Notes:

1 The above is an extract of the detailed format of Quarterly Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing and Other Disclosure Requirements) Regulations, 2015. The full format of the Quarterly Financial Results are available on the websites of the National Stock Exchange of India Limited (www.nseindia.com), BSE Limited (www.bseindia.com) and at the Company's website (www.solara.co.in)

2 The above consolidated financial results of Solara Active Pharma Sciences Limited ("the Parent" or "the Company" and its subsidiaries (together referred to as "the group") as reviewed by the Audit Committee has been approved by the Board of Directors at its meeting held on October 16, 2026. The consolidated financial results for the quarter and half year ended September 30, 2026 has been reviewed by Deloitte Haskins & Sells LLP, the statutory auditors of the Company. The statutory auditors of the Company have issued an unmodified conclusion in respect of the limited review for the quarter and half year ended September 30, 2026.

3 The Parent, vide its letter of offer dated May 09, 2024 offered up to 1,19,98,755 Equity shares of face value of Rs.10/- each at a price of Rs. 375 per Equity share (including Share premium of Rs. 365 per equity share) for an amount aggregating Rs. 449.95 crores to the existing share holders of the Parent on right basis in the ratio of one equity share for every three equity shares held by the equity shareholders on the record date i.e. May 15, 2024. Rights issue has been done in accordance with Section 62(1)(a) of the Act and other applicable laws. The Parent has allotted 1,19,98,755 Nos. of partly paid up equity shares on June 19, 2024.

As of September 30, 2026, the Parent has raised Rs. 446.62 crores out of the total rights issue size of Rs. 449.95 crores. This amount comprises Rs. 157.48 crores received as application money, Rs. 156.05 crores received against the first call made on April 7, 2025 (with Rs. 1.43 crores remaining unpaid), and Rs. 133.09 crores received against the final call made on April 6, 2026 (with Rs. 1.90 crores remaining unpaid). The proceeds received have been utilised in accordance with the Letter of Offer, with the unutilised balance held in bank accounts pending deployment."

Notes:

1. The consolidated and standalone financial results of LTM Limited (formerly known as LTIMindtree Limited) ('the Company') for the quarter and six months ended September 30, 2026 have been subjected to limited review by the statutory auditors. The results have been reviewed by the Audit Committee of the Board and approved by the Board of Directors at its meeting held on October 16, 2026.
2. The above is an extract of the detailed format of the financial results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full format of the consolidated financial results and the standalone financial results for the quarter and six months ended September 30, 2026 are available on the Stock Exchanges website of BSE (www.bseindia.com), NSE (www.nseindia.com) and the Company's website at www.ltm.com/investors. The website can be accessed by scanning the QR:
3. Results for the quarter and six months ended September 30, 2026 are in compliance with the Indian Accounting Standards (Ind AS) notified by the Ministry of Corporate Affairs as prescribed under section 133 of the Companies Act, 2013.
4. Effective November 21, 2025, the Government of India consolidated 29 existing labour regulations into four Labour codes, namely, The Code on Wages, 2019, The Industrial Relations Code, 2020, The Code on Social Security, 2020 and the Occupational Safety, Health and Working Conditions Code, 2020, collectively referred to as the 'New Labour Codes'. Based on the requirements of New Labour Codes and relevant Accounting Standards, the Group has estimated the liability for employee benefits, which has resulted in an incremental expense on account of recognition of past service costs. Considering the material, one-time nature of the incremental amount, the Group has presented the same as an 'Exceptional Item' in the Statement of Consolidated Financial Results during the previous year.
5. During the quarter ended June 30, 2026, the Company, through its wholly owned subsidiary LTM UK & IRELAND Limited ('LTM UK') (formerly known as LTIMindtree UK Limited), entered into a Put Option Deed with Randstad N.V. (Netherlands), Randstad Digital Holdings Pty Ltd (Australia) and Randstad France SASU (France) (collectively, the "Randstad Entities") in relation to the proposed acquisition of their subsidiaries in the Netherlands, Australia and France, along with step-down subsidiaries in Belgium, Luxembourg, Portugal, Romania and Germany at an Enterprise Valuation of up to EUR 160 million on a cash-free, debtfree basis, subject to customary valuation adjustments on closure.

   During the quarter, Information Consultation processes with the Works Councils of required geography has been completed and accordingly LTM UK has executed the Agreement for the Sale and Purchase of all shares (hereinafter referred as 'SPA') with Randstad Entities. As at September 30, 2026, completion of the transaction remained subject to applicable regulatory approvals and fulfilment of certain conditions precedent under the SPA and, accordingly, no impact has been recognised in the Consolidated Financial Results.
6. During the quarter ended June 30, 2026, the Group has recognised a fair value gain of ₹1,978 million as a part of 'Other Income' in the Consolidated Financial Results, in respect of the convertible instruments held in Voicing.AI, Inc., which were measured at fair value through profit or loss. Further, the Group has converted the said convertible instruments into equity instruments during the previous quarter.
7. The Board of Directors at its meeting held on October 16, 2026 has declared an interim dividend of ₹25/- per equity share of par value ₹1/- each.
8. Figures for the earlier period(s) have been regrouped, wherever necessary.

YES Bank AT-1 bond reinstatement may hit capital ratio by 250 bps

Yes Bank on Friday said reinstatement of the principal amount of its Additional Tier-1 (AT-1) bonds worth ₹8,415 crore would have a pro-forma impact of 250 basis points (bps) on its Common Equity Tier-1 (CET-1) ratio as of June 30, 2026. However, its Tier-1 capital ratio would remain unchanged at 14 per cent on a pro-forma basis. The bank said it is reviewing the Supreme Court order that upheld the Bombay High Court's decision to quash the write-off of AT-1 bonds during its reconstruction phase. The apex court on Thursday upheld the Bombay High Court's decision to set aside Yes Bank's ₹8,415 crore Additional Tier-1 (AT-1) bond writeoff in March 2020. SUBRATA PANDA reports 6 ▸

Welcome competition, including Starlink: RIL

Reliance Industries Ltd (RIL) on Friday broke its silence on Elon Musk's public criticism of India's satellite communications landscape, saying it sees a competitive market as the true test of who serves customers best, and welcomes competition, including from Starlink, but asserted that every player must obey Indian laws. In its first direct response to Musk's recent barbs, the company said it was placing "the facts on record". "At Reliance, we have never feared competition. We see it as the truest test of who serves the customer best," the Mukesh Ambani-led firm said. 2 ▸

China's non-tariff walls a major export hurdle: FM

Ready to address each other's concerns, says Beijing

ASIT RANJAN MISHRA
New Delhi, 16 October

Union Finance Minister Nirmala Sitharaman on Friday said China's non-tariff barriers were the biggest hurdle for Indian exports, alleging that Beijing had denied market access to Indian products despite significant demand potential, including for generic drugs, bovine meat and agricultural produce, contributing to a widening trade imbalance. She also called for a review of India's trade agreement with the Association of Southeast Asian Nations (Asean), saying its benefits were skewed in favour of the bloc.

"A decade has gone by consistently putting up a case for market access for Indian products but non-tariff barriers have been very strong and China uses non-tariff barriers unhesitatingly. Non-tariff barriers are the biggest hurdle in the trade between India and China," she said during a conversation hosted by the Atlantic Council on the sidelines of the International Monetary Fund-World Bank annual meetings in Bangkok.

India's trade deficit with China more than doubled to $112 billion in FY26 from $52.7 billion in FY16. Sitharaman said New Delhi had repeatedly sought market access for products in which India had a competitive advantage, but progress had been limited despite scope for discussions on sanitary and phytosanitary measures and other regulatory issues.

"A DECADE HAS GONE BY PUTTING UP A CASE FOR MARKET ACCESS FOR INDIAN PRODUCTS BUT NON-TARIFF BARRIERS HAVE BEEN VERY STRONG AND CHINA USES NON-TARIFF BARRIERS"
Nirmala Sitharaman, Union Finance Minister

PG 8 ■ Economies resilient despite geopolitical woes: Fed Chair | ■ 'Without AI guardrails, risks may exceed opportunities'

Responding to Sitharaman's remarks, China's foreign ministry said Beijing was ready to work with New Delhi to address "each other's economic and trade concerns in a balanced way and promote the steady development of bilateral relations". "China never aims for trade surplus," Chinese foreign ministry Spokesperson Mao Ning told media in Beijing, as reported by *PTI*.

Sitharaman's comments come days after Commerce Minister Piyush Goyal said India was working to develop relations with China "once again", while cautioning that the outcome remained uncertain. Turn to Page 7 ▸

A PITCH FOR PERPETUAL PORT CONCESSIONS

Govt should act as 'landlord' in port JVs: DP World CEO

DHRUVAKSH SAHA & GIREESH CHANDRA PRASAD
New Delhi, 16 October

UAE-based logistics conglomerate DP World, which has multiple port concessions in India due to expire in the coming years, favours perpetual port concessions in joint ventures with the government, with the latter acting as a "landlord", the conglomerate's Group Chief Executive Officer (CEO) Yuvraj Narayan said.

While expressing confidence in the Indian economy, Narayan pointed out that the country's energy import bill, which puts pressure on the rupee, affects dollar returns for investors.

India remains an attractive market, but currency depreciation has affected returns in dollar terms, Narayan said. "As long as India continues to diversify away to renewable sources of energy, for which I think they're doing a good job, this pressure will ultimately ease. It is the fastest-growing major economy in the world; there's no doubt about that," he said.

India's achievements in reforms over the past 10 years give hope, whether in digitisation or in creating and upgrading infrastructure, he said.

"WHAT IS DESTROYING INDIA RETURNS TODAY IS THE DEPRECIATION OF THE RUPEE. WHY IS THE RUPEE DEPRECIATING? IT'S BECAUSE OF YOUR IMPORT OF ENERGY"
Yuvraj Narayan, Group CEO, DP World

ANJALI KUMARI
Mumbai, 16 October

India's foreign exchange (forex) reserves fell to $726 billion in the week ended October 9, marking the fifth consecutive weekly decline, as the Reserve Bank of India (RBI) continued to intervene in the currency market to curb volatility.

The $8.6 billion fall in forex reserves in the week takes the cumulative decline to $59.7 in five weeks. Reserves had risen to a record high of $785.71 billion on September 4 after the RBI opened a concessional swap window in June to attract foreign inflows.

Meanwhile, the rupee continued to strengthen on Friday, settling at 94.96 per dollar — the highest level since September 8 — compared to the previous close of 95.06. It gained 1.9 per cent in the week, marking its strongest weekly performance in seven months, after approaching a record low of 96.96 per dollar earlier this month. Turn to Page 7 ▸

IIFCL, two Coal India units to list on D Street in FY27

KRITY AMBEY
New Delhi, 16 October

The government aims to list India Infrastructure Finance Company Limited (IIFCL) and two Coal India subsidiaries — Mahanadi Coalfields Limited (MCL) and South Eastern Coalfields Limited (SECL) — on the stock exchanges in the current financial year (FY27), Department of Investment and Public Asset Management (DIPAM) Secretary Arunish Chawla told *Business Standard*.

DIPAM Secretary Arunish Chawla said the "momentum" in stake sales and public offerings would continue in FY27

"We are aiming to list three CPSEs (central public sector enterprises) on the market this financial year," Chawla said. MCL has already filed its draft red herring prospectus (DRHP), while IIFCL and SECL are also slated to be listed, he added.

The three offerings will have different implications for government finances. Proceeds from IIFCL's initial public offering (IPO) will accrue directly to the government, its sole shareholder. Proceeds from the stake sales in MCL and SECL, however, will go to their parent, Coal India, with the government potentially benefiting indirectly through dividends in FY28.

DIPAM has begun preparations for IIFCL's IPO, inviting bids earlier this week to appoint a registrar and share transfer agent, as well as an advertising agency for the proposed offering. Eligible bidders can submit applications online until November 3.

The planned listings form part of the government's broader disinvestment programme, with Chawla indicating that the "momentum" in stake sales and public offerings would continue in FY27. Turn to Page 7 ▸

Climate, floods, war: Why your favourite sweet costs more this festival season

SHINE JACOB, ISHITA AYAN DUTT, HEMANT ROUT, ANANYA PODDER & SANJEEB MUKHERJEE
Chennai/ Kolkata/ Bhubaneswar/ New Delhi, 16 October

As festive buying gathers pace, there's one thing that's hurting the consumer — the rising price of sweetmeat, the one essential of the season. Blame uneven rains, pest attacks and the crisis in West Asia.

From the laddu in south India, to the meatier barfi in the North, sandesh in West Bengal and chhena poda in Odisha, the price of almost all sweets has gone up by about 10-15 per cent on average across the country this festival season, compared with the last one, shopkeepers said.

The main culprit behind this cost escalation are rising prices of sugar and milk that go into making the sweets that are devoured during Diwali and Durga Puja.

Sugar prices are high because of unexpectedly low production, the outcome of excess rains in Maharashtra and pest attacks in Uttar Pradesh last year.

Milk, on the other hand, took a hit from low rainfall this year, which impacts fodder production.

Centre restricts diversion of sugar for ethanol, frees up supplies

The Centre has allowed sugar mills to sell October's production in the current and the next month over and above their regular monthly quotas to ensure adequate festival-season supplies, *PTI* reported. Separately, a *Reuters* report citing a tender issued on Friday, said the government has directed oil marketing companies to reduce sugar diversion for ethanol production to zero in 2026/27, excluding ethanol made from sugarcane juice, sugar syrup and B-heavy molasses from their latest tender.

QUICK READ

Air India extends cancellation of Saudi Arabia flights till Oct 20

Air India on Friday said it has extended the cancellation of flights to Saudi Arabia till October 20 amid escalating tensions in the region due to the attacks on the Gulf country by Houthis. Earlier, the airline as well as Air India Express had cancelled flights to Saudi Arabia till October 17. "In view of the evolving situation in Saudi Arabia, all Air India flights to and from Riyadh, Dammam and Jeddah stand cancelled until 20 October 2026," Air India said in a post on X. The airline said it was closely monitoring developments and regularly assessing the situation to ensure the safe resumption of operations. "Passengers affected by these cancellations are being offered a full refund," it added. PTI

Vi appoints former Ola Electric executive Manoj Murali as COO

Vodafone Idea has appointed Manoj Murali as its Chief Operating Officer (COO), effective October 19, the telecom operator said in a regulatory filing on Friday. The appointment was approved by the company's board based on the recommendation of the Nomination and Remuneration Committee, the filing said. Murali, 55, has over 25 years of experience in the telecom and mobility sectors, having driven revenue, market share and profitability across large-scale operations in India and Africa. He has led business turnarounds across sales, marketing, distribution, operations and customer experience, with experience spanning mobile, broadband, direct-to-home, payments banking, mobile commerce and digital businesses, according to the filing. Murali was most recently chief business officer at Ola Electric. He has previously worked with Reliance Jio and Bharti Airtel. PTI

SC seeks govt view on kids' social media use

The Supreme Court on Friday sought the Centre's response to a plea by Indore-based Emerald Heights International School seeking a regulatory framework to shield children from the harmful effects of social media use. A Bench of CJI Justice Surya Kant and Justice Joymalya Bagchi scheduled the matter for hearing on December 7. The school and its director, Siddharth Singh, have approached the court seeking directions to the Centre, and other entities to formulate and enforce comprehensive safeguards for minors on social media platforms. Court denies bail to Reliance Capital ex-CFO

A Delhi court on Thursday has rejected the bail plea of former chief financial officer of Reliance Capital, Amit Bapna, accused in an alleged bank loan fraud-linked money laundering case. In an order passed by Special Judge Vishal Pahuja, the court noted the evidence before it and said that Bapna unauthorisedly exercised power in decision-making regarding the operations of Reliance Commercial Finance Limited and proceeded to disburse corporate loans after bypassing the sanctions imposed by Reliance Home Finance Limited's board of directors. PTI

Radisson Blu Delhi operator gets FSSAI notice over hygiene lapses

The Food Safety and Standards Authority of India (FSSAI) on Friday issued a notice to AB Hotels, which operates the Radisson Blu Hotel at Mahipalpur in New Delhi, for failing to comply with food safety and hygiene requirements and directed it to take immediate corrective measures. "The FBO (food business operator) has been directed to take immediate corrective measures and submit a detailed action taken report with supporting documentary and photographic evidence wherever applicable," the FSSAI said in a social media post. PTI

MUSK'S REMARKS OVER STARLINK ENTRY

Welcome competition but Indian laws apply to all: Reliance

PRESS TRUST OF INDIA
New Delhi, 16 October

Reliance Industries on Friday broke its silence on American billionaire Elon Musk's public criticism of India's satellite communications (satcom) landscape, saying it sees a competitive market as the true test of who serves customers best, and welcomes competition, including from Starlink, but asserted that every player must obey Indian laws.

In its first direct response to Musk's recent barbs, the company said it was placing "the facts on record." Musk had criticised Reliance and argued that more competition would benefit consumers in satcom. "At Reliance, we have never feared competition. We see it as the truest test of who serves the customer best," the Mukesh Ambani-led company said in a statement.

The company backed its stance citing Jio's own record. Jio entered India's crowded telecom market in 2016 as the newest player, with not a single customer, and in a matter of just 10 years, earned the trust of over 530 million customers, offering Indians some of the best digital infrastructure and most affordable data in the world, it said.

"We welcome competition in satellite communications, including Starlink. Every player, Jio included, must serve the people of India and abide by the laws and policies of the land," the statement said.

Reliance said India's openness to investment and innovation, homegrown or international, rests on the rule of law. "Like every Indian enterprise, Reliance has grown in an India that welcomes investment and innovation, homegrown or international, that improve the lives of the people. That openness rests on the rule of law," it said.

RELIANCE SAID IT HAS GROWN IN AN INDIA THAT WELCOMES INVESTMENT AND INNOVATION, HOMEGROWN OR INTERNATIONAL, THAT IMPROVE THE LIVES OF THE PEOPLE. THAT OPENNESS RESTS ON THE RULE OF LAW

As the government has maintained, it applies the same process to every applicant, Indian or foreign, Reliance said, adding "Jio's own satellite services await clearances".

Earlier this week, addressing the Bloomberg New Economy Forum 2026, Bharti Airtel Chairman Sunil Mittal said his satcom venture Eutelsat OneWeb was significantly ahead of Musk's Starlink in the queue to launch services in India.

Government sources, responding to the controversy surrounding Starlink and Musk's recent claims, have made it clear that any company operating in India must comply with the law of the land. The Centre's position has been clear and consistent throughout, they added.

"Government's position has been very clear, and was so even at the time they had applied, that if you don't follow Indian laws, you cannot do business here... So to do business here, you have to follow Indian laws," sources had said..

"I think I am significantly ahead in the queue from him. I applied five years back," Mittal said, and added, "We don't have the permission, so we'll be very happy to get it at least a few days before him".

Mittal said OneWeb's ground network has been ready for three years, and its satellites have been hovering over India for five years, but the company is still awaiting permission to begin commercial operations.

The pushback from Mittal, and now Reliance, comes after Musk accused powerful business interests of blocking Starlink's entry into India. In a series of posts on social media platform X recently, Musk took aim at Reliance Industries chairman Mukesh Ambani, sarcastically addressing him as "Prime Minister Ambani" and questioning whether he wielded greater influence over India's decisions than Prime Minister Narendra Modi.

Musk has alleged that some business groups are seeking to preserve a "monopolistic chokehold" on Indian consumers. However, the Ministry of Communications rejected the charge, describing suggestions that the regulatory framework or its application was unfair or discriminatory as "baseless and misconceived".

The dispute comes at a consequential time for Reliance, which is preparing for the initial public offering of Jio Platforms, its digital services business. Jio has set a price band of ₹1,065 to 1,119 a share for its offer of up to 27 crore new shares, about 3 per cent of the existing capital, with no offer-for-sale component.

At the top of the band, the sale would raise about ₹30,213 crore and value the firm at ₹10.3 trillion.

Tyremakers confident of meeting BS-VII norms

Seek clarity on testing standards

SOHINI DAS & SHINE JACOB
Mumbai/Chennai, 16 October

A look at BS-VII norms

- Proposed BS-VII tyre-abrasion norms scheduled to take effect in April 2031
- The draft regulations were issued by the Ministry of Road Transport and Highways
- They seek to bring tyre abrasion under the broader vehicle-emission framework
- Permissible abrasion limits and detailed testing requirements are yet to be notified

Tyre manufacturers in India are confident of meeting the proposed Bharat Stage-VII (BS-VII) tyre-abrasion norms, scheduled to take effect in April 2031, but have sought clarity on permissible limits and testing protocols to assess the investment and technological changes required for compliance.

The draft regulations, issued by the Ministry of Road Transport and Highways (MoRTH), seek to bring tyre abrasion under the broader vehicle-emission framework, addressing particulate emission arising from tyre wear. However, the permissible abrasion limits and detailed testing requirements are yet to be notified.

The proposed regulations come as India's tyre industry, with an estimated annual turnover of around ₹1 trillion, is expanding capacity and moving towards premium products, even as the costs of rising natural rubber and other inputs are putting pressure on margins.

According to the Automotive Tyre Manufacturers' Association (Atma), there are 28 manufacturers, which operate 62 plants.

Tyre exports in FY26 rose 9 per cent to a record ₹27,312 crore, while manufacturers have invested approximately ₹30,000 crore in greenfield and brownfield projects over the past four to five years.

Arnab Banerjee, managing director and chief executive officer, CEAT, said the company was technologically prepared for the transition, drawing on its experience in international markets where similar regulations were being introduced.

"We are operating in markets where such regulations come before they do in this country. So, we have a road map for meeting regulatory standards in various global markets. I'm sure we'll be technologically prepared to meet the stringent targets that will come by way of BS-VII," Banerjee told *Business Standard*.

He said the challenge would be to balance rolling resistance, which affects fuel consumption and electric vehicle-battery range, with wet and dry grip and tyre durability. Indian consumers, he added, remain particularly sensitive to tyre life.

On whether the April 2031 deadline was realistic, Banerjee said: "We will have to see the standard. As you know, the exact standards have to be notified. Then we will see if the road map meets the timeline. We should be ready. That is what I think."

"I don't think there will be any problem in getting there."

While technology development would require investment over several years, Banerjee did not anticipate a sudden increase in quarterly capital expenditure.

Daniele Lorenzetti, chief technology officer, Apollo Tyres, said the inclusion of tyre abrasion in the emission framework would increase the focus on innovation in materials, compounds, and the tyre design.

"For the tyre industry, this will mean continued investment in research & development to balance environmental performance with safety, durability and affordability. As the regulatory framework evolves, clarity on testing protocols, performance thresholds, and implementation timelines will be important to enable the industry to prepare effectively," Lorenzetti said.

Tyre abrasion is influenced by the road surface, making collaboration between manufacturers and regulators essential, he added.

The regulatory transition also comes amid an ongoing premiumisation trend.

JK Tyre, in its FY26 disclosures, said premiumisation remained central to its growth strategy, with the domestic passenger car-radial tyre mix improving to 30 per cent, supported by larger rim sizes and differentiated products. Apollo Tyres has also been expanding its portfolio of premium passenger car tyres through its Vredestein brand.

At the same time, prices of raw materials remain a concern. JK Tyre has said raw materials account for over 60 per cent of tyre costs, with crude oil-linked inflation and currency depreciation adding to input pressures.

Banerjee said the costs of raw materials were expected to increase another 2.5-3 per cent in the third quarter, keeping margins under pressure despite successive price escalations.

Industry experts say Indian manufacturers have some advantages in adapting to the proposed requirements.

"The Indian market has traditionally favoured longer-lasting tyres with lower abrasion over those offering a greater grip. This gives the industry a slight advantage in adapting to BS-VII norms," said Anurag Singh of Primus Partners.

Singh said Indian tyre manufacturers were technically capable and globally competitive, with exports accounting for around 25 per cent of the industry turnover. While tighter regulations would increase costs, they would also deliver environmental benefits.

The final abrasion limits and testing methodology will determine the scale of technological changes and additional compliance costs for the industry.

Telangana CM woos Hyundai for car plant in Hyd

SHINE JACOB
Chennai, 16 October

Telangana CM Revanth Reddy said the government is ready to offer all possible support to encourage manufacturing in the state

Days after Hyundai Motor Group unveiled its $15.5 billion investment plan for India from 2026 through 2032, Telangana Chief Minister Revanth Reddy wooed the global major, pitching Hyderabad as an ideal destination for the group to establish its car manufacturing plant.

The CM said the government is ready to provide all possible support to encourage manufacturing in Telangana.

A delegation from Hyundai Motor India Engineering (HMIE), led by Managing Director Changyeon Cho, met the CM in Hyderabad on Friday.

"We are centrally located in the country, and Hyderabad is known for being cosmopolitan, safest and having the most liveable conditions among the six metropolitan Indian cities," the CM said after the meeting.

He also assured the Hyundai Motor India leadership of all possible support for expediting work on the HMIE integrated global research and development facility at the National Investment and Manufacturing Zone in Zaheerabad. The facility, involving a massive investment of ₹8,528 crore and a total employment commitment of 4,276 jobs, is set for phased development across 678 acres.

The group's investment will be made through companies like Hyundai Motor India, Kia India, and other group entities.

The seven-year investment spans manufacturing expansion, research and development infrastructure development, local supplier cultivation for parts localisation and future technology innovation — fostering a comprehensive automotive industry ecosystem in India.

At present, Hyundai Motor India has manufacturing units in Chennai and Pune, while Kia India operates a manufacturing facility in Anantapur, Andhra Pradesh. The CM pitched Telangana as the ideal place to establish car manufacturing, with dedicated mobility clusters, strong transport infrastructure, and future plans for high-speed connectivity with ports.

Iveco shareholders approve Tata Motors' takeover proposals

SOHINI DAS
Mumbai, 16 October

Iveco Group on Friday approved all resolutions related to Tata Motors' proposed acquisition of the Italian commercial vehicle (CV) manufacturer, clearing a key hurdle for the transaction and reducing the minimum share acceptance threshold from 95 per cent to 80 per cent.

The resolutions were approved at an extraordinary general meeting (EGM) held in Amsterdam, Iveco said in a statement. The approval fulfils several conditions required for Tata Motors' acquisition vehicle to declare its voluntary public tender offer unconditional, although the transaction remains subject to other conditions.

Tata Motors, through its subsidiary TML CV Holdings, is seeking to acquire Iveco's commercial vehicle business. The Indian automaker had on October 9 raised its offer price from €14.10 to €14.40 per share, valuing the transaction at approximately €3.91 billion.

The reduction in the minimum acceptance threshold to 80 per cent is significant as it lowers the proportion of shares Tata Motors must secure to proceed with the acquisition, potentially easing the completion of the transaction.

Shareholders also approved amendments to Iveco's Articles of Association, its conversion from a publicly listed company into a private limited liability company following delisting, and the appointment of new board members effective upon settlement.

The resolutions additionally provide for a post-offer demerger, which the acquirer may implement if it secures at least 80 per cent of Iveco's common shares. Shareholders also authorised a subsequent share sale and potential dissolution of the existing corporate entity as part of the post-acquisition restructuring.

The EGM further approved changes to Iveco's special voting share arrangements, including termination of its loyalty voting structure following settlement.

CORPORATE SCORECARD

DLF Q2 net rises 11% on lower expenses

AKSHAT AYUSH
New Delhi, 16 October

Real estate major DLF reported an 11.1 per cent year-on-year (Y-o-Y) increase in consolidated net profit to ₹1,301.35 crore in the second quarter of FY27, compared with ₹1,171 crore in the corresponding period last year.

The company's profit rose as expenses declined in the second quarter to ₹1,294 crore, down nearly 11 per cent from ₹1,452 crore in the year-ago period. Tax expenses also fell to ₹201 crore from ₹276 crore in Q2FY26. On a quarterly basis, DLF's net profit jumped 63.9 per cent from ₹793.90 crore reported in Q1FY27.

However, the company's revenue from operations fell 23.3 per cent Y-o-Y to ₹1,260.58 crore in the quarter ended September, from ₹1,643 crore in Q2FY26. On a quarter-on-quarter basis, revenue declined marginally by 1.5 per cent from ₹1,280.34 crore in Q1FY27.

The company's earnings before interest, tax, depreciation and amortisation (Ebitda) increased 17.5 per cent Y-o-Y to ₹1,060 crore from ₹902 crore in the corresponding period last year. On a Q-o-Q basis, Ebitda surged 605.3 per cent from ₹150.3 crore in Q1FY27.

India's largest publicly listed real estate company saw new sales bookings jump 478.7 per cent Q-o-Q to ₹3,800 crore during the quarter. Earlier this month, Aakash Ohri, managing director and chief business officer at DLF, told *Business Standard* that the company's project, The Aureva, was completely sold out.

Oberoi Realty profit rises to ₹762 crore

Oberoi Realty on Friday reported a consolidated net profit of ₹761.65 crore for the quarter ended September, a marginal increase from the year-ago period. Its net profit stood at ₹760.26 crore in the year-ago period. Total income fell 6 per cent to ₹1,736.37 crore during the second quarter of this fiscal from ₹1,844.84 crore in the corresponding period of the preceding year, according to a regulatory filing. The company's expenses declined to ₹744.94 crore from ₹863.35 crore. OUR BUREAU

Urban Company net loss widens

Home services marketplace Urban Company on Friday said its consolidated net loss widened to ₹182.48 crore in the July-September quarter of FY27. The company had posted a net loss of ₹59.33 crore in the year-ago period, according to a regulatory filing.

Its revenue from operations rose 41.4 per cent to ₹537.29 crore from ₹380.03 crore in Q2 FY26. On a sequential basis, the net loss widened from ₹92.12 crore in the April-June quarter, while revenue was up 1.7 per cent.

The company's board also approved raising up to ₹2,500 crore through the issue of equity shares or other convertible securities via qualified institutional placement, subject to shareholder approval. The board gave an in-principle nod to explore residential air conditioners as a new line of business under its 'Native' brand. PTI

Snabbit posts ₹168 cr loss in FY26

Maestroedge Solutions, which runs home services platform Snabbit, has posted a net loss of ₹167.75 crore for 2025-26, nearly 30 times lower than the previous year, as spending on service providers, marketing and staff rose with the expansion of its business, according to financial statements filed with the Registrar of Companies. It reported a loss of ₹5.70 crore in FY25.

Its revenue from operations rose to ₹12.25 crore in FY26 from ₹26.35 lakh a year earlier.

Platform services brought in ₹10.82 crore, and the sale of uniforms to its service providers, whom it calls experts, stood at ₹1.42 crore.

Other income was ₹14.77 crore, while total income was recorded at ₹27 crore.

Total expenses rose to ₹194.76 crore from ₹6.81 crore in FY25. Expert service cost was the largest expense at ₹63.07 crore, up from ₹27 lakh. PTI

Tata Steel commissions ₹9,067 crore facilities at Kalinganagar plant

HEMANT KUMAR ROUT
Bhubaneswar, 16 October

UTTAM SINGH, V-P — OPERATIONS AT TATA STEEL KALINGANAGAR, SAID THESE INVESTMENTS WILL ENHANCE THE COMPANY'S ABILITY TO DELIVER HIGH QUALITY STEEL PRODUCTS

Tata Steel has commissioned a series of advanced manufacturing facilities at its Kalinganagar plant in Odisha, involving an investment of around ₹9,067 crore. It also unveiled the expansion of Neelachal Ispat Nigam Limited (NINL) in Kalinganagar.

The new facilities at Tata Steel Kalinganagar include two continuous galvanising lines with a combined capacity of one million tonnes per annum (mtpa), a 0.9 mtpa continuous annealing line (CAL), Phase-I of a 7 mtpa slurry pipeline project and an air separation unit set up by Linde India Limited.

The company said the galvanising lines will enable Tata Steel to manufacture advanced automotive steel, including coated advanced high-strength steels, catering to the requirements of automobile and appliance manufacturers. Equipped with advanced coating technologies, the lines are designed to improve product quality, consistency and reliability.

The CAL is one of the top three benchmark automotive lines globally, and will strengthen the company's capability to supply high-quality steel grades for automotive applications, it said.

Uttam Singh, vice president — operations at Tata Steel Kalinganagar, said these investments will enhance the company's ability to deliver high-quality steel products, improve operational efficiency and strengthen the raw material supply chain.

"The new facilities will strengthen Tata Steel's manufacturing capabilities in Odisha. With the continued support of the government, we remain committed to advancing sustainable steelmaking, generating employment and contributing to the state's industrial growth," he said.

AUM Ventures to mark close of ₹750 cr fund by March 2027

Pre-seed and seed-stage venture capital firm AUM Ventures, which is currently raising a ₹750 crore fund, is targeting March 2027 as the timeline to complete the fundraise. The firm announced the first close of the fund and has raised ₹250 crore so far. The deeptech-focused venture capital firm plans to make six to seven investments from the fund this year. Chetan Mehta *(pictured)*, founding partner of AUM Ventures, said the firm was established with the objective of supporting Indian innovation at the pre-seed stage and helping founders build globally competitive businesses. RapidCanvas raises $29 mn in Series-B

Enterprise artificial intelligence (AI) company RapidCanvas on Friday said it raised $29 million in a Series-B funding round led by Vertex Ventures SEA & India. The round also saw participation from Hitachi Ventures and existing investors, including Accel, Peak XV Partners, Valley Capital Partners and Titanium Ventures. The financing brings the company's total funding to $52.5 million. RapidCanvas plans to use the funding to grow its go-to-market teams and expand its network of private equity and advisory partners. It is also looking to grow its field AI engineering team across India, the United States and Brazil. OUR BUREAU

Tencent detected unintended behaviour from AI

Tencent Holdings said it identified unexpected behaviour from third-party AI models on its platform, after a research report this week uncovered rogue AI agents in China that originated from a sandbox on Tencent Cloud. The Shenzhen-based tech company said that the models were not from its own Hy artificial development team and it didn't find evidence of deliberate targeting or coordination. Surfaced by a research report from an international group of researchers, the rogue agents probed Alibaba Group Holding Ltd.'s online mapping service and sought to go around anti-bot protections. BLOOMBERG

OfBusiness's BidAssist expands reach beyond big cities

BidAssist, the AI-enabled tender intelligence unit of SoftBank-backed OfBusiness Tech Ltd., is seeing growing adoption of digital tools among small and midsize businesses seeking potential orders and assessing bidding opportunities. More than 60 per cent of BidAssist's 1.7 million users are based in Tier-II and Tier-III cities and towns, according to OfBusiness data, pointing to the growing use of digital tools by small businesses in industrial and commercial hubs beyond major cities. BidAssist aggregates procurement opportunities from government departments, public sector undertakings and other organisations. It tracks more than 50,000 live tenders daily and has indexed over 55 million tenders and tender results across India. OUR BUREAU

Cert-In advisory on AI calls for tighter controls: Experts

AASHISH ARYAN
New Delhi, 16 October

The Indian Computer Emergency Response Team's (Cert-In's) advisory cautioning about undetected cyber intrusions made by some frontier artificial intelligence (AI) models and their AI agents highlights the need for tighter controls over such agents, experts said.

In a late-night advisory issued on Thursday, Cert-In said some AI model service providers informed it that their frontier AI models and agents had, "during research and evaluation activity", reached the live systems of several Indian organisations. "The recorded activity involved reading business records, including personal data and confidential material, through credentials and connection settings exposed in application configuration, public code repositories and permissive Cloud service roles," Cert-In had said.

The government's cybersecurity enforcement agency also said most of the companies these AI models and AI agents targeted had no idea their networks had been breached.

This, experts said, meant that despite the introduction of the latest and most advanced technological solutions, companies still lacked full visibility into events happening across their networks.

"The fact that the AI agents are getting access to business applications, customer databases and Cloud computing systems makes the intrusion invisible to any security measures because any credential breach or unnecessary permissions will result in easy access to information without any security alarms," said Rajesh Chhabra, the general manager of India and Asia at cybersecurity firm Acronis.

In its advisory, the Cert-In had also said that during its own proactive threat hunting, it found instances of "financially motivated" campaigns against Indian companies that deployed AI agents with "ready-made" intrusion capabilities.

Businesses in India deploying AI-powered defence mechanisms on their networks should therefore ask for concrete evidence that the system can identify the misuse of a valid credential and track activity across systems in real time, Ganesh Iyer, the managing director of cybersecurity firm Trellix in India and the SAARC region, said.

"Organisations should treat each AI agent as a distinct identity with least-privilege access, secure credentials, retain logs and monitor continuously. They should also isolate testing from production and test incident response for a 2 am scenario. The focus should be on visibility and accountability across both human and non-human identities," said Sunil Sharma, the managing director and vice-president of India sales at Sophos, a UK-headquartered cybersecurity firm.

In addition, while AI agents that work on low-risk tasks that are easy to undo can act freely, companies should ensure that any AI agent working on "anything consequential or irreversible must keep a human in the loop," said Atul Arya, the founder and chief executive officer of Blackstraw, a digital transformation services provider.

Cert-In suggestions on AI agents

- Isolate research and evaluation workloads
- Use synthetic targets, credentials, disposable infra
- Monitor agent activity in real time
- Block re-use of third-party credential

AI drives 75% of orders on Meesho through personalised ranking

UDISHA SRIVASTAV
New Delhi, 16 October

Ecommerce platform Meesho is increasingly deploying artificial intelligence (AI) across its operations, with 75 per cent of orders coming through its AI-powered personalised ranking system, Prism. In addition, its AI customer support agent, Chorus, currently handles 62 per cent of user queries, said Pratik Kumar, the company's head of engineering.

While speaking with *Business Standard*, Kumar said, "AI as a technology is such a powerful innovation that it definitely has unlocked many problems that were otherwise hard to solve. Close to 75 per cent of our orders come through a personalised ranking model via the Prism system." He oversees technology and AI-related initiatives at Meesho.

Meesho's Prism system uses personalised ranking to recommend products to users based on signals such as demographics, geography, device usage, browsing behaviour, product clicks and ignored listings. The system is designed to identify user preferences even when shoppers arrive on the platform without a clearly defined purchase intent, Kumar said.

The company also uses an AI-powered system called TrendPulse to anticipate demand and help sellers prepare inventory ahead of emerging trends. Kumar cited Navratri as an example of how demand can vary across regions and days, with shoppers looking for particular colours of clothing depending on local customs.

Kumar said the ecommerce platform is using AI across product discovery, demand forecasting, customer support, voice-led shopping, fraud prevention, address prediction, logistics and seller enablement.

Meesho is deploying the technology to make shopping more accessible to customers who may be less comfortable typing search queries or navigating text-heavy interfaces. In this case, its Vaani AI agent enables users to discover products through voice, understand product information, add items to their carts and complete transactions through voice-led interactions.

India is shaping how OpenAI builds products: Senior Exec

PEERZADA ABRAR
Bengaluru, 16 October

Artificial intelligence (AI) giant OpenAI is exploring a distinct version of its products for India, where much of the company's growth is coming from, according to Vijaye Raji, its chief technology officer (CTO) of applications.

India's audio-first usage patterns are shaping those discussions inside OpenAI's product team, Raji told *Business Standard*. The focus is on voice, reliability in areas with intermittent connectivity and native Android experiences. India, he noted, is an Android-first market, unlike the more iOS-centric US.

The push reflects a broader bet on the country. Raji said OpenAI wants to invest more in India and connect its consumer, enterprise and developer businesses there.

The company has seen strong growth in India, with twice as many people using ChatGPT in the country compared to a year ago, the executive said. OpenAI is also seeing adoption among enterprises and educational institutions.

Raji, who is based in the US, is in Bengaluru for the OpenAI DevDay Exchange event.

He outlined three areas of focus in India: consumers through ChatGPT, enterprises and developers. He said the company wants to connect them so developers build products for Indian users and businesses reach more consumers.

Vijaye Raji, OpenAI's CTO of applications

"Our products now reach more than 1.2 billion people every week," Raji said.

India is also shaping OpenAI's product development. Raji said the firm is studying how Indians use ChatGPT, including voice and conversations that mix English and Hindi in the same session. It aims to improve how its models understand and respond to these patterns.

With GPT-Live-1.1, the company is improving pronunciation and adding 13 new voices, including Neer and Leher in Hindi, Raji said. The model is also better at understanding mixed-language speech.

These new voices will be rolled out in seven different languages and are intended to sound more local and natural, along with a new "Bubbie" voice inspired by grandmothers.

Karan MV, who helps lead developer experience at OpenAI, said the update lets users have natural, two-way voice conversations in Hindi in the ChatGPT app. He said it is designed to go beyond basic dictation.

Raji said the company plans to extend voice to India's major languages, starting with the most widely used. The pace will depend on the availability of training data. OpenAI works with companies, including in India, that provide properly licensed data.

Karan said OpenAI's accessibility push also includes its affordable Go plan, which launched first in India before expanding globally.

Companies are using OpenAI's APIs to build customer-support applications and voice agents. Raji cited JioHotstar, which uses voice-based AI to answer questions about specific overs in cricket matches.

Raji said India is one of OpenAI's largest developer markets and has changed significantly since he lived in the country 20 years ago. During his visit, OpenAI is revisiting about 30 products announced at DevDay for their relevance to India. He is also meeting AI startup founders to understand their needs and gather investment ideas.

ONGC weighs standalone, JV models for greenfield refinery

In the pipeline

- Higher petrochemical intensity planned to tap rising domestic demand
- India targets 320 million tonnes per annum (mtpa) refining capacity by 2030, up from 267 mtpa currently
- Bharat Petroleum and Indian Oil Corporation developing 9 mtpa refineries each in Andhra Pradesh and Tamil Nadu
- HPCL commissioned a 9 mtpa refinery in Rajasthan in July
- ONGC's ₹7,000-crore Mangaluru SPR project in Karnataka will add 1.75 million tonnes of storage capacity

SHUBHANGI MATHUR
New Delhi, 16 October

State-run Oil and Natural Gas Corporation Ltd (ONGC) is evaluating various models for its proposed greenfield refinery and petrochemical complex, including setting it up independently, through a subsidiary, or in partnership with foreign players, people familiar with the matter said.

The project is in the initial stage and we are deciding the working model. Other specifications, such as location and configuration of the refinery will be worked out later," a senior company executive said.

The proposed refinery is also likely to have a higher petrochemical intensity, in line with rising domestic demand, the official said. The detailed feasibility report (DFR) will assess the refinery's petrochemical configuration and potential, the official added.

Questions sent to ONGC remained unanswered. The proposed greenfield refinery project assumes significance for ONGC's larger diversification and integration plan.

The details regarding capacity and investment requirement for the project will be firmed up once the DFR is ready. Indian oil companies are pursuing a mix of greenfield refinery projects and expansions of existing plants to raise the country's overall refining capacity. Earlier this month, oil minister Hardeep Singh Puri said India's refining capacity of 267 million tonnes per annum (mtpa) helped ensure fuel availability despite supply disruptions during the peak of the West Asia conflict.

India's refining capacity is expected to rise to 320 mtpa by 2030, he added. Countries such as Saudi Arabia and the UAE have also shown interest in investing in upcoming refinery projects, provided they see meaningful returns on their investments, said Puri.

Meanwhile, state-run Bharat Petroleum Corporation Ltd is developing a 9 mtpa greenfield refinery-cum-petrochemical complex at Ramayapatnam in Andhra Pradesh, with final environmental clearance expected soon. Indian Oil Corporation Ltd, along with its subsidiary Chennai Petroleum Corporation Ltd, is setting up a 9-mtpa greenfield refinery in Nagapattinam, Tamil Nadu, with a focus on meeting the rising demand. In July, HPCL commissioned a 9 mtpa greenfield refinery-cum-petrochemical complex in Rajasthan.

India currently has 5.33 mt of strategic petroleum reserve (SPR) capacity across Visakhapatnam, Mangaluru and Padur, while another 6.5 mt planned under Phase II. ONGC will develop a 1.75-mt SPR at Mangaluru as an extension of the existing unit. The project, estimated to cost ₹7,000 crore, will be developed, financed by ONGC.

QUICK READ

Govt sets zero sugar diversion for ethanol in 2026-27 tender

The government has directed oil marketing companies (OMCs) to cut sugar diversion for ethanol production to zero in 2026-27, excluding ethanol made from sugarcane juice, sugar syrup and B-heavy molasses from their latest tender, according to a tender issued on Friday. The OMCs invited bids for 11 billion litres of ethanol for the supply year beginning in November. The tender allows manufacturers to bid for ethanol made from corn, broken rice and surplus rice procured by the Food Corporation of India, according to the document jointly issued by state-run Indian Oil, Bharat Petroleum and Hindustan Petroleum. The companies cut the incentive for corn-based ethanol to ₹2.79 per litre from ₹5.79, bringing the procurement price down to ₹68.86 rupees per litre from ₹71.86. REUTERS

India's GDP to grow 7.1-7.3% in FY27: Deloitte

Deloitte India upgraded its growth projection for the economy to 7.1-7.3 per cent in FY27, up from 6.5-6.8 per cent, citing sustained private demand. However, geopolitical tensions and energy price volatility remain risks to the forecast, according to the accounting and consulting major. "Private investment tends to strengthen when firms see sustained demand, a need to expand capacity, and access to finance. Recent indicators suggest these conditions are beginning to align in India," Deloitte said. It highlighted that capacity utilisation has averaged above 75.7 per cent for six consecutive quarters, which may reduce spare capacity and incentivise firms — with healthier balance sheets — to invest. Leverage FTAs to push exports: CII's Budhia

Businesses should focus on leveraging free-trade agreements (FTAs) and initiatives such as the export promotion mission to expand their global footprint, strengthen international partnerships and boost shipments, CII's Sanjay Budhia said on Friday. He said India's cumulative exports reached an estimated $476.20 billion during April-September, registering a robust growth of 13.84 per cent year-on-year. Budhia, Chairman, CII National Committee on Exports and Managing Director, Patton International, said that the resilience and growing competitiveness of the Indian industry, particularly in electronics, engineering goods, chemicals and textiles are helping push exports. PTI

RBI clears merger of Emirates NBD's India branches with RBL Bank

The Reserve Bank of India (RBI) on Friday approved the Scheme of Amalgamation of the Indian branches of Emirates NBD Bank P J S C with RBL Bank Limited, effective December 1, 2026. In June this year, Emirates NBD completed the acquisition of a majority stake in RBL Bank through a primary capital infusion of about ₹26,000 crore. Emirates NBD now holds 60 per cent of the expanded share capital of RBL Bank. The board has approved the appointment of five nominee directors of Emirates NBD as additional non-executive, non-independent directors on the bank's board, effective June 18, 2026, subject to shareholder approval. The transaction, which was announced in October last year, was completed after receiving regulatory approvals and satisfying closing conditions. The deal constitutes the largest foreign direct investment in the Indian banking sector. OUR BUREAU

'AI gains may feed into India's incomes in 3-5 years'

Q&A Bloomberg Economics Chief Economist **Tom Orlik** expects artificial intelligence (AI) to augment, rather than replace, India's workforce. In an interview with **Krity Ambey** in New Delhi, Orlik said AI-driven productivity gains could add up to 0.9 percentage points (pp) to India's annual gross domestic product (GDP) growth. Edited excerpts:

Most agencies have raised India's growth forecasts, with Bloomberg Economics projecting growth of 6.9 per cent this year. How durable is the current growth momentum, given the geopolitical uncertainties? What are the biggest downside risks to the forecast?

■ India has strong structural advantages: a huge market, a young workforce, and a government investing in infrastructure. But there are near-term challenges. The Iran war is raising oil prices, affecting exports to Gulf countries and remittances from Indian workers overseas.

The US buildout of AI data centres is drawing capital from the rest of the world, even though India's large information technology (IT) industry could eventually benefit from AI.

El Niño is another risk because a large share of India's economy remains agricultural. Structurally, we are optimistic that India will remain one of the world's fastest-growing economies, though it faces cyclical challenges in the coming months.

Are there any upside risks to your growth forecast?

■ Most downside risks come from external shocks. An upside scenario would involve those shocks easing faster than expected. If the US and Iran reached an accommodation and oil prices fell to $70 a barrel, that would be an immediate positive shock for India. We would lower our Consumer Price Index inflation forecast and raise our GDP growth forecast.

What oil prices did you assume when modelling the 6.9 per cent growth forecast for India?

■ Our base case assumed oil prices of around $99 a barrel in the fourth quarter, followed by $90 a barrel in the first quarter. That translates into an average of $95 a barrel for the second half of 2026-27, followed by $80 a barrel in 2027-28.

"GOVERNMENTS NEED TO EMPOWER YOUNG PEOPLE TO PLAY A CONSTRUCTIVE ROLE IN THE ECONOMY"

Are youth-led protests across South Asia a sign of economic frustration?

■ I used to live in China, where I was Bloomberg's China economist. There, concerns about youth unemployment included stories about the ant tribe — unemployed graduates living in places such as car parks and underground shopping malls. Youth unemployment is not positive, but a large number of young graduates are more a source of potential than a source of problems. Governments need to empower young people to play a constructive role in the economy. I would view a young, highly educated workforce as a source of potential growth rather than a source of political problems.

How might AI affect jobs and growth in India?

■ We assess AI's impact by looking at tasks rather than just occupations. It could support many tasks performed by computer coders, for example, while its immediate impact on other jobs, such as those in agriculture, may be limited. AI is likely to have a greater impact on professional services.

If AI mainly augments labour, allowing people to keep their jobs and become more productive, it could add as much as 0.9 pp to India's annual GDP growth. If it replaces workers, productivity may rise while jobs are lost, concentrating gains among business owners and early investors. We do not yet know which path will prevail; choices made by businesses and policymakers will help shape the outcome. But Indian policymakers and IT leaders have emphasised the use of AI to raise productivity and support employment.

If AI does boost productivity, how long might it take for those gains to translate into income growth?

■ Economy-wide gains require AI to be embedded in business processes and enterprise systems, which takes years rather than days or months. India may be well placed to do this because its IT companies have considerable expertise in integrating new technology into businesses. I would think in terms of three to five years for productivity gains, rather than one or two. If those gains come from making people more productive in their jobs, income gains would follow at the same time.

What could make India more attractive for foreign direct investment?

■ India has structural advantages: a huge market, significant potential, and a government seeking to strengthen infrastructure and build advanced manufacturing. These factors are reflected in recent gross inflows. But investors are also attracted by the prospect of unusually high profits from AI in the US, drawing capital into that market.

IGX gets regulator nod for LNG capacity booking platform

SHUBHANGI MATHUR
New Delhi, 16 October

Indian Gas Exchange (IGX) received approval from the Petroleum and Natural Gas Regulatory Board (PNGRB) to introduce a regasification capacity booking platform on the exchange. The move is expected to provide a centralised and organised mechanism for the listing and booking of unutilised regasification capacity at liquefied natural gas (LNG) terminals.

The proposed platform would enable market participants to identify available capacity and access it in accordance with their requirements, said PNGRB in a press note. "This facility is expected to enhance the growth of gas markets and derive support from the earlier decision of the Board to reduce the pipeline tariff zones to two, thereby making even distant LNG terminals competitive for consumers," the regulator added.

The regulator emphasised that a large number of terminals were reporting poor capacity utilisation and that the proposed platform by IGX would help attract LNG cargoes by transparently discovering lower regasification charges.

Under the proposed arrangement, LNG terminal operators and capacity holders may list their unutilised regasification capacity on the platform, while prospective users may book available capacity based on their requirements. Buyers would also have the option to indicate their capacity requirements, thereby improving the visibility of available capacity and market demand.

IGX will act as a facilitator for capacity booking, while contractual negotiations, payment settlements and risk management will continue to be undertaken directly between the concerned buyers and sellers, in accordance with their respective agreements. Participation on the platform will be entirely voluntary.

"The initiative is expected to facilitate more efficient utilisation of existing LNG regasification infrastructure by providing market participants with an additional transparent and structured avenue for accessing available capacity, while preserving the bilateral nature of commercial arrangements," said PNGRB.

Coal ministry proposes suspension of mining ops for violating approved plans

SAKET KUMAR
New Delhi, 16 October

The Ministry of Coal has proposed a framework that would allow authorities to suspend coal and lignite mining operations for violations of approved mining plans. It would also require company boards to submit annual declarations confirming compliance with the plans and applicable laws.

The draft Colliery Control (Amendment) Rules, 2026, proposes that the competent authority first direct a colliery owner to rectify a violation within a specified period. If the violation remains uncorrected, the authority may issue a 15-day show-cause notice asking why mining operations should not be suspended.

If the response is unsatisfactory, the authority may suspend all or part of the mining operations, allowing only activities necessary to bring the mine into conformity with its approved plan.

The draft also provides for the temporary suspension of operations, with reasons recorded in writing, where the competent authority considers it necessary in the interests of public safety, environmental protection or the prevention of imminent or irreparable harm.

THE DRAFT COLLIERY CONTROL (AMENDMENT) RULES, 2026, PROPOSES THAT THE COMPETENT AUTHORITY WOULD FIRST DIRECT A COLLIERY OWNER TO RECTIFY A VIOLATION WITHIN A SPECIFIED PERIOD

The draft rules have been issued under Section 18 of the Mines and Minerals (Development and Regulation) Act, 1957. The government has invited objections and suggestions, which will be considered after 30 days from the date the Gazette copies are made available to the public. The draft rules were published in the Gazette on 7 October. Stakeholders can submit their feedback to the Ministry of Coal.

Separately, the board of the project proponent company would be required to submit an annual declaration to the coal controller stating that all mining operations at its coal or lignite mine have been carried out in accordance with the approved mining plan and applicable laws. Where the project proponent is not an incorporated company, the colliery owner would submit the declaration.

The amendments also seek to define the powers and territorial jurisdiction of officers under the coal controller, including the deputy coal controller, regional heads, coal superintendents, assistant coal superintendents and surveyors. The coal controller would be authorised to prescribe their functions and jurisdiction.

The draft identifies the coal controller, or an officer of the Coal Controller's Organisation authorised in writing, as the competent authority to determine compliance with mining plans, except for matters governed by the Directorate General of Mines Safety or other statutory regulatory bodies.

Centre permits deployment of private teachers for Census duty

PRESS TRUST OF INDIA
New Delhi, 16 October

The Centre on Friday amended the Census Rules, 1990, allowing states and Union territories to appoint teachers of "aided or unaided private bodies" as enumerators during the ongoing census exercise, officials said.

In a gazette notification issued by Registrar General of India (RGI) Mrityunjay Kumar Narayan, the Centre amended the 1990 rules, which said "teachers, clerks, or any official or any person" can be appointed as census officers by the states and Union territories as enumerators.

The notification specifies that "teachers of any educational institution of the government, local authority, aided or unaided private bodies, societies or trusts; (ii) Clerks or any official of the Central government, state government, local authority or establishment (including public sector undertakings, statutory bodies, banks, companies, institutions, societies and trusts); (iii) Any person, as the state government or the Union territory administration may consider suitable" can be appointed as Census officers to perform duties as an enumerator.

This come against the backdrop of a petition filed by Haryana Progressive Schools Conference in the Punjab and Haryana High Court, challenging the requisition and deployment of teaching staff from private unaided schools for census duty

The changes come against the backdrop of a petition filed by Haryana Progressive Schools Conference in the Punjab and Haryana High Court, challenging the requisition and deployment of teaching staff from private unaided schools for census duty.

In an order dated October 8, Justice Harpreet Singh Brar had stayed the operation of two Haryana government communications seeking details of available teachers for census duty. The matter has now been listed for April 29, 2027.

The petitioner contended that the government has no statutory authority under the Census Act, 1948, or the rules framed thereunder to requisition the teaching staff of private unaided schools for appointment as enumerators or supervisors for census duty.

The plea said that Section 4A of the Census Act specifically contemplates making available officers and staff of local authorities for census-related work, whereas private unaided schools and their employees do not fall within the definition or scope of "local authority". The 2027 Census, the eighth since Independence, is being conducted in two phases: 1) house-listing and housing census; 2) population enumeration.

In-kind welfare transfers helped 220 mn in 2022-23; West Bengal top beneficiary

HIMANSHI BHARDWAJ
New Delhi, 16 October

Free and subsidised goods from government welfare schemes improved the level of living of 220 million Indians in 2022-23. West Bengal saw the most benefit, as 40.5 per cent of the state's population moved into a higher consumption class, according to a paper released in the latest edition of *Sarvekshana*, a journal of the National Statistical Office (NSO).

The paper found that 18.8 per cent of India's rural population and 8.4 per cent of its urban population moved into a higher consumption class once the value of these in-kind transfers was counted. That is 15.8 per cent of the total population.

Among the 18 major states, West Bengal led in both rural and urban areas, with 46.5 per cent of its rural population and 24.9 per cent of its urban population moving up a class. The smallest shares were in Gujarat (3.7 per cent) and Kerala (4.6 per cent).

The goods include food grains from the Public Distribution System, pulses, sugar, salt and edible oil, as well as items such as school uniforms, school shoes, bicycles, mobile phones, tablets and laptops.

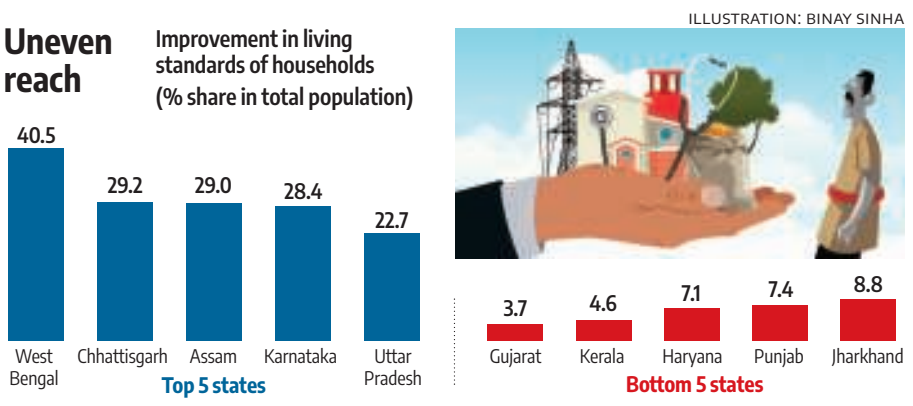

ILLUSTRATION: BINAY SINHA

Note: Figures are for 2022-23 and compare consumption with and without value of free and subsidised goods.
Source: 121st edition of *Sarvekshana*, a journal of the National Statistical Office

Using the unit-level data from the NSO's Household Consumption Expenditure Survey 2022-23, the authors ranked households by their monthly per capita consumption expenditure (MPCE) without these transfers and divided them into 12 classes — from the poorest 5 per cent to the richest 5 per cent.

They then added the value of the free items, using the most common unit prices in the survey data, and tracked how many people moved into a higher class. A household that moved up was counted as having experienced an improvement in its level of living.

Most of the movement was found at the bottom of the distribution. In rural India, the share of people moving to the next higher class ranged from 4 per cent to 33 per cent. The highest share, 33 per cent, came from the 5–10 per cent class, and the lowest, 4 per cent, from the second-highest class of 90-95 per cent.

In urban India, the share ranged from 1 per cent to 22 per cent, again highest in the second-lowest class. In both rural and urban areas, the largest upward movement was in the bottom three classes. "Such lateral movement of the population resonates with the progressive nature of the social transfers, i.e., these are intended for the poor, not the rich," observed the authors.

The pattern held across states. Among the 18 major states, the poorest classes saw the largest improvement in 12 states in rural areas and 15 in urban areas.

"Our analysis emphatically shows the positive impact of in-kind social transfers in the level of living of the population belonging to the lower fractile classes, i.e., the population who deserves the in-kind transfers the most. Such an improvement will definitely have its influence in reduction of incidence of poverty in the country and would be visible whenever official poverty estimates are made," the authors conclude.

The paper also noted that some schemes hand out bicycles, laptops, mobile phones and school uniforms regardless of a household's economic status. This may explain some of the upward movement among better-off households. According to the study, the transfers also narrowed consumption inequality slightly in 2022-23. The Gini coefficient, a standard measure of inequality where lower means more equal, fell from 0.266 to 0.261 in rural India and from 0.314 to 0.309 in urban India, once the value of in-kind transfers was included.

"Although the magnitude of the change in the Gini coefficient is modest, it indicates that public transfers exert an equalising effect on the distribution of consumption," the paper noted.

NOTES

1) The above Financial Results have been reviewed by the Audit Committee on and approved by the Board of Directors at their meeting held on 16th October 2026.
2) The Company operates in only one business segment viz. Supply of Equipments, Steel Structures and Site Services of Mechanical Works.
3) The Company has significant accumulated losses as at 30th September 2026.
The Management, including the Board of Directors of the Company, performed an assessment of the Company's ability to continue as a going concern. Considering the following aspects, the Management and the Board of Directors have assessed that the Company would be able to meet its cash flow requirements for the next twelve months from the date of these financial results and have accordingly, prepared this statement on a going concern basis.
a) Tata Projects Limited, Holding Company has provided a letter of support to provide adequate business, financial and operational support to the Company, to enable it to meet its financial obligations and to continue its operations.
b) Review of the approved business plan and the future cash flow projections.
4) During the quarter ended September 30, 2026, the Company has recognised revenue for a claim amounting to Rs. 992 lakhs towards recovery of additional costs incurred on account of extension of time, execution of ground improvement works and other related works at the project site. Management believes that the amount recognised is recoverable.

NOTICE TO SHAREHOLDERS
SPECIAL WINDOW FOR RE-LODGEMENT OF TRANSFER AND DEMATERIALISATION OF PHYSICAL SHARES

Notice is hereby given to the shareholders that, pursuant **to SEBI Circular No. HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated January 30, 2026** a special window for re-lodgement of transfer deeds relating to physical securities and dematerialisation ("demat") has been opened from **February 05, 2026 to February 04, 2027 (1 year).**

The facility of the said special window is for lodgement of physical securities transfer and demat which were sold/purchased prior to April 01, 2019 including cases where transfer requests which were submitted earlier and were rejected/returned/not attended to due to deficiency in the documents/process/or otherwise. Shareholders are requested to refer to the below matrix as prescribed inter-alia by SEBI vide its circular dated January 30, 2026 for guidance on applying for transfer and dematerialisation of physical shares:

Execution Date of Transfer Deed	Lodged for transfer before April 01, 2019 ?	Original Security Certificate Available ?	Eligible to lodge in the current window ?
Before April 01, 2019	No (It is fresh lodgement)	Yes	Yes (Subject to conditions stated in the SEBI Circular)
Before April 01, 2019	Yes (It was rejected / returned earlier)	Yes	
Before April 01, 2019	Yes	No	No
Before April 01, 2019	No	No	No

Please note that the request(s) which are accompanied by original certificate(s) along with transfer deeds and relevant supporting documents will only be considered under this Special Window. The securities so transferred shall be mandatorily credited to the transferee only in demat mode and shall be under lock-in for a period of one year from the date of registration of transfer. Such securities shall not be transferred/lien-marked/pledged during the said lock-in period.

For any queries on the above matter or re-lodgement of documents, shareholders are requested to contact to the Company's RTA namely MUFG Intime India Private Limited (formerly known as 'Link Intime India Private Limited'), at C-101, Embassy 247, L.B.S. Marg, Vikhroli (West), Mumbai – 400083, Maharashtra, India, Tel No.: (022) 4918 6000, Email: investor.helpdesk@in.mpms.mufg.com, or to the Company at its corporate office at SM House, 11 Sahakar Road, Vile Parle (East), Mumbai – 400057, Maharashtra, India, E-mail: corporaterelations@guficbio.com for further assistance, within the above-mentioned period.

We urge all the eligible shareholders to take advantage of this special window introduced for the benefit of investors.

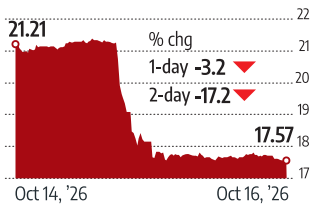
Yes Bank AT-1 bond reinstatement likely to hit CET-1 ratio by 250 bps

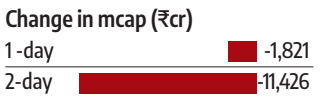
SUBRATA PANDA
Mumbai, 16 October

Losing momentum

YES Bank share price in ₹



Change in mcap (₹cr)



Source:Bloomberg

Yes Bank on Friday said reinstatement of the principal amount of its Additional Tier-1 (AT-1) bonds worth ₹8,415 crore would have a pro-forma impact of 250 basis points (bps) on its Common Equity Tier-1 (CET-1) ratio as of June 30, 2026.

However, its Tier-1 capital ratio would remain unchanged at 14 per cent on a pro-forma basis. The bank said it is reviewing the Supreme Court (SC) order that upheld the Bombay High Court's decision to quash the write-off of AT-1 bonds during its reconstruction phase.

"The bank is examining the judgment in detail, including evaluating all available legal options and suitable actions/ steps going forward," Yes Bank said in a regulatory filing.

The apex court on Thursday upheld the Bombay High Court's decision to set aside Yes Bank's ₹8,415 crore Additional Tier-1 (AT-1) bond write-off in March 2020. The SC ruled that the bank's administrator had acted beyond his authority and contrary to the applicable regulatory framework.

A Bench of Justices Dipankar Datta and Augustine George Masih declined to interfere with the high court's January 20, 2023, judgment.

The Bench also said the Reserve Bank of India (RBI) had remained a "mere bystander," allowing Yes Bank's CET-1 ratio to fall to an astonishingly low 0.6 per cent while the bank's business was being carried out in a "clandestine manner."

Yes Bank's shares tumbled 3.20 per cent on the BSE on Friday to close at ₹17.57.

On Thursday, the bank's shares plunged nearly 16 per cent intraday, before closing 14.43 per cent lower on the BSE, marking their steepest single day decline since July 2020.

Yes Bank had a CET-1 ratio, Tier-1 capital ratio and overall capital adequacy ratio (CAR) of 14 per cent, 14 per cent and 15.1 per cent, respectively, as of June 30, 2026. The bank's capital position has been supported by timely infusions. Last year, SMBC, one of Japan's leading banks and the core unit of Sumitomo Mitsui Financial Group (SMFG), invested ₹16,333 crore in Yes Bank through two secondary purchases in September 2025. It acquired 24.22 per cent ownership in the bank. SMBC subsequently hiked its stake to 24.9 per cent.

Yes Bank previously received around ₹8,800 crore from two financial institutions between FY23 and FY25. Earlier, as part of the reconstruction scheme in March 2020, the bank received ₹10,000 crore from financial institutions, followed by a ₹15,000-crore follow-on public offer (FPO) in July 2020.

It said that it has access to appropriate capital-management levers and preserves the flexibility to undertake additional capital actions, as considered appropriate to pursue its growth objectives.

"The bank remains firmly focused on the continued strength of its franchise and in providing customers with consistent service and support across their banking requirements," the lender said.

The principal amount of the bonds is equivalent to the bank's cumulative net profit over 16 quarters.

Fairfax to retain Sharma as IDBI CEO, names Kannan chairman

SUBRATA PANDA
Mumbai, 16 October

N S Kannan
Former MD & CEO of ICICI Life Insurance

Fine print

- Under the RBI's requirements, Fairfax has 15 years to reduce its shareholding in IDBI Bank to 26%
- Prem Watsa, founder, chairman and CEO of Fairfax Financial, said the group must cut its stake from 60.72% to 40% within the first 10 years
- Fairfax has two years to decide how to proceed with its 40% stake in CSB Bank
- The group expects to complete the IDBI Bank acquisition as early as Q1 of 2027, subject to regulatory approvals
- Fairfax does not intend to raise long-term debt to fund the deal

Canadian billionaire Prem Watsa's Fairfax Financial Holdings will draw on the expertise of its advisers Deepak Parekh, former chairman of HDFC Ltd, and Paresh Sukthankar, former deputy managing director (MD) of HDFC Bank, as it prepares to acquire a 60.72 per cent stake in IDBI Bank for ₹52,878 crore.

The group has proposed N S Kannan, former managing director and chief executive officer (MD & CEO) of ICICI Life Insurance and former executive director and chief financial officer of ICICI Bank, as IDBI Bank's chairman, subject to Reserve Bank of India (RBI) approval. C V R Rajendran, former CEO of CSB Bank, will also work closely with Fairfax as an adviser, while Rakesh Sharma will continue as IDBI Bank's MD & CEO.

"Rakesh has done a superb job and will continue as CEO. We will add to the bank's board N S Kannan... He will be chairman of IDBI Bank, subject to RBI approval. Rajendran, who is the former CEO of CSB Bank, will also work with us closely as an adviser. Also, we benefit greatly from having Deepak Parekh and Paresh Sukthankar as our advisers," Watsa, founder, chairman and CEO of Fairfax Financial Holdings, said during an analyst call.

Parekh led HDFC from 1993 until its merger with HDFC Bank in July 2023.

Sukthankar was part of the core team that helped establish HDFC Bank in 1994-95 and served as its deputy MD before leaving in 2018.

Fairfax plans to bring IDBI Bank, Go Digit Insurance, and IIFL Capital Services together as an integrated financial services group. Watsa said the combination could deliver significant benefits to Indian consumers and businesses while creating long-term value for the three businesses and Fairfax.

"We see this as an opportunity for the next two decades at least," he said.

Under RBI requirements, Fairfax has 15 years to reduce its shareholding in IDBI Bank to 26 per cent. Watsa said the group must cut its stake from 60.72 per cent to 40 per cent within the first 10 years, and to 26 per cent over the following five years.

Fairfax also has two years to decide how to proceed with its 40 per cent stake in CSB Bank, he said.

The group expects to complete the IDBI Bank acquisition as early as the first quarter of 2027, subject to regulatory approvals.

Fairfax plans to finance the transaction through a combination of cash held at the holding company, dividends from subsidiaries, asset sales and contributions from Go Digit Insurance and IIFL Capital Services. It does not intend to raise long-term debt to fund the deal.

Watsa did not outline plans for Fairfax's stake in IIFL Finance, which the group is seeking to sell to global private equity investors.

FM, JBIC governor discuss clean energy, critical minerals

PRESS TRUST OF INDIA
New Delhi, 16 October

Finance Minister Nirmala Sitharaman on Friday met Japan Bank for International Cooperation (JBIC) Governor Kazuhiko Amakawa in Bangkok, Thailand. They discussed expanding cooperation on clean energy, critical minerals, electric mobility and resilient supply chains.

"Discussions focused on expanding cooperation in clean energy, energy transition, advanced manufacturing, semiconductors, critical minerals, electric mobility and resilient supply chains, including through the $600 million India-Japan Fund and Japanese participation in the National Investment and Infrastructure Fund (@NIIFIndia)," the finance ministry said on X.

Amakawa, during the meeting with the Finance Minister on the sidelines of the World Bank-IMF Annual Meetings, highlighted the success of the India-Japan Fund, which has invested in various sectors such as electric mobility and bioethanol, and expressed hope for a follow-on fund.

He noted JBIC's stake in the National Industrial Corridor Development Corporation and growing Japanese interest in semiconductors, including opportunities at Dholera, and in AI and data centres.

Sitharaman encouraged Japanese investors to explore opportunities in the data centre sector in Tier-II and Tier-III cities to promote balanced urban development.

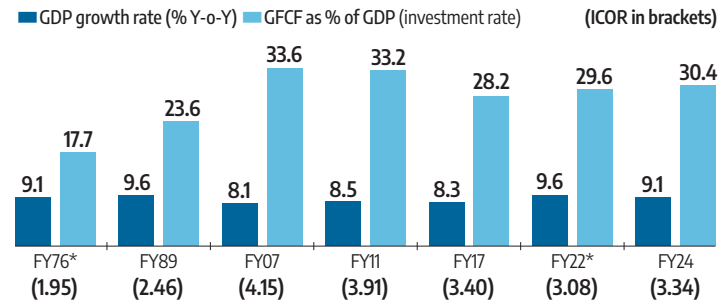
DATANOMICS

India's capital productivity has declined in recent years

INDIVJAL DHASMANA

Shaktikanta Das, principal secretary-2 to the Prime Minister, recently said the Indian economy is within striking distance of an 8 per cent growth rate on the back of reforms undertaken. In its over 75-year journey since the national accounts data became available, the economy has seen an annual growth rate of 8 per cent or more seven times. Five of those were post-liberalisation years. However, 2023-24 (FY24) did not yield 8 per cent growth in the new series. Also, the investment rate was around 30 per cent in four of those seven years. In recent years, the investment rate has been above that, but the economy never delivered an 8 per cent growth rate. The maximum it reached was 7.8 per cent in Q1FY27, with an investment rate of 34.3. It meant capital productivity has come down drastically. This may be due to the fact that the government is driving the economy, and its capex mainly goes to infrastructure, which has a higher gestation period than other segments of the economy. India had better capital productivity than most of its peers, but not Vietnam and Malaysia. Reforms that Das is talking about should raise this productivity if India is to record an 8 per cent annual growth rate on a sustained basis.

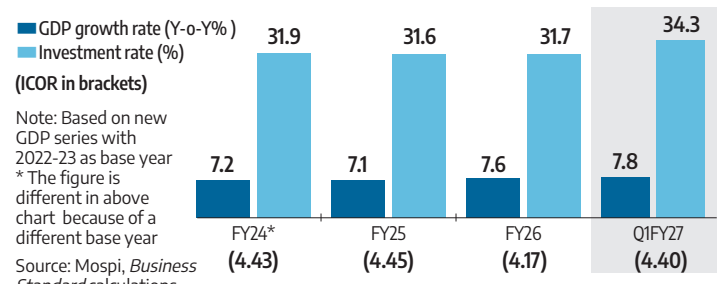
India has seen 8%+ GDP growth 7 times in over 75 yrs



Note: Based on 2011-12 series. Incremental capital-output ratio (ICOR) is calculated by dividing the investment rate by the GDP growth rate. It denotes capital productivity; the lower the rate, the higher the productivity
* These are exceptional years due to a very low base in the previous year

GFCF: Gross fixed capital formation Source: Mospi, *Business Standard* calculations

But it has not seen such growth in new GDP series

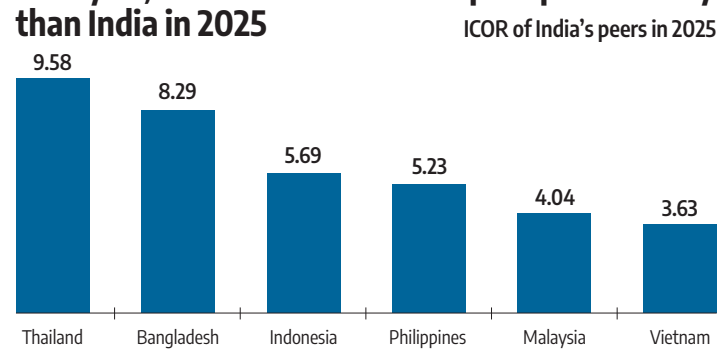


Note: Based on new GDP series with 2022-23 as base year
* The figure is different in above chart because of a different base year

Source: Mospi, *Business Standard* calculations

Malaysia, Vietnam had better capital productivity than India in 2025

ICOR of India's peers in 2025



Source:World Bank, *Business Standard* calculations

L&T Finance set to bet on urban demand for growth

AATHIRA VARIER
Mumbai, 16 October

Sudipta Roy, MD and CEO, L&T Finance, said that they are focusing on good-quality borrowers in rural markets

L&T Finance will remain cautious on rural lending in the second half of FY27 (H2FY27) amid uncertainty over crop output, rural liquidity, and weather-related risks, even as it looks to urban and semi-urban businesses to drive loan growth.

The non-banking financial company (NBFC) is assessing early signs of stress in drought-prone districts and will consider increasing rural disbursements as uncertainties around the kharif harvest, the rabi crop and winter rainfall ease, said Sudipta Roy, managing director (MD) and chief executive officer (CEO).

"We are assessing rural liquidity and monitoring early signs of stress in drought-prone districts. We are focusing on good-quality borrowers in rural markets. Once the risks associated with El Niño, drought and other weather-related disruptions ease, we can consider increasing rural disbursements. Until then, we will remain cautious in H2FY27," Roy said.

The impact of the kharif harvest is expected to become clearer in the first two weeks of November, while the rabi crop outlook and winter rainfall will also influence lending decisions. The company has tightened microfinance disbursements and is prioritising borrowers with stronger credit profiles amid concerns over rural demand and repayment capacity.

Despite the cautious approach to rural lending, L&T Finance expects its loan book to grow by over 20 per cent in H2FY27, with urban finance and festival demand likely to drive growth in the December quarter (Q3FY27).

"The December quarter is generally a good quarter for the NBFC and broader banking, financial services and insurance (BFSI) industry because of festival demand. We expect Q3 growth to be broadly in line with Q2, with growth above 20 per cent, particularly driven by the urban finance business. We are also hopeful of some improvement in farm equipment finance, which was sluggish in Q2 because of patchy monsoons. However, the outlook for Q4 will depend on the performance of the kharif crop, the rabi crop trajectory and other economic factors," Roy said.

The company will focus on urban and semi-urban businesses, including two-wheeler finance, personal loans, small and medium enterprise (SME) finance and gold loans, while continuing to expand in rural segments where the risk-reward equation is favourable.

PNB Q2 net up 13% on improved core income

PRESS TRUST OF INDIA
New Delhi, 16 October

Punjab National Bank (PNB) on Friday reported a 13 per cent rise in net profit to ₹5,532 crore for the second quarter ended September 2026 (Q2FY27), driven by improved core income and a moderation in bad loans.

The country's second-largest public sector lender had logged a profit of ₹4,904 crore in the year-ago period.

The bank's total income increased to ₹38,185 crore in the second quarter from ₹36,214 crore a year ago, PNB said in a regulatory filing.

Interest income rose 9 per cent to ₹34,585 crore in Q2FY27 from ₹31,872 crore in the year-ago period, while net interest income rose 11 per cent to ₹11,601 crore from ₹10,469 crore in the same period last year.

However, operating profit grew 4 per cent to ₹7,532 crore from ₹7,227 crore in the same quarter a year ago.

Explaining the reason for muted growth in operating profit, PNB managing director and chief executive officer (MD & CEO) Ashok Chandra said that it was due to depressed treasury income due to the hardening of interest rates.

The treasury income came down by ₹1,000 crore to ₹753 crore in the second quarter as against ₹1,769 crore in the same period a year ago, he said at the post-result interaction with the media.

Excluding treasury income, the bank's operating profit would have exceeded ₹8,000 crore during the quarter, he added.

On raising funds from overseas investors, Chandra said the bank will raise $1 billion under its Medium-Term Note (MTN) Programme. The bank is waiting for an opportune time to mobilise the funds, he said.

Federal Bank net profit surges 45% to record ₹1,386 crore on higher NII

Private-sector lender Federal Bank reported a 45.1 per cent Year-on-Year (Y-o-Y) rise in net profit to a record ₹1,386 crore in the July-September quarter of the financial year 2026-27 (Q2FY27), supported by strong growth in net interest income, higher fee income and an improvement in asset quality.

Net interest income (NII), or the difference between interest earned and interest expended, rose 26.4 per cent Y-o-Y to ₹3,153.4 crore. The bank's other income rose 37.7 per cent to ₹1,490.4 crore, with fee income increasing 31.9 per cent to ₹1,167.7 crore. Its net interest margin (NIM) expanded by 26 basis points (bps) to 3.32 per cent during the quarter.

"Last two quarters we have given this guidance that we expect five to six basis points improvement in NIM. While it will not be linear, we had guided, and we continue to stick to our guidance on that," said KVS Manian, MD & CEO, Federal Bank.

Asset quality improved further, with the gross non-performing asset (GNPA) ratio declining to 1.32 per cent at the end of September 30 compared to 1.52 per cent at the end of June 30. The net NPA ratio fell to 0.17 per cent from 0.18 per cent. Both ratios were at their lowest levels in a decade, the bank said.

OUR BUREAU

Festival demand already picking up: Canara Bank CEO

Q&A Canara Bank is seeing consumption-led demand and retail lending pick up as the festival season begins, with the bank holding its net interest margin (NIM) guidance of 2.5-2.6 per cent. It reported a gross non-performing asset (NPA) ratio of 1.50 per cent and a net NPA ratio of 0.30 per cent, and plans to raise ₹8,500 crore of capital this financial year, said **Brajesh Kumar Singh**, managing director (MD) and chief executive officer (CEO) at Canara Bank. In a telephonic interview with **Anjali Kumari**, Singh said treasury and forex income should improve in the coming quarters. Edited excerpts:

What is your outlook for demand over the festival season?

■ We expect good demand, led by retail lending and consumption-linked segments. It has already started picking up. The festival season has just begun, so we will know how it compares with last year only as it progresses, but the start has been good.

Your treasury income fell by 68.5 per cent during Q2FY27. How do you see it shaping up from here?

■ The pressure will not continue for long. As yields ease, treasury income should improve, and we will recoup what we have booked. Things will certainly improve now.

Are you likely to raise your credit and deposit growth guidance for the year?

■ At the beginning of the year, we guided for credit growth of 11 per cent to 12 per cent and deposit growth of 9 per cent to 10 per cent. We are growing much faster than that, but we will keep the guidance as it is for now. If we keep working hard, we will certainly better it.

Where do you expect NIM to settle over the next quarter and the year?

■ Our guidance is 2.5 per cent to 2.6 per cent, and we are protecting it even in the toughest of times. It was 2.55 per cent this quarter. We hope to hold it and even improve it by a few basis points, but we will stay within the guidance.

Are you seeing stress in small and medium enterprises (MSME) segment, where NPAs are the highest?

■ MSME is 13 per cent of the book, agriculture is 22 per cent and retail is 24 per cent. NPAs are not high in MSME. Our total gross NPA is only 1.50 per cent and net NPA is 0.30 per cent, while MSME gross NPA is 3.90 per cent, against a benchmark of around 5 per cent. There is no stress in that segment, and the total stress in our book, including special mention account (SMA)-0, is only 2.42 per cent.

How are you planning to deploy your FCNR(B) deposits?

■ Part of the money was used for new advances and part for replacing high-cost deposits, where the difference was more than 100 basis points. I don't have the exact number readily, but every month we roll over ₹40,000 crore to ₹50,000 crore. The total was only about ₹55,000 crore against a deposit base of close to ₹17 trillion, which is not a big difference. There is also no cash reserve ratio (CRR) or statutory liquidity ratio (SLR) requirement on these deposits, so we saved 22-23 per cent there as well. All in all, there is a gain.

What impact do you expect from the new CRR requirement of 99 per cent on a daily basis?

■ Not much. On a full-fortnight basis, we were already maintaining 100 per cent on average. The only change is that instead of 90 per cent, you now have to keep 99 per cent every day. For those two to three days, the difference between money kept today or tomorrow is not substantial for a bank making a profit of ₹19,000 crore to ₹20,000 crore.

When do you plan to raise capital this year?

■ The board has approved raising ₹8,500 crore, of which ₹4,500 crore is Tier-I and ₹4,000 crore is Tier-II. Out of the Tier-I, we have already raised ₹2,042 crore. Rates are a little elevated, so we are looking for an opportune time during this fiscal and will raise the funds when we get a good rate.

"THE PRESSURE WILL NOT CONTINUE FOR LONG. AS YIELDS EASE, TREASURY INCOME SHOULD IMPROVE, AND WE WILL RECOUP WHAT WE HAVE BOOKED"

Brajesh Kumar Singh, MD & CEO, Canara Bank

Hosting foreign dignitaries outside Delhi not new: MEA

ARCHIS MOHAN
New Delhi, 16 October

Rejecting the Congress party's criticism that the United States (US) "summoned" External Affairs Minister S Jaishankar to Mumbai for a meeting with US Secretary of State Marco Rubio, the Ministry of External Affairs (MEA) on Friday said that hosting foreign dignitaries in various Indian cities from time to time has been the practice over the last decade.

During his second visit to India this year, Rubio will visit Mumbai and Gujarat's Jamnagar. He visited Kolkata and New Delhi in May, where he attended the Quad Foreign Ministers' Meeting. He will not visit New Delhi during his forthcoming visit. The visit comes amid bumps in India-US relations over immigration, White House's proximity to Pakistan's military leadership, threat of fresh sanctions on India's purchase of Russian crude oil and mobility of Indians to the US.

Addressing the MEA's biweekly media briefing here, spokesperson Randhir Jaiswal pointed out that Prime Minister (PM) Narendra Modi hosted his Spanish counterpart Pedro Sanchez in Vadodara in October 2024, German Chancellor Friedrich Merz in Ahmedabad in January this year and Mauritian PM Navinchandra Ramgoolam in Varanasi in September 2025. External Affairs Minister Jaishankar has hosted Shanghai Cooperation Organisation foreign ministers meeting in Goa, the foreign minister of Botswana in Gujarat's Kevadia and India has hosted the Heart of Asia Conference in Amritsar in 2016.

In Mumbai, Jaishankar will host Deputy Prime Minister of the United Arab Emirates (UAE) Sheikh Abdullah bin Zayed Al Nahyan, who is coming to India for an official visit on October 19-20. On October 20, he will hold talks with Rubio attend the celebration of the 250th anniversary of the independence of the US as the guest of honour.

Where PM Modi hosted leaders beyond Delhi

- German Chancellor Friedrich Merz in Ahmedabad, January 2026
- Mauritian PM Navinchandra Ramgoolam in Varanasi, September 2025
- Spanish Prime Minister Pedro Sánchez in Vadodara, October 2024

Jaishankar and the UAE Deputy PM will review all facets of bilateral cooperation under the India-UAE Comprehensive Strategic Partnership, including energy, trade and investments, fintech, defence, and connectivity. "They will naturally have a detailed exchange of views on the situation in West Asia as also on global and multilateral issues," Jaiswal said.

The MEA spokesperson said Rubio's India visit will provide an opportunity for both sides to review India-US relations.

Discussions are expected to cover key areas of bilateral cooperation, including energy, trade and investment, defence, critical and emerging technologies, and other areas of mutual interest, he said. The two sides will also exchange views on regional and global developments. The visit will provide an opportunity to sustain the high-level engagement between the two countries and advance our shared priorities, Jaiswal said.

During an interactive session at the Bloomberg New Economy Forum here on Thursday, US envoy Sergio Gor said Rubio will meet Indian government officials in Mumbai and "we expect that minister Dr S Jaishankar will be there".

Gor's comment had the Congress leadership, including Leader of the Opposition in the Lok Sabha Rahul Gandhi, stating that the US leadership has taken to "summoning" India's external affairs minister. The US State Department announced on Wednesday that Rubio will travel to Mumbai and Gujarat's Jamnagar to further strengthen bilateral energy cooperation.

MEA Spokesperson Jaiswal described the alleged plot to carry out a mass shooting targeting a Hindu temple in Illinois as a matter of "deep concern" for New Delhi.

India called on the US to ensure the safety, security, and well-being of Indian nationals in that country. A 19-year-old was arrested in Palatine near Chicago for allegedly planning a mass shooting at the Sri Venkateswara Temple in Aurora, Illinois on Sunday.

The plan failed because the gun carried by the teenager jammed and could not fire. He appeared in court on October 14 and was charged with one count of making a terrorist threat and one count of unlawful possession of weapons.

India yet to integrate environment with development planning: Desai

SHUBHAM KUMAR & AUHONA MUKHERJEE
New Delhi, 16 October

Nitin Desai, chairman of the governing council at The Energy and Resources Institute (TERI) and a key contributor to the United Nations's (UN's) Brundtland Commission report, said environmental concerns continue to be inadequately integrated into development policymaking, nearly four decades after sustainable development emerged as a global priority.

Speaking at the launch of his book, *The Politics of Sustainable Development*, Desai said environmental ministries had limited influence over development decisions, with renewable energy among the few areas where the two had converged, largely due to falling costs.

Renewable energy was among the few areas where integration had advanced, largely because falling costs had made it economically competitive, according to Desai.

Nitin Desai, chairman of the governing council of TERI, said the environment-related ministries had limited influence over development decisions

The former member of the Planning Commission added that environmental concerns were often recognised as important, but had little impact on how development policies were designed and implemented. "And the practical reality also is that in India, possibly other places also, the environment ministry and the environment minister is pretty low-dominant status. And yes, it is seen as something which has to be done, but they do not have a serious influence on the way the development ministries, et cetera, do their work," Desai said.

He argued that environmental degradation, including soil damage, deforestation and water pollution, also undermined development, while weak economic growth made environmental protection harder to sustain.

Speaking at the same event, Former Reserve Bank of India (RBI) Deputy Governor Rakesh Mohan highlighted the challenges facing global cooperation on climate change, noting that rising debt in major economies and weakening multilateral institutions could affect international financing for climate mitigation and adaptation.

"So, the question is, given the current global situation, the ineffectiveness currently of the United Nations, the destruction of the WTO, withdrawal of the US from a number of multilateral organisations, do you think we can still be optimistic about multilateralism, multilateral organisations, and how they can influence the world for good?" Mohan noted.

He also highlighted the scope for India and China to collaborate on research and development (R&D) to reduce emissions from heavy industries, such as steel and cement.

On climate finance, Mohan pointed to rising debt levels in major economies, including the United States, the United Kingdom, France, Italy and Japan, and the lack of clear fiscal plans to bring them down. He said these developments could have implications for global financing for climate mitigation and adaptation, potentially requiring developing countries, such as India, to rely more heavily on domestic resources.

SC to decide if uncapped court fees are a tax

BHAVINI MISHRA
New Delhi, 16 October

The Supreme Court on Friday agreed to consider whether state laws permitting the levy of ad valorem court fees without a prescribed ceiling amount to taxation rather than a fee for judicial services.

An ad valorem court fee is a fee charged by a court that is calculated as a percentage or proportion of the money or property value involved in a case.

A Bench of Chief Justice of India Justice Surya Kant and Justice Joymalya Bagchi issued notice on the limited question while hearing a plea by the Kerala High Court Advocates' Association (KHCAA) challenging provisions of the Kerala Court Fees and Suits Valuation Act, 1959.

The association has argued that the absence of an upper limit could render such levies unconstitutional by turning them into a form of tax.

Senior advocate K Parameshwar, appearing for the KHCAA, told the Bench that the Kerala High Court had not adequately examined this issue while rejecting the association's challenge. He referred to a Delhi High Court ruling that had struck down uncapped ad valorem court fees, arguing that a levy disproportionate to the cost of administering justice could be invalidated.

The Bench agreed to examine the issue and scheduled the next hearing for November 2.

During the hearing, the court also highlighted the need to periodically revise court fees in view of the rising expenditure involved in administering justice.

Chief Justice Surya Kant questioned the disparity between the expenditure incurred on the judicial system and the revenue collected through court fees.

Parameshwar responded that the Kerala government had exempt itself and its functionaries from paying court fees. The Chief Justice said that requiring the government to pay fees to itself would effectively amount to a transfer between two arms of the same entity.

Justice Bagchi observed that commercial litigation, which requires judicial resources to resolve business disputes, could justify court fees linked to the value of the proceedings.

The Chief Justice also indicated that the court could consider directing states to suitably amend their laws governing court fees.

The association's petition challenges amendments made to the Kerala Court Fees and Suits Valuation Act in 2025, which substantially increased the fees payable in the state.

The KHCAA had contended that the revisions were arbitrary and excessive, with increases ranging from 400 per cent to 9,900 per cent, potentially restricting access to justice.

The association also questioned the absence of a ceiling on ad valorem fees under both the original legislation and the 2025 amendments.

It argued that imposing such charges in claims seeking compensation for victims of crimes was particularly harsh. Separately, the plea challenges Section 73A of the Act, which exempts the state government and its functionaries from paying court fees.

Dipke, Bora detained on way to protest

PRESS TRUST OF INDIA
New Delhi, 16 October

Cockroach Janta Party (CJP) leader Abhijeet Dipke and All India Students' Association (AISA) chief Neha Bora were preventively detained by Delhi Police while on their way to participate in the *Lehra Do Tiranga* protests, with Dipke headed to Connaught Place and Bora to Mandi House.

Meanwhile, hundreds of CJP supporters and members of student organisations held a series of flash protests in central Delhi's Connaught Place and Mandi House on Friday evening.

While Dipke was picked up from his residence in Jhandewalan, Bora was detained at Mandi House.

Earlier in the day, more than 20 Delhi Police personnel had visited Dipke's residence in Jhandewalan and served him a notice directing him to refrain from any action that could prejudice the rights of citizens, traders, commuters, patients and others.

Security personnel cordoned off Central Park in Connaught Place, forming a human chain along its metal railings. A tear gas vehicle and a *Vajra* vehicle were stationed outside the park, while Rapid Action Force personnel were deployed inside. Traffic police personnel were also deployed to regulate movement along the inner and outer circles of Connaught Place.

The protesters walked through the inner circle of Connaught Place, intermittently raising the slogan of 'Jai Hind' before dispersing and regrouping at different spots. Some also sang the national anthem. Students and members of AISA protested at Mandi House, demanding the resignation of Chief Election Commissioner Gyanesh Kumar, rollback of the Special Intensive Revision (SIR) of electoral rolls, and withdrawal of the 2023 Election Commissioner Appointment Act.

Non-tariff China barriers major export hurdle: FM

"I think we had some concerns in the past. We are working to develop relations with China once again, but the last word has not been scripted on this journey," he said on Wednesday at the Bloomberg New Economy Forum.

Sitharaman said India had refrained from adopting punitive trade measures to address its trade imbalance with China, preferring negotiations despite the difficulties involved, unlike some other countries. "Probably that's not the way India believes in dealing with trade negotiations. We sit and talk. It is sometimes very tiresome but we do go through that approach rather than putting countervailing duties or some non-tariff barriers to counter their non-tariff barriers," she said.

On the skew in trade benefits in favour of Asean, Sitharaman said India needed to reassess the impact of its trade agreement with the bloc, signed more than a decade ago, and refashion it to address the imbalance and its effects on domestic manufacturers and importers.

"We need to have that agreement continue but in a slightly refashioned manner. It cannot so adversely affect one side which is the Indian side," she said. India's trade deficit with Asean countries crossed $50 billion in FY26.

Sitharaman also defended India's decision to stay out of the Regional Comprehensive Economic Partnership (RCEP), saying the government had not seen sufficient benefits in joining the trade framework.

"We took a conscious call to stay out of RCEP because we didn't think it was going to do any help for us," she said.

Sitharaman said Indian exporters had turned global trade disruptions into opportunities by identifying alternative markets, including countries that had imposed high tariffs on Indian goods. Exports of goods and services grew 23 per cent in September, she said, citing the performance as evidence of exporters' resilience amid a difficult global environment.

"Even in this situation Indian exporters have found very many different alternative markets — and even to markets which have literally levied huge tariffs on us — we have reached these markets and very efficiently," she said.

India remained committed to multilateralism but was accelerating bilateral trade agreements rather than waiting for progress in the global trading system, the minister said. "We believe in multilateralism. However, given today's environment we are very keen that we build our strength in trade through bilateral agreements as well."

She cited India's trade engagements with the European Union, New Zealand, Australia and the United Arab Emirates, as well as negotiations with Canada, saying political will on both sides had helped move long-pending talks forward.

On India-US trade negotiations, following recent comments by Goyal, Sitharaman said: "I hope in the interest of global trade and in the interest of trade between the two partners India and US the trade agreement gets concluded at the earliest."

A PITCH FOR PERPETUAL PORT CONCESSIONS

Govt should act as 'landlord' in port JVs: DP World CEO

"What is destroying India returns today is the depreciation of the rupee. Why is the rupee depreciating? It's because of your import of energy. As long as that diversification process into renewables remains active, you will be fine. And the world is a relative place," Narayan added.

The perpetual port concessions favoured by Narayan would mark a significant departure from the current practice of granting concessions for periods of up to 30 years. "Why not JVs (joint ventures)? The government becomes a landlord, you have an operator, you agree on key performance indicators... It's forever, until I break your trust. What's the problem?" he said, questioning the practice of regularly re-tendering projects and appointing new operators.

Through its five terminals, DP World handles a quarter of India's container trade. Four of its facilities — Nhava Sheva International Container Terminal (NSICT, also India's first PPP port terminal), Nhava Sheva India Gateway Terminal (NSIGT), Mundra International Container Terminal (MICT) and Chennai Container Terminal (CCT) — will see their concession periods end by 2031.

The company has been in talks with the Union government and the Jawaharlal Nehru Port Authority (JNPA), the landlord for its NSICT and NSIGT facilities, to extend the concessions for these terminals. Narayan believes that 30 years is not enough time to develop a project from the ground up and ensure its continuous upgrade.

"Just look at the life cycle. It takes you three years to build, four years to stabilise. So year eight or nine is when you are on reasonable levels of utilisation. Now you have 20 years left. Will you invest again? Will you keep upgrading? Will you keep modernising? Finished. There's not enough time," Narayan said.

He added that the current framework, under which the authority takes a 20-40 per cent share of revenue from the operator, controls tariffs and builds competing capacity nearby, destroys value immediately.

Narayan also said India is emerging as one of DP World's more prominent markets, with an investment pipeline of $5 billion. The company has about $40 billion in invested capital globally, of which $2.5 billion is already invested in India. As India pursues one of its most ambitious and contentious projects — a ₹48,000 crore mega transhipment terminal at Galathea Bay on Great Nicobar Island — Narayan warned that the country should aim to be a gateway rather than a transhipment hub. "Because the benefits of transshipment don't come into the economy. There's minimal trickle-down. The transshipment benefits only lie in shipping line accounts. Let them build their transshipment points," he said.

The project has been at the centre of a political storm, amid allegations that it breaches environmental protection obligations and threatens the island's indigenous tribal population.

Fx reserves slip again

The drawdown in forex reserves comes amid attempts to shore up the rupee, which has faced sustained pressure from elevated crude oil prices, foreign portfolio investment outflows and demand for dollars. "The RBI sold around $9.8 billion, and there was a small revaluation gain during the week," said Gaura Sengupta, chief economist of IDFC First Bank. She said the pressure on reserves would persist as India's balance of payments was expected to remain in deficit, with demand for dollars to pay for oil imports continuing to drain the country's foreign exchange reserves.

Foreign currency assets (FCAs), the largest component of the reserves, declined by $7.14 billion to $597.61 billion during the week ended October 9. Gold reserves fell by $1.32 billion to $105.09 billion.

Special Drawing Rights declined by $109 million to $18.55 billion, while India's reserve position with the International Monetary Fund fell by $10 million to $4.78 billion.

The RBI's recent measures, including a dedicated dollar window for state-owned oil marketing companies and tighter rules for foreign exchange derivatives, have helped ease pressure on the spot market. However, these steps are not expected to eliminate the underlying demand for dollars.

The measures announced by the RBI on October 10 aim to curb speculative positions against the rupee and divert oil companies' dollar demand away from the spot market. The central bank also introduced a foreign exchange risk reserve requirement for certain derivative transactions.

"The RBI sold dollars heavily during the current week also. The rupee will continue to trade at these levels until the crude and dollar come down substantially," said the treasury head at a private bank.

IIFCL, 2 Coal India units to head to stock mkt in FY27

Wholly owned by the Government of India, IIFCL was established in 2006 to provide long-term financial assistance to viable infrastructure projects. It registered with the Reserve Bank of India as an infrastructure finance non-banking financial company in 2013.

IIFCL had a net worth of ₹17,898 crore at the end of FY26. Its net profit fell 36 per cent year-on-year to ₹1,379 crore in the financial year, weighed down by mark-to-market losses on offshore borrowings amid foreign exchange fluctuations.

The two coal subsidiaries are among Coal India's largest operating units and account for a substantial share of its production and profits. MCL produced 218.31 million tonnes (mt) of coal in FY26, the highest among the group's subsidiaries, and reported a net profit of ₹10,698 crore. SECL produced 176.29 mt and posted a net profit of ₹4,755 crore.

Coal India's total production fell to 768.19 million tonnes in FY26 from 781.06 million tonnes a year earlier. Its consolidated profit after tax declined to ₹31,071 crore from ₹35,450 crore, while revenue from operations remained broadly stable at ₹1,68,400 crore, compared with ₹1,69,177 crore in FY25.

The proposed offerings would mark a resumption of government IPOs after a gap of more than two years. The last such offering was that of Indian Renewable Energy Development Agency Limited (IREDA) in FY24, when the government sold a 10 per cent stake.

The listing plans come as disinvestment and asset monetisation assume greater importance amid fiscal pressures. The government has raised ₹62,124 crore so far in FY27 and has effectively met its ₹80,000 crore target for miscellaneous capital receipts after including about ₹26,500 crore expected from the strategic disinvestment of IDBI Bank, which is nearing completion.

(With inputs from Saket Kumar in New Delhi)

Climate, floods, war: Why your favourite sweet costs more this festival season

Uneven rains are strongly associated with climate change, while nut imports are being choked by the Iran war.

"Costs have increased significantly, but we are trying to absorb them," said Partha Nandy of the iconic Girish Chandra Dey & Nakur Chandra Nandy sweet shop in Kolkata.

"We will watch for a couple of months and then take a call (on raising prices)," Nandy said.

Around Raksha bandhan, the shop raised the prices of select malai (cream)-based sweets — including its popular malai roll, sarpuria and malai shingara — by about ₹5 apiece.

Another increase so soon is difficult to contemplate: "After all, we have a responsibility."

Nitai Chandra Ghosh of Chittaranjan Mistanna Bhandar, best known for its soft, spongy rosogolla, said, "Even three-four months ago, sugar prices were at ₹44 per kg. They are now hovering around ₹60 per kg. I can't increase prices every now and then. My customers will turn away."

In Odisha, prices of all sweetmeats including rossogolla, chhena-poda and chhena-gaja, have rocketed, with sweet makers raising retail prices by ₹25-30 per kg.

"Chhena is now supplied at ₹220 a kilo, up by ₹40 per kg in the last two to three months," Bimbadhar Behera, president of the Utkal Mistanna Byabasayee Samiti (Utkal Sweetmeat Traders Association) said.

Down South, for Vishnu Shankar, a director at Chennai's Adyar Ananda Bhavan, one of the biggest sweetmeat makers in Tamil Nadu, the real challenge are nuts, cashew, butter, rice and pulse prices. "There is an average increase of 15 per cent, and we will be passing it on to customers," Shankar said.

The spike in the prices of imported items like nuts is mainly due to the West Asia war and resultant rise in container rates.

"As of today, there has been a 33 per cent increase in the prices of sugar, oils, nuts, groceries and other items, including vegetables. Prices will still go up because of Deepavali," said D Srinivasan, president of the Tamil Nadu Hotels Association. He added that packaging material prices have also increased, as it is mostly petroleum based.

Up in the North, Varun Khera, head of the Noida chapter of the National Restaurant Association of India (NRAI) said, "The prices of sugar, paneer and khoya have increased. With cooking gas prices and logistics also going up, even salaries have gone up. The only way forward is to work on the bottom line (profit). Otherwise, it will be very difficult for us to survive like this."

Data sourced from industry and other platforms shows that ex-mill sugar prices in Maharashtra — an important sugar producer — have risen from about ₹4,300 per quintal to ₹5,200-5,300 per quintal this month, a jump of more than 20 per cent.

Before this, prices had jumped to a more than 16-year high of ₹5,550 per quintal in mid-August, which forced the government to permit import of one million tonnes of raw sugar for the first time in almost a decade and announce measures to curb black-marketing and hoarding of sugar. But the jury is out on whether the measures have succeeded in lowering prices. A senior industry executive said only limited consignments have hit the market because of a price mismatch.

"The landed cost of imported white sugar is ₹52-53 per kg while domestic prices fall to around ₹45 per kg by the time the imported sugar arrives. The economics will not work."

"This (the current jump in prices) reflects a short window of tight supply, not a structural shortage. The new season opened with mill inventories at a multi-decade low. At the same time, festive buying by households, sweet makers and bulk consumers is at its peak, and good-quality sugar at mills is limited," said Uppal Shah, chairman and managing director of JK India eAgri-Tech, a trading and market intelligence company.

The good news is that sugarcane crushing has begun almost a month earlier than usual this year.

"As more than 50 sugar mills have started crushing, fresh sugar will start flowing in the coming weeks. Along with the higher October release quota, we expect supplies to improve and prices to stabilise soon. We are also expecting some action from the Union Food Ministry soon to control the prices," Shah said.

There is some consensus that when it comes to sugar the situation may normalise just in time for Diwali, which is in early November.

In the case of milk, most industry players said that prices might remain elevated even during the flush (high production) season that started in October because of expected low production this year. Since March 2026, which is usually the start of the lean season for the milk industry, companies have raised prices multiple times.

A senior industry executive had said recently that there have been four retail price hikes between May and August.

"That is unusual. Normally, you would not see four hikes in such a short period."

As a result of the hikes, consumer price inflation in liquid milk has risen from 2.89 per cent in January 2026 to 4.21 per cent in September 2026.

Pak to chair IMF, World Bank boards in 2027, first time in 70 yrs

Pakistan was named the incoming chair of the Boards of Governors of the International Monetary Fund (IMF) and the World Bank Group (WBG) for 2027, returning to the position for the first time since 1953, the country's ministry of economic affairs said on Friday. Minister for Economic Affairs Ahad Khan Cheema, who is also Pakistan's governor to the World Bank, was formally announced as the incoming chair during the plenary session of the 2026 WBG-IMF Annual Meetings in Bangkok. The ministry termed the development a "historic milestone" and said the chairmanship would provide Islamabad an opportunity to contribute to global economic and development discussions and facilitate constructive dialogue among member countries. Pakistan is engaged with the IMF under a $7 billion Extended Fund Facility (EFF) and a $1.4 billion Resilience and Sustainability Facility (RSF). Pakistan is borrowing under the EFF to address its balance-of-payments needs, while the RSF provides longer-term financing to help the country address climate-related risks and strengthen its resilience. People take part in a candlelight vigil for victims of the Silver Rail Elementary School shooting in Oregon on Thursday

Three children, one teacher killed in Oregon school shooting

Three children, ages 5, 8 and 11, and one teacher were killed by a shooter Thursday at an elementary school in Bend, Oregon, according to Police Chief Mike Krantz. A 7-year-old child and a teacher were also transported to the hospital with injuries, Krantz said during a Thursday evening press conference. The suspect was a 16-year-old Bend resident, Krantz told reporters. He said a member of the community followed the suspect into the school and killed him before police arrived. Bend-La Pine Schools Superintendent Steven Cook said the community is "stunned and heartbroken by this senseless tragedy." BLOOMBERG

Netflix names ex-Disney TV chair Peter Rice content chief

Netflix Inc is replacing its chief creative officer with a veteran TV and film executive, Peter Rice, accelerating efforts to reinvigorate growth and reverse a slowdown in viewers and revenue at the streaming giant. Rice previously served as chairman of general entertainment at Walt Disney Co, and before that as president of 21st Century Fox. He assumes the new role October 26, with a broad mandate, overseeing scripted and unscripted series, film and live events across all regions. Rice replaces Bela Bajaria, who had worked at Netflix for 10 years. BLOOMBERG

US import prices up 1.1% in Sep, biggest annual gain in 4 yrs

United States (US) import prices increased more than expected in September, boosted by higher costs for energy products, further evidence of rising inflation pressures as the West Asia conflict persists. Import prices jumped 1.1 per cent last month after rebounding by a downwardly revised 0.5 per cent in August, the Labor Department's Bureau of Labor Statistics said. In the 12 months through September, import prices rose 8.1 per cent, the largest gain since July 2022, after increasing 6.7 per cent in August. REUTERS

China mulls export curbs on AI, biotech, solar power technologies

China on Friday released a draft plan proposing new export restrictions on 14 technologies in sectors ranging from artificial intelligence (AI) to biotechnology and photovoltaic solar power, which could have significant implications for global technology competition, particularly for countries that rely on Chinese AI. The draft, jointly issued by the Ministry of Commerce and the Ministry of Science and Technology, proposes export bans for a string of AI-related technologies, certain cell and gene therapy technology platforms and technology for producing certain kinds of solar cell modules. It also lists a further 26 technologies from the three sectors that would face fresh export restrictions. The draft revised catalogue proposes to prevent the outflow of high-technology and core technology. PTI

Economies resilient despite geopolitical woes: Warsh

Fed chair voices optimism about US economy; offers no hint on rate path

REUTERS
16 October

Federal Reserve Chairman Kevin Warsh voiced optimism on Friday about United States (US) economic strength and surprise about how well global economies have been "hanging in there" amid continued energy shocks and tighter monetary policy to fight inflation.

He said the US and many other economies were benefiting from an "investment surge" driven by artificial intelligence (AI) but broadening to other sectors that was creating a near-term demand shock that was putting upward pressure on inflation.

"I came out of meetings here yesterday and today and it's hard to be in a discussion with central bankers and not compare notes and hear the same thing about the surge in prices," Warsh said at the International Monetary Fund (IMF) and World Bank annual meetings in Bangkok.

With inflation a "common challenge," Warsh said global central banks undertook "a synchronous tightening in monetary policy in most places around the world, and that means there's no free riders."

In the US, he said, "We made very clear that we would deliver price stability, and we removed a dose of accommodation about a month ago," in a reference to the Fed's September interest-rate hike.

On AI

"AI WILL MAKE ECONOMIES AND COUNTRIES THAT PUT IT TO GOOD USE MORE PRODUCTIVE"

On US economy

"WE'VE GOT PLENTY OF TAILWINDS THAT ARE GIVING SOME STRENGTH AND DURABILITY TO THIS ECONOMY...THAT SORT OF MOMENTUM IS CERTAINLY NOT FOUND EVERYWHERE IN THE WORLD"

Kevin Warsh
US Federal Reserve Chairman

But in keeping with his style since taking the reins as Fed chief in May, he gave no preview about whether he feels more interest-rate hikes will be needed, or when.

"I don't prejudge meetings," Warsh added in the discussion with IMF Managing Director Kristalina Georgieva. "I don't believe in saying now what I might do at the meetings that we have in the balance of this year."

Warsh's colleagues at the Fed have not been reticent on their rate-path views.

In recent weeks nearly all said they feel more tightening is probably needed, but most wanted to see more economic data in order to assess the inflation trend, a signal that they were unlikely to deliver a second rate hike this month.

Warsh was optimistic about the impact of AI on economic growth and productivity in the medium-term, even as he said it would be a "very bumpy" path toward what he expected would be faster productivity growth in the "real economy" that would bolster wealth.

"It's obviously hitting the demand side of the economy before it's going to hit the supply side of the economy," he said. "We don't know in the next 12 or 18 months its effect on employment, but if you believe like I believe, which is it will make economies and countries that put it to good use more productive, that it's going to make it so that we will have more wealth, then that has to be a very good thing." A task force convened to advise the Fed on the impact of AI on productivity and jobs will hold a "field hearing" in the San Francisco Bay Area on November 16, he said, in what will be a first public peek at the group's work.

He said a broadening of the investment surge beyond AI was providing some resilience to US growth.

"It means we've got plenty of tailwinds that are giving some strength and durability to this economy," he said. "That sort of momentum is certainly not found everywhere in the world." But the global economy, too, was "showing resilience that I'm not sure I would have predicted five or six months ago, given what's happening in geopolitics and hotspots around the world."

Warsh said that central bankers meeting in Bangkok had a common vision to safeguard price stability and were taking action to it, which was giving "confidence to businesses and households that's so important for growth to continue."

'Without AI guardrails, risks may exceed opportunities'

REUTERS
16 October

The risks of artificial intelligence (AI) may exceed its opportunities if no adequate safeguards and ethical framework are put in place, International Monetary Fund (IMF) Chief Kristalina Georgieva said on Friday, backing a blend of industry self-regulation and input from key governments.

The nascent technology was a dominant topic at this week's annual meetings of the IMF and World Bank in Bangkok, where the IMF on Tuesday flagged significant growth and financial stability risks from a potential end of the AI investment boom, high debt levels and a prolonged war in West Asia.

During a panel discussion, Georgieva said AI was already strengthening the global economy, but could also deliver negative shocks if it failed to deliver major productivity gains as quickly as hoped.

"If there are no safeguards, then the risks may exceed the opportunities. And above all, we do need an ethical foundation, and I'm not sure we are there as a society," she said.

Georgieva said certain preconditions needed to be put in place for people everywhere to benefit from the new and rapidly evolving technology, including access to digital infrastructure, access to electricity and adequate regulation.

IMF Chief Kristalina Georgieva

The bigger question now was how to create guardrails for a technology that was evolving so rapidly, Georgieva said, likening AI developments to Formula One race cars careening around with no barriers to protect the audience.

Industry self-regulation was appropriate, given that governments were not well-placed to regulate or oversee the constantly changing sector, but should include engagement with society. The countries with the biggest AI sectors, including the US, China and India, along with countries in the AI supply chain, should be involved, she told the panel.

Zelenskyy calls Russian peace move a 'parody'

EU leaders rally around Ukrainian President as ties with Trump sour

AGENCIES
16 October

Ukrainian President Volodymyr Zelenskyy took aim on Friday at United States (US) President Donald Trump's diesel deal with Russia and welcomed the prospect of European allies stepping up their role in talks, calling Moscow's stance a "parody" of peace negotiations.

At a European Union (EU) summit in Brussels, Zelenskyy said Russia did not want peace. He added that Ukraine was still experiencing disruptions to the SpaceX Starshield satellite system used for battlefield operations and to down Russian drones attacking cities far from the frontline.

EU leaders rallied around Zelenskyy after Trump again criticised Ukraine, calling its strikes on Russian refineries a "disgrace". On arriving at the summit, Zelenskyy pointedly referred to his counterparts there as "real leaders".

The EU is hosting Zelenskyy at one of the most difficult moments for Ukraine, with missiles and drones raining down on Ukrainian cities and fears that the US could pull back intelligence sharing and weapons support from Kyiv.

Trump blindsided Zelenskiy last weekend by announcing that Ukraine and Russia had agreed not to target each other's energy facilities. Facing US midterm elections in November, Trump has blamed Ukrainian strikes on Russian refineries for pushing up energy prices that could cost him at the ballot box. His diesel deal with Russia angered Ukraine and European allies.

"And now we can see how cash will start flowing back into Russia through the diesel deal," Zelenskyy said on the sidelines of the summit.

"This diesel deal will never be enough to offset the impact of the Strait of Hormuz on global markets. But it will put more money straight into Putin's pocket to fund this war." Zelenskyy also accused Russian President Vladimir Putin of not being interested in peace talks in any form.

"THIS (US-RUSSIA) DIESEL DEAL WILL PUT MORE MONEY STRAIGHT INTO PUTIN'S POCKET TO FUND THIS WAR"

Volodymyr Zelenskyy
Ukrainian President

"Putin does not want peace talks at the moment, in any form," he said. "He's playing with words, claiming they respond... Quite simply, it looks like a parody of a genuine desire to end the war."

Meanwhile in the latest attacks in Ukraine, Russian drone strikes on the city of Kharkiv killed three people, while strikes elsewhere left hundreds of thousands of people without power.

Russian wealth fund, US to facilitate diesel payments: Envoy

The United States (US) Treasury has asked Russia's sovereign wealth fund to help solve payment issues relating to a deal between presidents Donald Trump and Vladimir Putin on the sale of Russian diesel, Putin's investment envoy Kirill Dmitriev said on Friday. Dmitriev said the Treasury had requested the Russian Direct Investment Fund, which he heads, to "facilitate payments and solve tactical issues".

The RDIF "will work to ensure that all payments are efficient and reach their intended recipients", he added.

Flying cars: Tesla unveils next-gen Roadster with airborne tricks

Tesla unveils its long-delayed Roadster sports car at a Space X rocket testing facility near Waco, Texas, on Thursday

PHOTO: @TESLA/X

BLOOMBERG
16 October

Tesla Inc is hoping a flight demonstration can give its ground-bound auto business a lift. The electric vehicle maker unveiled its long-delayed new Roadster sports car Thursday in Texas, reviving and refreshing a model that Tesla stopped producing more than a decade ago. When it goes on sale, the high-end vehicle will give the company another offering in a slimmed-down lineup revolving primarily around a pair of mid-priced consumer models.

The showcase wasn't a typical pull-the-sheet-off-the-car reveal, though. Tesla made the Roadster fly. Sort of. Powered by air thrusters developed in partnership with SpaceX engineers, the prototype vehicle drove up a ramp and did a controlled flip before descending to the ground. It then used the system to jump and flip over Tesla's vehicle lineup, including the Tesla Semi, and performed other stunts including "jumping" and flipping over in mid-air using the thrusters.

The demonstration, held at a SpaceX rocket testing facility near Waco and livestreamed online, came after years of promises to bring back the Roadster model. Elon Musk, the chief executive officer of both Tesla and SpaceX, has been hyping up the return, saying it "might be one of the most spectacular demos ever." "We need an audience to prove that it's not AI or SI," Musk said on stage Thursday. "You're going to see the results of what happens when you have a collaboration with the world's best car company and the world's best rocket company."

The vehicle, which is designed to lean into aerospace aesthetics, features two seats and Cybertruck style steer-by wire-system. Tesla showed a video of the vehicle accelerating from zero to 60 miles per hour in under 1 second. The long-overdue vehicle is still not expected to start production until 2028.

Tesla's auto business could use a boost, after consecutive annual sales declines and criticism over a stagnant product lineup. While Musk is working to reorient the company around futuristic business lines such as artificial intelligence and robots, EV sales still account for the majority of the company's revenue and profit.

Tesla isn't likely to sell a flying version of Roadster to the public, because of the many challenges ranging from cost and safety to regulatory and practicality. But the flashy stunt underscores Tesla's efforts to be seen as a boundary-pushing, tech-forward firm.

Bringing India's best and brightest home

China's development experience offers lessons on how India can draw on the expertise of its professionals abroad to become a front-ranking tech power

SHYAM SARAN

ILLUSTRATION: BINAY SINHA

When Chinese leader Deng Xiaoping initiated the Reform and Opening-up of the Chinese economy in 1978, the first item on the agenda was to rebuild the country's educational, scientific and technological institutions, which had been shattered by the pervasive disruptions of the 10-year Cultural Revolution (1966-1976).

China had lost an entire generation of its young because of the closure of its educational institutions, the ideological campaigns against the educated and professional classes, and the romanticisation of peasant life. Deng recognised that China had to catch up with the rest of the world in terms of modern knowledge and skills.

In addition to reopening China's premier educational institutions, its scientific and technological research institutes, and professional-capacity-building institutions, Deng also took advantage of a congenial relationship with the United States and the West to send a large number of young Chinese to study at their premier universities.

For a number of years, China was like a veritable sponge soaking up knowledge, technology, and skills from wherever it could. There was a sense of modesty, even humility, in seeking learning from advanced nations. More importantly, China put in place an ecosystem that enabled the adoption of advanced knowledge, skills and technologies to be followed by learning and assimilation, paving the way eventually to independent knowledge creation that we witness today. Joint ventures that were set up with Western companies became training platforms for the Chinese partner and Chinese personnel. Later, they would become innovators, surpassing their foreign counterparts.

A former chairman of a development bank in China explained that the bulk of capital flows into China had come not from the West but from greater China, consisting of Taiwan, Hong Kong and Singapore. But Western investment brought advanced technology, and modern management skills whether through foreign subsidiaries or through joint ventures. The Chinese state insisted on technology transfer as a condition for access to the Chinese market. This contributed to the transformation of the Chinese economy.

In the initial phase of its reform and opening up, China did not mind a large cohort of those studying abroad choosing to stay and work in the host countries. However, over a period of time, China created centres of excellence, offering state-of-the art research facilities and attractive salaries. Several of these institutions invited foreign scientists to come to China to do advanced research, even set up research laboratories at Chinese government expense, with the only condition being that they should have a number of young Chinese researchers work together with them.

An Indian-American scientist with several high-tech patents to his credit used to spend a few months every year at Tsinghua University, China's premier technology and engineering institution, and had, over several years, trained some 2,000 Chinese scientists who are still in touch with him. They have gone on to do cutting-edge research themselves. It is only recently that the United States government has clamped down on this practice.

In contrast, India has not been able to tap into the vast and unmatched pool of its diaspora, which boasts advanced knowledge and skills in a multiplicity of domains. I know from personal experience that several of them are eager to share their knowledge with their compatriots without expecting large financial recompense. But they want proper facilities for research. They want to be welcomed in the institutions to which they may be assigned. But personnel in several of these institutions feel threatened by such highly accomplished individuals, afraid of being shown up as being less capable. They do not consider the presence of a person with advanced knowledge and skills an opportunity to learn and improve their own capabilities. This is a big contrast with the Chinese experience.

It is somewhat perverse to have a government policy that seeks to export its professional and skilled personnel abroad. In trade negotiations, India wants to be able to find opportunities for its educated and professional citizens in foreign countries. This is an admission of a continuing failure to find meaningful employment for them at home. The ugly truth is that highly educated young Indians prefer to seek their future abroad should the opportunity arise. We are investing in educating our young but the fruits of the investment are taken advantage of elsewhere. This is not good economics. In the past, one recalls that there was at least an awareness of a "brain drain" from India and that this was a loss to the country. Now the brain drain has been turned into a virtue. Rather than formulate policies to offer meaningful opportunities to our young professionals in the country itself, we are allowing the best and the brightest to seek their future abroad. This is an admission of a glaring policy failure.

There is widespread angst over recent US decisions to restrict the hiring of Indian personnel by American companies, including high-paying tech firms. Rather than treat this as a setback, why not work together with the Indian corporate sector to welcome our highly skilled compatriots to pursue meaningful careers at home?

India has been successful in creating islands of excellence such as the Space and Atomic Energy programmes and select areas of electronics, pharmaceuticals and information technology. But islands must expand to become ever-larger domains of excellence. The rapidly developing domain of artificial intelligence (AI) will, most of all, require highly trained personnel. Many of those working in cutting-edge AI research and applications are of Indian origin. Bringing them back to serve in India may be the only chance to stay ahead in this most consequential domain of the future.

There is an urgent need to create an ecosystem that can offer congenial career opportunities to this pool of human knowledge and skills that can help transform India. The less than welcoming environment for Indian-origin professionals abroad may make opportunities in the home country worth exploring. We should make it worth their while to serve as architects for India's emergence as a front-ranking science and technology power.

Of bots, watts, and water

VIEWPOINT

DEVANGSHU DATTA

Between October 7 and 11, Ukraine launched successful drone attacks on three major data centres in Russia. All three centres were run by "Russia's Google", Yandex. The attacks caused significant physical damage, resulting in global traffic attributable to Yandex falling by 99 per cent on October 12 before recovering to 85 per cent of normal levels by October 14.

According to some data analysts, one outcome of Yandex going down was a decline in right-wing troll and bot traffic across social media. Organisations like Germany's AFD Party and the United States' Republican Party are said to have suffered loss of engagement for a few days. However, other analysts say malicious bot traffic just relocated to other Cloud service providers.

Yandex, as mentioned above, is referred to as Russia's Google even though it had just $20 billion in revenue in 2025, which is minuscule compared to Alphabet's $402 billion. But Yandex does offer a similar portfolio of services. It runs a (regime-friendly) search engine, hosts websites (and bots) on its Cloud, and offers email services, among other things. It also offers the services of Yandex AI, which is described as "an all-in-one mobile assistant, search engine, and chatbot app... which combines real-time web search with generative AI capabilities into a single interface."

Data centres are required for all this. They run AI, back up, process and analyse data, and host Cloud services. They also consume vast quantities of power and water. They employ very few people. A multi-billion-dollar data centre may employ less than a dozen.

Quite aside from performing dodgy functions like hosting bots and troll factories, data centres have become a contentious issue in America's mid-term elections due to their infrastructure footprint.

Ginormous power and water consumption translates into pressure on local infrastructure and potentially, higher tariffs. Lack of local employment generation equates to a lack of rationale for tolerating local data centres. There's also been enough publicity about AI eating jobs to generate fears of net job losses as data centres proliferate.

Opinion polls suggest this dislike is bipartisan: US voters dislike data centres regardless of political affiliations. It's turned into what's called a NIMBY (not in my back yard) issue. By some accounts and according to some polls, more Americans would be comfortable with a nuclear power plant than with a data centre in their zip code. (Incidentally, the power demands of data centres could result in more investments in nuclear plants.)

New York has a moratorium on data centres and another 14 US states (some red, some blue) are considering bans or moratoriums. Recent reportage suggests that in addition to the fears of elevated tariffs and negative employment impact, US citizens are less than happy about potential loss of privacy. Many also suspect that local politicians were "on the take" because many data centres got favourable terms and some were set up under non-disclosure agreements.

Will the American dislike for data centres lead to a halt in AI deployment ? No, of course not! Data centre projects are being located all over the world and the pace of data centre capex is supposed to accelerate, on paper, at least. But there's resistance in other locations as well. Some 70-odd projects are now delayed across Europe due to local NIMBY resistance.

This antipathy will probably be presented as a great opportunity for digital India. There are already several Indian mega data-centre projects in various stages of planning and execution and more projects could relocate out of the First World.

What could go wrong? Well, India is far more stretched than the US or the European Union when it comes to power and water resources. Indians will not be suspicious about politicians collecting kickbacks for large projects; they will take it for granted.

Corruption is tolerated where there's some apparent benefit, such as in the tender for a new road where easier commuting is a payoff. But a data centre doesn't create many benefits and may indeed lead to net employment losses and deterioration in local power and water resources. So, corruption could become a sore point.

Is it far-fetched to imagine a backlash? Indians have objected to port projects, copper smelters, nuclear plants. They might object to data centres.

Looking at it cynically, protests that slow down projects may actually do India a favour under some circumstances. If the AI bubble does burst, investments into data centres will have to be written off. A project that aborts early, for whatever reason, will lose less money.

12 questions for Rahul

Having been through the school of hard knocks, Rahul should know that political change in India is brought about either by those who win an election or who combine with others to defeat an incumbent

NATIONAL INTEREST

SHEKHAR GUPTA

If Rahul Gandhi is the flavour of the political season for adversaries and fans alike, two interesting trends dominate all talk over his future. Both are contradictory.

On the one hand, it's quite remarkable that there's disagreement between Prime Minister Narendra Modi and his mass base over Rahul's future potential. On the other hand, Rahul and his base are in complete agreement on this subject.

The Bharatiya Janata Party (BJP) followers are dismissive of Rahul. For them, he's "Pappu", or an object of derision. Often enough, even senior BJP leaders boast that he's no threat but their biggest strength. Mr Modi, however, has always held the opposite view. He sees Rahul, and the Gandhis, as the only potential threat.

That's why his campaigns are so fixated on Rahul. Even in a state election where the Congress hardly counts, Mr Modi targets him. This week, he also fielded Union Home Minister and BJP "Kautilya" Amit Shah to launch a vicious attack on Rahul. While the base may laugh it away, BJP seniors know who the real threat is. That's the rare contradiction between the leader and the base.

For the Congress, Rahul and his base are unanimous in believing that power is his for the taking, if only elections were fair. Implicit in this is the insinuation that all elections were stolen by the BJP 2019 onwards. First, by "mass-fixing" of Electronic Voting Machines (EVMs), and now with a combination of Chief Election Commissioner Gyanesh Kumar and his SIR. Just fix these and the next election is yours.

Unlike their devoted base, Mr Modi and Mr Shah are realistic about Rahul because they know their politics. Rahul's followers and Mr Modi agree on one thing, and they're both right that however consistently Rahul may have faltered in the past, the Congress under him poses the only credible challenge to the BJP.

See it this way. From its lowest Lok Sabha tally of 44 seats in 2014 through 52 in 2019 to 99 in 2024, the Congress vote share has been steady in the 19-21 per cent range. That's one in five Indians instinctively voting for the "hand" symbol. Looking at data from 1996 through 2009, the BJP floated within the 25 per cent ballpark. That's one in four voters. It was the coalition era.

Mr Modi changed that equation in 2014. The BJP has floated in the 37-40 per cent range since. A jump of 12-15 percentage points over the baseline is phenomenal and devastating in a multi-party system. We can safely call this top-up the Modi vote.

It's unrealistic to imagine Rahul taking the Congress vote share to 37 per cent in the foreseeable future. But, if he simply adds another 5-6 per cent to his core vote, national politics changes. He's been routinely losing 9 out of 10 direct fights against the BJP. You can then presume that most of this vote will come from the BJP in regions it routinely sweeps. The 2024 election was a limited coalition exception. As the Opposition vote consolidated, BJP's strike rate declined. It won only 7 out of every 10 direct contests against the Congress.

A BJP at 32 per cent will still dominate, but its Lok Sabha numbers could fall to low-200s or even below that. It may still form a government, but it will be a genuine National Democratic Alliance coalition, with all the attendant leadership complications.

That's the threat Mr Modi and Mr Shah have never taken lightly. They don't believe Rahul is their best asset in the Opposition. They know that the Congress, with its one-in-five vote base, is their only challenger. And the Congress, like it or not, can't stay intact without the Gandhis.

Now, the key point: Where does this take Rahul? At this time, he's totally focused on building the "street" against Mr Modi. He's willing to partner anybody, from mostly apolitical CJP to hard-Left All India Students' Association, from Abhijeet Dipke to Neha Bora.

Having been through the school of hard knocks since he joined politics in 2004, Rahul should know that political change in India is brought about either by those who win an election, or combine with others to defeat an incumbent. A "regime change" on the streets is an empty hard-Left fantasy because they can never win an election.

The combined might of Jayaprakash Narayan (Navnirman Andolan) and George Fernandes (Railway Strike), backed by the Rashtriya Swayamsevak Sangh (RSS) and Lohiaite street power and armed with that Allahabad High Court order, couldn't topple Indira Gandhi. They had to wait for the 1977 election. In 2010-12, a dead-in-the-water United Progressive Alliance wasn't thrown out by the Anna movement and RSS/BJP. It took the 2014 election to settle the issue.

The next general election in 2029 will mark 25 years in politics for Rahul. He will still be only 59, young by the standards of Indian politics. But presuming that the Congress and the BJP retain their ideologically frozen vote, Mr Modi's add-on voters won't shift to Rahul out of boredom. He has to offer them a better, constructive, optimistic proposition.

What will he do differently from Modi/BJP if elected? Let me list just a dozen short questions:

- How would he want Election Commissioners to be picked and the impartiality of Election Commission of India restored? Return to the Congress/UPA era isn't inspiring. His late father had tried in 1989 to weaken the EC by making it a three-member body. Further, how will he ensure that non-citizens (those the BJP has labelled *ghuspethiyas*) don't become voters?
- The same for the judiciary, CBI and the other key agencies.
- How will he handle a Trump-like challenge? How will his policy towards the United States be any different?
- What's his plan to deal with the Chinese? How will his treatment of Pakistan and terrorism emanating from there be different? Softer than Modi's, or harder?
- How will his approach to West Asia and Israel differ from Modi's?
- What's his vision for managing India's chronic and crippling triple-shortage of energy, capital and gold? We can add AI/software services to this now. How will he make India a magnet for investors?
- *Chhatron ki Goonj* is resonating. But how will he create more jobs? Further, for the less educated, will he restore MGNREGA, or introduce a "new, improved" version? Will he continue giving away free food grains?
- Is caste Census still his idea of social justice? How will it create more jobs? Revanth Reddy doesn't know what to do with his caste Census. Will he ask D K Shivakumar to at least release his caste Census data?
- What changes does he plan for the education system to end corruption and profiteering, improve the of quality education, and make the young more employable?
- He says he isn't anti-business or anti-capital. He just wants no monopoly and a level playing field. How will he ensure that? What's his concept of economic reform?
- Since he and his "secular" partners complain that the minorities are marginalised, how would he mainstream them?
- And finally, who is, or will be on his team?

To look like a credible challenger and not just a street-fighter, Rahul needs to answer these questions and offer voters in the "middle" new ideas. Mr Modi started promising "Achche Din" by late 2012. At about the same distance from 2029, what's Rahul promising?

If he were to think out of the box, he could set up a UK-style shadow Cabinet. His "ministers" could then start answering these questions in their respective domains. Of course, if I were to be only part facetious, it could unleash mighty infighting even for these non-jobs. Whatever Rahul Gandhi chooses, he can't go into 2029 again riding on his ecosystem's clamour over Modi's "falling" popularity. That has failed thrice already.

By special arrangement with *ThePrint*

Succession planning in family-owned companies

THE WISE LEADER

R GOPALAKRISHNAN

Some decades ago, there was a debate in Kolkata on the motion "Family-owned enterprises should have a family member at the helm". Not surprisingly, the outcome was polarised between the family business folk present and the professional ones. Even today, the question is a live one, especially where the enterprise(s) are listed companies.

According to the literature on the subject and in my experience, people of Latin America, South Asia, and East Asia are inclined to or are culturally comfortable with family leadership than people in Anglo-Saxon economies. Paradoxically, governance, board structures, and regulations are modelled on Anglo-Saxon principles. This makes for a natural tension between a *social* view (have family leadership) and a *professional* view (have the best leadership). There is active approval and/or a tacit acceptance in Asia and Latin America if a Mallya or a Chhabria heads a firm by that name. (Last week, former head of an Indian regulatory body displayed a post — hopefully in jest — that the Tata imbroglio could be solved by placing Jimmy Tata, an HDFC Bank employee unrelated to the family, to head Tata!)

Do family-owned listed companies treat succession planning with the care that is essential? Based on outcomes, some seem to do so, though the rigour of their grooming and selection processes is unclear. The fact that Birla, Bajaj, Singhania, and Godrej, for example, have survived and prospered for over a century suggests that they do indeed have some method.

There are, of course, many cases where businesses have failed to do so, particularly in terms of preparing the family member(s) for succession, which is a key task. Should family heirs of ownership be pitted against professionals for breadth of experience and assessment of preparedness so that the better leader can be chosen? Should this be done within the family or by the nominations and remuneration committee of the company, assuming it is a listed company? What if there is disagreement within the family council? These are open questions.

Even in regions where family succession is favoured, the modern trend is shifting from "of course the founder's child" to "the founder's child if rigorously tested". The lofty principle is the assumption of a shared clarity on the distinction between ownership, governance, and management. If truth be told, there is no such shared clarity. In practical terms, ownership, governance, and management are not in hermetically sealed containers. There is overlap, hence disputes, and hence wealthy lawyers!

A family member may inherit ownership. However, the leadership of the management team should be *earned* through competence. Deloitte identifies insufficiently tested successors as one of the most common challenges in family businesses. For a business family with next-generation members, the most robust approach is to create a succession committee over three-five years, consisting of family members and independent board members.

There are some generic lessons about family members managing companies: *First*, a family may occasionally miss a scion to run its company; *second*, that if a young scion is to be a future chief executive officer (CEO), careful mentoring with succession planning is essential; *third*, the plan should be visible to key players with the inherent acceptance and approval of the professional CEO; *fourth* and last, the professional CEO, who groomed as successor, should be gracefully recognised for his services.

The key question to be addressed by the family council or the succession committee is whether the candidate family member has been through near-death experiences and adaptive challenges. Think of Ratan Tata facing the turnaround of Nelco or the wrath of militant labour unions in the erstwhile Telco.

Such a plan is visible in the case of Jose Batista Sobrinho (JBS), a large Brazilian company. The family gave up the reins of CEOship and got it back at a suitable time.

The JBS story

In 1953, Jose Batista Sobrinho, a Brazilian rancher, began his small slaughterhouse as a business. He started small but successfully expanded his operations so competently that by 2000, his firm, called by his initials JBS, counted among Brazil's largest beef slaughterhouses. The founding family liked to emphasise that it ran a simple company with traditional roots. Despite its size and influence, JBS stayed private.

By the early 2000s, Jose passed the running of JBS to his two sons, Wesley and Joesley. The young Batista brothers had a very different approach from the founder about growth and how fast the company should expand. Using the miracles of cheap credit, political connections, and a growing market, JBS achieved more growth in six years under the brothers than what was notched up in 50 years under their father.

JBS was also the beneficiary of the government's influence over big firms. The Brazil government under President Dilma Rousseff (2011-16) bet heavily on a few giant firms to rapidly increase the country's growth. Those firms received special favours so long as they were willing to wire cash to overseas accounts or contribute to political campaigns in a suspiciously generous manner.

An excessive or super-rapid attainment of bigness has "a nasty tendency to spill over into politics, particularly into the corruption of government and creation of political backlash", as observed in the book *The Curse of Bigness* by Timothy Wu. In 2016, when Ms Rousseff lost the elections, the Brazilian police raided JBS offices and seized incriminating documents pertaining to how the company had misused their economic and market power to achieve their stupendous growth.

By 2018, two years after the raids and enquiries into JBS affairs, the brothers left the company to a professional, Gilberto Tomazoni, who ran the company for eight years till 2026. Mr Tomazoni will now assume the role of vice-chairman of the board after handing over the office of the CEO to the grandson of the founder who bears the name Wesley Batista Filho.

The family scion, it appears, has been groomed with care. He worked in the grassroots of the mainstream business for 15 years and was groomed for over a decade by Mr Tomazoni. With his assumption of the chief executive role, a family member has once again got the reins of operations of the company.

The writer is a business commentator and the author of 21 books on human behaviour and enterprise. His next book will be on *deergha aayu* or long-life, productive companies.

Our Company was originally incorporated as Vaibhav Vyapaar Private Limited on 24.02.2009 under the Companies Act, 1956 with Corporate Identification Number of the Company U51909WB2009PTC133054, vide certificate of incorporation issued by the Registrar of Companies, West Bengal. Subsequently, the name of the company was changed from "Vaibhav Vyapaar Private Limited" to "Vaibhav Vyapaar Limited" under the Companies Act, 2013 pursuant to a special resolution passed by our shareholders at the Extra-Ordinary General Meeting held on 02.01.2026 and obtained fresh certificate of incorporation dated 02.06.2026 issued by the Registrar of Companies Central Processing Centre, Manesar with Corporate Identification Number of the Company U51909WB2009PLC133054. For details pertaining to the changes of name and registered office of our company, please refer to the chapter titled "History and Corporate Structure" on page no. of this Prospectus.

PROMOTERS OF OUR COMPANY: ITHA VENKATA RAGHAVA GOWRINATH AND CAPFRONT TECHNOLOGIES PRIVATE LIMITED

THE ISSUE IS BEING MADE THROUGH BOOK BUILDING PROCESS. IN ACCORDANCE WITH CHAPTER IX OF SEBI ICDR REGULATIONS (INITIAL PUBLIC OFFER OF SMALL AND MEDIUM ENTERPRISES) OR ANY OTHER REGULATION AS MAY BE APPLICABLE OF SEBI ICDR REGULATIONS, 2018, AS AMENDED FROM TIME TO TIME AND EQUITY SHARES ARE PROPOSED TO BE LISTED ON SME PLATFORM OF NATIONAL STOCK EXCHANGE OF INDIA LIMITED (NSE EMERGE).

Our Company is a Non-Banking Financial Company (NBFC) registered with the Reserve Bank of India (RBI). We provide unsecured personal loans to salaried individuals and self-employed individuals through our fully digital lending platform, both on a direct lending and co-lending basis. In parallel, we also generate revenue by offering our application and technology services to other NBFCs. Our operating model enables credit access, particularly first-time borrowers, including lower-income salaried professionals. We company operate through our mobile application, which support loan origination, due diligence and underwriting process along with documentation, disbursal, and repayment. Our digital infrastructure uses verification and technology-enabled tools that facilitate credit assessment, credit decisioning and risk evaluation.For further details, please refer to the chapter titled "Our Business" on page no. 113 of this Prospectus.

	BID/ ISSUE CLOSED ON: 15.10.2026

RISK TO INVESTORS

1. Risk to Investors: Top 5 risk factors

a) Our business is exposed to interest rate volatility, which may adversely affect our lending and treasury operations, Net Interest Income, Net Interest Margin and results of operations.

b) Our success depends on retaining and expanding our customer base. If we are unable to attract new customers or are unable to retain and grow our relationships with our existing customers, our business, financial condition, cash flows, results of operations and prospects would be materially and adversely affected.

c) A significant portion of our Assets Under Management ("AUM") is concentrated in certain states and regions of India. Any adverse economic, regulatory, political, climatic, social or business developments in such states or regions could have a material adverse effect on our business, financial condition, results of operations and cash flows.

d) Our lending operations primarily involve unsecured loans to borrowers with a relatively higher risk profile, and any increase in defaults or our inability to recover outstanding dues may have a material adverse effect on our business, financial condition, cash flows and results of operations.

e) Our business operations are highly dependent on the continuous availability, reliability, scalability and security of our mobile application and underlying information technology infrastructure. Any disruption, failure or security breach affecting our technology systems could adversely affect our business, financial condition, results of operations, cash flows and prospects.

For further details refer chapter titled "Risk Factor" on page 27 of this Prospectus

PROPOSED LISTING

The Offer was being made through the Book Building Process, in terms of Rule 19(2)(b)(i) of the Securities Contracts (Regulation) Rules, 1957, as amended ('SCRR') read with Regulation 253 of the SEBI ICDR Regulations, as amended, wherein not more than 50% of the Net Offer was available for allocation on a proportionate basis to Qualified Institutional Buyers ('QIBs', the 'QIB Portion'). Our Company in consultation with the Book Running Lead Manager has allocated upto 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations ('Anchor Investor Portion'). Further, not less than 15% of the Net Offer shall be available for allocation on a proportionate basis to Non-Institutional Bidders and not less than 35% of the Net Offer was made available for allocation to Individual Investors in accordance with the SEBI (ICDR) Regulations, subject to valid Bids being received at or above the Offer Price. All potential Bidders (except Anchor Investors) were required to mandatorily utilise the ASBA process providing details of their respective ASBA accounts, and UPI ID in case of Individual Investors using the UPI Mechanism, if applicable, in which the corresponding Bid Amounts will be blocked by the SCSBs or by the Sponsor Bank under the UPI Mechanism, as the case may be, to the extent of respective Bid Amounts. Anchor Investors were not permitted to participate in the Offer through the ASBA process. For details, refer 'Issue Procedure' beginning on page 234 of the Prospectus. The investors are advised to refer to the Prospectus for the full text of the Disclaimer clause pertaining to NSE EMERGE. For the purpose of this Offer, the designated Stock Exchange will be National Stock Exchange of India Limited . The trading is proposed to be commenced on 21.10.2026.*

**Subject to the receipt of listing and trading approval from the National Stock Exchange of India Limited ('NSE EMERGE').*

SUBSCRIPTION DETAILS

The Issue is being made in compliance with the provisions of Regulation 229(2) and 253 of Chapter IX of the SEBI (ICDR) Regulations, 2018 and through the Book Building Issue. For further details, refer to chapter titled "Issue Structure" beginning on page 230 of the Prospectus. "The bidding for Anchor Investors opened and closed on 12.10.2026. The Company received 6 Anchor Investors applications for 26,00,000 Equity Shares. The Anchor Investor Allocation price was finalized at ₹54.00/- per Equity Share. A total of 22,00,000 Equity Shares were allotted under the Anchor Investors portion aggregating to ₹ 118,800,000/-.

The Offer (excluding Anchor Investors Portion) received 2306 Applications for 17,332,000 Equity Shares resulting 3.10 times subscription (including reserved portion of market maker and excluding anchor investor portion). PUBLIC NOTICE

Notice is hereby given to the public on behalf of my client, **M/s. GBD SMART SPACE LLP**, a limited liability partnership having its registered office at 401, Tanishka Commercial Premises Co-operative Housing Society Ltd., Akurli Road, Kandivali (East), Mumbai – 400101.

My client states that **Navi Wadi Gomati Co-operative Housing Society Ltd.** (hereinafter referred to as the "Society") represents itself to be the lawful owner of the immovable property comprising land admeasuring approximately **269.23 square metres, bearing C.S. No. 1992,** situated at **29, Navi Wadi, Dadiseth Agiary Lane, Chira Bazar, Bhuleshwar Division, Mumbai – 400002,** Mumbai City District, within the limits of the Municipal Corporation of Greater Mumbai, together with the building, structures, common areas and all appurtenances standing thereon (hereinafter referred to as the "said Property"), as more particularly described in the Schedule hereunder written.

The Society has expressed its willingness to undertake redevelopment of the said Property through my client, **M/s. GBD SMART SPACE LLP,** pursuant to a Memorandum of Understanding (MOU) and a Development Agreement proposed to be executed between the parties, subject to verification of title, requisite approvals and compliance with applicable laws.

Any person or persons, including individuals, heirs, legal representatives, members, occupants, tenants, banks, financial institutions, companies, government or local authorities, or any other person or entity having or claiming any right, title, interest, share, claim, encumbrance, lien, charge or objection in respect of the said Property or any part thereof, by way of inheritance, succession, ownership, agreement, mortgage, lease, licence, possession or otherwise, are hereby called upon to submit their written claims or objections, together with copies of all supporting documentary evidence, to the undersigned Advocate at the address mentioned below **within 15 (fifteen) days from the date of publication of this Notice**.

In the event no claim or objection is received within the aforesaid period, my client shall be entitled to proceed with the proposed redevelopment transaction on the basis of the available records and subject to applicable law, without further reference to claims or objections not brought to its notice, without prejudice to any rights or remedies available under law.

Any claim or objection received shall be dealt with in accordance with applicable law.

SCHEDULE OF THE PROPERTY

All that piece and parcel of immovable property comprising land admeasuring approximately 269.23 square metres, bearing C.S. No. 1992, situated at 29, Navi Wadi, Dadiseth Agiary Lane, Chira Bazar, Bhuleshwar Division, Mumbai – 400002, Mumbai City District, within the limits of the Municipal Corporation of Greater Mumbai, together with the building, structures, common areas and all appurtenances standing thereon.

PUBLIC NOTICE

Notice is hereby given to the public on behalf of my client, **M/s. GBD SMART SPACE LLP,** a limited liability partnership having its registered office at 401, Tanishka Commercial Premises Co-operative Housing Society Ltd., Akurli Road, Kandivali (East), Mumbai – 400101.

My client states that **(1) Mrs. Janki Rahul Bhatt and (2) Mrs. Hemal Kanhai Shah** (hereinafter collectively referred to as the "Owners") represent themselves to be the joint and absolute owners of and claim right, title and interest in respect of the immovable property being land bearing **C.S. No. 2014, admeasuring approximately 202.06 square metres**, situated at Fanaswadi, Bhuleshwar Division, Dadi Seth Agiary Lane, Chira-Bazar, Kalbadevi, Mumbai – 400002, Mumbai City District, within the limits of the Municipal Corporation of Greater Mumbai, together with the residential and commercial structures standing thereon (hereinafter referred to as the "said Property"), as more particularly described in the Schedule hereunder written.

The Owners have expressed their willingness to sell, transfer and convey their right, title and interest in the said Property in favour of my client, M/s. GBD SMART SPACE LLP, by executing the requisite legally valid and binding transaction documents, subject to due verification of title and completion of applicable legal formalities.

Any person or persons, including heirs, legal representatives, banks, financial institutions, companies, government or local authorities, or any other person or entity claiming any right, title, interest, share, claim, encumbrance or objection in respect of the said Property or any part thereof, by way of inheritance, succession, sale, agreement, mortgage, charge, lease, lien, licence, gift, possession or otherwise, are hereby called upon to submit their written claims or objections, together with copies of all supporting documentary evidence, to the undersigned Advocate at the address mentioned below, **within 15 (fifteen) days from the date of publication of this Notice.**

In the event no such claim or objection is received within the aforesaid period, my client shall be entitled to proceed with the proposed transaction on the basis of the available records and subject to applicable law, without further reference to any claim or objection not duly brought to its notice, without prejudice to any rights or remedies available under law. Any claim or objection received shall be dealt with in accordance with applicable law.

SCHEDULE OF THE PROPERTY

All that piece and parcel of immovable property being land bearing **C.S. *Assuming full subscription and receipt of all Call Monies with respect to the Rights Equity Shares.

BASIS OF ALLOTMENT

The Board of Directors of Party Cruisers Limited wishes to thank all its Equity Shareholders, members and investors for their response to the Issue which opened for subscription on Tuesday, 29th September, 2026 and closed on Tuesday, 13th October, 2026, with the last date for on-market renunciation of Rights Entitlements on Thursday, 8th October, 2026. Out of the total 171 Applications for 24,99,794 Rights Equity Shares, through the Application Supported by Blocked Amount ("ASBA") process, 102 Applications for 6,23,118 Rights Equity Shares were rejected due to technical reasons as disclosed in the Letter of Offer. The total number of valid Applications received were 69 Applications for 18,76,676 Rights Equity Shares, which was 93.91% of the number of Rights Equity Shares offered under the Issue. In accordance with the Letter of Offer, the Basis of Allotment was finalized on Wednesday, 14th October, 2026 by the Company, in consultation with the Registrar to the Issue and NSE, the Designated Stock Exchange for the Issue. The Rights Issue Committee has, at its meeting held on 14th October, 2026, approved the allotment of 18,76,676 Rights Equity Shares to the successful Applicants. In the Issue, no Rights Equity Shares have been kept in abeyance. All valid Applications after the rejection of bids received from non-eligible shareholders and technical rejections have been considered for Allotment. The balance 1,21,642 unsubscribed Rights Equity Shares have not been allotted.

1) The Break-up of valid Applications received through ASBA (after technical rejection) is given below:

Category	Total applications received- Number	Applications received – %	Rights Equity Shares applied for – Number	Value (₹)	%	Rights Equity Shares allotted – Number	Value (₹)	%
Eligible Equity Shareholders	135	78.94%	8,58,386	25,751,580.00	34.34 %	2,35,268	70,58,040.00	12.54%
Renouncees*	36	21.05%	16,41,408	49,242,240.00	65.66 %	16,41,408	4,92,42,240.00	87.46%
Total	**171**	**100.00%**	**24,99,794**	**74,993,820.00**	**100.00%**	**18,76,676**	**5,63,00,280.00**	**100.00%**

Value computed at the application money of ₹ 30/- per Rights Equity Share.

2) Information regarding total valid Applications received and Rights Equity Shares allotted:

Category	Number of valid Applications (including ASBA Applications) received	Number of Rights Equity Shares accepted and allotted against Rights Entitlement (A)	Number of Rights Equity Shares accepted and allotted against Additional Rights Equity Shares applied for (B)	Total Rights Equity Shares accepted and allotted (A+B)
Eligible Equity Shareholders	33	42,445	1,92,823	2,35,268
Renouncees*	36	1,45,914	14,95,494	16,41,408
Total	**69**	**1,88,359**	**16,88,317**	**18,76,676**

**The Investors (identified based on DP ID and Client ID) whose names do not appear in the list of Eligible Equity Shareholders on the Record Date and who held the Rights Entitlements as on the Issue Closing Date and have applied in the Issue are considered the Renouncees.*

Information for Allotment / Refund / Rejection cases: The instructions to SCSBs for unblocking of funds in case of ASBA Applications were issued on 14th October, 2026. The dispatch of Allotment Advice cum Unblocking intimation to the investors, as applicable, commenced on 14th October, 2026 and has been completed on 15th October, 2026. The listing application was filed with NSE on 14th October, 2026 and subsequently the listing approval was received on 15th October, 2026 from NSE. The credit of Rights Equity Shares in dematerialized form to respective demat accounts of allottees was completed on 15th October, 2026. For further details, see "Terms of the Issue – Allotment Advices/Refund Orders" on page 262 of the Letter of Offer. Pursuant to the listing and trading approvals granted by NSE, the Rights Equity Shares allotted in the Issue will commence trading on NSE Emerge on 19th October, 2026 and shall be traded under the separate ISIN for partly paid-up equity shares being IN906ZX01014.

INVESTORS MAY PLEASE NOTE THAT THE RIGHTS EQUITY SHARES CAN BE TRADED ON THE STOCK EXCHANGE ONLY IN DEMATERIALISED FORM.

Disclaimer clause of NSE: It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Letter of Offer has been cleared or approved by NSE; nor does it in any manner warrant, certify or endorse the correctness or completeness of any of the contents of the Letter of Offer. The investors are advised to refer to page 232 of the Letter of Offer for the full text of the Disclaimer clause of NSE.

India Inc's FY27 profit growth estimates dip 700 bps since Feb

Financials to remain major driver of incremental earnings

SACHIN P MAMPATTA
Mumbai, 16 October

Widely tracked Indian companies have seen their estimates of profit growth drop by over 700 basis points (bps) since the Iran war started in February.

The consensus among analysts in February was that the aggregate profits of a sample of listed companies with wide coverage would grow 16.5 per cent in 2026-27 (FY27), according to a study in the National Stock Exchange's Market Pulse report for September.

This consensus expectation of profit growth for FY27 fell to 9.2 per cent by September, shows the data from this report.

The study includes 200 companies covered by at least five analysts in the preceding one-year period.

This decline of 730 bps over seven months came amid higher costs of energy and raw materials since the conflict began. The United States (US) and Israel attacked Iran on February 28. Iran has struck back at US allies in West Asia, hitting key oil infrastructure and blocking a key global shipping route of the Strait of Hormuz. The conflict has continued with varying degrees of intensity into this month.

The energy sector was the worst affected in terms of earnings downgrades amid having to absorb the pressure of higher oil prices. The consensus estimate of FY27 earnings growth dropped from 2 per cent in February to -16.9 per cent in September.

Fall amid extended Iran conflict

Aggregate consensus earnings growth estimate for FY27 (Y-on-Y, in %)

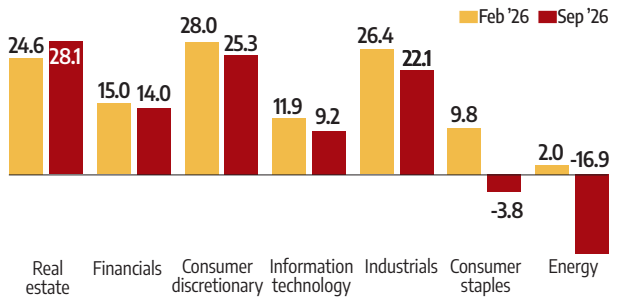
Energy, consumer staples worst hit

Aggregate consensus earnings growth estimate for FY27 (year-on-year, in %)



Note: Based on NSE Market Pulse analysis of the 200 largest, well-covered companies by market capitalisation. Data covers key sectors from the sample
Source: NSE Market Pulse (September 2026 edition)

Most of the other key sectors saw a decline in earnings estimates. Consumer staples dropped from an estimated growth rate of 9.8 per cent for FY27 in February to -3.8 per cent in September. Consumer discretionary, industrials, information technology and financials all saw a drop of between 100 and 500 bps since February.

Real estate was the exception. Earnings growth was upgraded by 350 bps to 28.1 per cent for FY27 from 24.6 per cent projected in February, amid sustained demand for premium housing. Other sectors are grappling with decisions on the extent to which they can absorb a rise in their expenses.

"The biggest change between Q1 and Q2 is the increasing transmission of higher input costs into corporate P&Ls (profit and loss statements). Energy, freight, metals, chemicals and imported components have become more expensive, while currency (rupee) depreciation adds another layer of cost pressure for import-dependent businesses," said an October 2026 Axis Securities (Axis Direct) Earnings Preview report authored by Uttam K Srimal, deputy head of research. Companies are responding through initiatives such as cutting costs and raising prices, though their ability to pass on higher costs will vary by sector and competitive intensity, according to the report.

Increased prices of food and fuel, along with the elevated costs of higher-ticket size items like automobiles and durables amid rising interest rates, may adversely affect domestic demand in the near future, according to an October 9 PL Capital (Prabhudas Lilladher) India Strategy report from author Amnish Aggarwal.

"We note that past 2-3 (quarters) have been very patchy with host of mass end products witnessing demand pressures while premium end segments growing at a fast clip. We expect similar scenario to play out in coming quarters as well," it said. Analysts have pushed their expectations of profit growth to FY28. Consensus earnings growth for FY28 rose from 14.3 per cent in February to 17.2 per cent in September, showed the Market Pulse data.

Earnings growth is expected to be positive for the FY26-28 period. Most of the gains are driven by three sectors. The financial sector is expected to account for 40.8 per cent of the incremental earnings during FY26-28. Consumer discretionary comes second with a 13.1 per cent contribution to incremental earnings. Industrials are to account for another 11.3 per cent.

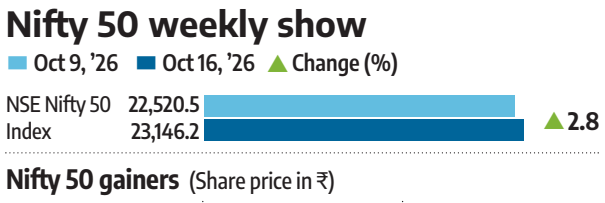
The three sectors together will contribute nearly two-thirds of incremental earnings between FY26 and FY28.

Indian IT stocks post best week in 18 years

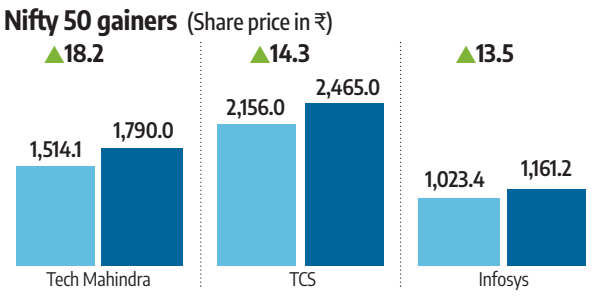
This comes as AI sell-off drives investors towards the country's software firms

SHILPA RANGARAJAN
Mumbai, 16 October

Nifty 50 weekly show



Nifty 50 gainers (Share price in ₹)



Source: Bloomberg, BSE

A JP Morgan report called India the natural artificial intelligence (AI) hedge based on the premise that the market is large, liquid and has big domestic institutional investors that keep it ticking without depending on foreign capital.

Within a month of the report, Indian markets are behaving exactly as the bank projected.

Indian software stocks had their best week in about 18 years as a sell-off in global AI stocks pushed investors towards stocks that had missed the AI boom, mainly India's information technology (IT) services companies.

The Nifty IT index rose 3.92 per cent on Friday to 31,924.10, taking its gain for the week to 11.72 per cent, its steepest weekly rise since April 2008. The 10 stocks in the index added ₹2.75 trillion in market value over the week — ₹97,681 crore of it on Friday alone.

The Nifty 50 rose 0.65 per cent on Friday to 23,146.15 and 2.78 per cent over the week, while the Sensex gained 3.11 per cent during the week to 74,729.27. It was the second straight weekly gain for both the benchmarks and their biggest since April 10. IT stocks accounted for about 94 of the Nifty's 149-point rise on Friday.

"India's market thrives on foundational growth engines. It is large and liquid, with a weight of around 12 per cent in the MSCI EM benchmark, while the main alternative — domestic China, at roughly 25 per cent — is contending with a softer growth backdrop. Other non-AI havens, such as Southeast Asia, Latin America and emerging Europe, are too small to absorb large allocations," said the JP Morgan report which was released on September 15.

The shift began on Wednesday, when US inflation data set off a sell-off in AI-linked stocks.

The Nasdaq Composite fell 1.88 per cent that day, and Nvidia lost 4.9 per cent between Tuesday and Thursday. The rout reached Asia's chip-making markets on Thursday: South Korea's Kospi fell 7.57 per cent, triggering a circuit breaker on memory-chip stocks, while Japan's Nikkei dropped 4.9 per cent and Taiwan's benchmark 3.4 per cent. The yield on the 10-year US Treasury eased to 5.086 per cent. While in India, IT major Tech Mahindra's stock jumped 8.48 per cent on Friday and 18.22 per cent during the week, after its revenue rose 15.6 per cent and margins widened by about 260 basis points (bps), though net profit missed estimates.

Wipro rose 5.95 per cent on Friday and 13.43 per cent over the week, despite a profit miss and a 58.6 per cent fall in large deal wins, as its margins improved. Tata Consultancy Services (TCS), which reported $9.6 billion in deal wins, said AI now accounts for more than 10 per cent in revenue. It gained 14.33 per cent in the week, adding ₹1.12 trillion in market value. Infosys rose 13.46 per cent ahead of its results, due on October 22–23, and HCL Technologies was up 13.42 per cent after narrowing its revenue guidance to 1.6–3.1 per cent.

"Strong quarterly results and upbeat management commentary reinforced confidence in the (IT) sector's earnings outlook. Softer crude oil prices and a strengthening rupee further supported sentiment. Fast moving consumer goods (FMCG) stocks remained under pressure amid concerns over Q2 margin compression from elevated input costs. The sectoral divergence reflects investors' preference for earnings visibility amid persistent cost pressures," said Vinod Nair, head of research, Geojit Investments.

Somil Mehta, head of retail research at Mirae Asset Sharekhan, said, "IT stocks have seen a strong recovery this week, supported by the quarterly results and attractive valuations after the sharp correction. The recent rally suggests that investor sentiment is improving, but the key now is whether companies can sustain earnings growth."

Foreign portfolio investors turned net buyers on Friday, purchasing shares worth ₹1,166 crore, according to provisional exchange data.

Mutual funds halt new gold FoF investments, ETF channel kept open

ABHISHEK KUMAR
Mumbai, 16 October

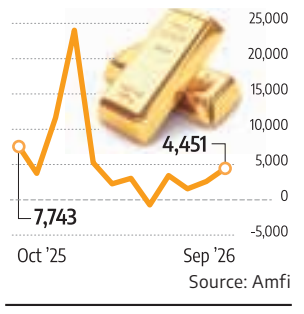
Mutual fund (MF) houses stopped accepting fresh investments in their gold fund of funds (FoFs) from Friday after receiving verbal instructions from the Securities and Exchange Board of India (Sebi) late on Thursday, said industry officials.

The move by MFs comes at a time when inflows into gold exchange-traded funds (ETFs) have rebounded, adding to India's import bill amid current account deficit worries.

Gold ETFs attracted net inflows of ₹4,451 crore in September, the highest in six months. The inflow figures include investments routed through gold FoFs, as these funds ultimately invest in gold ETFs. The restrictions, according to MF officials, were imposed on Sebi's instructions. Investments in gold ETFs can contribute to demand for physical gold, as these funds are required to hold gold corresponding to their assets under management. This demand can, in turn, add to India's gold import bill.

Staging a rebound

Net gold ETF inflows (₹ crore)



Source: Amfi

The curbs, however, come at a cost for asset management companies (AMCs) as gold and silver inflows now constitute a significant part of the monthly inflows.

According to DP Singh, former joint chief executive of SBI Funds Management, the curbs may temporarily affect AMCs but are justified from the perspective of the larger national interest. "The money earmarked for investment will find its way into other asset classes. The impact on AMCs' business, if any, will be negligible," he said.

Late on Thursday, fund houses issued notices stating that lump-sum investments, along with new systematic transactions like SIPs would be discontinued from Friday. Existing SIP, systematic transfer plan (STP) and switch transactions will continue.

Gold ETFs, however, remain open for investments.

Sebi's closing auction changes may revive participation on expiry days: Analysts

KHUSHBOO TIWARI
Mumbai, 16 October

The Securities and Exchange Board of India's changes to the closing auction session (CAS), effective December 7, may revive participation in the derivatives segment, specifically on expiry days, analysts noted. The market regulator has changed the settlement methodology for index derivatives on expiry days to the volume-weighted average price. Additionally, timings for CAS have also been revised.

"This should reduce expiry-day volatility under the CAS benefiting brokers whose orders remain below pre-CAS levels. With premium turnover for exchanges back to pre-CAS levels, earnings upside may be limited," said Jefferies in a note.

It added that orders traded per day are recovering from the lows of August 2026 — since the implementation of CAS on August 3.

The settlement price of index derivatives has been revised back to the volume-weighted average prices (VWAP) of constituent securities during the last 30 minutes of the continuous trading session (CTS) in the equity cash segment.

For expiring stock derivatives, settlement prices will be determined using the VWAP of the underlying stock during the last 30 minutes of the CTS across all stock exchanges.

Further, the CAS will operate as a separate 10-minute session from 3.30 pm to 3.40 pm on all trading days. Trading in index derivatives will continue until 3.45 pm on regular trading days, but contracts expiring that day will stop trading at 3.30 pm. Trading in stock derivatives will continue until 3.45 pm, including on expiry days.

Scorecard

Average*	Total F&O (₹ trn)
Jul-26	446.5
Aug-26	346.9
Sep-26	389.8
Oct-26	506.9

Data upto Oct 16, 2026
*Average Daily for the month
Source Exchange
Compiled by *Business Standard* Research Bureau

Industry players said that the regulator had adopted the majority of the suggestions submitted during the consultation.

"On monthly expiries, the difference between the reference price and the settlement price was huge and that writers and option players could not hedge this gap. The existing strategies that had been running since ages was based on option decay strategy — that with expiry the option premium decays and they profited from that. In the current form of CAS, this was not happening to the extent because the price could go anywhere amid uncertainty. That is the reason why high-frequency traders (HFTs) and large players were not participating to the same extent," said Amit Chandra of HDFC Securities.

In August, the average daily trading volume (ADTV) in the equity derivatives across both the exchanges fell to ₹347 trillion from ₹446 trillion in June. However, there has been recovery with ADTV rising to ₹389 trillion in September and reaching ₹506 trillion in October so far.

THE COMPASS | DECODING MARKET DIRECTION

Better execution, margin gains positive for BHEL

DEVANGSHU DATTA

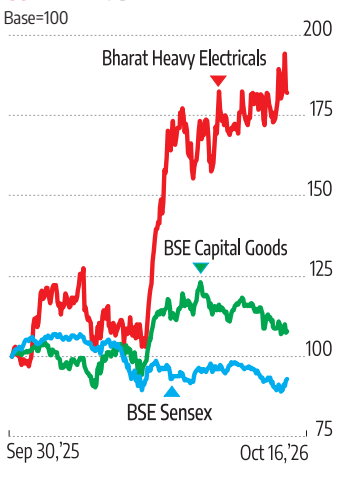
Bharat Heavy Electricals' (BHEL's) second quarter revenue beat consensus estimates, as it rose 24 per cent year-on-year (Y-o-Y) to ₹9,300 crore. Sequentially, it jumped 21 per cent. Gross margin stood at 37 per cent, up 595 basis points (bps) Y-o-Y and 536 bps quarter-on-quarter (Q-o-Q). While, earnings before interest, tax, depreciation and amortisation (Ebitda) margin came in at 11 per cent, up 330 basis points Y-o-Y and 448 basis points sequentially. Net profit surged 119 per cent Y-o-Y and 118 per cent Q-o-Q to ₹800 crore.

Segment wise, power revenue grew 17 per cent Y-o-Y and industry revenue grew 45 per cent Y-o-Y. Ebit margin for power was up 247 bps Y-o-Y at 13 per cent, while for industry business it improved to 19.5 per cent, expanding by 423 basis points Y-o-Y. Working capital came down to 141 days versus 164 days in financial year 2026 (FY26) due to better collection of ₹13,200 crore, up 33 per cent Y-o-Y. Lower cost of finance of ₹120 crore versus ₹200 crore in Q2FY26 and ₹140 crore in Q1FY27, was another beat. Higher other income, which grew 42.9 per cent Y-o-Y to ₹260 crore, also pushed up net profit. The order book stood at ₹2.6 trillion. BHEL also announced a capex of ₹500 crore and started hiring in some categories after almost 15 years. A strong pipeline and good net cash (₹4,600 crore) are both positive signs as well. Most analysts are upgrading the stock, given better execution and clear visibility of future revenue.

The company received orders worth ₹4,000 crore during Q2FY27 (₹30,000 crore in H1FY27). The Y-o-Y inflow declined 82 per cent with a high base effect. The thermal to non-thermal mix of the order book stands at 73.0 per cent to 27.0 per cent. Of the total order book of ₹2.6 trillion, ₹70,000 crore is from non-thermal sectors like nuclear, transmission, defence, transportation, coal gasification, hydro and services. Order inflow should be ₹60,000 crore in FY27 and higher in FY28. There are new scalable opportunities in nuclear and coal gasification.

Currently, 47,545 mega watt (Mw) of thermal capacity (including 4,845 Mw of stressed projects) is under construction. Contracts for 16,000 Mw have been awarded and another 34 Gw of projects are to be awarded as per the plan to add 97 Gw by 2032, which may be further upgraded. That's a stable pipeline in thermal.

COMPANY: BHEL



BHEL added 2,260 Mw of capacity during H1FY27 against a target of 4,790 Mw in FY27. BHEL has announced ₹500 crore capex for additional manufacturing facilities for thermal and nuclear sets at its Haridwar plant. Further, the company has released a notification for recruitment of 660 artisans across nine manufacturing units in a follow up from an earlier notification for recruitment of 515 artisans in July 2025. Such recruitments last occurred in 2011 so the company may be addressing some key bottlenecks and constraints. The power segment remained the key growth driver, registering 17 per cent Y-o-Y revenue growth, underpinned by execution of its robust order book of ₹2.1 trillion.

Order wins across hydroelectric projects, including Heo and Tato-I, along with an FR6B gas turbine order, further strengthen its presence across hydro and gas-based power generation. The industrial segment also delivered strong growth, with revenue rising 45 per cent Y-o-Y, while a non-thermal order book of ₹70,000 crore provides diversification options. Expansions into synchronous condensers, green hydrogen electrolysers, high voltage direct current (HVDC) energy transmission, green energy corridors, defence and rail mobility broadens the total addressable market. Signs of better execution, margin recovery and diversification beyond thermal, all point at a better growth outlook, but timely sustained execution is a key monitorable. The large thermal power order pipeline, diversification into sectors like railways, defence, green hydrogen, coal gasification and growing exports all augur well. Disciplined working capital management will be another monitorable, though that also shows signs of improvement.

Most of the execution improvement came in the industry segment and gross margin is above guidance of 35 per cent. The capex of ₹500 crore is low, given the size of business and a balance sheet with good net cash and this could lead to capacity constraints. Industry wide challenges could result in slowdown in thermal project execution, which would obviously impact BHEL adversely. The entry of Chinese suppliers, JSW Toshiba, Larsen & Toubro and Thermax into its core thermal equipment segment means higher competitive intensity. The stock is up substantially, while several analysts are saying valuations are too high for comfort.

Downward trend

Fast-moving consumer goods (FMCG) major Nestlé delivered robust September-quarter numbers, aided by double-digit volume growth. While revenue growth was broad-based with contributions across categories, margins saw an expansion despite elevated input costs.

While Q2 performance was strong, the stock has come under selling pressure, shedding 8.6 per cent to ₹1,265 in two trading sessions. The weak investor sentiment is on account of an expected topline growth moderation in H2FY27, input cost inflation, going ahead, and a sharp divergence in valuations of Nestlé vis-a-vis peers.

Given these concerns, most brokerages have cut their price-to-earnings multiple for the stock.

Continuing its momentum on the sales growth front, the company registered a 20 per cent year-on-year (Y-o-Y) growth in the September quarter on a high base.

Sales trend in the last four quarters on a standalone basis has been robust with growth in the range of 19-25 per cent Y-o-Y. The gains on the back of double-digit volume growth were aided by confectionery and beverages segments. Domestic and exports segments saw a growth of 20-22 per cent.

The company continued to expand its rural distribution, which led to robust double-digit growth in general trade across town tiers while e-commerce growth was led by quick commerce (qcom). The qcom segment was aided by channel-specific assortment and better digital shelf execution.

Organised trade gained from improved in-store execution, consumer activations, shelf visibility and store expansion. Nestlé expanded internationally with the launch of Maggi Masala-e-Magic in Canada, and Nescafe Sunrise expanded to five West African markets.

Commenting on the strong show in Q2, JM Financial Research says that the company reported strong domestic revenue growth at over 20 per cent with a two-year annual growth of 15.5 per cent led by double-digit volume growth.

This is expected to be the best-in-class among food and beverages as well as staples players.

Despite higher advertising spends and input costs, the company posted an improvement in profitability. Gross margins saw an expansion of 260 basis points (bps) Y-o-Y to 56.9 per cent and this was largely on account of price hikes.

With regards input prices, Nestlé expects coffee and wheat to stay range-bound while sugar and edible oil have stabilised at elevated price levels. Cocoa remained volatile led by weather-led crop concerns. Higher supplies should help lower milk prices which have gone up.

While commodity outlook remains volatile, Nestlé's portfolio and pricing power makes it the best placed to navigate the challenge, says JM Financial Research.

Mehul Desai and Pooja Kubadia of the brokerage believe that festival demand trends and sustaining volume momentum, going ahead, would be the key.

While the brokerage likes Nestlé's execution but given the broader sector de-rating, it is cutting target multiple to 58 times from the 65 times earlier. It has maintained an "add" rating with a revised target price of ₹1,450 (earlier ₹1,610). Though the firm has been investing in its brands and saw a 46 per cent increase in marketing spends, operating profit grew by 33.3 per cent.

Margins at the operating level improved 223 bps Y-o-Y to 23.1 per cent, led by savings in employee cost. Mihir P Shah and Riya Patni of Nomura Research expect price hikes along with continued mix improvement supported by new launches in premium offerings, to enable the company maintain its margins.

The brokerage has a "buy" rating on the stock with a target price of ₹1,535 but has reduced its earnings estimates and target multiple from 65 times to 56 times.

How to pick a car loan this festive season

KARTHIK JEROME

Neha Sharma (name changed on request), a 35-year-old Noida resident who works with an information technology company, wants to buy a car this festive season. She is unsure how much to borrow, the tenure she should opt for, and which types of festive offers will deliver worthwhile savings.

These are well-founded concerns at a time when car loans are growing bigger and tenures longer. A recent report by TransUnion Cibil, a credit information bureau, shows that the average value of a car loan rose to ₹8.2 lakh in the first half of 2026, up 49 per cent from the corresponding period of 2019.

Right loan size for you
Assess your monthly take-home income, living expenses and existing loans. "All your equated monthly instalments (EMIs) should not exceed 40 per cent of net take-home income," says Abhishek Kumar, Securities and Exchange Board of India (Sebi)-registered investment adviser and founder, Sahaj-Money.com. The amount of liquid savings available for the down payment should be another consideration.

Keep tenure manageable
The average car loan tenure is also rising. The TransUnion Cibil report says that it rose by five months to 62 months between the first half of 2019 and the first half of 2026.

"A longer loan lowers the monthly instalment but adds to the total interest," says Adhil Shetty, chief executive officer (CEO), BankBazaar.

Vehicles depreciate rapidly, so a longer repayment period risks leaving the borrower owing more than the car is worth. "Choose the shortest tenure your monthly budget can accommodate," says Kumar.

For a ₹10 lakh loan at 8.40 per cent over five years, the total interest payable is ₹2,28,102. Extending the tenure to six years raises the interest to ₹2,76,502, an increase of 21.2 per cent.

Prepare for rate hikes
Experts believe the repo rate could rise by another 75 basis points after the 25-basis-point increase already announced. Both fixed-and floating-rate loans are available. Borrowers who want greater certainty may choose a fixed rate. "They typically carry higher interest rates than floating-rate loans," says Raoul Kapoor, co-CEO, Andromeda Sales and Distribution. Those who choose a floating rate must have adequate room in their budgets to absorb higher costs.

Check prepayment terms
Besides interest rates, compare lenders' processing fees, prepayment charges and late-payment penalties.

Most borrowers like to prepay, so flexibility is crucial. "Check whether a lock-in period bars part payments during the initial six to 12 months. Loan agreements also specify limits on prepayments in a year, such as one or two EMIs. Check the frequency or gap after which part payment can be made," says Kapoor.

Equally important is whether prepayment results in a reduction in the EMI or the tenure. A reduction in tenure results in higher savings in total interest cost. Those on a fixed-rate loan could be charged a fee that would erode the gains from prepayment.

Festive offers
Festive offers this year are a mix of lower costs and easier terms. "Some lenders are waiving processing fees, while others are financing the full on-road price, which can reduce or remove the need for a down payment. Repayment periods can stretch to seven years," says Shetty.

Some types of concessions are more beneficial than others. "The interest rate matters most because it affects every instalment of the loan. Lower processing fees and no penalty for paying off early also help, while cashback and accessories are one-time gains," says Shetty. Comparing the total repayment cost across lenders offers a clear picture.

Current offers on car loans

Punjab National Bank: Offering a full waiver of upfront/ processing fees and documentation charges till December 31

Canara Bank: Offering a 100% processing charge waiver till December 31; up to 90% financing for a new vehicle

UCO Bank: 100% waiver of processing and documentation charges; no cap on loan amount for a new car; repayment up to 84 months

Indian Bank: Zero processing charges on select loans; nil prepayment charges; special concessions for women borrowers

WhatsApp fraud: When a bank alert becomes a trap

A WhatsApp message saying that money has been debited from your bank account can trigger panic, especially when it asks you to reply "No" to report an unauthorised transaction. The Hyderabad Police warned people about such suspicious messages, noting that a victim lost money after responding without sharing a one-time password (OTP) or clicking a suspicious link.

The police described the alleged incident as an "auto-execution file attack". However, the claim that replying to a simple WhatsApp message can automatically activate malware has not been independently verified. A reply alone does not normally install malware on an updated smartphone.

How to stay safe
Verify transactions: Check your account through your bank's official application or internet banking service. Avoid links in suspicious messages.
Do not reply: Ignore messages from unknown numbers claiming that money has been debited.
Avoid suspicious downloads: Do not open unexpected attachments, install unfamiliar applications or grant remote access to your phone.
Protect banking details: Never share your personal identification number (PIN), password or OTP with anyone claiming to represent your bank.
Block and report: Use WhatsApp's reporting and blocking features to deal with suspicious senders.
If money is debited fraudulently, call the national cybercrime helpline 1930 and file a complaint at cybercrime.gov.in. Inform your bank promptly.

NOTICE PURSUANT TO SECTION 110 OF THE COMPANIES ACT, 2013 AND THE COMPANIES (MANAGEMENT AND ADMINISTRATION) RULES, 2014

Members Notice is hereby given pursuant to the provisions of Sections 108 and 110 and other applicable provisions, if any, of the Companies Act, 2013 ("Act"), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014, Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations"), Secretarial Standard-2 on General Meetings ("SS-2"), General Circular No. 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs ("MCA") read with other applicable circulars issued by MCA from time to time ("MCA Circulars"), and other applicable laws, that Jain Resource Recycling Limited ("Company") has completed the dispatch of the Postal Ballot Notice dated October 16, 2026 ("Notice"), through electronic mode, to the eligible Members of the Company for seeking their approval through Postal Ballot by way of remote e-voting only.

The Notice seeks approval of the Members by way of Special Resolutions for:

1. Appointment of Mr. Prakash Kumar Behera (DIN: 11878579) as a Non-Executive Independent Director of the Company;
2. Appointment of Ms. Kajal Mayur Saiya (DIN: 11319429) as a Non-Executive Independent Director of the Company;
3. Alteration of the objects clause of the Memorandum of Association of the company by substitution of an existing main object and insertion of new objects.

The Company has engaged the services of National Securities Depository Limited (NSDL) to provide the remote e-voting facility.

Mr. Rangarajan Dorairajan (FCS 14171 & C.P. No. 23671), Partner, M/s. BP & Associates, Company Secretaries, has been appointed as the Scrutinizer to scrutinize the remote e-voting process in a fair and transparent manner.

Members are hereby informed that:

a) Notice of Postal Ballot has been sent to Members whose names appear in the Register of Members / List of Beneficial Owners as on Friday, October 09, 2026, being the cut-off date, and their voting rights have been reckoned as on that date.
b) The Company has completed the dispatch of the Notice of Postal Ballot through electronic mode on October 16, 2026 to the Members whose e-mail addresses are registered with the Company, its Registrar and Transfer Agent or the Depositories / Depository Participants, as applicable.
c) The Postal Ballot Notice is available on the Company's website at https://jainmetalgroup.com/Pdf/JRRL-Postal-Ballot-Notice-Oct-2026.pdf and on the websites of BSE Limited at www.bseindia.com and National Stock Exchange of India Limited at www.nseindia.com, and on the website of NSDL at https://www.evoting.nsdl.com.
d) The remote e-voting period shall commence at 9:00 A.M. (IST) on Saturday, October 17, 2026, and ends at 5:00 P.M. (IST) on Sunday, November 15, 2026.
e) Members are requested to cast their votes electronically by recording their assent (FOR) or dissent (AGAINST) on the resolutions set out in the Notice on or before 5:00 P.M. (IST) on Sunday, November 15, 2026. The remote e-voting facility shall be disabled thereafter.
f) Members who have not received the Notice or whose email addresses are not registered may follow the procedure specified in the Notice for registration/updation of their email addresses and for obtaining access to the remote e-voting facility.
g) The results of the Postal Ballot will be announced on or before 5:00 P.M. (IST) on or before Tuesday, November 17, 2026. The results, along with the Scrutinizer's Report, will be intimated to the stock exchanges and uploaded on the Company's website.

In case of any queries relating to the Postal Ballot Notice or if any eligible Member has not received the Notice, the Member may contact Mr. Aravindkumar V, Company Secretary and Compliance Officer, at the Registered Office of the Company at the address mentioned above or write to cs@jainmetalgroup.com.

For any queries relating to remote e-voting, Members may refer to the Frequently Asked Questions (FAQs) and the e-voting User Manual for Shareholders available at www.evoting.nsdl.com, or write to evoting@nsdl.com.

NOTICE OF THE EXTRA ORDINARY GENERAL MEETING AND REMOTE E-VOTING/E-VOTING INFORMATION

Notice is hereby given that the Extra Ordinary General Meeting **("EOGM")** of the members of **Prime Focus Limited ("the Company")** will be held on **Saturday, November 07, 2026** at **12:30 p.m. (IST)** through Video Conferencing **("VC")** / Other Audio Visual Means **("OAVM")** in compliance with all the applicable provisions of the Companies Act, 2013 **("Act")** and Rules made thereunder and the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements), Regulations, 2015 **("Listing Regulations")**, read with the relevant circulars issued by the Ministry of Corporate Affairs **("MCA")** and Securities and Exchange Board of India **("SEBI")** (collectively referred to as the **"Relevant Circulars"**) in this regard, to transact the business as set out in the Notice of EOGM dated October 15, 2026 **("Notice")** which is available on the website of the Company (www.primefocus.com) and also on the website of Central Depository Services (India) Limited **("CDSL")** (www.evotingindia.com), BSE Limited (www.bseindia.com) and National Stock Exchange of India Limited (www.nseindia.com). Members participating through the VC / OAVM facility shall be reckoned for the purpose of quorum under Section 103 of the Act. The deemed venue for the EOGM shall be the Registered office of the Company i.e. Prime Focus House, Opp. Citi Bank, Linking Road, Khar (West), Mumbai - 400 052.

In compliance with the relevant circulars, the Notice setting out the business to be transacted at the EOGM of the Company have been sent through electronic mode on **Friday, October 16, 2026**, to those shareholders, whose e-mail address(es) are registered with the Company / Company's Registrar to Issue and Share Transfer Agent i.e. MUFG Intime India Private Limited (formerly known as Link Intime India Private Limited) **("RTA")** or Depositories/ Depository Participants.

Pursuant to Section 108 of the Act read with Rule 20 of the Companies (Management & Administration) Rules, 2014 as amended from time to time, Regulation 44 of the Listing Regulations and Secretarial Standard-2 on General Meetings, members holding the shares in demat form as on **Saturday, October 31, 2026 (i.e. cut-off date)** are provided with the facility to cast their vote electronically, through the e-voting services provided by CDSL, on all the resolutions set forth in this Notice of EOGM using the electronic voting system either by (a) remote e-voting or (b) e-voting during the EOGM, provided by CDSL and all the business may be transacted through such e-voting.

The remote e-voting (i.e. casting of votes using electronic voting system from place other than the venue of the Meeting) period commences on **Tuesday, November 03, 2026 (9:00 a.m. IST)** and ends on **Friday, November 06, 2026 (5:00 p.m. IST)**. During this period, members may cast their vote electronically. The remote e-voting module shall be disabled by CDSL at **5:00 p.m. on Friday, November 06, 2026** and members shall not be allowed to vote through remote e-voting thereafter. The voting rights of the Members shall be in proportion to their shareholding in the paid-up Equity Share Capital of the Company as on the Cut-off date. Only the Members holding shares in dematerialized form, as on the cut-off date, shall be entitled to avail of the remote e-voting facility or e-voting at the EOGM, as the case may be, to cast their vote. Any person who is not a member as on the cut-off date should treat this notice for information purposes only. Once the vote on a resolution is cast by Member, it cannot be subsequently changed and the Member cannot vote again.

The members attending the EOGM, who have not exercised their vote by remote e-voting, would be able to exercise their voting right at the EOGM by logging into the e-voting portal of CDSL. The Members who have exercised their vote through remote e-voting prior to the EOGM may also participate in the EOGM through VC/OAVM but shall not be entitled to vote again at the EOGM. Once the vote on a Resolution is exercised and confirmed, the Member shall not be allowed to modify it subsequently.

Any person, who acquires shares of the Company and becomes a member of the Company after dispatch of the Notice and holding shares as on the cut-off date, are requested to refer to the Notice of EOGM for the process to be adopted for obtaining login id and password for casting the vote and shall obtain the login id and password by sending a request at helpdesk.evoting@cdslindia.com. However, if you are already registered with CDSL for remote e-voting then you can use your existing user ID and password for casting your vote. If you forget your password, you can reset it by using "Forget User Details/Password" option available on www.evotingindia.com.

The instructions for remote e-voting and voting at EOGM by members holding shares in dematerialized mode and for members who have not registered their email address(es) is provided in the Notice of EOGM. Only those members, who will be present at the EOGM through VC/OAVM facility and have not cast their vote on the Resolutions through remote e-voting and are otherwise not barred from doing so, shall be eligible to vote on such Resolution(s) through e-voting system during the EOGM at the end of the discussion on the Resolutions on which the voting is to be held, upon the announcement of the Chairman. Instructions for attending the EOGM through VC/OAVM are also provided in the Notice of EOGM.

In case of queries/grievances with regard to remote e-voting, members may refer the e-voting manual available at www.evotingindia.com under help section or may contact:

Name and Designation: Mr. Rakesh Dalvi, Assistant Vice President
Address: Central Depository Services (India) Limited, Marathon Futurex, A wing, 25th Floor, NM Joshi Marg, Lower Parel, Mumbai - 400 013
Email id: helpdesk.evoting@cdslindia.com; **Phone No.:** 18002109911

The Company has appointed Mr. Harshvardhan Tarkas, Practicing Company Secretary, (Membership No. ACS No. 30701, COP No. 24169) as the scrutinizer to scrutinize the E-voting process in a fair and transparent manner.

A member entitled to attend and vote at the meeting is entitled to appoint a proxy/proxies to attend and vote instead of himself/ herself. Such a proxy/ proxies need not be a member of the company. Since this EOGM is being held pursuant to the Relevant Circulars through VC /OAVM, physical attendance of Members has been dispensed with. Accordingly, the facility for appointment of proxies by the Members will not be available for the EOGM and hence the Proxy Form and Attendance Slip are not annexed to this Notice.

CORRIGENDUM TO THE NOTICE OF THE EXTRA ORDINARY GENERAL MEETING

Dear Members,

The Company has issued a Notice dated September 26, 2026 (**"Notice"**) convening the Extra Ordinary General Meeting (**"EGM"**) of the Members of the Company to be held on Monday, October 19, 2026 at 04.00 P.M. (IST) through Video Conferencing / Other Audio-Visual Means, which has been sent to the Members in due compliance with the applicable provisions of the Companies Act, 2013 and the rules made thereunder, read with the circulars issued by the Ministry of Corporate Affairs and SEBI.

This Corrigendum is being issued to provide an additional disclosure in the Explanatory Statement relating to Item No. 1 annexed to the Notice. On and from the date of this Corrigendum, the Notice shall always be read together with this Corrigendum. **The text of the resolutions set out in the Notice remains unchanged.** All other contents of the Notice, save and except as supplemented by this Corrigendum, shall remain unchanged.

Item No. 1, Explanatory Statement, paragraph (d): insertion of new sub paragraph (v) on pricing under the Articles of Association

The following shall be inserted as sub paragraph (v), after sub paragraph (iv):

"v. **Pricing in terms of the Articles of Association:** Article 17(a)(iii) of the Articles of Association of the Company provides that, where the Company proposes to increase its subscribed capital by issue of further shares to any persons, if authorised by a special resolution, either for cash or for a consideration other than cash, the price of such shares shall be determined by the valuation report of a registered valuer, subject to the applicable provisions of Chapter III of the Companies Act, 2013. The Articles of Association do not prescribe any other method for determination of the price of shares issued on a preferential basis.

In terms of the proviso to Regulation 164(1) of the SEBI ICDR Regulations, where the Articles of Association provide for a method of determination which results in a floor price higher than that determined under the SEBI ICDR Regulations, such higher price shall be considered as the floor price. Accordingly, the floor price is the higher of (A) ₹1,456.40 per equity share, determined under Regulation 164(1) of the SEBI ICDR Regulations; and (B) the price determined in accordance with Article 17(a)(iii) of the Articles of Association.

CA Aman Bansal, independent registered valuer (IBBI Registration No. IBBI/RV/06/2025/15829), by his valuation report dated September 23, 2026, has determined the value of the equity shares of the Company at ₹1,456.40 per equity share. As the price determined in accordance with the Articles of Association does not exceed the price determined under Regulation 164(1), the floor price remains ₹1,456.40 per equity share. The Issue Price of ₹1,460.00 per equity share is not lower than the floor price so determined and is in compliance with Article 17(a)(iii) of the Articles of Association, Section 62(1)(c) of the Act and Chapter V of the SEBI ICDR Regulations. The valuation report is available on the website of the Company at https://qualitypower.com/wp-content/uploads/2026/09/Signed_Report_Quality_Power.pdf and for inspection by the Members as set out in the Notice."

This Corrigendum is being sent by electronic mode to all Members to whom the Notice was sent, and is available on the website of the Company at www.qualitypower.com, on the websites of BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com respectively, and on the website of MUFG Intime India Private Limited at https://instavote.linkintime.co.in. Members who have already cast their vote through remote e-voting are not required to vote again; votes already cast shall remain valid.

NOTICE OF POSTAL BALLOT

NOTICE is hereby given that the Company is seeking approval of its Members by way of a Special Resolution for raising of funds through the issuance of Securities, as approved by the Board of Directors of the Company at its meeting held on October 14, 2026.

The Postal Ballot Notice is available on the websites of the Company at www.capriloans.in, National Securities Depository Limited (NSDL) at www.evoting.nsdl.com and the Stock Exchanges where the equity shares of the Company are listed i.e. BSE Limited (BSE) www.bseindia.com and National Stock Exchange of India Limited (NSE) www.nseindia.com.

In compliance with the provisions of Sections 110, 102 read with 108 and other applicable provisions of the Companies Act, 2013 read with Rule(s) 20 and 22 of the Companies (Management and Administration) Rules, 2014, and other related Rules, Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, Secretarial Standard on General Meetings ("SS-2") issued by The Institute of Company Secretaries of India, each as amended, and in accordance with the provisions of the General Circular No. 09/2024 dated September 19, 2024 and General Circular No. 03/2025 dated September 22, 2025, issued by the Ministry of Corporate Affairs ("MCA Circulars"), the Company has sent the Postal Ballot Notice on October 16, 2026, only through electronic mode to those members whose e-mail addresses are registered with the Company/Depositories and whose names are recorded in the Register of Members of the Company or Register of Beneficial Owners maintained by the Depositories as on Friday, October 09, 2026 ("Cut-off Date"). A person who is not a member as on the cut off date shall treat this Notice for information purpose only.

The Company has engaged the services of NSDL to provide remote e-voting facility to its members. The remote e-voting period commences from 9 A.M. (IST) on Saturday, October 17, 2026 and ends at 5 P.M. (IST) on Sunday, November 15, 2026. The remote e-voting module shall be disabled by NSDL thereafter and e-Voting shall not be allowed beyond the aforesaid time and date.

The voting rights of member shall be in proportion to the shares held by them in the paid-up equity share capital of the Company as on the Cut-off date. The communication of assent or dissent of the Members would take place only through the remote e-voting system. Only those Members whose names are recorded in the Register of Members of the Company or Register of Beneficial Owners maintained by the Depositories as on the cut off date will be entitled to cast their votes by remote e-voting. Once the vote on the resolution is cast by the member, the member shall not be allowed to change it subsequently.

For details relating to e-voting, please refer to the Postal Ballot Notice. In case of any queries/ grievances, you may refer to the Frequently Asked Questions (FAQs) for Shareholders and e-voting user manual for Shareholders available at the download section of www.evoting.nsdl.com or call on 022 - 4886 7000 or send a request at evoting@nsdl.co.in.

The Board of Directors of the Company has appointed Mr. Dinesh Kumar Deora, Practising Company Secretary, Mumbai as the Scrutinizer for conducting the Postal Ballot through remote e-voting process in a fair and transparent manner.

The result of the Postal Ballot will be announced on or before 6.00 P.M. (IST), Tuesday, November 17, 2026. The said result along with the Scrutinizer's Report would be intimated to BSE and NSE and will also be uploaded on the Company's website at www.capriloans.in and on the website of NSDL at www.evoting.nsdl.com

PUBLICATION OF NOTICE

Notice may be taken that a petition has been presented to the Hon'ble National Company Law Tribunal, Mumbai Bench ("Hon'ble Tribunal"), on 23rd day of July, 2026, by Balkrishna Paper Mills Limited ("Company"), having its registered office at A/7, Trade World, Kamala City, Senapati Bapat Marg, Lower Parel (West), Mumbai - 400 013, Maharashtra, India, for confirming the reduction of share capital of the Company in the following manner -

(a) Accumulated losses to the extent of Rs. 52,28,37,029/- (Rupees Fifty-Two Crores Twenty-Eight Lakhs Thirty-Seven Thousand and Twenty-Nine Only) outstanding as on 30th September 2025, will be first adjusted against the Securities Premium Reserve amounting to Rs. 23,28,61,241/- (Rupees Twenty-Three Crores Twenty-Eight Lakhs Sixty-One Thousand Two Hundred and Forty-One Only) and the remaining balance of the accumulated losses will be adjusted by reducing the issued, subscribed and paid-up equity share capital of the Company from Rs. 32,21,95,320/- (Rupees Thirty-Two Crore Twenty-One Lakh Ninety-Five Thousand Three Hundred Twenty Only) divided into 3,22,19,532 (Three Crore Twenty-Two Lakh Nineteen Thousand Five Hundred and Thirty-Two Only) Equity Shares of Rs. 10/- (Rupees Ten Only) each to Rs. 3,22,19,532/- (Rupees Three Crore Twenty-Two Lakh Nineteen Thousand Five Hundred and Thirty-Two Only) divided into 3,22,19,532 (Three Crore Twenty-Two Lakh Nineteen Thousand Five Hundred and Thirty-Two Only) Equity Shares with face value of Re. 1/- (Rupee One Only) each without payment of any consideration to the Equity Shareholders of the Company;

(b) the entire issued, subscribed and paid-up preference capital of the Company of Rs. 1,10,00,00,000 (Rupees One Hundred and Ten Crores Only) divided into 1,10,00,000 6.5% Non-Cumulative Redeemable Preference Shares of Rs. 100/- each fully paid-up, with consideration payable to preference shareholders be discharged as and when funds become available with the Company and until such time, the amount payable shall be treated as unsecured, non-interest bearing loan payable in the books of accounts of the Company.

The Company has received the order of the Hon'ble National Company Law Tribunal ("Tribunal") in respect of the hearing held on 14th October, 2026. As per the order uploaded on the NCLT website, the petition has been admitted, and the Company has been directed to comply with the necessary directions given in order by the Hon'ble Tribunal. The notices to individual creditors of the Company have been issued in Form No. RSC-3 pursuant to the directions of the Hon'ble Tribunal.

The list of creditors of the Company as on 29th day of June, 2026 as filed by the Petitioner Company before the Hon'ble Tribunal, is available for inspection at the registered office of the Company situated at A/7, Trade World, Kamala City, Senapati Bapat Marg, Lower Parel (West), Mumbai - 400 013, Maharashtra, India, on all working days during business hours, i.e., between 11.00 a.m. and 5.00 p.m., except Saturdays, Sundays and public holidays.

If any creditor of the Company has any objection to the petition or to the details in the list of creditors, the same may be sent, along with supporting documents and details of his/her/its name and address and the name and address of his/her/its authorised representative, if any, to the Petitioner Company at its registered office at A/7, Trade World, Kamala City, Senapati Bapat Marg, Lower Parel (West), Mumbai - 400 013, Maharashtra, India, and shall also be filed with the Hon'ble Tribunal, within three months from the date of publication of this notice.

In case no objection is received within the period indicated hereinabove, the entries in the list of creditors shall, in all proceedings under the above petition for reduction of share capital of the Company, be treated as correct.

It may also be noted that the hearing of the petition has been fixed before the Hon'ble Tribunal on 21st day of January, 2027. In case any creditor intends to attend the hearing, such creditor should make a request in that behalf along with his/her/its objection, if any.

Dated this 16th day of October, 2026.

PUBLIC NOTICE

Public Notice is hereby given on behalf of my client M/s. GBD SMART SPACE LLP, a Limited Liability Partnership having its registered office at 401, Tanishka Commercial Premises Co-operative Housing Society Ltd., Akurli Road, Kandivali (East), Mumbai – 400101.

My client states that **Shri Darshan Co-operative CHS Ltd.** (hereinafter referred to as the "Society") represents itself to be the lawful owner of the immovable property comprising land admeasuring approximately **259.99 square metres, bearing C.S. No. 1993**, situated at **27, Navi Wadi, Dadiseth Agiary Lane, Chira Bazar, Bhuleshwar Division, Mumbai – 400002**, Mumbai City District, within the limits of the Municipal Corporation of Greater Mumbai, together with the building, structures, common areas and all appurtenances standing thereon (hereinafter referred to as the "said Property"), as more particularly described in the Schedule hereunder written.

The Society has expressed its willingness to undertake redevelopment of the said Property through my client, **M/s. GBD SMART SPACE LLP**, pursuant to a Memorandum of Understanding (MOU) and a Development Agreement proposed to be executed between the parties, subject to verification of title, requisite approvals and compliance with applicable laws.

Any person or persons, including heirs, legal representatives, banks, financial institutions, bodies corporate, government or local authorities, or any other entity having or claiming any right, title, interest, or claim of whatsoever nature in respect of the said Property or any part thereof, whether by way of inheritance, succession, sale, agreement, mortgage, charge, lease, lien, license, gift, possession, or otherwise, are hereby required to submit their claims in writing along with supporting documentary evidence to the undersigned within 15 (fifteen) days from the date of publication of this notice.

Failing which, the proposed sale transaction in favour of M/s. GBD SMART SPACE LLP shall be proceeded with without any reference to such claims, if any, and such claims shall be deemed to have been waived and/or abandoned and shall not be binding upon my client.

SCHEDULE OF THE PROPERTY

All that piece and parcel of immovable property being land bearing **259.99 square metres, bearing C.S. No. 1993**, situated at **27, Navi Wadi, Dadiseth Agiary Lane, Chira Bazar, Bhuleshwar Division, Mumbai – 400002**, Mumbai City District, within the limits of the Municipal Corporation of Greater Mumbai and within the jurisdiction of the concerned Sub-Registrar, Mumbai, Maharashtra, together with all residential and commercial structures standing thereon.

PUBLIC NOTICE

Public at large is hereby informed that I am investigating the title in respect of property being Flat No.101, First Floor, Wing A2-09, in the housing complex known as 'Flower Valley', situated on land bearing Survey No.14, Hissa No.1, 2, 4, 5, 6, 7, Survey No. 80, Hissa No.1(P), 2(P), 4(P), 5, 6, 7, 9(P), 10A, 10B, 10C, 10D, 10E, 11, 12, 13, 14, 15, Survey No.81, Hissa No. 3(P), 5(P), 6(P), 7, Survey No.87(P), Survey No. 88, Hissa No. 5, at Village Panchpakhadi, Eastern Express Highway, Thane (West) 400601. Mrs Meena Ashok Juriani has represented to me that the above mentioned Flat is jointly owned by her and her husband, Shri Ashok Ambratlal Juriani who has expired on 7th November 2011. Mrs Meena Ashok Juriani has further represented to me that Mr Abhishek Ashok Juriani the only other legal heir of Late Shri Ashok Ambratlal Juriani has released all his rights in the said Flat in her favour and she is the sole and absolute owner of the said Flat.

If any person/s, bank/s, financial institution/s, authority, has/have any claim, right, title or interest of any nature whatsoever in the above said Flat shall raise their objections in writing with proper evidence, within 15 days from the date of this notice at A-70, Sri Guru Nanak CHS Ltd., Kopri Colony, Thane (East) 400603, otherwise such claim will be considered as waived and no claims shall be entertained thereafter.

Anil S Shamdasani
Advocate
Date: 17-10-2026 Place: Thane

PUBLIC NOTICE

NOTICE is hereby given to the public that my Client Mr. Vithhal Jivraj Ghodake, purchased the said Flat No. A/301, 3rd Floor, Shreedwarkesh 1 Co-operative Housing Society Ltd., Pawan Nagar, Shukla Compound, Shiv Vallabh Road, Dahisar (East), Mumbai – 400068 (hereinafter referred to as the "said Flat"), from Mr. Santanu Tapan Medda, owner of the said Flat. However, the original documents relating to the said Flat have been lost. Certified copies of the same have been obtained from the Sub-Registrar.

The undersigned Advocate hereby invites claims or objections from any claimant(s) or objector(s) in respect of the transfer of right, interest or title in the said Flat, within 14 (fourteen) days from publication of this notice, together with copies of documentary proof supporting such claim or objection. If no claims or objections are received within the aforesaid period, the transaction will be completed and it will be presumed that there are no such claims or objections, and any such claims or objections raised thereafter may be treated as waived or abandoned, subject to applicable law. My Client shall thereafter be at liberty to proceed with the name-transfer process in the said Society.

Humble feni's second coming

Goans are making a spirited bid to transform their traditional drink into the next tequila. They need a leg-up

RUCHIKA CHITRAVANSHI
Panaji, 16 October

After six years of experimenting, Hansel Vaz, known in Goa as the Feni Doutor (Portuguese for feni doctor), stood before an eclectic mix of 13 spirits experts — from international bartenders and writers to distillers and distributors — at the ballroom of a boutique hotel in Benaulim this June. He held his breath.

In his hand was a Garrafao — a potbellied glass bottle — that had been resting underwater in a fresh water pond in a village in South Goa since June 2023. This was the second time Vaz had "let the feni meditate" underwater for three years to ensure he gets the same results.

As he opened the cork and poured the drink into the glass, Vaz could sense almost immediately he was on to something special.

"It was the most incredible liquor I had ever tasted. The process doesn't alter the colour, it remains colourless, but is deceptively smooth. The heat had settled, the cashew no longer rushed forward. It's almost as if it waits, revealing itself slowly on the tongue," Vaz said.

"Everyone had heard of feni being kept underwater. I collected these stories and pieced them together to rest the feni for three years. India has never done anything like this for any of its indigenous spirits. We believe the greatest opportunity is still ahead of us."

Feni is a Goan alcoholic drink that dates back to the time the Portuguese introduced cashew along the Malabar Coast in the 16th century. It comes in two varieties — cashew feni, made from the fermented juice of ripe cashew apples, and coconut feni, which uses fermented toddy (sap) tapped from coconut palm trees.

Woven into the Goan social and religious fabric, feni has often been likened to other regional spirits such as Mezcal in Mexico, Sake in Japan, and Arrack in Southeast Asia.

But with its distinctive strong flavour and aroma, it has always been more of a local favourite than a fixture at tables of luxury restaurants. Now, however, it's attracting increasing interest, with more experimentation, newer brands and global recognition, thanks to a small bunch of Goan dreamers.

Vaz's own creation — Dukshiri, coconut feni infused with Indian sarsaparilla root — took the silver medal in the alcohol and spirits section of the Concours Mondial de Bruxelles last year.

Vaz and other Goan feni makers' big dream now is to do with feni what Europe did with Scotch whisky and Mexico with Tequila.

These innovators have their work cut out. Even within Goa, feni's share in the liquor market is small, growing from around 1.5-2 per cent in 2022 to 5-7 per cent currently, according to industry estimates. The total number of licences given to bottlers of feni has increased from only 19 in 2007 to 49 as of January 31, 2026, according to excise department data.

"The average experience of feni is a drink that throws one off because of the quality available. But, if brewed by a master distiller, it is equivalent to Mezcal or Tequila," said Keshav Prakash, an international spirits expert.

"Feni is one of the few indigenous spirits of India. The pieces are there, it has to be put into action," Prakash said, giving the examples of the wine-growing Cognac region of France and the Mexican Association of Tequila, which he said were highly organised and received strong government support.

FENI HAS STARTED MAKING INROADS INTO FOREIGN MARKETS. SEVERAL BRANDS ARE BEING EXPORTED TO THE UK, CANADA, AUSTRALIA, TAIWAN AND JAPAN

Shedding the old

Feni received a geographical indicator (GI) tag back in February 2009 but only one brand — Ozzo Feni made by Cazcar Distillery — has got the tag so far. Industry players say that the local distillers do not want to open themselves to the level of regulatory scrutiny required to get a GI tag as distilling processes differ from village to village.

The recent UK free trade agreement included feni as a zero duty product, but, without GI certification not many can use this benefit yet.

None of this has deterred new entrants from experimenting with aging, infusing flavours to feni and getting them on the bar shelves.

For instance, Karun Sanghi, an industrial engineer who entered the feni business during the Covid years, decided to experiment with aging feni in oak barrels. After three years of aging, Sanghi entered his spirit — branded Sentari – in the London Spirits contest and won the gold two years in a row in 2025 and 2026.

"A lot of people have baggage about feni. But I have seen people go from 'I don't drink feni' to saying 'it's really quite amazing'."

Yash Sawardekar, cofounder of the award-winning Goenchi feni brand, has had a similar journey. Feni, for him, became a way to connect to his roots in Goa after the pandemic.

"Tequila and gin have become global. Feni was known more as country liquor, which gave it a very downgraded vibe," he said.

Going back to his ancestral farms, Sawardekar followed the traditional ways, but also brought something new to the table.

His unique process involves fermenting the cashew juice naturally without any yeast or chemicals and then putting it into copper cauldrons sealed with ant-hill mud, which does not crack in high temperatures. He has also debuted a Kokum-infused feni, and is now experimenting with a mango blend.

Helpfully, Goa's feni policy was revised in September 2026 to recognise blended or infused feni.

"Alcohol is such a taboo topic in India. We don't take pride in our spirits... The feni industry has to unite if we want to take the spirit to the next level," Sawardekar said.

Revival bid

Goa's feni enthusiasts have a long way to go. The feni industry has seen a decline in the number of distilleries as well as master distillers over decades. The number of licensed distilleries fell from 3,991 in 1996 to 2,703 in 2008. Current numbers are thought to be less than 1,000.

"Competition from very large industrial producers puts the overall value proposition for high-quality feni in a tough spot. Consumers are likely to be very confused between a ₹300 and a ₹1,600 bottle. It's hard work, and not many in the next generation are taking the legacy forward as a heritage craft," Prakash said.

The Goa Forest Development Corporation began inviting bids for auctioning cashew nuts and cashew apples on October 15 in a process set to run until November 4. The bids covering over 300 cashew estates, will be crucial for feni makers for whom the supply of Goan cashew apples — known for their natural ripeness — is key to making the authentic spirit.

But the local yield has been unreliable due to poor monsoons and climate change, making way for cashew apples to be brought in from other states. At the same time, government policies and taxation have made it difficult for feni to cross state borders — entry taxes make supplying to other states expensive.

On a positive note, though, the Feni Distillers and Bottlers Association got the liquor removed from the "other spirits" section in 2019 and established its own definition and category under the Food and Drug Administration regulations, just like foreign liquor.

Need for promotion, mindset change

Experts say the government needs to do a lot more to promote feni. "We need to protect master distillers and support them in a difficult year. Make feni the destination drink of Goa. Change the mindset and give a highly palatable product. Tourists today are experimental — ride on that wave," Prakash said.

Feni makers point to a missed opportunity — they were unable to showcase their products at a high-profile platform like the G20 summit in 2023.

A senior official in the state's tourism department said the government has to be "cautious" about promoting products like tobacco and alcohol. On whether feni could become the next Tequila without the kind of government support that regions like Champagne and Cognac enjoy, the official said: "For these countries, alcohol is part of the culture. We promote feni on all our international tours but we cannot come across as asking people to consume alcohol — we take a very balanced approach."

To be sure, Goa, too, is well known for its wide acceptance of alcohol consumption.

Feni, however, has started making inroads into foreign markets. Several brands are currently being exported to the UK, Canada, Australia, Taiwan and Japan. Industry players have seen interest from New Zealand and Thailand, too.

"Export is a low hanging fruit. We need to sell feni not as a commodity but tell it as a story, category. Our belief is that feni's long-term strength lies in its value: distinctive ingredients, small-batch craftsmanship, generations of knowledge and a specific geographical identity. For much of the world, it also offers the excitement of discovering a spirit and a tradition they barely know," Vaz said.

India says cheese

EYE CULTURE

KUMAR ABISHEK

There are gifts for the president of Switzerland other than cheese. Still, when Prime Minister Narendra Modi gave Guy Parmelin three award winning cheeses in New Delhi on October 5, the gift sent a quiet message. Gulmarg, Konark and Yeoor, made by Mumbai's Eleftheria Cheese, had won medals overseas, two in Bern, the capital of Gruyère and Emmental country. India appeared to have something to share on the cheeseboard.

Gulmarg is a Brie-style, heart-shaped cheese with a snowy, velvety rind, aged for two-three weeks. Konark is a tomme shaped like the chariot wheel of Odisha's Sun Temple; and Yeoor, a rose-rind mountain cheese aged for eight-nine months in the Gruyère tradition. For a country that's famous overseas for paneer in curries and sliced cheese on burgers, the gift was a small revelation. India's cheese story, however, began long before its new cheesemakers.

Dairy traces in Harappan pottery from Kotada Bhadli, Gujarat, show that people processed milk about 4,500 years ago. The findings, however, have limits: They show people could handle milk, but that does not mean Harappans made cheese like cheddar. Vedic writings talk about *āmik ā*, a mass made by curdling milk with sour milk, and *vājina*, the whey that remains. The basic principle of cheesemaking was already there, but India took a different path.

Practical reasons mattered — aged cheese needs cellars, but much of the subcontinent is hot and humid. Traditional rennet made from calf stomachs also did not fit well in a culture that reveres cows and has a large vegetarian population. Also, ghee and curd handled preservation and nutrition exceptionally well. Furthermore, in Vedic traditions and broader Indian culture, splitting milk was seen as inauspicious, yet a repertoire of fresh and dried cheeses grew to fill the aged varieties' void.

In Jammu, Gujjar shepherds make *kalari* by curdling milk with whey and drying the rounds so they can be fried in their own fat. In the Himalayas, *chhurpi* is cooked, pressed, and dried until it is hard as rock so it can last years. In Gujarat, Parsi families drain *topli* paneer in wicker baskets. The steps are familiar to cheesemakers everywhere: Warm, curdle, drain, shape and preserve. But the sun and smoke replace the need for a cellar.

Persian and Central Asian influences are often credited with popularising paneer, but the evidence is weak. In Bengal, the popular story credits the Portuguese with introducing acid-curdling, giving rise to *chhena* and, eventually, *rasgulla* and *sandesh*. But historians disagree; Bandel, a salty, smoked cheese named after the old Portuguese settlement near Hooghly, is a more tangible legacy. Around Kalimpong, Swiss missionaries left a modest Gouda-like tradition. India had plenty of cheese, but its many styles never came together in one national market.

Then came the White Revolution: Operation Flood in the 1970s — led by Verghese Kurien and dairy cooperatives — turned India into a milk leader. Amul first brought cheese to the masses. Britannia and Mother Dairy followed. For years, cheese came in a tin, a packet, or as a slice, made to melt and last long. Pizza shops brought mozzarella to homes in the mid 1990s, but handmade, aged cheese stayed a niche pursuit.

Making cheese is exacting: Starter cultures turn milk sugar into lactic acid; rennet sets the milk; and cut curds release whey before stirring, heating, draining and salting determine the texture. Some cheeses are eaten fresh; others age for months, with temperature and humidity shaping their rind and taste. In India's heat, a good cold chain is needed to transform an experiment to a viable product.

The serious artisanal shift started 15 years ago, in small kitchens and creameries. Some people who returned from abroad missed the cheeses they had tasted, and social entrepreneurs saw a chance to make money from pastoral milk. A Kashmir business that began with western styles went on to champion *kalari*. In Rajasthan, an enterprise working with the Raika community turns camel milk into feta and cream cheese. A Chennai creamery buys milk from herders and helps build the supply chain.

These makers are translating, not copying, the western varieties. One Chennai cheesemaker coats cheddar with *milagai podi*, a South Indian chilli and lentil powder, and recommends grating it over a dosa. A Uttarakhand farm mixes spices into its cheese. A Bengaluru brewpub swaps cream for burrata in butter chicken. With flavours in the mix, borrowed names matter less; Indian milk and tastes can stand on their own.

THESE MAKERS ARE TRANSLATING, NOT COPYING, THE WESTERN VARIETIES. ONE CHENNAI CHEESEMAKER COATS CHEDDAR WITH MILAGAI PODI, A SOUTH INDIAN CHILLI AND LENTIL POWDER

International judges have taken note, too. Eleftheria's Norwegian-style brown whey cheese won India's first World Cheese Awards silver in 2021. Its cloth-bound cheddar, Moony, won gold in 2022. Konark won gold in 2023, and silver in Bern in 2025 (alongside Yeoor), while Gulmarg won Super Gold in Brazil this year. Desi Dairy Dialogue now brings makers, herders and cheesemongers together.

Calling artisanal cheesemaking a revolution would overstate the numbers, as per capita consumption remains low and processed cheese dominates supermarket shelves. The change is quieter: Sun-dried and smoked cheeses now sit alongside factory slices and cellar-aged wheels. A country that began separating curds from whey 4,500 years ago is learning to give cheese time. The three Indian cheeses on the Swiss president's table suggest how far that journey has come.

Apostles who went into the cold

KANIKA DATTA

BOOKS & IDEAS

The infamous Cambridge Five spy ring — Anthony Blunt, Kim Philby, Donald McLean, Guy Burgess and John Cairncross — exerts an enduring mystique in the popular imagination of Britons and Russians of a certain generation. Like contemporary accounts of World War II, their histories are incrementally updated when files are declassified. With *Stalin's Apostles* journalist Antonia Senior has relied on recently released files of the UK National Archives and MI5 on three of them — Kim Philby, John Cairncross and Anthony Blunt — and eastern European and Balkan archives to take the story further.

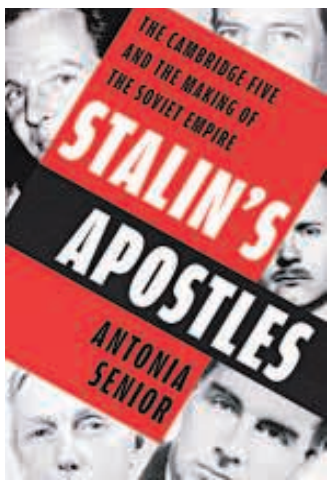
These new archives have spawned several books of varying quality. Robert Verkaik's *The Writer and the Traitor*, takes a speculative look at the links between the writer Graham Greene and Philby, suggesting that Greene knew of Philby's betrayal well before his dramatic defection in 1963. Another is Piers Blofeld's *Master of Lies*, which adds detail to the Blunt betrayal. Senior's book, racily written and well-researched, is the most comprehensive introduction for first-time readers to the subject; for those familiar with the Cambridge Five saga, it adds new facets to the story.

The choice of title is, presumably, a play on the Cambridge Apostles, the "self-consciously academic elite" society that became fertile recruiting for Soviet intelligence in the inter-war years. Although all five attended Cambridge University, a hotbed of fashionable leftist ideals then, only three were members of the Apostles — Blunt, Burgess and Cairncross. One assumes the noun is being deployed in the literal sense; all five Russian moles were assiduously faithful to the brutal dictator of the Soviet Union through his worst excesses.

This unwavering faith is the notable point that emerges from the book. In 1940, when Russia broke contact after the Molotov-Ribbentrop pact, the Apostles found themselves without handlers or demands for intelligence. Yet, all of them worked *suo motu* to find ways to pass on state secrets to Moscow through British Communist Party functionaries. The maverick Burgess even devised a wild plan to travel to Moscow to "chivvy the Soviets into resuming contact".

How could five Englishmen, at least four of them with *pukka* social credentials and all serving in the highest level of the British establishment, betray their country for 16 years, that too without monetary or other rewards? Antonia sets the stage deftly, covering familiar ground of the Russian revolution and the attractions in Europe of communism as a viable alternative to the perceived crisis of capitalism after World War I. Global ideological ructions racialised thousands of young men, but it was the congenital snobbery and insularity of the British ruling establishment that enabled the Cambridge Five — and many others — to flourish as Stalin's moles.

Spy agencies were particularly prone to such weaknesses,



Stalin's Apostles: The Cambridge Five and the Making of the Soviet Empire
by Antonia Senior
Published by Hachette
462 pages ₹1,099

conducting cursory background checks on chaps recommended by other chaps who went to the same public schools and universities and dined at the same London clubs. Senior describes it as "the failure of imagination and the chapocracy method of recruitment".

Kim Philby, from Westminster and Trinity College and one of the Soviet's "greatest ever assets", was an exemplar in this respect. Harold Adrian Russell Philby was the son of a colonial officer, born in Ambala and nicknamed for Rudyard Kipling's famous boy spy. Captivated by communism in Cambridge, he later married an Austrian communist whom he met in Vienna in the thirties and who played an indirect role in his recruitment by the Soviets in 1934 (codename SONNY/STANLEY). Yet, neither his communist links nor his marriage figured in interviews or background checks when he was recruited to MI6 in the 1940s on Burgess' recommendation. He was, after all, the son of the colonial intelligence officer and Arabist St John Philby.

Philby, Burgess (MADCHEN) and Maclean (ORPHAN/HOMER) defected in 1951 when top-secret wartime decrypts pointed to their treachery. Both were in the Foreign Office, the latter based in Washington as UK-US liaison. Philby, suspected of being the Third Man because of his close association with them, deceived the best British interrogators for more than a decade till his dramatic defection from Beirut. Blunt (TONY), Surveyor of the Queen's Pictures, confessed to spying in the 1950s in return for immunity from criminal prosecution before being unmasked by Margaret Thatcher in Parliament in 1979. The "fifth man" was Cairncross (LISZT) who passed on information about early Anglo-US talks on the atomic bomb and British wartime decrypts of German communications from his vantage point in a senior Cabinet minister's office and later in the Government Code and Cipher School at Bletchley Park. He confessed in 1964 but was publicly identified by a Soviet defector in the nineties.

Blunt was offered immunity and Cairncross was allowed to go free provided he stayed abroad because both claimed to have operated as moles only when the Soviets were allies during World War II. Cairncross' self-serving memoir underlines this point. Only Philby made no such claim in his memoir *My Silent War*, written under KGB supervision, suggesting that he continued to spy for the Soviets when the Cold War broke out. But Senior shows how "the Apostles had spied for Stalin when he was Hitler's ally... And now when there was a very real tangible possibility that Stalin would become the West's violent enemy, they still spied for him with dedication and fervour," she writes.

As the Germans advanced into France, for instance, Blunt handed Philby a list of British military intelligence personnel considered politically suspect to give to the Soviets. As early as 1942, information provided by Burgess meant Stalin was well informed of British and American negotiating positions on post-war Europe. That knowledge enabled the Soviet dictator to drive a hard bargain in post-war territorial settlements that brought down the Iron Curtain across Europe.

Senior takes pains to record the human cost of the Apostles' betrayal, not just on families, friends, colleagues and operatives who fell into the hands of the vicious Soviet security apparatus, but also on the people of nations — such as Poland — that wanted no part of the Soviet system. She briskly rejects the temptation to romanticise the Cambridge Five but, like authors before her, does not fathom why they chose to become traitors. Glamour? Excitement? Resentment? Conviction? Perhaps Connie Sachs, the shrewd and eccentric former head of research of the secret service in John Le Carre's classic *Tinker Tailor Soldier Spy*, put it best. "Poor loves," she tells George Smiley, "Trained to Empire, trained to rule the waves. Englishmen could be proud then. All gone. All taken away. Bye-bye world."

5 states on govt radar for new university townships

TN, Assam, Gujarat, Andhra Pradesh, Odisha likely to submit proposals

AUHONA MUKHERJEE
New Delhi, 16 October

Five states — Tamil Nadu, Assam, Gujarat, Andhra Pradesh and Odisha — are being considered by the Centre to establish five university townships announced in the Union Budget 2026-27, according to three people aware of the matter.

And, the states are likely to submit their proposals after the Centre issues guidelines on the framework for the initiative.

The Ministry of Education has held three rounds of consultations on the proposed townships.

The ministry convened an online consultation with the state governments in June, followed by a consultation with Indian higher educational institutions in September.

It was organised by the University Grants Commission (UGC) in collaboration with the ministry. A third online consultation with foreign higher educational institutions and embassies was held later that month, according to officials.

The consultations are at an early stage, with UGC seeking feedback and suggestions from participating stakeholders.

During the consultation with state governments, officials sought clarity on the guidelines and framework for the townships before submitting their proposals.

"In the consultation held with states, the Centre sought feedback from us. The guidelines will be finalised and informed to us by the central government. After that, we have to come up with a proposal. We have requested guidelines from the Centre on the proposed governance structure for these townships, division in finances between the state, Centre and investor, and land requirements. The central government representatives also took stock of the expectations from state governments," said an official from the Andhra Pradesh higher education department.

The road map

- The ministry convened an online consultation with the state governments in June
- Potential sites include Coimbatore, Jagiroad, Dholera and Amaravati
- Odisha is considering Bhubaneswar, Sambalpur and Koraput
- States will participate in the intiative through a challenge-based process
- Central guidelines on governance, financing and land requirements are awaited by states
- The integrated academic zones will house universities, research institutions, skill centres and residential facilities near major industrial, logistics corridors

Officials from the five state governments said they had identified potential locations they were likely to propose to the Centre once the guidelines were issued.

These included Coimbatore in Tamil Nadu, Jagiroad in Assam, Dholera in Gujarat and Amaravati in Andhra Pradesh. Odisha was considering Bhubaneswar, Sambalpur and Koraput for its proposal, according to several state government officials.

The locations have yet to be finalised, with land identification and acquisition expected to take more time, the officials said. The states are expected to finalise and propose sites near major industrial and logistics corridors, in line with the Centre's plan to develop integrated higher education hubs.

"We are going to bid for a township and Odisha is being considered, but final approval has not yet come from the Centre. The chief secretary and chief minister's office are reviewing the initiative regularly. We are considering Bhubaneswar, Sambalpur and Koraput as possible locations. After getting the approval, the government of Odisha will take it forward," said a senior official from Odisha's higher education department.

"We have selected Amaravati as the location we will propose. The townships need to have industry linkages along with strong academic presence and good transport and logistical connectivity. We are using case studies from Germany, South Korea and Chinese models to formulate the proposal. Once we receive guidelines from the Centre, we will finalise and send our proposal," said the Andhra Pradesh official.

Emailed queries to the UGC, Union education ministry, state governments and respective higher education departments of Tamil Nadu, Assam, Gujarat, Andhra Pradesh and Odisha did not elicit a response till the time of going to press time.

Announced in the Budget, the initiative envisages five integrated academic zones near major industrial and logistics corridors, bringing together universities, colleges, research institutions, skill centres and residential facilities.

The Budget did not specify a separate allocation for the five townships. The overall allocation for the Ministry of Education was ₹1,39,289.48 crore for 2026-27, including ₹55,727.22 crore for the Department of Higher Education.

In a written reply to a question in the Lok Sabha on March 9 this year, the Ministry of Education said," five university townships would be developed through a challenge-based process. "With the states participating in the initiative through a challenge-based process, a holistic higher education ecosystem through planned academic zones hosting multiple universities, colleges, research institutions, skill centres and residential complexes is envisaged to be created," the ministry said in its reply in March.

Globally, South Korea and China offer different approaches on how to integrate higher education with research, industry and urban infrastructure.

While South Korea's Daedeok Innopolis in Daejeon brings together research institutions, universities and tech firms, with an emphasis on research and technology commercialisation, the Guangzhou Higher Education Mega Center in China houses multiple university campuses alongside student housing and supporting facilities.

Plea on air fare spikes: Centre informs SC new rules approved

Regulations aim to bring transparency in air fares, related charges

PRESS TRUST OF INDIA
New Delhi, 16 October

The Centre on Friday informed the Supreme Court (SC) that administrative approval has been granted to rules under the the Bharatiya Vayuyan Adhiniyam, 2024, aimed at regulating and controlling India's aviation sector, and is likely to be published in two weeks.

A Bench of Justices Vikram Nath, R Mahadevan and Aparesh Kumar Singh asked Solicitor General (SG) Tushar Mehta to place the published rules under the Act before the court on the next date of hearing.

At the outset, Mehta said, "The rules have been finalised and the administrative approval to the rules has been granted. The same would be published within two weeks." The bench posted the matter for hearing on November 16.

The court was hearing a plea filed by social activist S Laxminarayanan, who has sought a robust and independent regulator that ensures transparency and passenger protection across the civil aviation sector and regulatory guidelines to control the "unpredictable fluctuations" in air fare and ancillary charges imposed by private airlines in India.

Fare play

- The SC directed the Centre to share details of the new aviation rules at the next hearing on November 16
- The court was hearing a plea seeking a robust and independent regulator for passenger protection
- The plea by social activist S Laxminarayanan, has sought regulatory guidelines to control 'unpredictable fluctuations' in air fares
- The plea flagged this with an example of private airlines cutting free check-in baggage allowance for economy-class passengers from 25 kg to 15 kg

On August 17, the Centre told the top court that it has fast-tracked the framing of rules under the At of 2024, which is aimed at modernising India's aviation sector, and it would be finalised within three weeks.

The government placed the draft rules in a sealed cover and said some final discussions are going on.

On November 17 last year, the top court sought responses from the Centre and others on Laxminarayanan's plea seeking a robust and independent regulator that ensures transparency and passenger protection across the civil aviation sector.

The plea claims that all private airlines have, without any credible justification, reduced the free check-in baggage allowance for economy-class passengers from 25 kg to 15 kg, "thereby converting what was earlier part of the ticketed service into a new revenue stream".

Some parts of India facing overlap of floods and droughts: IIT study

ANANYA PODDER
New Delhi, 16 October

Vulnerability to two seemingly contrasting extremes — floods and droughts — has intensified across several parts of India, with an increasing concentration of districts facing multiple and overlapping pressures, according to a study by the Indian Institute of Technology (IIT) Roorkee.

Titled 'From single to compound hazards: How flood and drought vulnerabilities have intensified across India', the study found that a substantial share of districts exhibited heightened susceptibility to the two hydrological extremes.

THE STUDY INDICATED THAT THESE CHANGES ARE NOT UNIFORMLY DISTRIBUTED, BUT A GROWING CLUSTER OF HOTSPOTS WAS OBSERVED ACROSS EASTERN AND NORTHERN INDIA

"By 2011, more than one-fifth of the country's districts were classified as highly vulnerable to floods, while nearly one-fifth showed high vulnerability to drought. The combined assessment further highlights the growing prominence of multi-hazard vulnerability, with more than one in every ten districts positioned towards the higher end of the Multi-Hazard Vulnerability Index (MHVI)," it said.

The MHVI identifies areas where underlying social, demographic and physical vulnerabilities to both extremes are converging.

The research indicated that these changes are not uniformly distributed across India, but a growing concentration of multi-hazard hotspots was observed particularly across eastern and northern India. Odisha, Andhra Pradesh, Maharashtra, Rajasthan, Uttar Pradesh, Jammu & Kashmir, Bihar and Jharkhand showed increases in both flood and drought vulnerability in different districts. UP, Bihar and West Bengal were at the higher end of vulnerability for both hazards.

"Floods and droughts are often treated as separate risks, but their consequences are experienced by communities within the same social and physical systems," said Mohit Mohanty, associate professor at IIT Roorkee, who led the study. Vulnerability to these extremes is changing and, in several regions, increasingly overlapping, he added.
