudi Aramco oil facilities to evacuate and stay away, saying the facilities were legitimate targets for their forces. Houthi rebels on Tuesday accused Saudi Arabia of carrying out overnight airstrikes along Yemen's northern border with the kingdom and its western coastline. Saudi Arabia did not immediately respond to the claim. The reported strikes came hours after air raid sirens sounded and explosions were heard in the Saudi capital. Meanwhile, Saudi Arabia stopped issuing public warnings of imminent military attacks days before a series deadly strikes on Riyadh airport that killed at least 18 people and wounded over 300. The government has not said why there were no alerts to the public before the four Riyadh attacks in the past week. AGENCIES

Nasa's Perseverance rover breaks record for off-planet driving on Mars

Nasa's Perseverance Mars rovers in a "selfie" that it took over a rock nicknamed "Rochette" in 2021 FILE PHOTO: REUTERS

While no person has ever set foot on Mars, humankind has managed to conduct extensive explorations of the surface of Earth's planetary neighbour using robotic rovers. One of them, Nasa's six-wheeled Perseverance rover, has now set a record for the longest distance driven by any vehicle on a world beyond Earth. The US space agency has announced that Perseverance has trekked 45.2 km since arriving on Mars roughly 5-1/2 years ago, passing the distance mark previously established by another Nasa rover, Opportunity. Visa gets approval to prepare for domestic business in China

United States (US) payments firm Visa has received approval from China's central bank to begin preparations for a domestic bank card clearing institution in the country, ending years of waiting to tap into one of the world's largest payment markets. This marks a major step for Visa to join rivals American Express and Mastercard in operating bank card clearing services in China and represents a further opening up of the nation's tightly controlled financial sector. The People's Bank of China issued an administrative approval to Visa permitting it to begin preparatory work. REUTERS

AI data theft down 90-99%: Anthropic

Claude AI models' capabilities protected with new security safeguards

REUTERS
13 October

Anthropic says extraction attempts reduced 100 times

Anthropic said on Monday new measures designed to prevent rivals from copying the capabilities of its Claude AI models have reduced data harvested in so-called distillation attacks by about 90 per cent to 99 per cent.

Model distillation has emerged as a key concern for leading artificial intelliegnce (AI) companies due to intensifying US-China competition, with firms including Anthropic, OpenAI and Google arguing the practice enables rivals to reproduce advanced capabilities more quickly and at lower cost.

Anthropic said safeguards restricting access to Claude's reasoning have sharply reduced extraction attempts, with "the number of reasoning tokens extracted by distillers" now "10 to 100 times lower than it was before".

The firm said it had made it harder to use proxy networks to repeatedly probe Claude's protected reasoning, blocking extraction attempts, and hindering large-scale distillation efforts.

Anthropic said its safety system is "roughly as robust as those that prevent Claude from helping build bioweapons" and has "a false positive rate of less than 0.1 per cent".

It banned tens of thousands of accounts linked to distillation campaigns and cited Chinese AI startup Z.ai , also known as Zhipu, as an example of a company that attempted to distill capabilities from Claude while developing its GLM-5.3 model, warning such practices pose safety and national security risks.

Anthropic said on Monday its experiments suggested small AI models may be months away from being capable enough to self-replicate on commercial internet-of-things (IoT) devices, such as smart ovens and off-brand Android TV boxes. In its experiments, Anthropic looked at whether AI models could find vulnerable devices, copy themselves into those devices, and continue spreading without human help.

It found that small models under 30 billion parameters could complete the many steps needed for replication. However, the firm found that such AI models also struggled to complete the entire sequence from start to finish.

In its simplified tests, Anthropic found that GLM-5.2 and stronger models were capable of end-to-end replication. Replicating models would be hard to shut down as there is no central switch-off point and, unlike non-AI malware, they could also figure out unfamiliar devices on their own, targeting data center processors, Anthropic warned.

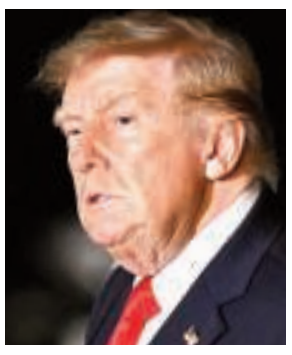
The firm focused on IoT devices like Android TVs, smart appliances, and other internet-connected gadgets in its research as these are typically poorly secured.

The AI major also warned that if small models improved at their historical rate, they would be able to autonomously replicate by the end of this year, with small weight-based replicators following suit soon after.

Anthropic also said such autonomous AI systems were likely to replicate slowly and rely on widely available, relatively insecure computing resources. It added that systems should be strengthened to make it harder for such AI agents to spread.

China, Russia are not helping Iran: Trump

REUTERS
13 October



"THEY (CHINA, RUSSIA) HAVE TOO MUCH TO LOSE, AND WE WOULD KNOW ABOUT IT"
Donald Trump, President, US

United States (US) President Donald Trump said late on Monday he did not believe that China and Russia were helping Iran "at all," adding that Moscow and Beijing had "too much to lose" if they enabled Tehran.

Trump said on Truth Social that he had seen comments from his critics and opponents that China and Russia were helping Iran. "If they are, it's at a very low level, but I don't believe they are at all. They have too much to lose, and we would know about it, and know about it very fast," Trump wrote.

The United States and Iran have been at war since 28 February, when the US and Israel attacked Iran and Tehran responded with its own strikes on Israel and Gulf states that host US bases. US-Israeli strikes on Iran and Israeli attacks on Lebanon have since killed thousands and displaced millions.

Trump has previously described Chinese President Xi Jinping and Russian President Vladimir Putin as "neutral" during the Iran war.

Iranian drone attacks on CIA facilities in the Gulf have prompted US intelligence analysts to investigate whether Russia provided targeting information or advanced drone technology. European foreign ministers pressed the case in a March meeting with US Secretary of State Marco Rubio. *The Washington Post* and the *Wall Street Journal* that month reported that Russia was providing Iran with targeting information.

Moscow and Beijing maintain close ties with Tehran. Russia has said the Iran war could lead to a nuclear arms race in West Asia. Beijing has condemned Washington's attacks on Tehran as a brazen violation of Iran's sovereignty.

Last month, Trump warned Xi against providing support to Iran when the Chinese leader visited Washington, and received assurances that China would not do so.

Iran, Russia raising hybrid threats in UK: MI5 Chief

Iran is stepping up attempts to hit harder targets such as military sites in Britain and Russia is increasing its hybrid warfare against Ukraine's allies, the United Kingdom's (UK) domestic spy chief said on Tuesday.

In his annual speech on wide-ranging threats to Britain, MI5 Director General Ken McCallum also said the greatest concern about the misuse of artificial intelligence (AI) was terrorists being able to develop bioweapons or even create new pathogens.

Flydubai probe: Two Maldivian pilots arrested in UAE

PRESS TRUST OF INDIA
Dubai, 13 October

Two Maldivian pilots employed by flydubai have been arrested by United Arab Emirates (UAE) police in connection with an alleged attempt by an Omani copilot to hijack and crash a Dubai-Tel Aviv flight, in which Indian Captain Smit Machchhar was injured while foiling the suspected plot, according to media reports.

The duo were taken into custody on October 3, and their families have been formally informed of their detention by the Maldivian Embassy in the UAE, Maldivian news portal Adhadhu reported.

UAE AUTHORITIES ARE YET TO RELEASE OFFICIAL CHARGES AGAINST THE TWO PILOTS

The Maldivian authorities have declined to comment on the detention of the two pilots, it said.

No official details have so far been released by the UAE authorities regarding the allegations against the detained Maldivian nationals or the status of the investigation into their possible involvement.

The arrests came as UAE authorities widened their investigation into the September 30 incident involving flydubai co-pilot Hammam al-Hammami, an Omani national accused of attacking the flight's pilot, Machchhar, with an axe in an alleged attempt to take control of the aircraft and carry out a "terrorist attack".

According to Male-based Mihaaru newspaper, the two male pilots are believed to have interacted with al-Hammami at their workplace and lived in the same building as him. However, authorities have not officially revealed the nature of their alleged links to the incident or disclosed details of the evidence against them.

The two are among the six Maldivian nationals working as pilots for flydubai and are reportedly the airline's most recent recruits from the Maldives, news portal *edition.mv* reported.

The flight FZ1073, which was carrying 174 passengers and crew members, was travelling from Dubai to Tel Aviv.

The co-pilot allegedly stabbed Machchhar in an attempt to hijack and crash the plane. Though the pilot was injured in the assault, he resisted the attacker and unlocked the cockpit door. This allowed crew members and passengers to rush inside, overpower the co-pilot, and assist in stabilising the aircraft. The aircraft made an emergency landing at Tabuk airport in Saudi Arabia.

Orbital data centres risk becoming military targets in space

BLOOMBERG
13 October

Orbital data centres chasing unlimited solar power and boundless real estate increase the risk of potentially catastrophic conflict in space — just as militaries worldwide embrace artificial intelligence (AI) and see computing facilities as critical infrastructure.

On the ground, government server farms are highly protected and can be buried to make them more resilient to attack. Iranian airstrikes targeted data centres across West Asia, and Ukrainian attacks in recent days destroyed several in Russia, highlighting their perceived value.

In space, the facilities would be vulnerable to missiles, jamming, cyber attacks and directed-energy weapons. Defending them is costly, yet a successful physical attack could choke a crucial orbital band with debris.

"Anything of value that you put up in space increases the potential payoff of attacking space infrastructure," said Bleddyn Bowen, author of *Original Sin: Power, Technology and War in Outer Space* and an associate professor of astropolitics at Durham University in the United Kingdom (UK). "We'd rather not have a shooting war in space because we'd all lose quite a lot."

The United States (US) Space Force said in a statement it "maintains a range of capabilities to protect and defend US space interests, if directed by appropriate decision-makers and consistent with applicable law, policy, and established authorities."

On October 2, a SpaceX rocket carried a data centre test satellite for Alphabet's Google into orbit as ground operators hunt levels of computing power to fuel AI development. Blue Origin founder Jeff Bezos also expressed enthusiasm, with his company filing with the US Federal Communications Commission to operate more than 50,000 such satellites.

SpaceX Chief Executive Officer (CEO) Elon Musk, whose company has been getting an increasing share of US national security and defence contracts, has said he envisions as many as 1 million orbital data centers.

Although that number might not be realistic — given that operating data centers in orbit presents plenty of more prosaic challenges, such as cooling — even putting a fraction of those in the skies would pose a military defence problem, said former Harvard University astrophysicist Jonathan McDowell, who tracks launches and orbital debris.

The US, China, Russia and India have tested ground-based anti-satellite weapons. The Space Force said last month it placed an operational weapon in orbit but declined to say what it was.

"If you outsource a lot of your missile defence targeting to these data centers, for instance, then that makes them very much military targets," McDowell said. "Kinetic anti-satellite weapons could directly target a data centre. The other possibility is the vulnerability to jamming."

The worst-case scenario, he said, would be missile attacks against space-based centres that create enough debris to make those orbital areas unusable.

Data centres would most likely use a sun — synchronous orbit over the Earth's poles to stay constantly in sunlight, said Victoria Samson, chief director for space security and stability at the non-profit Secure World Foundation. That type of orbit is also used by many imaging satellites.

Axiom Space, a US startup that's designing orbital data centers, said its systems were built around the assumption they'd be military targets, and "security is a design requirement for orbital compute, not an add-on."

Philip Johnston, chief executive officer of Starcloud, which also aims to develop data center satellites, said he saw them being less at risk in space than on the ground. The sheer number would distribute operations enough where destroying a few would have little effect, he said.

Although the risk of orbital debris and escalation would be enough to dissuade major space powers from a kinetic attack, a nation with less to lose in orbit might not have such qualms.

"If all this seems a little half-baked and not very well thought through, that's because it's completely half-baked and no one has thought about it at all," said Jeffrey Lewis, a distinguished fellow at the Foreign Policy Research Institute based in Philadelphia.

Constellation of computers

A Google diagram showing how a network of satellites could operate like a giant data centre in space

Each dot represents a satellite in a proposed space data centre cluster. Red marks the central reference satellite, magenta its nearest neighbours, and the arrow points towards Earth. Dashed lines show how the formation shifts in free fall, while the orange circle traces one outer satellite's path

Global growth resilience

Headline numbers mask vulnerabilities

The October edition of the International Monetary Fund's (IMF's) World Economic Outlook (WEO), released on Tuesday, underscores the broad resilience of the global economy. Despite several disruptions over the past few years, economic growth has broadly held. India has exhibited strong growth performance. According to the IMF's latest assessment, the global economy is expected to grow at 3.1 per cent in 2026, 10 basis points higher than the July update. Growth is expected to increase to 3.4 per cent in 2027. The IMF has increased India's growth projection for the current year to 7 per cent, as against its July estimate of 6.4 per cent. Growth in the next financial year too is expected to be 7 per cent, 30 basis points higher than the IMF's July projection. The upward revision, among other things, is based on resilient domestic demand.

As the WEO explains, two sets of factors have helped the global economy withstand the latest price shocks in energy and commodities. The first is the rerouting of energy supplies, which has meant higher energy production in other countries. Inventory drawdown in many countries also helped. Further, substitution through other sources such as renewables has helped reduce the impact. The second factor is sustained investment in artificial intelligence (AI) and related areas, which has given a significant boost to global economic activities and trade. However, it is worth noting that these factors have limits. If energy supplies from West Asia are not restored quickly, falling inventories could soon get reflected in prices and availability. Further, the AI boom and the lofty valuations of related companies are already raising concerns. If these companies fail to meet expectations, there could be severe disruption in financial markets.

Besides, as the IMF has highlighted, growth is concentrating in a select few countries. Notably, only 32 economies now account for 95 per cent of global growth. This level of growth was spread among 54 economies as recently as April. The percentage of countries with downgraded growth projections has also increased. Thus, growth is being reallocated across countries, depending on their exposure to AI and their ability to deal with war-related supply shocks. The concentration of growth in a few countries, largely driven by an investment boom in a single sector, could pose significant risks to global growth and macroeconomic stability. It is also important to keep in mind that this is happening against the backdrop of elevated public debt, particularly in advanced economies, which is, in part, pushing up interest rates. Tight global financial conditions, owing to large borrowing requirements of governments in advanced economies and the substantial investment needs of AI companies, could affect capital flows to small and emerging-market economies, impacting their growth prospects. It could also increase risks to financial stability.

What does all this mean for India? It is expected to grow at a healthy pace, which the IMF's projections and revisions have acknowledged. However, it must be noted that India is significantly exposed to disruption in energy supplies and is not a significant beneficiary of the AI boom. In fact, the AI boom elsewhere is partly affecting capital flows, which is impacting both its stock and currency markets. India raised a substantial sum of foreign currency, mainly through non-resident bank deposits, to bolster its reserves to deal with pressures on the balance of payments. However, as recent central-bank intervention in the foreign-currency derivatives market suggests, it has not fundamentally changed the dynamics. Thus, sustaining growth and maintaining macroeconomic stability will require considerable policy agility.

Human rights restored

Navi Pillay is a deserving Nobel Peace Prize winner

In an ideologically fractured world, the award of the Nobel Peace Prize often attracts controversy. Last year, for instance, the award to a Venezuelan Opposition leader, the right-wing Maria Corina Machado, met with substantial reservations from global liberal establishments. The reservations were confirmed when she gave her medal to United States (US) President Donald Trump after he had invaded her country and captured its President. Mr Trump, of course, thinks he was due to receive the "Noble Prize", as he termed it, for "stopping eight wars" — though his machinations in West Asia have sent the region and the global economy into turmoil for the foreseeable future. But, barring Mr Trump and the Israeli ruling establishment, few people would quibble with this year's winner, South Africa's Navanethem "Navi" Pillay, 85, human rights jurist extraordinaire.

Ms Pillay heard she had got the award when the citation was read in Norway, and her response reveals a wry sense of humour. At the Nuremberg Palace of Justice — where the first Holocaust trials were held — she initially thought it was a joke and then told those who had gathered to applaud her that she might share the prize with Mr Trump if they clapped a little harder. But the gravity of the issue for which Ms Pillay won the award is not in doubt. It comes at a time when the world is facing more war and conflict than it has seen in a long time and when the bastion of democratic freedom, the US, is committing human rights violations on its own soil. Ms Pillay's sterling contribution to shaping the multidimensional facets of human rights law deserves the highest recognition. Most recently (2021-25), she chaired the United Nations (UN) independent enquiry commission on Occupied Palestinian Territory, which accused Israel of committing genocide in Gaza. This finding contradicted entrenched Western assumptions (and tacit approval) of Israel's actions and marked the first official recognition of Israel's disproportionate response, especially in targeting Palestinian children, following the Hamas massacre of October 7, 2023.

Ms Pillay, granddaughter of Indian indentured labourers, is the fifth South African to win the Nobel Peace Prize. She shares the honours with Albert Luthuli, Desmond Tutu, Nelson Mandela and F W de Klerk. Apartheid was the leitmotif on which she built her work as a human rights champion. She was the only non-white woman to open her own law practice in Natal province, principally because no law firm wanted its white employees to take instructions from a woman of colour. As a lawyer, she defended several apartheid detainees, including Nelson Mandela, and exposed the use of torture against them. Ms Pillay later graduated from Harvard Law School and became a high court judge after the African National Congress came to power. Her work in the International Criminal Tribunal for Rwanda brought women's rights front and centre of human rights debate for the first time by recognising that rape and sexual assault could constitute acts of genocide. Her subsequent work on gender justice at the International Criminal Court — which, ironically, India does not recognise — and focus on caste discrimination as UN Human Rights Commissioner (2008-14) added new dimensions to the issue. By recognising Ms Pillay, who serves as an ad hoc judge at the International Court of Justice in the genocide case against Myanmar over its treatment of the Rohingyas, the Nobel committee has delivered a much-needed restorative to the primacy of human rights in the global discourse.

The inadequacy of climate action

With the 1.5°C threshold expected to be breached within years, India must pay greater attention to adaptation and resilience

Sustainable development is defined as meeting the needs of the present without compromising the ability of future generations to meet their needs. The threat of climate change, however, requires something more than this. The issue is not just avoiding things today that will worsen climate in the present or the future. Our actions now have to take into account the established probability of climate worsening for humans in the near future. That is why the United Nations Framework Convention on Climate Change (UNFCCC) was negotiated and ratified a little over three decades ago. Its preamble stated that "responses to climate change should be coordinated with social and economic development in an integrated manner with a view to avoiding adverse impacts on the latter".

NITIN DESAI

This has not happened. The integration of climate action with development has contributed to the growth of renewable energy, though even here, the boom may be attributable more to improved commercial prospects resulting from lower capital costs. The reality is that policymaking for climate action is separated from development policy formulation.

In practice, development needs and profit potentials drive both present and future actions. That is why the performance of the member states of the UNFCCC on climate mitigation are abysmal. An independent organisation, Climate Action Tracker, evaluates the performance of major countries towards the goal of 1.5°C set in the Paris Agreement in 2015. In its assessment, the actions of practically all the major states are insufficient.

The United States, Russia, the Gulf States and much of Southeast Asia are rated as "critically insufficient"; India, China, Egypt, Brazil, Argentina, Canada and Mexico are rated as "highly insufficient"; most of Europe, Australia and South Africa are rated as "insufficient". If all countries followed the level of climate action associated with each category, the resulting global temperature rise would be 4°C for the "critically insufficient" category, be 3-4°C for the "highly insufficient", and be 2-3°C for the "insufficient" category. The issue is not whether the countries will reach what they have promised for 2030. India will and may even exceed the target. The real issue is that the stated targets for 2030 are inadequate for reaching the global limit of 1.5°C. The situation now has worsened with the withdrawal of the US from the Paris Agreement and from the UNFCCC, which will take effect in January 2027. Their malign impact will be seen in this year's meeting of the UNFCCC in Antalya, Türkiye.

Quite frankly we must accept that because of their limited promises, the world will not succeed in limiting future temperature increases to the goals set in the Paris Agreement. On September 2, the United Nations Environment Programme (UNEP) published a report recognising for the first time that the 1.5°C threshold will be breached within a matter of years, not decades. Climate policy must now focus as much on building up resilience to higher temperatures and adaptation as on climate change mitigation. This is part of the agenda for the UNFCCC. But the actual design and implementation of resilience and adaptation will differ greatly depending on local conditions. This is what India should now pay greater attention to in its climate policy. Are we doing enough on adaptation and resilience? An index measuring a country's exposure, sensitivity and capacity to adapt to the negative effects of climate change across six sectors — food, water, health, ecosystem services, human habitat, and infrastructure — places India at level 28 out of 48 in Asia-Pacific. Its neighbours, other than Sri Lanka, are below this level and even more vulnerable to climate change risks.

In India, we need to raise the importance of a climate change management strategy that connects it more directly with the main framework of development policy. Looking at the long-term trend of development requires proper integration of climate change management with traditional development actions, such as agricultural growth targets and the adaptation of agriculture to rising temperatures, which may go up to 50°C in summer, their impact on health, and the energy demand they will generate for cooling. We must recognise that cooperation between neighbouring countries on interlinked climate-related impacts, such as those affecting shared rivers, may be necessary and useful. The most important planning need is to raise the importance of climate change management by setting up a National Climate Management Body involving the Centre, states, and the municipalities of very large cities to review and evaluate the adequacy of adaptation and mitigation efforts and secure agreement on future plans for climate management. A major reason for this is that the formulation and implementation of adaptation actions and building up resilience have to be at the local level and involve sectors that are well within state control and management.

Since climate action generally aims at future challenges, we must design climate management programmes that deliver more immediate benefits. For example, forest restoration and strengthening can increase carbon sequestration while also improving water supply; renewable energy can improve the availability of local power supplies; and electric vehicles can reduce running costs. Such co-benefits will make long-term actions more acceptable.

While adaptation and resilience management can be led by state governments and local authorities, the continuing drive for climate change mitigation must remain a central responsibility. So far, much of the focus has been on the promotion of renewable energy. But there are now programmes involving compliance standards and carbon pricing. These include the Carbon Credit Trading Scheme, which imposes emission-intensity targets on several energy-intensive industries and allows trading to address surpluses and deficits, and the Environment Audit Rules, 2025, which provide for environmental audits of industries with a potentially adverse impact on climate change, along with a host of other activities. Placing these under the oversight of the National Climate Management Body suggested above can strengthen pressure for compliance. One must also recognise that carbon capture, utilisation and storage (CCUS) may be a necessity for major carbon-emitting industries such as steel and cement. At present, India's share of global CCUS activity is negligible, and the Union government must vigorously pursue the five-year provision of ₹20,000 crore made in the 2026-27 Budget.

The Centre can play a major role in helping states, not just by providing sufficient finance for their broad-based climate action, but also by using satellite imagery and artificial intelligence to improve information on climate impacts and actions, link climate action with development activities, and improve the effectiveness of climate-related policies and programmes.

I have focused on national action. But we must recognise our continuing need for more effective global cooperation on climate change mitigation and on the provision of technology and finance required for both mitigation and adaptation. Right now, the prospects for effective global cooperation appear bleak. But as the impacts of climate change become more evident — as seen recently in the high temperatures experienced in the northern states — global cooperation may become more effective. Hopefully, we will see some early signs of this at next month's UNFCCC meeting.

The medical poverty trap is real

The latest findings from the National Sample Survey's 80th Round, covering January-December 2025, raise uncomfortable questions about the accessibility and affordability of medical services in India. The survey highlights two important trends: A substantial rise in reported morbidity across the country and continued reliance on private health care providers. More importantly, treatment at private facilities imposes a significantly higher financial burden on patients than treatment at public hospitals.

Rising morbidity: The proportion of people reporting an ailment during the preceding 15 days increased considerably in the 80th Round compared with the 75th Round (July 2017-June 2018). In rural India, it nearly doubled, rising from 6.8 per cent to 12.2 per cent, while in urban India, it increased from 9.1 per cent to 14.9 per cent. At first glance, this increase might appear entirely negative. However, higher reported morbidity does not necessarily mean that Indians have suddenly become less healthy. It could also reflect an ageing population and greater health awareness, allowing illnesses to be reported more frequently.

VACHASPATI SHUKLA & SANTOSH KUMAR DASH

Private providers dominate: According to the latest NSS estimates, 65.4 per cent of treated non-hospitalised ailments in rural India were managed by private providers. In urban India, the figure was 74.8 per cent. The state-level differences are particularly noteworthy. In rural Odisha, 60.9 per cent of treated ailments were handled by government-run facilities. Tamil Nadu and Chhattisgarh also recorded public health care utilisation above 50 per cent. By contrast, public health care accounted for only 15.8 per cent of treated ailments in rural Punjab and less than one-fourth in several other states. This tells us that public health care utilisation is not simply a function of income or geography. It is not simply a matter of consumer preference — it is a verdict on availability, waiting times, perceived quality and the uneven reach of public facilities. This has major implications for household finances, as treatment in private hospitals requires substantially higher out-of-pocket expenditure.

Unequal health care burden: For a treated non-hospitalised ailment, the average out-of-pocket expenditure in India was ₹304 in rural government facilities and ₹257 in urban government facilities. The corresponding expenditure at private hospitals was ₹1,541 and ₹1,343. These gaps also vary widely across states. In urban areas, treatment at a government hospital cost ₹47 in Tamil Nadu but ₹830 in Bihar; at a private hospital, it ranged from ₹834 in Kerala to ₹3,509 in Bihar. The cost of falling ill depends not only on the provider but on the state — a second layer of inequality.

High cost of hospitalisation: In-patient treatment is far more punishing. The average out-of-pocket expenditure per hospitalisation, excluding childbirth, was ₹31,484 in rural India and ₹38,688 in urban India. But the average expenditure in private hospitals was ₹47,710 in rural areas and ₹54,999 in urban areas, compared with only ₹6,905 and ₹6,032, respectively, in government hospitals. A family facing a large medical bill has limited choices. It may borrow money, postpone other essential expenditures, or sell productive assets. For households already living close to the poverty line, a serious illness can, therefore, become an economic shock from which recovery is difficult. This is the so-called medical poverty trap: Illness reduces a household's economic security, while economic insecurity, in turn, makes it harder to obtain timely and quality health care. This risk is greatest in economically weaker states such as Bihar and Uttar Pradesh, which depend heavily on private care despite lower household incomes.This creates a fundamental policy contradiction. The households that can least afford expensive medical treatment are often the households most dependent on providers who charge considerably more than public facilities.

Insurance is not enough: This is where schemes such as Ayushman Bharat have an important role in improving financial protection. But an insurance card cannot compensate for the absence of a functioning public-health facility nearby. Nor can insurance by itself ensure the availability of medicines, diagnostic services, doctors, and quality primary care. Health care financing and health care delivery must, therefore, be considered together. Health insurance and financing schemes, meanwhile, have expanded. Coverage rose from 14.1 per cent in 2017-18 to 47.4 per cent in 2025 in rural areas; and from 19.1 per cent to 44.3 per cent in urban areas. While this is a substantial change, the reported out-of-pocket medical expenditure remains high. This does not mean that insurance has failed; it means that nominal coverage is not the same as effective financial protection.

Ayushman Bharat and other schemes can reduce catastrophic expenditure only if eligible households know how to use them, if hospitals are available and empanelled, and if covered services match actual needs. The survey's numbers, therefore, point to a broader problem. India has expanded the architecture of health financing faster than it has repaired the everyday capacity of public care.

Way forward: India needs to strengthen public health care at every level, from Ayushman Arogya Mandirs to district hospitals, so that facilities deliver timely, quality care rather than merely exist. The aim is not to eliminate private health care, but to make the choice between public and private genuine. Universal coverage must mean that seeking treatment does not threaten a family's economic survival. Absent this, the private sector will remain the default provider and households will remain the default financiers.

The writers are, respectively, assistant professors at Sardar Patel Institute of Economic and Social Research, and the Institute of Rural Management Anand

Rights as freedoms, not freebies

BOOK REVIEW

NEHA BHATT

Cash transfers and welfare perks have long served as political tools to gain votes, particularly among women. While these measures do offer some tangible relief, their public framing remains problematic. In the book *Freebies or Rights*, economist Reetika Khera sets out to question this framing and raises a crucial question: When the state provides essential services like food, health care, and education, are these political hand-outs or fundamental rights? Can they create more dependency or offer opportunity?

Through this lens, the book introduces readers to social policies and the role of the state in shaping everyday lives. It relies on primary data from field studies since the 2000s, layered with Ms Khera's anecdotes from across rural India and secondary data. The book also draws attention to the lack of social policy departments in our central universities, which has created a vacuum in our understanding of how important it is for true nation-building.

The book investigates the implementation of core government programmes that offer social support to the remotest corners through food security, nutrition, public health, social protection, and employment, including during the Covid-19 pandemic. These include schemes such as maternity benefits, child development services, mid-day meals, the public distribution system, the national rural employment guarantee programme, the national social assistance programme, and public canteens. Many of these schemes that existed during the United Progressive Alliance's time and were renamed under the National Democratic Alliance have not necessarily improved. How successful have these schemes been? Has government funding and coverage increased over the last few decades? Are tech interventions as impactful as they are made out to be? How well has the funding been spent? Ms Khera examines each core policy in detail. Written in a conversational tone, her analysis, layered with plenty of data and illustrative graphs, makes complex social policy accessible and interesting even to a lay reader.

Among her overarching arguments is the worrying development that our social spending may not be going to the right places — and instead, be "funnelled back to corporates and philanthropic-capitalists". She calls attention here to the flagship nutrition programme, POSHAN Abhiyaan, launched in 2018.

In theory, she says, it brought some useful interventions, including mass campaigns to raise awareness and support behaviour change. One of these was to encourage six months of exclusive breastfeeding for an infant. Yet from 2015-16 and 2019-21, this proportion increased only marginally from 55 to 64 per cent. This is because, she argues, a significant amount of funding was used to give smartphones to Anganwadi workers to record their work. Research suggests this perhaps hindered their work — often, these gadgets could not be used due to connectivity issues, and a software system that did not take into account the varying needs of different regions.

Freebies or Rights: Understanding Social Policy in India
by Reetika Khera
Published by Speaking Tiger
408 pages ₹599

Ms Khera also draws our attention to an issue that is not adequately discussed: India's nutrition agenda is increasingly driven by international agencies and development organisations, with a top-down approach. While corporations and philanthropist-capitalists can help with funding, "they also use it to advance their own agendas", she says, such as their business interests and to influence government policies to suit them.

Another major thorn in the social policy landscape is the lack of credible data to understand the real impact of certain social policy schemes. Creating such "data blackholes", says Ms Khera, is an "easy way to suppress failures and create fanciful narratives, or in other words, "to hide realities and avoid accountability".

What is the way forward then? She cites three model states that have done better than others when it comes to implementing social policies and creating lasting impact that we could draw a few lessons from: Tamil Nadu, Odisha, and Himachal Pradesh.

The interventions that have worked in Odisha, for example, are simple yet effective: Including eggs not only in mid-day meals but as part of ration for children under three and pregnant and lactating mothers, ensuring pensions to elderly widows and disabled come on time every month, and maternity benefits reaching a majority — two-thirds of mothers who gave birth in 2021-22. Himachal Pradesh, meanwhile, has fared well in educational levels, with improvements in children's reading, writing, and math skills in government schools. Additionally, the state's efficient and extra nutritious public distribution system that goes beyond the basics is worthy of note. Tamil Nadu, too, is leaps ahead in offering reasonable meals through its system of public canteens and a breakfast scheme in schools.

By opening up key debates in social policy, Ms Khera brings a neglected field of study into light, offering a ripe opportunity to strengthen social protection, equality, and freedom in a way that is not framed as charity, but as basic rights.

Hyundai Motor group to invest $15.5 billion in India over 7 years

SHINE JACOB
Chennai, 13 October

The Hyundai Motor group on Tuesday announced an investment strategy for India, committing $15.5 billion from 2026 through 2032, through companies such as Hyundai Motor India and Kia India.

Hyundai Motor Group Executive Chair Euisun Chung met Prime Minister Narendra Modi in New Delhi on Tuesday to discuss long-term plans.

The initiative positions the country as a strategic core market for the group's growth, emerging market expansion, and next-generation automotive innovation.

The plan entails manufacturing expansion, developing the infrastructure for research & development (R&D), cultivating local suppliers for localising parts, and technology innovation — fostering a comprehensive automotive industry ecosystem in India.

To execute this large-scale investment initiative, the group will establish an investment entity in the country.

"India remains one of the Hyundai Motor group's most important and strategic markets globally. The past 30 years have been defined by our commitment to India. This investment reaffirms our commitment to India for the next 30 years and beyond. Through this investment, we will create more employment opportunities and work together with our partners and stakeholders to support India's continued industrial development," said Chung.

Prime Minister Narendra Modi and Hyundai Motor Group Executive Chair Euisun Chung at the Prime Minister's Office in New Delhi on Tuesday PHOTO: HYUNDAI MOTOR INDIA

The new investment entity group's Indian R&D centre. will coordinate and execute investment across R&D infrastructure, future technologies, and the broader automotive industry ecosystem. Additionally, it will serve as a platform to identify local partners, support strategic partnerships and foster collaboration with local suppliers.

Strengthening automotive ecosystem

The investment goes beyond developing facilities. It will expand capacity across Hyundai Motor India and Kia India to support significant growth in volumes while ensuring localisation to meet India's market demands. This expansion will position India as one of the leading global export platforms for the group.

The group also plans to establish an R&D system in India through infrastructure expansion and cultivating local talent. A key focus is strengthening technological competitiveness through the With a planned investment of approximately $700 million in the R&D centre, including its vehicle-testing track, the group will accelerate next-generation automotive technology development and establish India as a core innovation hub.

The group will strengthen local supply chains and support supplier development through investment in regional partners. These partnerships will enhance localising parts, identify local suppliers, and build a stable, resilient supply-chain ecosystem.

It also aims to lead India's mobility. This includes support for high-potential startups and expansion in new mobility services integrated with its core-vehicle business. The group will also explore opportunities in new business verticals including specialised automotive financing, electric-vehicle charging infrastructure, and end-of-life vehicle recycling.

Hyundai replicating India learnings across global markets: CEO

DEEPAK PATEL
New Delhi, 13 October

Hyundai Motor Company's (HMC's) experience in India, where it has built a broad business ecosystem and is expanding its vehicle portfolio, is serving as a blueprint for the South Korean automobile giant to strengthen its local presence in other markets, its President and Chief Executive Officer José Muñoz said on Tuesday.

While speaking at Bloomberg New Economy Forum 2026, Muñoz stated that companies should not focus excessively on quarterly results when making long-term investment decisions. He said Hyundai had continued with its electrification strategy even as some competitors reconsidered their plans.

"So, India is an example, right? Not all OEMs (original equipment manufacturers) are now in a situation to confidently invest in moments, which are very critical, right? So, in some companies, they focus too much on the quarterly results. In our case, thanks to our executive chair, who is always looking in the long term, so the most important (step) is to stay steady on course. So, for example, most of our competitors have decided to not continue with the electrification," he said.

"We stayed the course, and then we found better solutions like developing robotaxis. In India, about 50 per cent of our vehicles will be electrified by 2030, which is a lot," he added. The 2030 target includes compressed natural gas, hybrid and electric vehicles.

AI investments must be judged by returns, not fear of missing out, says K M Birla

PRESS TRUST OF INDIA
New Delhi, 13 October

Investments in artificial intelligence (AI) should be based on the returns they can generate rather than rushing into adoption with a sense of "FOMO (fear of missing out)", Aditya Birla Group Chairman Kumar Mangalam Birla said on Tuesday.

Speaking at the 2026 Bloomberg New Economy Forum, Birla said now there is a shift from an "AI arms race" for compute and talent to a hard look at returns, and that the group will go "a little more gradually" on AI investments than it had planned a year ago.

"A year ago, we probably thought that AI was a monster sitting there on the last row, and it would eat me up by the time it got here if I didn't know everything about AI," he said, describing the earlier apprehension around the technology.

Companies are now moving towards assessing what AI could deliver and the returns they could earn from investing in it, he added.

Aditya Birla Group Chairman K M Birla said the group will go a little more gradually on AI investments than it had planned a year ago

"I think that we're going to take it a little more gradually than we thought a year ago, because it is a large investment. And I don't think we need to act out of a sense of FOMO," Birla said in a panel discussion.

According to Birla, AI-based applications would vary across businesses, with the technology helping improve customer interactions in some areas, manufacturing efficiency in others, and net interest margins in financial services.

"Also for a company like us, which is multi-business, there is no one cap fits all," he said, adding that the impact of AI on the productivity of an entire organisation was still being assessed.

Drawing a parallel with the earlier excitement around blockchain, Birla said the group had adopted the technology in its fibre business to improve traceability in the textile supply chain.

Consumers and garment manufacturers can scan a label to trace the forests from which cotton or viscose used in a garment was sourced, he said.

On the challenges facing businesses, Birla said capital allocation had become increasingly difficult as companies continued to invest in existing operations while responding to new business opportunities and demands.

"You can't stop growing... You either grow, or you go down. You can't stay in a state of equilibrium," he said.

Moreover, being a global company, it also has to face the impact of geopolitical developments. "When I read about a significant global event in the newspapers, I can be sure that it will impact us somewhere," he said.

The Aditya Birla Group, headed by Kumar Mangalam Birla, operates across more than 20 sectors in 41 countries spanning six continents, employs over 227,000 people and has more than 600 manufacturing units.

No plans of shifting flights from Mumbai to Navi Mumbai before March-end: MIAL

DEEPAK PATEL
New Delhi, 13 October

Adani group-controlled Mumbai International Airport Ltd (Mial) on Tuesday told airlines it did not plan to shift any international flights from Mumbai airport to Navi Mumbai airport until the end of the winter season in March next year, and the transition would be done in consultation with airlines, sources privy to the development told *Business Standard*.

In a statement, the Mial spokesperson said: "Jeet Adani (director of airports) and Arun Bansal (chief executive officer of Adani Airport Holdings) met with the Airline Operators Committee (AOC) of Mumbai Airport today (Tuesday). They have assured the airline community of minimisation of disruption and have assured them of fully respecting historical slots allocations. They have further given a commitment not to disturb any slots for the winter schedule."

Mial said a joint working group would work over the next two weeks to draw up a plan to implement the redevelopment of the ageing infrastructure at Terminal 1.

Mumbai International Airport Ltd said a joint working group would draw up a plan over the next two weeks to implement the redevelopment of the ageing infrastructure at Terminal 1

The airport operator also said that the airlines had committed themselves to supporting the redevelopment and traffic balancing from the summer schedule (starting in March). However, an industry source said that the airlines did not agree with Mial's position that they had committed themselves to supporting the redevelopment and traffic balancing.

The Airline Operators Committee, which represents airlines operating at Mumbai airport, is yet to issue a formal update on the outcome of Tuesday's meeting, sources further said.

The dispute between airlines and the Adani group over the shift began in August, when Mial started discussion on moving around one-third of international services to Navi Mumbai as part of the redevelopment of Terminal 1 at Mumbai airport.

The Adani group runs both the airports.

The issue escalated in early October after Mial asked airlines to shift 265 of the 770 weekly international departures by October 25 and identify the specific flights by October 6.

The Ministry of Civil Aviation subsequently asked Mial to defer the transition and work with the airlines on an approach mutually agreed upon. In the meeting on Tuesday, it was concluded that any transition, if required, would take place only after discussions with the commercial teams of all airlines, sources said.

The airport operator was unable to provide a clear answer when questioned about the passenger traffic currently handled by Terminal 1, according to sources.

Airlines had earlier sought the monthwise capacity-utilisation data for both Terminal 1 and Terminal 2 to understand the rationale for shifting international flights to the new airport. The discussions on Tuesday also covered the safety concerns raised by Mial as a reason for redeveloping Terminal 1.

Note: 1. In the event of failure of physical auction, an e-auction may be conducted by using weblink - https://gold.samil.in
2. Please consider this notice as a prior notice for the next auction in case the proposed auction fails.
3. The auction is subject to certain terms and conditions contained in the bid form, which is made available before the commencement of auction.

Condition for auction- The Bank is not responsible for the quality of gold ornaments. The ornaments shall be auctioned on "as is where is" worth basis. Each bidder shall satisfy itself/himself/herself regarding the description, purity, quality, weight, condition, and value of the gold ornaments before placing a bid. The successful bidder shall pay the full bid amount within 5 working days from the date of the auction/sale. In the event of failure to make payment within the prescribed period, the Bank may cancel the sale and take such further action as it may deem appropriate, subject to the applicable terms and conditions. The Bank reserves the right to change/modify/cancel the schedule the auction without referring a reason. No claim, objection, grievance, or complaint concerning the gold ornaments/items shall be entertained after completion of the auction. The Bank reserves the right, at its sole discretion, to accept or reject any or all bids at any stage and to vary, modify, or waive any condition of sale, subject to applicable law. Participation in the auction and submission of a bid shall be deemed to constitute the bidder's unconditional acceptance of the terms and conditions governing the auction. Each bidder shall be deemed to have considered all applicable taxes, duties, charges, and other relevant factors before submitting a bid. The principle of caveat emptor, meaning "buyer beware," shall apply. Each bidder shall also be deemed to have carefully read and understood the applicable terms and conditions, including any amendments in force at the time of the auction. No objection or complaint shall be entertained after a bid has been submitted. In the event of any inconsistency or discrepancy between the English version of this notice and any translated version, the English version shall prevail.

STREET VIEW

"Loan book quality, capital markets activity, and trading will be very much in focus, as all three may have weakened. Bank stocks need to show that lending growth remains strong and net interest income continues to rise"

Wolf von Rotberg, Equity Strategist, Bank J. Safra Sarasin

IT stocks lead mkts to biggest rally in 4 mths

HCLTech results spark 5.22% surge in IT index, highest in 17 months; FM's remarks on LTCG tax lift sentiment, too

SHILPA RANGARAJAN
Mumbai, 13 October

Domestic equities posted their biggest single-day gains in four months on Tuesday, led by a sharp rally in information technology (IT) stocks after better-than-expected results from HCLTech. Sentiment was also buoyed by a recovery in the rupee and Union Finance Minister Nirmala Sitharaman's remarks that the government was willing to hear stakeholders' views on long-term capital gains (LTCG) tax.

The Nifty 50 rose 1.6 per cent to 22,721.95, while the BSE Sensex gained 1.54 per cent to 73,033.81. Both indices recorded their biggest single-day advances since June 12, making Indian equities Asia's best performers for the session. Forty-six of the Nifty 50 constituents closed higher.

The Nifty IT index surged 5.22 per cent to 29,830.10, its biggest one-day gain since May 12, 2025, with all 10 constituents advancing. HCLTech led the surge, with its shares rising 8.42 per cent, a day after the company reported stronger-than-expected September-quarter results.

The company's net profit rose 21.2 per cent year on year to ₹5,132 crore, while revenue increased 11.5 per cent to ₹35,620 crore. Its operating margin widened to 18.2 per cent, and revenue from advanced artificial intelligence services climbed 78 per cent to $219 million. The rally also reflected a rebound in beaten-down IT stocks after a prolonged spell of pessimism about the sector's prospects amid advances in artificial intelligence. "HCLTech results were in line (with our expectations). The IT pack has been oversold, and it has been holding on to good levels. There was a lot of negativity around IT stocks, so they bounced back very sharply. I'm expecting IT stocks to do really well in the near term," said Somil Mehta, head of retail research at Mirae Asset Sharekhan.

Indian software services companies have also been viewed as a potential beneficiary of the shift towards AI infrastructure investment, as businesses continue to spend on implementing and integrating the technology rather than developing semiconductor hardware themselves.

Developments in China's memory-chip industry added to the rotation in Asian markets. South Korea's Kospi fell 5.46 per cent as shares of SK Hynix and Samsung Electronics slumped 10.09 per cent and 7.39 per cent, respectively. The two companies account for about half of the index and have fallen 16 per cent and 22 per cent, respectively, over the past five trading sessions.

The selloff followed China's ChangXin Memory Technologies (CXMT) announcement that it planned to launch a next-generation server memory chip by the end of 2026, raising concerns about competition in the memory-chip market. CXMT shares fell 2.8 per cent amid fears of a potential supply glut.

"We think the easy money is past," Morgan Stanley's Shawn Kim wrote in a note on the memory-chip cycle. Analysts, however, cautioned that it was too early to conclude that the market was facing oversupply.

Beyond IT, gains were broad-based. The Nifty MidSmall IT & Telecom index rose 2.77 per cent, followed by realty stocks, up 2.46 per cent. Consumer durables gained 1.56 per cent, FMCG advanced 1.40 per cent, automobiles rose 1.23 per cent and metals added 1.15 per cent. Pharma was the only major sectoral index to close marginally lower, slipping 0.01 per cent.

The Nifty Bank gained 1.03 per cent, led by IndusInd Bank, which rose 2.85 per cent, and Yes Bank, up 2.01 per cent. HDFC Bank advanced 1.29 per cent and ICICI Bank gained 1.51 per cent. Among other financial stocks, Bandhan Bank jumped 9.21 per cent following reports that Abu Dhabi-based International Holding Company planned to invest in its promoter, while Shriram Finance rose 6.31 per cent. Investors also drew support from Sitharaman's comments on the debate around LTCG tax and the securities transaction tax (STT). The finance minister said on Tuesday that the ongoing debate was healthy and that she was keen to hear stakeholders' views, offering some hope of a reconsideration of the tax regime.

Mid, smallcap MF assets hit ₹10 trillion

Experts see momentum sustaining

KAIRAVI LUKKA & ABHISHEK KUMAR
Mumbai, 13 October

Mid and smallcap schemes are now a ₹10-trillion segment within the mutual fund (MF) industry, with assets under management (AUM) quadrupling in five years.

This has been driven by strong investor inflows and mark-to-market gains from a sustained broader market rally.

Active mid and smallcap funds had a combined AUM of ₹9.8 trillion at the end of September 2026 compared to ₹2.5 trillion in September 2021. In the same period, their combined share in active equity AUM rose from 19.6 per cent to 26 per cent. Experts see the growth momentum sustaining. The industry currently manages another ₹35,000 crore through passive mid and smallcap funds. Investor appetite for these two relatively high-risk categories has risen over the past four years, buoyed by strong returns.

Interest has picked up further in recent months as the broader market rebounded sharply after March 2026.

In September, smallcap funds saw a record net inflow of ₹9,039 crore, while midcap funds attracted ₹7,835 crore.

So far this year, smallcap funds have seen net inflows of ₹55,300 crore, while midcaps have seen flows of ₹51,295 crore. In comparison, largecap funds have attracted only ₹11,690 crore.

Valuations show a mixed story. While the Nifty Smallcap 250 index, the smallcap benchmark, is currently trading at 30.9 times trailing 12 months (TTM) price-to-earnings (P/E), it is at a premium to its five-year average P/E of 28.2 times. It remains lower than its 10-year average of 34 times. However, at 30.6 times P/E for the midcap benchmark, the Nifty Midcap 150 index, it is still cheaper than its five-year and 10-year averages of 33.5 times and 36.9 times respectively. The Nifty 50 is trading at 20.1 times P/E, lower than its five- and 10-year average price to earnings ratios. Yet, money managers are not too keen to write off small and midcap indices.

Vipul Bhowar, executive director and head of equities at Waterfield Advisors, said he doesn't expect flows into mid and smallcaps to moderate soon. "Despite elevated valuations, we believe valuations remain reasonable relative to growth. These are also segments where companies have invested meaningfully in growth over the past three years, and that investment is now beginning to pay off," he said.

Sebi proposes tighter scrutiny of IPO proceeds

KHUSHBOO TIWARI
Mumbai, 13 October

The Securities and Exchange Board of India (Sebi) on Tuesday proposed a stricter framework for monitoring how listed companies use money raised from the public. Monitoring agencies would report directly to stock exchanges, and defaulting firms could face fines and, freezes on promoters' dematerialisation (demat) accounts.

The market regulator issued a consultation paper on Tuesday on recommendations from a working group set up to review the Listing Obligations and Disclosure Requirements (LODR) Regulations, 2015.

The working group, chaired by V S Sundaresan, a former executive director of Sebi, has recommended making the appointment of a monitoring agency mandatory for all issuances regardless of size, excluding the offer for sale (OFS) portion.

Under the proposals, if a listed entity does not cooperate, the monitoring agency would file its report on the best available information, along with a "statement of non-cooperation".

Relaxation on fresh issue revisions extended

Sebi has extended its relaxation allowing companies to revise the size of fresh issues until March 31, 2027, according to a communication sent to the Association of Investment Bankers of India (AIBI). Under the relaxation, companies planning initial public offerings (IPOs) can increase or decrease the size of their fresh issue by up to 50 per cent without filing fresh draft offer documents with Sebi. FPI outflows top record ₹3 trn in CY26, nearly double 2025 tally

DEEPAK KORGAONKAR & PUNEET WADHWA
Mumbai/New Delhi, 13 October

Foreign portfolio investors (FPIs) have pulled out a record ₹3.08 trillion ($32.73 billion) of Indian equities in nine months of calendar year 2026 (CY26) — nearly double the ₹1.66 trillion withdrawn in CY25. Their net investment totaled ₹427 crore in CY24.

Foreign investors have been net sellers in the secondary market, withdrawing ₹3.64 trillion ($38.69 billion) through October 12, according to data from the National Securities Depository Ltd. The primary market, however, attracted net inflows of ₹ 56,485 crore ($5.97 billion) during the same period, reflecting continued appetite for new share issuances even as funds exit listed stocks.

The 2026 pullout, analysts said, comes amid rising US bond yields that recently breached the 5.2 per cent mark, a global rally in artificial intelligence (AI) stocks and concerns over high crude oil prices amid the West Asia war.

The selling pressure, in fact, has intensified in recent months. After offloading equities worth ₹35,861 crore in September, FPIs sold another ₹47,417 crore through October 12, indicating that foreign outflows remain unabated.

Global money is chasing the AI and semiconductor trade in the US, Taiwan and Korea, according to Jignesh Desai, chief executive officer, institutional equities, Centrum Broking. India has little to offer on that front, so it has become the market FPIs sell to fund positions abroad.

"The weak rupee is adding to it, as it cuts dollar returns. Valuations still look rich for the earnings growth, and high crude and US yields have added to the worry. Strong SIP [systematic investment plan] flows have also made exiting easy, because FPIs can sell in size and the market holds up," Desai said.

Sustained selling by foreign investors is weighing on domestic equities, with the benchmark Sensex and Nifty 50 down 15.60 per cent and 14.4 per cent, respectively, this year.

Domestic institutional investors (DIIs), meanwhile, have continued to buy, acting as a counterweight to foreign selling. Their cumulative net investment in equities has reached ₹6.83 trillion so far in CY26, according to the latest data. For comparison, DIIs recorded net inflows of ₹5.26 trillion in CY24 and ₹7.88 trillion in CY25, highlighting the scale of domestic institutional buying this year.

Speedy exit

The road ahead

The sharp rise in US Treasury yields has made American debt more attractive to foreign investors, reducing the appeal of riskier emerging-market assets such as Indian equities, analysts said. The yield on the US 10-year Treasury bond has climbed above 5.2 per cent, providing investors with higher returns from a relatively low-risk asset.

"From the FPI perspective, pulling money out of India is rational since the risk-free return from the 10-year US bonds breached the 5.2 per cent mark recently. So long as the US bond yields remain elevated, FPIs will continue to sell," said V K Vijayakumar, chief investment strategist at Geojit Investments.

High crude oil prices (Brent is testing the $100-a-barrel mark) have added to the pressure, raising concerns over India's macroeconomic outlook and corporate earnings.

THE COMPASS | DECODING MARKET DIRECTION

Upgrades for Info Edge hinge on profitability gains at 99acres

DEVANGSHU DATTA

The business update from Info Edge India, which operates jobs portal Naukri, for the second quarter of the financial year (Q2FY27) was broadly in line with consensus estimates and most analysts are positive on the stock. Info Edge's standalone billings grew 12.8 per cent year-on-year in Q2FY27. Adjusting for renewal timing differences, the company's management estimates that underlying standalone billings growth in Q2 would be about 14-15 per cent Y-o-Y.

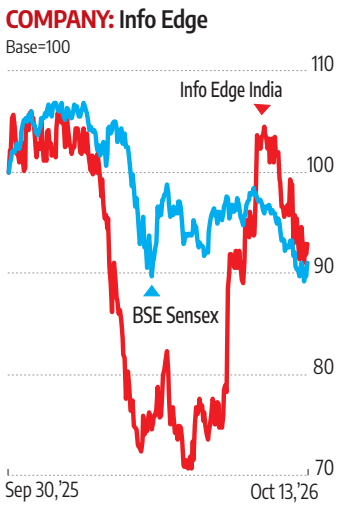
Recruitment billings fluctuate based on renewal timing, as some clients renew early while others push into the following quarter. Info Edge's Q1FY27 billings growth was 15 per cent, but timing adjustments pushed growth to 17.5 per cent. H1FY27 billings grew 14.9 per cent Y-o-Y. Over longer periods such as two quarters, timing effects even out. Billings were driven by premiumisation with business-to-business AI products like AI-Rex and Talent Pulse, leading to more sign-ups and revenue contributions.

Billings by 99acres, Info Edge's real estate bookings website, grew 21.2 per cent Y-o-Y in Q2FY27, compared with 16.5 per cent Y-o-Y in Q1FY27. The platform's share of traffic was estimated to be stable. Jeevansathi, the company's matrimonial website, grew 18.4 per cent and Aisle, the dating app, grew 40.0 per cent, leading to total matchmaking billings growth of 23.1 per cent Y-o-Y. Education portal Shiksha's traffic is under pressure and billings are down 27 per cent, as the spread of artificial intelligence in education eats into referrals to the platform. Shiksha has introduced new offerings to move away from search, which is the most directly affected by AI. The transition will take time, and billings growth may be under pressure in the interim.

99acres' billings growth in Q2FY27 brought it close to breakeven. Naukri's billings hit ₹613.8 crore in Q2FY27, marking a slight slowdown. The billings of other verticals declined 2.3 per cent Y-o-Y to ₹60 crore compared to a 6.7 per cent Y-o-Y decline in Q1FY27. Across all platforms and verticals, billings rose 12.8 per cent Y-o-Y to ₹822.3 crore, more or less in line with consensus.

Overall, the updates may not change investors' perspective on Info Edge much, though the consensus continues to be positive.

COMPANY: Info Edge



Earnings upgrades could be driven by the traction in 99acres (and to some extent by billing growth in the matrimonial platforms) with the real estate platform edging closer to breakeven. The decline in Shiksha's traffic and billings is not a surprise and it is unlikely to shift the needle given that the website's revenue contribution and that of other smaller verticals are relatively low.

Real estate achieved strong billings growth. Management noted that the share of category traffic was stable, with a web time-share of 49 per cent and app time-share of 59 per cent for July and August 2026. Q4FY26 billings by 99acres were impacted by internal changes, including in the sales organisation, and tighter invoicing and process controls. Management called it "a one-time transitional impact on 4Q billings" and expects growth to recover in FY27.

Actual results and detailed management commentary will clarify the situation for investors. Post Q1FY27, it was assumed that the operating profit margin could be sustained above 42 per cent for FY27 due to lower costs and better operating leverage. That guidance could be hiked.

There are other questions. For instance, Naukrigulf, the company's online job search platform focused on the Gulf Cooperation Council region, and the impact of the West Asia conflict would be of interest. 99acres' growth has improved after the acquisition of housing.com by Aurum PropTech. Guidance for Q1FY27 included a projection that cash profits would be achieved in FY27, with a medium-term target of 30 per cent margins, assuming billings growth was sustained above 20 per cent. An update (since billings did grow at over 20 per cent) could be useful.

Also, after Q1FY27, management said it did not view AI as a disintermediation risk for recruitment, real estate, or matchmaking, citing proprietary data and two decades of domain knowledge as counterbalances. The Street would like clarity on this and the outlook going forward.

However, while the actual results and guidance will be useful, the Q2FY27 updates were more or less in line with expectations. Hence, analysts have made minor adjustments to their earnings and valuations, while the consensus on the stock remains positive. Most analysts have made small upgrades to operating profit margins and earnings expectations driven by 99acres and Jeevansathi/ Aisle.

Stock risks could come from the company's investments in listed companies (Eternal, Policybazaar, Shiprocket), which provide a significant component of Info Edge's valuation. The overall investment portfolio spans over 130 companies with invested capital of ₹5,000 crore plus. That portfolio's performance is not yet known.

Robust services revenue growth, better-than-expected margin performance, and steady guidance helped shares of HCLTech, the country's third-largest information technology services company by market capitalisation, gain 8.28 per cent on Tuesday.

Healthy new deal wins and traction in its artificial intelligence (AI) business also lifted investor sentiment. The stock was the top gainer in both the Nifty 50 and the Sensex, closing at ₹1,321. Driven by the services and engineering research and development (ER&D) segments, the company reported quarter-on-quarter (Q-o-Q) revenue growth of 2.3 per cent in constant currency terms to $3.7 billion. The services business, which accounts for three-fourths of revenue, grew 3 per cent sequentially, including inorganic contributions from HPE's telecommunications (telecom) solutions business and Jaspersoft.

While inorganic growth contributed 97 basis points (bps) to overall revenue growth, the growth rate excluding acquisitions was 2.3 per cent. The ER&D business grew a robust 4.1 per cent, supporting overall growth. The product business, however, weighed on the top line, with revenue declining 5.8 per cent.

Management raised its revenue growth guidance for 2026-27 (FY27) to 2.5-4 per cent from 1-4 per cent and its services revenue growth guidance to 3-4.5 per cent from 1.5-4.5 per cent, both in constant currency terms. The organic growth midpoint remains broadly unchanged, with the 50 bps increase in the overall guidance driven by inorganic contributions.

According to HDFC Securities, the guidance implies no acceleration in the second half of FY27, as management refrained from extrapolating a few weeks of strong demand amid a fluid business environment.

Even as the macroeconomic (macro) environment remained uncertain, the deal pipeline remained healthy, with the company reporting net new bookings of $3.3 billion for the quarter. This was 35 per cent higher sequentially and 27 per cent higher year-on-year, marking the second-highest quarterly bookings figure and the company's strongest first half to date.

The $1.14 billion mega deal, won in July, is expected to start contributing in the first quarter of 2027-28 (FY28), rather than the third (October-December/Q3) or fourth quarter (January-March/Q4) of FY27, which provides revenue visibility. The company indicated that demand remained healthy, with a broad-based pipeline across verticals and geographies, although management remained cautious amid volatile external conditions.

According to Axis Securities analysts Kuber Chauhan and Abhishek Bhalotia, the outlook is supported by a healthy deal pipeline across business verticals, continued AI implementation, and strategic partnerships. The brokerage believes HCLTech is well positioned for a stronger recovery following its restructuring initiatives and as AI adoption broadens across business verticals, provided the macro environment remains stable. It has a "buy" rating on the stock, with a target price of ₹1,360.

Alongside healthy deal bookings, margin performance also exceeded estimates. The earnings before interest and tax (Ebit) margin rose to 18.1 per cent, up 130 bps Q-o-Q and 70 bps from a year earlier. The improvement was well above estimates and was driven by gains of 73 bps from AI efficiencies and Project Ascend, 50 bps from operating leverage, 32 bps from higher-margin advanced AI revenues, and 23 bps from foreign exchange gains.

These gains were partly offset by headwinds of 25 bps from the HPE telecom acquisition and 22 bps from restructuring costs.

Go beyond riskometer when buying bonds

SANJAY KUMAR SINGH

The Securities and Exchange Board of India (Sebi) has introduced a credit riskometer for debt securities. The colour-coded display aims to help investors assess credit risk. While the riskometer provides a starting point, most investors should look beyond it when assessing a bond.

How the meter works
The credit riskometer maps ratings from AAA to D to six levels, from lowest credit risk to very high default risk. In cases where a bond has multiple ratings, the riskometer reflects the lowest one. Unsecured bonds display "unsecured" in bold red. "A graphic, colour-based representation of ratings will allow investors to visually compare the risk between two bonds," says Ankit Gupta, founder director, BondsIndia.

"It will help those unfamiliar with rating symbols and terminology or lacking the expertise to conduct an in-depth credit assessment," says Shubham Gupta, cofounder and CEO, Growthvine Capital.

Recognise its limits
The meter reflects ratings, but does not capture every risk a bond carries. "Bonds with the same colour may differ in repayment terms and issuer strength," says Vishal Goenka, cofounder, IndiaBonds. The riskometer also does not reflect interest rate risk. "The display shows where a rating stands today, but cannot predict where it will stand tomorrow," says Prashant Mishra, founder and CEO, Agnam Advisors. In the past, many issuers held top-tier ratings shortly before they defaulted.

Guard against downgrades
Treat the riskometer and ratings as a minimum check. Ankit Gupta suggests reading the rating rationale for a fuller perspective on all the risks a bond carries.

"Watch market signals, which usually move before rating agencies," says Mishra. Treat a negative outlook or a rating watch as warnings. Limit each issuer to 5-10 per cent of the bond portfolio. Remember that a bond with a shorter tenure is safer as it means there is less time for things to go wrong.

Dealing with rate risk
Longer-maturity bonds fall more when rates rise. Match maturity to your horizon. "Interim prices matter less if you hold the bond to maturity," says Goenka.

Allow for limited liquidity
Corporate bonds can become illiquid, particularly during periods of market stress. "Higher-rated bonds generally offer better liquidity," says Goenka. Diversify investments to mitigate individual bonds' liquidity risk.

Compare yields
Compare the yields offered by similar bonds. "A higher yield, particularly as compared to another paper having the same rating or colour, signals that the market perceives greater risk," says Joydeep Sen, financial market expert, corporate trainer and author.

Scrutinise issuer's finances
Check whether the company can repay debt from the cash it generates or depends on fresh borrowing. Persistent negative operating cash flows are a sign of trouble.

For operating companies, check debt to earnings before interest, tax, depreciation and amortisation. A ratio above four to five times needs a good explanation. "Interest coverage below two times warrants caution, and below 1.5 times signals danger," says Mishra. Be wary of companies that borrow short term to fund long-term loans. Such asset-liability mismatches have led to several defaults in the past.

Avoid bonds if auditors resign or qualify accounts, results are delayed, or the company gives large loans to or provides guarantees for group companies. "Covenant breaches and frequent rating downgrades should prompt closer scrutiny," says Shubham Gupta.

Run background checks
Check the track record of the promoter and the business group. A Google search can reveal adverse events or wrongdoing. "Lay investors unable to conduct due diligence should invest through a professional manager of a mutual fund, portfolio management service or alternative investment fund," says Sen.

What each colour of riskometer indicates

Colour	Long-term rating	Short-term rating	Risk level
Green	AAA	A1+	Lowest credit risk
Chartreuse	AA+, AA, AA-	A1	Very low credit risk
Neon yellow	A+, A, A-	A2	Low credit risk
Caramel	BBB+, BBB, BBB-	A3	Moderate credit risk
Dark orange	BB+, BB, BB-	A4+	Moderate risk of default
Red	B+, B, B-, C+, C, C-, D	A4, D	High to very high risk of default

Buying property in a relative's name? Check laws, tax risk

Buying a house in a spouse's, child's or parent's name can attract scrutiny if the person funding the purchase differs from the registered owner. The source of money, ownership structure and actual beneficiary determine whether the arrangement complies with the law.

The Prohibition of Benami Property Transactions Act, 1988, provides exceptions for certain family purchases. Property bought in a spouse's or child's name using the purchaser's known sources may qualify. Certain joint purchases involving siblings, parents or children are also covered, subject to statutory conditions, including the funder being named as a joint owner.

Buying property in the name of a spouse, child or other family member is not illegal in itself, said legal experts. However, a family relationship does not provide blanket protection.

If the source of investment cannot be explained, tax authorities may examine it as "unexplained". A transaction established as benami can lead to attachment and confiscation of the property, penalties and prosecution.

What buyers should maintain
- Sale deed and ownership records reflecting the intended ownership.
- Bank statements and payment records establishing the source of funds.
- Income tax returns showing the funder's financial capacity.
- Gift deeds or loan agreements, with supporting records.

NOTICE TO SHAREHOLDERS FOR RE-LODGEMENT OF TRANSFER REQUESTS OF PHYSICAL SHARES

Pursuant to the SEBI circular No. SEBI/HO/MIRSD/MIRSD-PoD/P/CIR/2025/97 dated 2nd July, 2025 and SEBI circular No. SEBI/HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated 30th January, 2026, Shareholders of the Company are hereby informed that a Special Window has been opened for a period of one year from 5th February, 2026 till 4th February, 2027 (period), for re-lodgement of transfer and dematerialisation ("demat") of physical securities which were sold/ purchased prior to April 01, 2019. The special window shall also be available for such transfer requests which were submitted earlier and werere rejected/ returned/ not attended due to deficiency in the documents/ process/ or otherwise. In case of death of transferee as per the executed transfer deed, legal heir(s) can claim the securities with all required documents as per the specified transmission procedure. After the transfer, if a fraud is detected during the one-year lock-in period, the lock-in shall continue on the related securities till further intimation.In such cases, securities so locked-in shall be released only in favour of the claimant as per order from competent court for release of securities.

The securities so transferred shall be mandatorily credited to the transferee only in demat mode and shall be under lock-in for a period of one year from the date of registration of transfer and Such securities shall not be transferred/ lien-marked/ pledged during the said lock-in period. Cases involving disputes between transferor and transferee will not be considered in this window and may be settled by transferor and transferee through court/ NCLT process, Further, securities which have been transferred to Investor Education and Protection Fund (IEPF) shall not be considered under this window for processing.

Eligible shareholders may submit their transfer requests along with the requisite documents to the Company's Registrar and Share Transfer Agent (RTA) at MUFG Intime India Private Limited, C-101, 247 Park, Lal Bahadur Shastri Marg, Surya Nagar, Gandhi Nagar, Vikhroli West, Mumbai, Maharashtra - 400083, India, Contact 022-49186000 E-mail: mumbai@in.mpms.mufg.com.During this period, the securities that are re-lodged for transfer (including those requests that are pending with the company/ RTA, as on date) shall be issued only in demat mode, once all the documents are found in order by RTA. Conditions to be fulfilled by the investor/transferee: The transferee shall be mandatorily required to submitthe following documents : 1. Original securitycertificate(s), 2. Transfer deed executed prior to April 01, 2019, 3. Proofof purchase by transferee, as may be available, 4. KYC documents of the transferee (as per ISR forms), 5. Latest Client Master List ('CML'), not older than 2 months, of the demat account of the transferee, duly attested by the Depository Participant, 6. Undertaking cum Indemnity as per the format at Annexure-A.

UPDATE KYC AND CONVERT PHYSICAL SHARES INTO DEMAT MODE

The shareholders who are holding shares in physical form are requested to convert their physical share certificates into dematerialized Form (in electronic form).

That the above named borrower(s) have failed to maintain the financial discipline towards their loan account (s) and as per books of accounts maintained in the ordinary course of business by the Company, Column D indicates the outstanding amount.

Due to persistent default in repayment of the Loan amount on the part of the Borrower(s) the above said loan account has been classified by the Company as Non Performing Asset (as on date in Column C) within the guidelines relating to assets classification issued by Regulating Authority. Consequently, notices under Sec. 13(2) of the Act were also issued to each of the borrower.

In view of the above, the Company hereby calls upon the above named Borrower(s) to discharge in full his / their liabilities towards the Company by making the payment of the entire outstanding dues indicated in Column D above including up to date interest, costs, and charges within 60 days from the date of publication of this notice, failing which, the Company shall be entitled to take possession of the Mortgaged Property mentioned in Column B above and shall also take such other actions as is available to the Company in law.

Please note that in terms of provisions of sub - Section (8) of Section 13 of the SARFAESI Act, "A borrower can tender the entire amount of outstanding dues together with all costs, charges and expenses incurred by the Secured Creditor only till the date of publication of the notice for sale of the secured asset(s) by public auction, by inviting quotations, tender from public or by private treaty. Further it may also be noted that in case Borrower fails to redeem the

NOTICE OF POSTAL BALLOT & REMOTE E-VOTING TO MEMBERS

Members of Info Edge (India) Ltd., ("the Company") are hereby informed that pursuant to Sections 108 and 110 of the Companies Act, 2013 read with Companies (Management and Administration) Rules, 2014, Secretarial Standard on General Meetings ('SS-2') issued by the Institute of Company Secretaries of India, General Circular No. 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs, Government of India (the 'MCA'), read together with previous circulars issued by MCA in this regard (collectively referred to as 'MCA Circulars') and Regulation 44 of Securities and Exchange Board of India (Listing Obligations & Disclosure Requirements) Regulations, 2015 (including any statutory modification or re-enactment thereof for the time being in force), the Company seeks approval of the Members through Postal Ballot process by way of Remote E-voting in respect of the following resolutions as set out in the Postal Ballot Notice ('Notice') dated September 14, 2026, circulated to the Members:

S.No	Description of Resolution	Type of Resolution
1.	Appointment of Mr. Himanshu Agarwal (DIN: 06672915) as a Whole-time Director designated as Whole-time Director and Chief Financial Officer of the Company	Ordinary
2.	Appointment of Mr. Naresh Chand Gupta (DIN: 00172311) as a Non-Executive, Independent Director of the Company	Special

The Company has duly sent and completed the dispatch of Notice on Tuesday, October 13, 2026, by e-mail only, to the Members on their registered e-mail addresses, seeking their consent on the resolutions set out in the Notice. The said Notice is also available on the Company's website at www.infoedge.in, website of the Stock Exchanges at www.bseindia.com and www.nseindia.com and on the website of MUFG Intime India Private Limited, Registrar and Share Transfer Agent of the Company ('RTA') at instavote.linkintime.co.in. The Members may also download the same from the above mentioned websites.

The Members of the Company, holding shares either in physical form or in dematerialized form, as on cut-off date i.e. Friday, October 9, 2026 may exercise their votes electronically and provide their assent or dissent on the resolution as set out in the Notice and a person who is not a Member as on cut-off date should treat this Notice for information purpose only. The Company has engaged the services of RTA, as the agency to provide Remote E-voting facility.

Remote E-voting period commences on Wednesday, October 14, 2026 (at 9:00 A.M. IST) and ends on Thursday, November 12, 2026 (at 5:00 P.M. IST) (both days inclusive). Remote E-voting module shall be disabled by RTA after 5:00 P.M. IST on Thursday, November 12, 2026. Remote E-voting shall not be allowed beyond the date and time mentioned above.

Once a vote on a resolution has been cast by the Member, he/she shall not be allowed to change it subsequently or cast the vote again on the said resolution. The detailed procedure/instructions for Remote E-voting are contained in the Notice.

In terms of the MCA Circulars, the Company has sent Notice in electronic form only and physical copy of the Notice and postal ballot form has not been sent to the Members for the Postal Ballot process. Accordingly, the communication of the assent or dissent of the Members would take place through the Remote E-voting system only. The notice of the Postal Ballot contains the instructions regarding the manner in which the Members can cast their vote through remote E-voting.

The Members, who are holding shares in physical/electronic form and whose email addresses are not registered, shall register their email Id with the Company's RTA/ their respective Depository Participants. The Members who have not updated their KYC details, are requested to submit Form ISR-1 and other relevant forms to update KYC details including email Id to the Company's RTA. Members holding shares in demat form can update their KYC including e-mail address with their Depository Participants. Those Members who have already registered their e-mail addresses are requested to keep their e-mail addresses validated with their DPs/RTA to enable servicing of communication and documents electronically.

Mr. Rupesh Agarwal, Managing Partner, failing him, Mr. Shashikant Tiwari, Partner, failing him, Mr. Mohit Varshney, Partner, M/s Chandrasekaran Associates, Company Secretaries has been appointed as the Scrutinizer to conduct the Postal Ballot through Remote E-voting process in a fair and transparent manner.

The resolutions, if passed by requisite votes, shall be deemed to have been passed on the last date of Remote E-voting i.e. Thursday, November 12, 2026. The results of the Postal Ballot will be declared at the Registered Office/Corporate Office of the Company within prescribed statutory timelines, and also be displayed on the website of the Company i.e. www.infoedge.in and the website of RTA i.e. instavote.linkintime.co.in. The results will also be intimated to the Stock Exchanges where the Company's equity shares are listed.

In case of any queries, you may refer the Frequently Asked Questions (FAQs) for shareholders and E-voting user manual for shareholders available at instavote.linkintime.co.in. Any Member having any grievance pertaining to the Postal Ballot/Remote E-voting processes or who have not received Postal Ballot Notice may write to Ms. Jaya Bhatia, Company Secretary at Corporate Office of the Company or at investors@naukri.com or contact at +91-120-3082000 or contact RTA by e-mail at enotices@in.mpms.mufg.com or investor.helpdesk@in.mpms.mufg.com or call on: 022-49186000.

HDFC Bank's succession planning route offers tips for major lenders and non-banks

RAGHU MOHAN
New Delhi, 13 October

The move by HDFC Bank to add one more whole-time director (WTD) to its board, taking its strength to five, may light up a route for domestic systemically important banks, or D-SIBs, and upper-layer shadow lenders to create a leadership pipeline, experts said.

In a bourse filing on September 12, HDFC Bank explained its rationale for the step — "in order to have sharper synergy and oversight, including on the bank's subsidiaries, as well as to have a larger pipeline for succession planning". This builds on the Reserve Bank of India's (RBI's) 2023 stipulation that private banks must have at least two WTDs, including the managing director (MD) and chief executive officer (CEO), on their boards.

"The idea of creating a pool of WTDs for regulated entities (REs) will give executives exposure to the challenges and opportunities around strategy, governance, regulatory, legal, audit, and compliance at the board level," said Rajesh Narain Gupta, founder and chairman, SNG & Partners, a law firm. "This will give a 360-degree perspective on running the organisation and add significant value to the business leader and CEO in making."

WHOLE-TIME DIRECTORS (WTDS) IN PRIVATE BANKS HAVE BECOME AN INDUSTRY-WIDE TALENT POOL, MIRRORING STATE-RUN UNDERTAKINGS MODEL WHERE A WTD FROM ONE INSTITUTION CAN TRANSITION TO LEAD ANOTHER

The big moves

Of late, succession planning in banks has hit the headlines with corner-office occupants moving on all of a sudden.

In the case of HDFC Bank, a D-SIB, wholesale changes at the top of its batting order came about after its MD & CEO Sashidhar Jagdishan announced in August that he was quitting. Kaizad Barucha, the deputy MD spoken of as a successor, was handicapped by the RBI's 15-year cap (as a WTD, or 70 years, whichever is earlier; this also applies to MDs & CEOs of private banks). He was appointed to the board as WTD in 2013.

V S Rangan's term as executive director (ED) was to end in November 2026 even as a successor to Bhavesh Zaveri, who retired as ED earlier in April this year, remained undecided. Nomination and remuneration committee members Sandeep Parekh and D Ranganathan, too, were near their term-limits (January 2027). Since then, of course, Anup Bagchi has been appointed boss at HDFC Bank; Rangan is now a WTD along with Jimmy Tata.

Earlier, there were sudden exits of Sumant Kathpalia at IndusInd Bank and Srikrishnan Hari Hara Sarma at Karnataka Bank. At Kotak Mahindra Bank, here was a change of guard after its MD and CEO, Ashok Vaswani, decided not to seek reappointment on the completion of his term on December 31, 2026. Vaswani assumed office on January 1, 2024, for a three-year term approved by the RBI in October 2023. Anup Kumar Saha has received RBI's approval to take over as MD & CEO for a three-year term starting January 1, 2027.

The WTD route is now being looked at afresh to create leadership strength.

Strategic dividend

"Operating as a D-SIB and given its vast post-merger balance sheet, HDFC Bank may want to revisit its executive architecture," said Nitin Potdar, a senior corporate lawyer and founder of Chambers of Nitin Potdar. "Given the RBI's stringent mandate for microscopic governance, elevating multi-vertical risk, IT, and compliance functions, adding a fifth WTD seems fully justified."

Crucially, this expansion yields a vital strategic dividend: "It structurally broadens the bank's internal bench of board-level talent, ensuring a robust, cross-functional pool of future MD & CEOs who can navigate strict regulatory tenure caps."

"HDFC Bank's move highlights a critical regulatory objective. When the RBI prescribed the WTD guidelines for private banks in 2023, it intended to build a deeper institutional bench, not just solve for one-off succession," observed Ravi Duvvuru, a member of the RBI's advisory group on regulation and founder and designated director, Duvvuru & Reddy LLP.

"Broad adoption of WTDs creates a mature executive market where leaders are thoroughly tested in risk, compliance, and governance before taking the helm."

How many WTDs are enough? "While HDFC Bank may merit having five WTDs due to its size and scale, it may not be the case with every other bank," said R Gurumurthy, who serves on the boards of Axis Capital and Religare and is former head-governance at RBL Bank.

It's worth noting that the RBI also requires at least half the attendees in a board meeting to be independent directors (IDs).

How do you get top-class IDs onboard?

The remuneration paid to them is not commensurate with the time spent on the board, although the RBI has hiked the fixed remuneration ceiling to ₹30 lakh annually, with sitting fees on top. One route, suggested Divyanshu Pandey, founder at C B Pandey & Associates, "Is to go back to the core and groom a second level of management of those who did not qualify to rise to senior positions in a bank, but have great knowledge to be appointed as an ID."

Good for business

A larger pool of whole-time directors can:

- Give sharper synergy and oversight, including on subsidiaries
- Create a deeper pipeline for succession planning
- Give exposure to business executives to board-level challenges and opportunities
- Build a robust, cross-functional pool of future MDs & CEOs who can navigate strict regulatory tenure caps

Industry-wide talent pool

There is one more facet to what HDFC Bank has done. The new WTD will be in charge of the bank's subsidiaries. This mirrors the position at the State Bank of India (SBI), which has a dedicated MD to look after its subsidiaries. It also tells you where we are now: The larger banks are financial conglomerates (SBI being the first to answer to such a profile) with business lines cutting across mutual funds (MFs), insurance, and investment banking (i-banking).

Seen in this context, WTDs in private banks become an industry-wide talent pool, mirroring the state-run undertakings model where a WTD from one institution can seamlessly transition to lead another.

That leads us to another aspect: The RBI's four-tier scale-based regulatory (SBR) approach, which was introduced to cut out arbitrage between banks and non-banking financial companies (NBFCs) as it was seen as being detrimental to orderly growth and systemic stability.

The layers are: Base (NBFCs with assets of ₹1,000 crore and below); middle (assets of ₹1,000 crore and above); upper (to be specifically identified); and top (to be left empty, unless the banking regulator feels an NBFC poses potential systemic risk).

The idea behind this architecture is that it enhances transparency and governance while not burdening them with higher-level regulations.

Now, the upper-layer NBFCs are financial conglomerates too and, like the bigger banks, have interests in MF, insurance, and i-banking. In March this year, the agenda of a Department of Financial Services meeting on NBFCs, chaired by then finance secretary, M Nagaraju, included the following: "governance reforms to include better leadership rotation" and "clarity on NBFCs as potential banks".

Is there a case for upper-layer NBFCs to have more WTDs?

"As a good practice, it will be desirable for upper-layer NBFCs to have multiple WTDs. It will give them exposure and increase the bench strength for future elevation. In case making multiple WTDs is not possible they could be made permanent invitees to the board," said Vimal Bhandari, chairman of HDFC Mutual Fund Trustee Company and an ID on the board of Escorts Kubota's, having served RBL Bank in a similar capacity.

"This will give them a perspective on how a board works and sensitise them to leadership expectations; as and when possible, they could be appointed WTDs". And "at a time when the leadership pool across regulated entities needs to be widened, such an approach can create bench strength who can move across REs."

Simply put, you can create a talent pool at the firm- and systemic level.

Other banks

That said, Gurumurthy pointed to the fact that "given that external CEOs are probably chosen more often now, it may be better to consider this bench as a potential pipeline for CEOs of other banks too".

"While it may not necessarily form the pool for choosing an MD & CEO, it will most certainly be the one if anyone is needed to occupy that chair on an emergency basis. It's a good training ground for a future CEO role though, certainly," said Gurumurthy.

POSTAL BALLOT NOTICE

Notice is hereby given to the Members of Ganges Securities Limited **('Company')**, pursuant to Section 108 and 110 and other applicable provisions of the Companies Act, 2013 ('Act') and Rules made thereunder **('Rules')**, Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 **('Listing Regulations')**, Secretarial Standard on General Meetings issued by the Institute of Company Secretaries of India **('SS-2')** read with the guidelines prescribed by the Ministry of Corporate Affairs **('MCA')** for holding general meetings/ conducting postal ballot process through e-voting vide various general circulars issued by MCA **('Circulars')**, including any statutory modification(s) or amendment(s) or re-enactment(s) thereof for the time being in force and), approval of the members of the Company' is being sought for the following Resolution by way of Postal Ballot through remote e-voting process **('remote e-voting')** only.

S. No	Description of Resolution	Type of Resolution
1.	Approval of Material Related Party Transaction(s) of the Company.	Ordinary

In accordance with the aforesaid Circulars, the Company has sent the Postal Ballot Notice along with the Explanatory Statement thereof on Tuesday, October 13, 2026, in electronic form only to those Members whose email addresses are registered with the Company/RTA/Depository Participants (DP) and whose names appeared in the Register of Members/List of Beneficial Owners as received from MUFG Intime India Private Limited (formerly known as Link Intime India Private Limited) the Company's Registrar and Transfer Agent **('RTA')** / Depositories as on Friday, October 09, 2026 **('Cut-Off date')**.

The Company has engaged the services of National Securities Depository Limited **('NSDL')** to provide remote e-voting facility to its members and the communication of assent or dissent of the Members would only take place through the remote e-voting system.

The Postal Ballot Notice is also available on the website of the Company at www.birla-sugar.com, the website BSE Limited at www.bseindia.com and National Stock Exchange of India Limited at www.nseindia.com on which the Equity Shares of the Company are listed and on the website of NSDL at www.evotingnsdl.com.

Remote E-Voting Schedule:

Commencement of e-voting:	End of e-voting:
Wednesday, October 14, 2026 at 09:00 A.M. (IST)	Friday, November 13, 2026 at 05:00 P.M. (IST)

The remote e-voting module shall be disabled by NSDL thereafter and Members will not be allowed to vote electronically beyond the said date and time. Voting rights of the Members shall be in proportion to the shares held by them in the paid-up equity share capital of the Company as on Cut-off date. Once vote on the Resolution is cast, the Member will not be able to change it subsequently. Only those Members whose names are recorded in the Register of Members of the Company or in the List of Beneficial Owners as on the Cut-off date will be entitled to cast their votes by remote e-voting.

Members who hold the shares in physical mode and have not registered/updated their e-mail address with the Company, can register/update the same by sending email to kolkata@in.mpms.mufg.com giving details of folio number, e-mail address and self-attested copy of PAN Card, AADHAAR Card. Members holding shares in dematerialised mode and have not registered / updated their e-mail address, can register / update their e-mail address with the Depository Participant(s) where they maintain their demat accounts.

The Board of Directors of the Company has appointed Mr. Mohan Ram Goenka (Membership No. FCS 4515 & COP 2551), Practicing Company Secretary, as Scrutinizer to conduct the Postal Ballot and e-voting process in a fair and transparent manner.

The resolution, if approved, shall be deemed to have been passed on the last date of e-voting, i.e. Friday, November 13, 2026. The results of e-voting will be announced within two working days from the conclusion of remote e-voting period and will be displayed on the Company's website www.birla-sugar.com and communicated to the Stock Exchanges and Depositories.

In case of any queries, you may refer the Frequently Asked Questions (FAQs) for Shareholders and e-voting user manual for Shareholders available at the download section of www.evoting.nsdl.com or call on : 022 – 4886 7000 or send a request to Ms. Pallavi Mhatre, AVP – NSDL at evoting@nsdl.com or contact at NSDL, 3rd - 7th Floor, Naman Chambers, Plot C32, G - Block, Bandra Kurla Complex, Bandra (E), Mumbai - 400 051, India.

NOTICE

SEBI's SPECIAL WINDOW FOR TRANSFER AND DEMATERIALIZATION (DEMAT) OF PHYSICAL SHARES

Kindly note that a special window for transfer and dematerialization (demat) of physical shares will remain open upto 4th February 2027 as per SEBI Circular no. HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated 30th January 2026 ("**SEBI Circular**")

This facility is available to those investors who had purchased physical shares of United Spirits Limited (the "**Company**") prior to 1st April 2019, and

a) had not lodged the shares for transfer, or

b) had lodged the shares for transfer, but the same was rejected, returned, not processed due to deficiencies in documentation.

Applicability of Special Window:

For clarity regarding applicability of this window for transfer deeds executed prior to 1st April 2019, investors may refer to the below matrix:

Lodged for transfer before 1st April 2019	Availability of original security certificate with the Investor	Eligibility under the special window
No (Fresh lodgement)	Yes	Yes, subject to conditions stated under SEBI Circular.
Yes (Rejected, returned earlier)	Yes	
Yes	No	No
No	No	No

Kindly note that the request(s) which are accompanied with original share certificate(s) along with transfer deed(s) and other supporting documents will only be considered under the special window.

Investors wishing to avail this special window may contact the Company's Registrar and Share Transfer Agent (RTA), as below

Integrated Registry Management Services Private Limited
Unit: United Spirits Limited
30, Ramana Residency, 4th Cross, Sampige Road
Malleswaram, Bengaluru – 560 003, Karnataka, India.

Foreign varsities' India campuses unlikely to strengthen research

Teaching-led campuses likely as labs, funding, doctoral pipelines prove harder to build

AUHONA MUKHERJEE
New Delhi, 13 October

Key hurdles

- High cost of building infra, limited demand for research-oriented programmes could constrain development of research-intensive institutions
- Foreign universities entering India are initially focused on academic programmes
- The entry of foreign universities has been positioned as a way to bring international academic expertise
- These universities have expressed plans to build research capabilities through collaborations

Foreign universities setting up campuses in India are unlikely to majorly reshape the country's research ecosystem in the near term, with most expected to focus on teaching-led programmes rather than building research-intensive institutions, according to education sector experts.

The high cost of building research infrastructure, limited demand for research-oriented programmes, and the need for sustained funding could constrain the ability of these campuses to develop research-intensive institutions, they said.

Several foreign universities entering India have strong research credentials in the Quacquarelli Symonds rankings, but their India campuses are initially focused largely on undergraduate and postgraduate programmes.

The entry of foreign universities has been positioned as a way to bring international academic expertise and research collaborations to India, alongside expanding access to international degrees.

Under the University Grants Commission's regulations, foreign universities can establish campuses in India and offer certificate, diploma, degree, and research programmes, subject to regulatory approval and requirements related to academic and physical infrastructure.

However, Manindra Agrawal, director at the Indian Institute of Technology (IIT) Kanpur, told *Business Standard* that foreign campuses were unlikely to replicate the research ecosystem of established Indian institutions, particularly given the financial requirements of research-intensive universities.

"No research-focused university has come to India so far. Research-focused universities will always run at a loss, so they need government support or donor backing to keep running. For instance, Harvard will not come here and lose money; it would rather spend in the US. Universities coming here are cost-neutral and cannot support research," Agrawal said.

He added that foreign universities were likely to complement rather than compete with India's established research institutions.

Syed Sultan Ahmed, chairperson of The Association of International Schools of India, said demand for foreign universities was primarily for employable degrees rather than research, making it difficult to build research ecosystems at new campuses. "Foreign universities are coming into India due to demand for employable degrees from students. Most Indian students go to colleges to get a valuable degree that will lead to a job, so the demand itself is not for research. The economics of it will decide what the institutions offer since these are private universities, and setting up a campus in a new country is a major investment, requiring huge capital expenditure," Ahmed observed.

He added that whether their campuses eventually offer PhD programmes would be a key indicator of whether they are building research capabilities in India rather than primarily providing undergraduate and postgraduate degrees.

Several foreign universities have expressed plans to build research capabilities in India through collaborations, research centres, and partnerships with Indian institutions. However, none of the foreign university campuses currently operating or formally announced in India have announced a standalone PhD programme.

"There are two sides to an institute — teaching and research. It's easier to import teaching, but to bring research and the entire ecosystem somewhere is difficult. Research requires government grants as well as industry participation, so it's difficult to transplant that somewhere else," Ahmed said.

Shantanu Rooj, founder and chief executive officer of TeamLease EdTech, said the impact of foreign campuses in the near term was likely to be "more catalytic than transformational". The programmes announced so far also point towards a predominantly teaching-led model, with proposed offerings concentrated in areas such as business, finance, artificial intelligence, data science, cybersecurity, and software engineering, Rooj said.

Building a research-intensive institution, however, would require a different financial and academic model, Rooj said. "Tuition-led campus economics alone are unlikely to create research-intensive universities quickly," he said, adding that laboratories, doctoral and postdoctoral ecosystems, long-duration grants, and sustained faculty investment would be needed.

Business Standard had earlier reported that foreign universities setting up campuses in India would build permanent local faculty teams, with Victoria University planning to recruit experienced academics from top Indian institutions and the University of Wollongong saying most new appointments would be India-based academics, including those from the Indian higher education sector.

Agrawal said attracting top research faculty could also prove difficult, as researchers at institutions such as the IITs have access to established research ecosystems and may not want to move to campuses without a comparable research focus.

Rooj added that research faculty choose institutions based on the strength of their research ecosystem rather than salaries alone. "Institutions such as India's established IITs and research universities already possess laboratories, PhD pipelines, collaborators, and institutional research cultures built over decades. Foreign campuses are therefore more likely initially to expand competition and enable joint or mobile faculty models than simply pull researchers away from established Indian institutions," Rooj said.

Experts agree that the stronger opportunity for foreign universities may lie in collaborating with established Indian institutions rather than attempting to replicate their research ecosystems in India.

"Foreign universities can establish relationships with credible Indian universities. They can collaborate and partner for research work," Ahmed said.

Rooj said their international networks could connect Indian faculty and students with global laboratories, doctoral networks, and joint research projects, allowing the campuses to build a research presence without immediately replicating the infrastructure of their parent institutions.

In a first, co-working beats IT/ITeS in office leasing in Jan-Sep

AKSHAT AYUSH
New Delhi, 13 October

"LARGE OCCUPIERS, IN PARTICULAR GCCs, ARE RUNNING AN INCREASINGLY BLENDED PORTFOLIO"

Peush Jain
Managing director – commercial leasing and advisory, Anarock group

India's office space market marked a shift in trends as co-working overtook information technology (IT)/IT-enabled services (ITeS) as the largest occupier of office space for the first time in a nine-month period, from January through September, underlining a growing preference for flexible (flex) workspaces, according to findings released on Tuesday by Anarock Research & Advisory.

Commenting on the report's findings, Peush Jain, managing director (MD) — commercial leasing and advisory at Anarock group, said flex workspaces were complementing traditional leasing rather than replacing it, adding that there had been a decisive shift in the mix of office space occupiers.

"Large occupiers, in particular global capability centres (GCCs), are running an increasingly blended portfolio. They have long-term, customised campuses for their core teams and flex space for speed, pilots and expansion. Many flex operators also rent entire buildings on conventional terms," Jain said, adding that the two forms of leasing were closely connected, with both forming part of a single office ecosystem.

According to the Anarock report, the co-working sector led overall demand with a 26 per cent share during the period under review, surpassing IT/ITeS at 25 per cent and banking, financial services and insurance (BFSI) at 21 per cent. IT/ITeS has traditionally been the leading sector, according to Anarock data.

Among key segments, co-working and BFSI increased their share of office demand, accounting for 47 per cent of total leasing in the first nine months of calendar year 2026, up from 41 per cent in the same period last year.

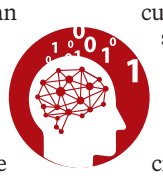
Amit Ramani, founder, chairman, and MD at Awfis Space Solutions, said co-working's emergence as the largest office space occupier over the past nine months validated a structural shift, as enterprises and GCCs increasingly focused on agility, capital efficiency, and speed to market.

"Flex is no longer just an alternative option or a startup enabler — it has firmly become a core pillar of corporate growth strategy," Ramani added.

Harsh Binani, cofounder at Smartworks, said managed workspaces would play an increasingly strategic role in meeting enterprises' real estate needs. "The opportunity will not be defined by square footage alone, but by the ability to deliver institutional-grade, scalable workplace infrastructure across multiple cities," he said.

Two-thirds of MSMEs use AI tools, but only 21% deploy biz software: CII-ISB study

MONIKA YADAV
New Delhi, 13 October



Nearly two-thirds of India's micro, small and medium enterprises (MSMEs) use artificial intelligence (AI) tools, but only about one-fifth rely on integrated business software to manage operations, highlighting a gap between technology adoption and its effective use, according to a joint study by the Confederation of Indian Industry (CII) and the Indian School of Business (ISB).

The report, MSMEs in India: Challenges, Opportunities and the Road Ahead, found that 65.8 per cent of surveyed enterprises used AI tools, while only 21 per cent used enterprise resource planning (ERP) or customised business software to manage their operations.

AI was primarily used for business communication, cited by 34.9 per cent of respondents, followed by content creation (22.3 per cent) and training (18.9 per cent).

NOTICE OF POSTAL BALLOT

NOTICE is hereby given, pursuant to the provisions of Section 110 read with Section 108 and other applicable provisions, if any, of the Companies Act, 2013, as amended (the **"Companies Act"**), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014 (the "Rules"), Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, Secretarial Standards issued by the Institute of Company Secretaries of India on General Meeting (**"SS-2"**), read with other applicable laws and regulations, if any, and in accordance with the guidelines prescribed by the Ministry of Corporate Affairs (**'MCA'**) for holding general meetings / conducting postal ballot process through E-voting vide General Circular Nos. 14/2020 dated April 8, 2020, General Circular No.3/2025 dated September 22, 2025 of Ministry of Corporate Affairs (**"MCA Circulars"**), that it is proposed to seek the consent of the shareholders ("Members") of Indian Metals & Ferro Alloys Ltd. (the **"Company"**), for approval of Appointment of Mr Partha Satpathy (DIN: 11589079) as Non - Executive Independent Director of the Company through Postal Ballot/Meeting ("Postal **Ballot/Meeting"**) by way of electronic voting (**"E-voting"**) as contained in the Postal Ballot notice dated **06th October 2026.**

The Postal Ballot Notice (**"Notice"**) has been sent on **13th October 2026** through electronic mode only to those Members, whose email address is registered with the Company or with the Depositories / Depository Participants and whose name appear in the Register of Members/list of Beneficial Owners as on **09th October 2026 ("Cut-off Date")**, in accordance with the guidelines prescribed by the Ministry of Corporate Affairs. A person who is not a Member as on the Cut-off Date shall treat this Notice for information purposes only.

Members holding shares in physical form and have not registered their email address yet, are requested to register the same with the Company by sending an e-mail to **investor-relation@imfa.in**. Members holding shares in electronic form are requested to get their e-mail address registered with their respective DPs.

In terms of the MCA Circulars, the Company has sent this Postal Ballot/Meeting Notice in electronic form only. The hard copy of this Notice along with postal ballot forms and pre-paid business envelope will not be sent to the Members in terms of the MCA Circulars. Accordingly, the communication of the assent or dissent of the Members would take place through e-voting only. The e-copy of the Notice is also available on the website of the Company at **www.imfa.in** and of at the website of **NSDL website www.evoting.nsdl.com.**

The Company has engaged **National Securities Depository Limited ("NSDL")** for providing e-voting facility to all the members.

The documents referred in the Notice shall be open for inspection by the members at the registered office of the Company on all working days between **10:00 A.M. to 04:00 P.M.** Members seeking to inspect such documents can send an E-mail to the Company Secretary at **secretarial@imfa.in.**

Mr Sourjya Prakash Mohapatra, Practicing Chartered Accountant has been appointed as the Scrutinizer for conducting the Postal Ballot/Meeting through E-voting process in a fair and transparent manner.

The Members are requested to note the E-voting instructions as follows:

a. A person whose name is recorded in the Register of Members or in the Register of Beneficial Owners maintained by the Depositories as on the Cut-off date shall be entitled to vote on the Resolution set forth in the Notice.
b. The remote E-voting shall commence on Wednesday, **14th October 2026** at **9:00 A.M.** IST and ends on Thursday, **12th November 2026 at 5:00 P.M.** IST. The E-voting module shall be disabled by **NSDL** for voting thereafter and remote E-voting shall not be allowed beyond the said date and time.
c. During this period, Members of the Company as on cut-off date holding shares in physical or dematerialised form, may cast their votes through remote E-voting. Once the vote on a resolution is cast by the member, the same cannot be modified subsequently by such member.
d. In case of any queries, Members may refer the Frequently Asked Questions (FAQs) for Shareholders and E-voting user manual for Shareholders available at the download section of **www.evoting.nsdl.com** or call on: 022 - 4886 7000 or send a request to Ms. Pallavi Mhatre, Deputy Vice-President, **NSDL** at **evoting@nsdl.com.**

The Scrutinizer will submit his report of the votes cast to the Chairman or any Director authorised by the Board or the Company Secretary. The results of Postal Ballot/Meeting shall be declared on or before Saturday, **14th November 2026** along with the Scrutinizer's report, be communicated to the Stock Exchanges and will also be uploaded on the Company's website **www.imfa.in** and on the website of the National Securities Depository Limited **("NSDL") www.evoting.nsdl.com.** The proposed Special Resolution, if approved, shall be deemed to have been passed on the last date of voting, i.e. **12th November 2026.**

IMPORTANT NOTICE TO SHAREHOLDERS

Special Window for Re-lodgement of Transfer Requests of Physical Shares

Pursuant to SEBI Circular No. **HO/38/13/11(2)2026-MIRSD-POD/1/3750/2026** dated **January 30, 2026**, shareholders are hereby informed that a **Special Window** has been opened for a period of **one (1) year**, from **February 5, 2026 to February 4, 2027**, for the **re-lodgement of transfer requests for physical share certificates.**

This facility is applicable to **transfer deeds lodged prior to April 1, 2019** which were **rejected, returned, or not attended** due to **deficiencies in documents, process, or otherwise.**

Shareholders who missed the earlier deadline may now avail this opportunity by submitting the requisite documents to the Bank's Registrar and Share Transfer Agent at the address mentioned below:

Bigshare Services Pvt. Ltd
Office No. S6-2, 6th Floor, Pinnacle Business Park, Next to Ahura Centre, Mahakali Caves Road, Andheri East, Mumbai – 400093. Phone: 022 – 62638200 Email : info@bigshareonline.com

We also request all the shareholders to update KYC details including PAN, email id, address, mobile number and bank account details with the DP (If shares are held in demat form) or with RTA (if shares are held in physical form) to ensure the ease of communication and seamless payment of dividend.

Shareholders holding shares in physical form are requested to demat their shares by submitting share certificate to their Depository Participant (DP).
