Oil breaches \$100; stocks, rupee slide

KISHOR KADAM & SAURAV ANAND
Mumbai/New Delhi, September 9

AMIDST ESCALATING HOSTILITIES in West Asia, Brent crude hit the \$100-a-barrel mark on Wednesday, the first time since July 24, roiling the stock markets and weakening the rupee. Spooked by rising oil prices, which have left the Indian crude basket at \$108.91 a barrel, investors chose to take risk off the table. India imports more than three-fourths of its requirement of crude oil.

Benchmark equity indices slumped by about 1% while the rupee lost 27 paise, or 0.29%, against the dollar to close at 95.1012. The Sensex tanked 813.35 points to close at 74,764.23 while the broader Nifty plunged 203.6 points to end the day at 23,431.50. Over the past three sessions, the Sensex and Nifty have fallen 2.29% and 1.95%, respectively, while the rupee has depreciated by 0.65% in just two sessions.

The surge in oil prices will intensify the pressure on oil marketing companies (OMCs) and India's crude import bill as the US-Iran conflict con-

US deal may give India tariff edge

● Architecture for preferential market access in the works, says commerce secy

MUKESH JAGOTA
New Delhi, September 9

THE UNITED STATES may design a tariff architecture that will give India preferential market access vis-à-vis its key competitors under a bilateral trade agreement (BTA) in the works. "There is a requirement that any deal has to give certain kind of preferential access on each other's part. From the Indian side, because we are operating

BTA AROUND THE CORNER

■ India has said repeatedly that competitive tariff advantage for the country's exporters is a must for an interim BTA with the US

■ Despite the delay in a trade deal, India's exports to the US have been growing — April-July shipments increased 3% to **\$34.4 billion**

RAJESH AGRAWAL, COMMERCE SECRETARY

There are a few things which both sides are discussing. Deal will be signed at an appropriate time

on MFN (most favoured nation) tariffs, it is easier to do so. From their (US) side, they are operating on executive tariffs. So they are building an architecture which will create those differentials and create a preferential

market access," Commerce Secretary Rajesh Agrawal said. Though New Delhi has stated multiple times in recent weeks that competitive tariff advantage for the country's exporters was a must for clinch-

ing an interim BTA with the US, this is the first time a senior government functionary has indicated that Washington is indeed working on this.

NSE eyes listing before Sept 25, may trim issue

KUSHAN SHAH
Mumbai, September 9

THE NATIONAL STOCK Exchange (NSE) could make its stock market debut before September 25. The exchange is believed to have filed its updated draft red herring prospectus late Wednesday.

The initial public offering (IPO) could be launched as early as next week, with the listing likely to follow before September 25, a source close to the development said. NSE MD and CEO Ashish Chauhan also hinted that the listing may be just weeks away while speaking to reporters on the sidelines of

the Global Fintech Fest 2026.

The listing could pave the way for further stake sales by existing shareholders. Some individual shareholders who are not participating in the offer for sale (OFS) may look to offload shares in the secondary market after the IPO, potentially capitalising on any listing gains, the source said.

According to a Bloomberg report, NSE has lowered the price range and may shrink the stake on sale, leaving the deal poised to fall short of becoming India's biggest-ever listing.

US freezes Cognizant filings for green cards

FE BUREAU
Bengaluru, September 9

THE US HAS suspended fresh programme electronic review management (PERM) filings by IT services major Cognizant amid an investigation into alleged fraud and abuse of the country's worker immigration programme, putting the company's green-card sponsorship practices under scrutiny.

Anthony D'Esposito, inspector general at the department of labour, announced the action on Tuesday night on X, saying green-card applications for Cognizant and cloud software company Cloudera had been

suspended. The development could have wider implications for the technology sector. D'Esposito suggested that the investigation could expand to other IT services companies and Big Tech firms that rely heavily on Indian-origin employees through the H-1B visa programme.

PERM is a mandatory labour-certification process for most employment-based green-card applications. Under it, an employer has to demonstrate that there are no qualified and available American workers for the position being offered to a foreign worker.

ECONOMY DOING WELL, TO REGAIN ITS MOJO: LAHIRI

NITI AAYOG VICE CHAIRMAN Ashok Kumar Lahiri on

Wednesday said the Indian economy has been doing reasonably well and that Asia's third-largest economy will regain its mojo and return to a current account surplus soon. Lahiri further said the major challenge the Indian economy faces is the low share of manufacturing in India's overall GDP. "The Indian economy has been doing reasonably well. I will never say very well because I am a reformist," he said at the Global Fintech Fest 2026. India's economy grew at a faster-than-expected 7.8% in the April-June quarter, showing resilience despite concerns that the war in Iran and resulting global uncertainty could weigh on domestic economic momentum.

OIL MARKETING COMPANIES' FUEL LOSSES WIDEN

No imminent hike in pump prices despite crude spike

● Price revision only if Indian basket sustains well above \$110 per barrel

SAURAV ANAND
New Delhi, September 9

AS BRENT CRUDE breached the \$100-a-barrel mark on Wednesday for the first time since July 24, while the Indian crude basket climbed to \$108.91/bbl on September 8, intensifying pressure on oil marketing companies (OMCs) and India's crude import bill as the US-Iran conflict continues to disrupt West Asian supplies.

However, official sources indicated that another retail petrol and diesel price revision may depend on crude sustaining above current levels. "Historically, retail fuel price revisions have occurred when the Indian crude basket averaged around \$106/bbl. Therefore, unless crude prices sustain levels well above \$110/bbl, a further increase in retail fuel prices appears unlikely," Pankaj Srivastava of Rystad Energy told FE.

The last retail fuel price revision was on May 25, when state-run OMCs raised petrol and diesel prices, taking cumulative increases since May 15 to around ₹7.5/litre. Since then, prices have remained

OIL PRESSURE

■ Brent tops **\$100 a barrel** as the US-Iran conflict disrupts West Asian supplies

■ Indian crude basket hits **\$108.91 a barrel, up 13.2%** from August

■ Petrol marketing margins turn negative **₹5/litre**, while diesel losses widen to **₹23**

unchanged, with petrol at ₹102.12/litre and diesel at ₹95.20/litre in Delhi.

The Indian crude basket has averaged \$102.11/bbl so far in September, up 13.2% from \$90.19/bbl in August. Brent futures rose as high as \$100.19/bbl and were trading at \$99.93, up \$2.01, or 2.05%, while WTI gained \$1.49, or 1.6%, to \$94.52. Brent has risen about 25% since early August.

"With escalation in hostilities between Iran and the US, Brent prices have crossed the \$100/barrel mark today and the Indian crude basket is at around \$109/barrel. At the average price for the month of September till date, marketing margins on petrol are negative ₹5/litre and diesel at negative ₹23/litre and under-recoveries

on domestic LPG are at ₹200/cylinder," said Prashant Vasisht, senior vice president and co-group head, Corporate Ratings, Icra.

Srivastava said every \$10/bbl increase in crude prices adds roughly \$42 million a day to India's import costs, or around \$12-15 billion annually. India's crude import bill has already risen sharply. The country spent \$63.37 billion in the first four months of FY27, up about 56% from \$40.55 billion in the corresponding period of FY26.

The latest crude spike also compounds pressure on state-run OMCs.

Equirus data for the week ended September 4 showed petrol marketing margins worsening to negative ₹4.2/litre

from negative ₹2/litre a week earlier. Diesel marketing margins remained at negative ₹24.9/litre, against negative ₹24.8/litre. Integrated margins, including refining, stood at ₹12/litre for petrol and ₹18.2/litre for diesel.

IOC, BPCL and HPCL entered the current quarter with stretched finances. Their aggregate standalone debt rose 37% quarter-on-quarter to ₹2.3 lakh crore in Q1FY27, while combined Ebitda swung to negative ₹25,800 crore from positive ₹32,300 crore in Q4FY26, a deterioration of ₹58,100 crore.

PPAC data show the Indian crude basket averaged \$114.48/bbl in April, \$106.23 in May, \$83.22 in June, \$82.04 in July and \$90.19 in August.

■ Every **\$10 rise** in crude adds about **\$42 mn** a day to India's import costs

■ India's crude import bill surged **56%** to **\$63.37 bn** in the first four months of FY27

■ IndianOil, BPCL and HPCL debt climbed 37% sequentially to **₹2.3 lakh cr**

Food inflation likely to rise further amid steep prices

● Onion, sugar, rice, mustard oil costlier on year

SANDIP DAS
New Delhi, September 9

RETAIL PRICES OF key agricultural commodities including rice, sugar, mustard oil and onion are ruling at significantly higher levels compared to the previous year, according to the price monitoring cell of the Department of Consumer Affairs. Rise in prices of these commodities is attributed to declining production and higher global prices.

The elevated prices of these commodities is likely to push food inflation further in the coming months. Retail onion prices rose to ₹52.66/kg on Wednesday, up 90% from a year earlier. Retail prices have risen by more than 50% over the past month, while prices in Delhi-NCR have crossed ₹60 per kg.

However, trade sources attributed the price rise to reports of a 5%-7% decline in kharif onion output in Maharashtra, the country's largest

ELEVATED COSTS

onion-producing state, due to lower acreage and delayed monsoon rains. To curb the price rise, the government has started to offload onion at the subsidised rate of ₹35/kg from its buffer while sources said that prices are likely to rise until the end of October, until the arrivals of the kharif harvest.

The retail prices of rice and mustard oils increased to ₹46.23/kg and ₹202.14/kg on Wednesday, a 7% increase over

the previous year. An official said the government currently holds close to 40 million tonne (MT) of rice stock against a buffer requirement of 10.25 MT for October 1; this stock would be offloaded under the open market sale scheme to curb the price rise. The prices of wheat, chana (gram) dal, potato, and tomato as of Wednesday have declined or witnessed only a marginal year-on-year increase due to ample supplies.

CPSEs achieve 40% of FY27 capex target in April-August

PRASANTA SAHU
New Delhi, September 9

CENTRAL PUBLIC SECTOR enterprises (CPSEs) and other major government agencies, including the Railway Board and the National Highways Authority of India (NHAI), achieved aggregate capex of ₹3.36 lakh crore, or 40% of the annual capex target, in the first five months of FY27.

However, the entities' monthly capex growth moderated to around 5% in August, compared with robust growth of 35% in July, largely due to the impact of monsoon rains.

These state-run entities, with an annual capex target of ₹100 crore and above, invested ₹3.36 lakh crore in April-August of FY27, 23.5% more than the ₹2.72 lakh crore invested in April-August of FY26. The capex achievement by these entities 36.5% of the FY26 target.

In whole of FY26, these state-run entities invested ₹8.64 lakh crore, reaching 110% of their ₹ 7.85 lakh crore target. The target is ₹ 8.43 lakh crore for the current financial year.

Monthly data show that these entities reported their sharpest increase in April, when capex jumped 62.9% year-on-year to ₹81,108 crore, followed by a 35.2% rise in July to ₹72,218 crore. Growth moderated to 15% in May, while June and August recorded more modest

IN NUMBERS

increases of 4.9% and 4.8%, respectively.

The Railway Board and NHAI are the biggest investors. For context, FY27 capex for the Railways and NHAI is estimated at ₹4.52 lakh crore, equivalent to 54% of the total capex target for state-run agencies in FY27. These two entities are almost fully funded through the Union Budget and account for 37% of the Centre's overall FY27 capex estimate of ₹12.2 lakh crore.

LARSEN & TOUBRO'S HYDRO-CARBON arm has secured a ₹2,500-5,000 crore offshore order from ONGC for the additional development of the Ratna-I (ADR-I) and NLM-14 projects off India's west coast, as the state-run explorer steps up investment in established offshore assets to enhance production.

L&T Energy Hydrocarbon Offshore (LTEH Offshore) will undertake engineering, procurement, construction, installation and commissioning of 3 new well-head platforms, a riser platform, multiple subsea pipeline and cable segments, along with modifications to existing offshore facilities. The projects are aimed at enhancing production and supporting continued development of ONGC's offshore assets in the region.

L&T classifies orders valued between ₹2,500 crore and ₹5,000 crore as "large", indicating the value range of the latest contract. "The ADR-I and NLM-14 developments are significant additions to India's offshore energy infrastructure and demonstrate the continued investment in enhancing production from established offshore assets," said Parthasarathi Chatterjee, senior vice-president and head, L&T Energy Hydrocarbon Offshore.

He said the projects combine new offshore facilities with brownfield modifications in operating fields.

Freight corridors run at 90%-plus capacity; traffic jumps 15% in a year

MANU KAUSHIK
New Delhi, September 9

FREIGHT MOVEMENT ON the dedicated freight corridors (DFCs) has increased nearly 15% over the past year with combined traffic reaching 438 trains a day in August. This means the two corridors—eastern and western—are now operating at over 91% of their stated capacity of 480 trains a day.

The official data shows that the Western Dedicated Freight Corridor (WDFC), which the Prime Minister, Narendra Modi, inaugurated on Tuesday, alone recorded a monthly record of 210.4 trains a day, or nearly 88% of its stated 240-train daily capacity, even before its full commissioning.

The opening of the New Saphale-Jawaharlar Nehru Port Authority (JNPA) section by the PM will allow freight to move directly between Dadri and JNPA, instead of being transferred to the Western Railway network for the final leg. This is expected to reduce transit time and improve the reliability of freight movement on the corridor. Earlier, freight moving on the WDFC had to be offloaded at terminals such as New Sanjali and Palanpur and then carried

by the conventional railway network to JNPT. "With the final leg now operational, freight movement on the corridor is expected to become faster since there will be fewer handling points and lower transit time. We expect this to improve the efficiency of container movement and allow the corridor to handle even higher freight volumes," a senior official told FE.

Despite the recent rise in traffic, the corridors are already operating close to their stated capacity. For instance, WDFC handled 210.4 trains a day in August (87.7% of stated capacity), while EDFC recorded 227.6 trains a day (94.8% of stated capacity).

The official said that the capacity constraint does not necessarily mean freight volumes cannot rise further. That's because the use of long-haul and double-stack trains, particularly on WDFC, can increase the amount of cargo moved per train without requiring a proportional increase in train movements. Train movement on the two corridors rose nearly 13% year-on-year to an average 435.5 trains a day during April-August 2026, from around 385.5 trains a day in the corresponding period last year.

Cabinet approves ₹20,800-cr rail projects across nine states

THE CABINET ON Wednesday approved eight railway multimarketing projects worth ₹20,804 crore across 31 districts in nine states, adding around 1,196 km to the rail network. The projects, targeted for completion by FY30, are aimed at expanding rail capacity, easing congestion and facilitating

higher freight movement.

Of the total, three projects worth ₹10,783 crore will add around 656 km of tracks across 14 districts in five states. The projects will improve rail connectivity to around 6,911 villages with a combined population of nearly 11 million.

West Asia on boil again, BRICS sherpas work to bridge divide within

● Delhi braces for summit with Iran, Saudi Arabia, and the UAE at table

SHUBHAJIT ROY
New Delhi, September 9

WITH THE WAR in West Asia flaring up following the exchange of strikes between the US and Iran, the BRICS Sherpas, the most senior negotiators from the 11 member countries of the grouping, are burning the midnight oil to try and hammer out a joint declaration

for the New Delhi summit of the leaders on September 12-13. The key point of discord, it is learnt, is the formulation over the war in West Asia given that Iran, the UAE and Saudi Arabia are expected to be at the summit table.

While Russian President Vladimir Putin's attendance has been confirmed, officials are also preparing for the participation of Chinese President Xi Jinping, Iranian President Masoud Pezeshkian, South African President Cyril Ramaphosa and Indonesian President Prabowo Subianto. Brazil's President Lula is not going to be at this gathering since he attended the AI summit in New Delhi in February this year, and will send a top government representative.

With the UAE and Iran, new members of the BRICS since 2024, part of the negotiations, Indian officials, along with the

A view of the national flags of countries participating in the 18th BRICS Summit hoisted outside the Bharat Mandapam, in New Delhi on Wednesday

Russians, Brazilians and Egyptians, are working to bridge the gap between the warring parties. Ever since the start of the war on February 28 when the US and Israel attacked Iran, Tehran

has targeted US bases in the Gulf region including in the UAE. This has put the Emiratis and the Iranians at loggerheads over the last six months. Sources said that Indian

officials are trying to hold separate meetings with officials of the UAE and Iran, and bring them on the same page for the Delhi declaration. In May this year, when foreign ministers of

the BRICS met in New Delhi, Russia's Sergey Lavrov told the UAE and Iranian ministers to hold direct talks.

"We would like to have a BRICS' Delhi declaration, which is a consensus document, in all the paragraphs. Efforts are underway to achieve that outcome. We are optimistic that we can accomplish that," a senior Indian official said.

In May, India was unable to bridge the diplomatic gap within the BRICS and could not come up with a joint statement after the two-day meeting of the Foreign Ministers.

Instead, Delhi had issued a chair statement and an outcome document trying to reflect the divergences between Iran and the UAE over the war. The statement had underlined "differing views among some members" over the West Asia situation, and BRICS members had expressed their "respective

national positions".

With the crisis in the key Strait of Hormuz affecting economies and sending energy prices soaring, Delhi is keen that it reflects in the joint declaration after arriving at a common position and language.

Officials in Delhi are confident that the summit agenda is robust, dealing with the burning issues of the time – from food security to climate change, energy security to economic impact.

According to the Ministry of External Affairs (MEA), the summit will begin on Saturday with a closed-door session for BRICS member countries themed 'Inclusive Global Governance and Strengthening Multilateralism'.

Following the session, leaders will tour the 'Bharat Innovates Exhibition', assemble for a family photo, followed by a joint tree-planting ceremony.

The first day's engagements will conclude with a dinner hosted by Prime Minister Narendra Modi.

On Sunday, leaders from BRICS member states, partner nations and outreach invitees will gather for the open session, titled 'Resilience, Innovation, Cooperation and Sustainability: Shaping the Future for Inclusive Global Future'.

According to officials, India's BRICS chairship is guided by the theme 'Building for Resilience, Innovation, Cooperation and Sustainability', reflecting its vision of a people-centric approach rooted in the spirit of "humanity first".

In addition to these areas, leaders will exchange views on strengthening intra-BRICS cooperation on common priorities and share perspectives on global and regional matters of mutual importance.

Govt orders removal of websites, apps of 15 crypto platforms

FE BUREAU
New Delhi, September 9

THE GOVERNMENT HAS ordered the removal of websites and application of 15 virtual digital asset service-providers (VDA SPs) for non-compliance with anti-money laundering rules, the finance ministry said on Wednesday.

The financial intelligence unit-India (FIU-IND) ordered the action against Weex, Blofin, Rezorex, Bitunix, DigiFinex, Toobit, XT.com, Latoken, WOO X, Pionex, ChangeNow, SimpleSwap, Fixedfloat, WhiteBIT and Guardian.

The director, FIU-IND, issued notices for the takedown of application/URLs of the said VDA SPs for public access as they were found to be "operating illegally" without complying with the relevant provisions of the Prevention of Money Laundering Act (PML) Act, 2002.

"The VDA SPs operating in India (whether offshore or onshore) and engaged in activities like exchange between virtual digital assets and fiat currencies, transfer of virtual digital assets, safekeeping or administration of virtual digital assets or instruments enabling control over virtual digital assets etc. are required to be registered with FIU-IND as Reporting Entity and comply with the set of obligations as mandated under Prevention of Money Laundering Act, 2002 (PMLA) and Rules

DIGITAL CRACKDOWN

■ All 15 providers allegedly operated without mandatory PMLA compliance and registration

■ XT.com, Latoken, WOO X, Pionex and ChangeNow also face takedowns

■ VDA platforms must register with FIU-IND as reporting entities operating India

■ RBI has repeatedly warned about cryptocurrencies

framed there under," the ministry said in a release.

"These obligations are activity-based and are not contingent on physical presence of the entity in India. The regulation casts reporting, record keeping, and other obligations on the VDA SPs under the PML Act which also includes registration with the FIU-IND."

Crypto products and Non-Fungible Tokens (NFTs) are unregulated and can be highly risky, the ministry said. "There may be no regulatory recourse for any loss from such transactions."

The government and the Reserve Bank of India (RBI) have repeatedly warned about risks related to cryptocurrencies. Reports earlier this year had said that the government and the RBI prefer tighter curbs on virtual digital assets even in the

absence of a formal policy to ban or regulate such assets. The RBI is in favour of a cryptocurrency policy leaning towards prohibition, a media report had said in July.

In January, Chief Economic Adviser V Anantha Nageswaran had said that the government and RBI's views on cryptocurrencies are aligned.

The RBI has previously cautioned against the popularity of stablecoins, saying these assets raise concern for both monetary policy and financial stability in emerging market developing economies like India. The central bank has also said that crypto should not be legalised in the country.

The government and the RBI have repeatedly pitched that the central bank digital currency (CBDC) as a superior alternative to cryptocurrencies.

Cement majors line up ₹13K-cr green power push

SAURAV ANAND
New Delhi, September 9

INDIA'S LEADING CEMENT companies are set to raise their green power capacity by nearly 50% to 5.8-6 GW by March 2028, from around 4 GW in March 2026, backed by planned investments of ₹12,000-13,000 crore over the next two years.

The additional capacity could generate annual savings of ₹6,200-6,700 crore, translating into a payback period of just 1.8-2.2 years, as cement makers increasingly turn to renewable power to lower energy costs and reduce exposure to fuel-price volatility.

Every 5% increase in green power replacement can reduce power and fuel costs by ₹15-16 per tonne, while a 25% replacement could lower costs by ₹75-80 per tonne and expand operating margins by 140-160 basis points, according to Icra.

"The highly energy-intensive nature of cement manufacturing, coupled with persistent fuel price volatility and supply-side risks, is driving the sector's transition towards green power," said Anupama Reddy, vice president and group head, corporate ratings, Icra.

Icra's sample comprises UltraTech Cement, Shree Cement, ACC, Ambuja Cements, Birla Corporation, Dalmia Bharat and Ramco Cements, which together account for around 65% of India's installed cement capacity as of March 2026.

Green power capacity among these companies has already climbed sharply from 1.2 GW in March 2023 to 4 GW in March 2026, and is projected to reach 5.8-6 GW by March 2028, the Icra data showed.

The shift comes as cement

producers target net-zero emissions over the next 15-20 years.

The calcination process accounts for 57-60% of cement-sector emissions, while fuel combustion contributes 27-30% and electricity use another 10-13%. Companies are therefore combining green power with blended cement, alternative fuels and improvements in clinker efficiency.

Icra said India's thermal substitution rate is currently only around 6%, significantly below global benchmarks. Major cement producers are targeting 10-15% over the next three to five years by increasing the use of biomass, municipal waste and industrial waste as alternative fuels.

The industry is also evaluating carbon capture, utilisation and storage.

The government has proposed ₹20,000 crore over five years for deployment across sectors including cement, though ICRA expects large-scale adoption to remain gradual because of high costs, energy requirements and limited carbon transportation and storage infrastructure.

Aus flags India's sugarcane support at WTO

FE BUREAU
New Delhi, September 9

AUSTRALIA HAS STEPPED up pressure on India at the World Trade Organization (WTO), alleging that New Delhi's market price support for sugarcane between 2018-19 and 2024-25—far above the WTO's permitted product-specific support limit of 10%

of production.

In a communication to the WTO's Committee on Agriculture, Australia calculated India's market price support at Rs 1.52 lakh crore in 2024-25, with the support-to-value of production ratio ranging between 90% and 95% during the period under review.

For now, Australia's submission is not for a WTO ruling or

an order against India. It is a formal request for clarification under the WTO Agreement on Agriculture (AoA) and an offer to engage in discussions about the other trade-distorting measures that facilitate sugar exports. But its unusually high estimate could put sugarcane support firmly back on the agenda of the WTO's agricultural negotiations.

Centre defends GST data against claims of manipulation

SHUBHAM RANA
New Delhi, September 9

THE CENTRAL BOARD of Indirect Taxes and Customs (CBIC) on Wednesday defended the reported strong growth in goods and services tax (GST) collections in FY27 so far after former finance secretary Subhash Chandra Garg claimed the data is being manipulated to show high mop-up.

In an article on Tuesday, Garg claimed the government is manipulating data by showing the 11% growth in April-August GST collections while excluding cess collections.

Gross GST collections rose 14.8% year-on-year to ₹2 lakh crore in August while April-August collections were up 11% at ₹10.4 lakh crore.

GST revenue post-refunds rose 8.3% on year in August to ₹1.68 lakh crore and up 9% in the five months to August at ₹8.89 lakh crore.

"When (cess is) included, 5 month gross GST growth becomes 4.08% and net 1.30%, a pathetic performance," Garg said. "There is an unfortunate but increasing tendency to manipulate data to suit narratives," Garg said.

Refuting this, the CBIC said that the GST revenue figures reflect the correct picture of GST revenue performance.

The GST Council discontinued the compensation cess from September 22, 2025 on all items except tobacco and related products. The cess levy on tobacco and related products was also removed from February 1, 2026. Accordingly, from the above period, there is no cess collection, the CBIC said.

Since November 2025,

GST revenue figures published publicly showed compensation cess separately in a table below and the year-on-year growth was computed on the tax base consisting of CGST, SGST and IGST for the corresponding periods, the CBIC said in a post on X, formerly Twitter.

"Where a levy has ceased to exist in law, retaining it in the base measures something else altogether. It is neither arithmetically right nor makes any logical sense," the CBIC said. "A growth rate is meaningful only when it is computed on a comparable basis, that is, on the same set of levies on both sides of the comparison. Otherwise, it is like comparing apples and oranges."

The CBIC added that the purpose of a growth figure is to show how the tax base has moved.

Any attempt to cherry-pick figures from two different tax bases is "thoroughly misleading and mischievous," the CBIC said.

"A fair analysis must compare like with like, instead of misleading our citizens by comparing two fundamentally different datasets."

CIL output rises 40%

SAURAV ANAND
New Delhi, September 9

STATE-RUN COAL INDIA'S (CIL) daily coal production jumped 40% to around 1.91 million tonne (MT) on September 8, from an average 1.36 MT during September 1-3, as receding monsoon rains helped restore mining operations and accelerate supplies to power plants.

Coal dispatches to the power sector also rose sharply. Average daily supplies increased 27% to 1.74

MT on September 8, from 1.37 MT per day during the first three rain-affected days of the month.

The improvement has pushed coal supplies to power plants gradually towards pre-monsoon levels, CIL said.

The recovery was sharper at Northern Coalfields (NCL), one of CIL's major producing subsidiaries, where coal output on September 8 rose 67% and supplies increased 75% compared with the average during September 1-3.

15-MINUTE 'GOLDEN WINDOW' TOO LONG IN CURRENT CONTEXT

Banks may have a minute only to spot & stop frauds

FE BUREAU

Mumbai, September 9

BANKS MAY BE required to cut the time to detect and stop fraudulent transactions to as little as 30 seconds to one minute, as fraudsters increasingly move money through mule accounts at a lightning speed, industry executives said at the Global Fintech Fest 2026.

The traditional "golden window" of around 15 minutes available to banks to identify a fraudulent transaction and attempt recovery may be too long in the current environment where instant payments dominate the landscape, HSBC's Ranjan Bhattacharya said. "30 seconds to 1 minute is the more realistic time frame," Bhattacharya, MD, head of group strategy, Middle East and India, and chief of staff, India, HSBC, said at a panel discussion on hunting mule accounts in real time.

"Today, APIs enable us to ping and take those decisions at a lightning speed. And fraudsters also are moving money very fast," he said, adding that even two minutes could be a more realistic outer limit. The increasing use of instant digital payments such as UPI is making the window progressively shorter.

Unlike card payments, where existing dispute and transaction-monitoring mechanisms can provide some scope to intervene, UPI transactions result in an immediate movement of funds between accounts. This makes real-time detection increasingly critical. The challenge is compounded by the growing sophistication of mule-account networks.

Across different forms of digital fraud—from investment scams to impersonation and "digital arrest" frauds—the money received from a victim is typically moved through multiple mule accounts before reaching the wider fraud network.

India recorded losses of around ₹22,000 crore from

cyber frauds in 2025, according to government data, underlining the scale of the problem. Banks are, therefore, looking to move beyond rule-based systems towards behavioural and real-time transaction monitoring.

Devraj Sanyal, chief of AI and data science, Reserve Bank Innovation Hub, said institutions should focus less on identifying specific modus operandi and more on behavioural patterns. Once fraudsters realise that a particular method has been detected, they can simply change their approach. "If you go behind the modus, it is going to change tomorrow. What you have to go for is behavioural patterns."

The problem begins even before a transaction takes place,

with mule accounts increasingly being opened through sophisticated methods. Suren-dra Kumar Vishwakarma, general manager at Punjab National Bank, said traditional fraud controls were increasingly being supplemented by systems that analyse transaction behaviour as it happens.

"The time has come for us to understand the behaviour of transactions," he said, adding that banks need to act while a transaction is taking place, rather than rely only on predetermined rules. However, faster intervention also brings the risk of legitimate transactions being blocked. Banks have to balance fraud prevention with customer trust, Vishwakarma said.

Panelists also pointed to the use of deepfake technology to potentially bypass video-KYC processes, making it harder for human agents to distinguish genuine customers from impersonators.

Truecaller's Global Head-Business Shiladitya Mukhopadhyaya said network-level signals could help banks identify suspicious changes in a mobile number's behaviour, including sudden SIM changes or a number being registered across multiple banks or UPI platforms.

'SIP book growth may moderate in next 1-2 yrs'

Vetri Subramaniam, MD & CEO, UTI Mutual Fund, tells Kushan Shah that the rise in primary market issuances is not bad for the secondary market. He also believes that the growth in the systematic investment plans (SIPs) will slow down in the next couple of years. Excerpts:

have become as successful as they are today. It is a symbiotic relationship.

Primary market inflows today will help entrepreneurs build businesses, which can support the economy and earnings growth in the future. There is a perception that strong primary market activity is bad for the secondary market, but I do not agree with that. Our fund

house invests in an IPO based on its merits rather than following any generic rule.

Do you think the pace of growth in the SIP book seen in recent years is sustainable?

The mutual fund industry has seen fantastic growth in its SIP book over the last four to five years. We may not see a similar pace of growth over the next one to two years.

As an industry, we cannot restrict ourselves to existing investors or only those who file income-tax returns. We need to focus on a much broader potential investor base.

What is the fund house's strategy to accelerate growth?

We are pulling multiple levers for growth. Our share of SIPs and overall flows is lower than what we are capable of managing, both from an investment and distribution perspective. We are therefore aggressively focusing on investor education to increase our share of SIP assets.

We are also partnering with fintech platforms to expand the reach of investments beyond sophisticated investors with disposable savings to people who are not yet in the habit of saving. We already have an extensive distribution network and digital presence. It is now about execution.

ALL THE LARGE COMPANIES WE INVEST IN TODAY WERE ONCE LISTED THROUGH IPOs

Do you see the slew of big IPOs putting pressure on liquidity in the secondary market?

I don't have a particular view on the IPOs, but I do not see primary market inflows putting pressure on the secondary market. Some IPOs appear large because we compare them with those in the past, but relative to the size of the economy, they are not that big.

Capital markets exist to ensure that investors with available funds can invest in businesses and enable them to scale. If the primary market is not active, the market will eventually stop growing, which would also create problems for the secondary market. Both primary and secondary markets have a reason to exist.

Do you find the high participation of mutual funds in IPOs concerning?

All the large companies we invest in today were once listed through IPOs. If these companies had not received capital then, they may not

Call for new lending norms for gig workers

PRESS TRUST OF INDIA

Mumbai, September 9

BANKERS ON WEDNESDAY called for new lending models based on cash flows and alternative data to extend formal credit to gig workers.

This will help overcome the handicap of traditional underwriting models centred on fixed monthly salaries, which are unable to adequately capture their repayment capacity, they said.

Speaking at the Global Fintech Fest 2026, bankers said gig workers have volatile incomes, but possess the ability and discipline to repay loans, and stressed the need for digital, flexible, and technology-driven lending products tailored to their earnings patterns.

"A gig worker does not have a salary, but they have an income. A gig worker does not get a salary on a particular day. They don't have a payday, but they do have cash flows," Ratan Kesh, executive director and chief operating officer of Bandhan Bank, said, adding that lenders need to assess the borrower's ability to repay rather than merely focus on building a lending book.

PhonePe goes global, to begin UAE operations

ANEEES HUSSAIN

Mumbai, September 9

PHONEPE HAS RECEIVED its first international licence from the Central Bank of the UAE and will begin operating locally in the country, Founder and Chief Executive Officer (CEO) Sameer Nigam said on Wednesday.

"PhonePe is going global," Nigam said on Wednesday. "We just received our first international licence from the Central Bank of the UAE. We will be launching operations in the UAE as our first foreign market."

The licence will allow the company to acquire merchants, deploy point-of-sale (PoS) devices and offer foreign exchange services, Nigam said, without specifying a launch timeline.

PhonePe's overseas presence has so far been built around Indian users travelling abroad. The company has enabled UPI payments for Indian travellers in the UAE, Singapore, Mauritius, Nepal, Bhutan, Sri Lanka, France, Qatar and Cambodia, all of them transactions by Indian users drawing on Indian bank accounts.

In the UAE, that acceptance came through Mashreq's NEO-PAY terminals in March 2024, routed via NPCI International Payments. Operating locally will mean directly serving UAE merchants and customers.

Under the Central Bank of the UAE's retail payment services framework, a payments licence is distinct from a banking licence, which permits deposit-taking. The framework covers nine categories, including merchant acquiring, payment aggregation, payment account issuance and domestic and cross-border fund transfers.

That would mirror PhonePe's structure in India, where it distributes credit, insurance and deposit products through bank and NBFC partners, rather than holding a banking licence itself.

Separately, Nigam said PhonePe has become the first UPI application to launch payments on feature phones, aimed at an estimated 250 million Indians without smartphones. The service works over the handset's messaging channel instead of the internet.

Jio Payment launches cross-border payments

JIO PAYMENT SOLUTIONS (JPSL), a wholly-owned subsidiary of Jio Financial Services, on Wednesday announced the launch of its cross-border payment platform to help Indian exporters accept international payments from global customers and boost their global competitiveness.

Through JPSL's new facility, domestic exporters can accept international payments via virtual accounts, international cards, and local payment rails. The launch follows the receipt of authorisation from the RBI to operate as a Payment Aggregator for cross-border transactions, covering exports and imports, JPSL said. —PTI

Users can transfer money to any mobile number or UPI ID, share a QR code to receive payments, recharge connections and check balances.

The company also launched Pulse Pro, a paid version of its Pulse data platform, which has published anonymised payments data by category and pin code free for six years.

PhonePe on Wednesday announced a partnership with Visa to launch three products. Tap to Pay lets users tokenise a Visa card on the app and pay in a contactless manner at PoS terminals from an Android phone. Cross Border Scan to Pay will let users scan Visa QR codes in 14 markets including Singapore, Japan and China. Smart Accept lets small merchants take card payments on their smartphones without a PoS machine.

'Aadhaar authentication capacity to rise to 250-300mn'

● We are preparing for 250-300 mn authentication a day: UIDAI head

FE BUREAU

Mumbai, September 9

AADHAAR AUTHENTICATIONS could more than double in the coming years, with the Unique Identification Authority of India (UIDAI) preparing to handle 250-300 million authentication a day, compared with around 100 million currently, UIDAI Chairperson Neelkanth Mishra said.

UIDAI Chairman Neelkanth Mishra (centre), Jitendra Gupta, founder and CEO of digital-first neo-banking platform Jupiter, and Srinivas Jain (left), executive president, SBI Funds, at the Global Fintech Fest in Mumbai on Wednesday

"We are now doing 100 million authentications a day... we are preparing to go to 250 to 300 million," Mishra

said. "The number of entities has expanded. More than 600 entities now use Aadhaar," he said, adding that the identity

infrastructure was increasingly becoming a base layer for digital services.

He said the growth in Aad-

haar usage was also being supported by efforts to move traditionally paper-based and physical processes online. The Aadhaar app, which enables residents to update details such as mobile numbers and addresses, has seen close to 60 million downloads, up from 50 million just a few weeks earlier, he said.

The UIDAI is also working on strengthening its technology infrastructure as authentication volumes rise.

Mishra said the organisation was implementing post-quantum cryptography as part of its technology road map for the next decade, while also using artificial intelligence (AI) for fraud

detection.

The authority is also working towards greater global interoperability of Aadhaar and India's digital public infrastructure, he said.

Mishra said the objective was for Aadhaar to eventually become an infrastructure that users barely notice in the background, while continuing to provide secure and trusted identity verification at scale.

He highlighted the growing potential for Aadhaar's identity layer to support new applications, including agentic technologies, where users could delegate authentication and identity-sharing tasks to AI agents.

India believes BRICS has relevance in a multipolar world and that it can be a voice for the Global South

AT A TIME of serious geopolitical tensions with the Russia-Ukraine war and US-Iran conflict subjecting the global economy to supply-side shocks, the BRICS grouping is expected to address challenges confronting the Global South. BRICS has always supported a multipolar, equitable, and democratic world order and demanded a greater voice for the Global South in the International Monetary Fund, World Bank, and United Nations. The perception of being an anti-US grouping has also brought the BRICS in the crosshairs of President Donald Trump who has threatened a 100% tariff as he believes plans to create a currency rivaling the US dollar are in the works. The reality is more complicated. While sanctions against Moscow and Sino-US trade tensions lend impetus for de-dollarisation, India wants to de-risk but does not wish to provoke the ire of the US.

How India navigates through these pressures as China — the dominant power within BRICS — has made progress to internationalise the yuan needs to be seen. India, for its part, is unlikely to support a yuan-anchored payment system within BRICS as it instead favours greater intra-bloc trade in national currencies. As summit chair, India obviously wants to stamp its influence on the outcomes as it believes that BRICS has relevance in a multipolar world that is rapidly rebalancing and perceives its role as an important voice for the Global South. Amidst scepticism about BRICS' relevance, it must be said that institutional reforms have helped deal with the needs of the Global South. A case in point is the New Development Bank (NDB) which has emerged as an important option for the development needs of such countries.

Among the key deliverables anticipated from the summit is the Strategy for Economic Partnership 2030, which moves beyond individual initiatives towards a longer-term road map for co-operation in trade and investment, digital economy, financial cooperation, industry, innovation, and sustainable development. While that is a good way to go about it, experts believe there needs to be a sharp focus on specific initiatives that create economic value for members. BRICS too could follow a similar approach in areas such as critical minerals, clean energy, and supply chains with the collective resources and manufacturing capacity being shared and leveraged. For its part, India will strive for stronger research ties and more government-to-government partnership across artificial intelligence (AI), advanced computing, quantum technologies, and semiconductor materials. This focus on frontier technologies comes against the backdrop of countries attempting to counter growing AI monopolies and de-risking global semiconductor supply chains. Media reports suggest that connecting chip design and deeptech startups across members via the proposed Startup Innovation Fund and Incubator Network is another target area.

Moreover, for the NDB to play a bigger role in both funding infrastructure creation in the BRICS member nations and also financing de-carbonisation of several sectors — as part of its climate finance initiative — it needs to be strengthened. Not only does the lender's capital base need to be bigger, but it must also use the capital more efficiently. As of now, experts point out that the NDB's leverage is lower than that of organisations like the World Bank or the Asian Development Bank. Experts also call for a more robust system for the grouping to be able to discuss the repercussions of policies of one nation on another. They draw attention to institutional forums at the European Union where the impacts of policies can be deliberated.

Anime superpower needs a bigger stage in Japan

WE'VE HAD *EMILY* in Paris. How about Son Goku?

Fans of *Dragon Ball*, the seminal manga and anime in which the Saiyan is the main character, were excited by reports of a new theme park in France based on the franchise. French President Emmanuel Macron revealed plans to build three parks near Paris with Saudi Arabia, highlighting his love of manga in announcing the €6 billion (\$7 billion) deal.

While plans are underway to construct an entertainment complex near Riyadh based on the franchise, rights holder Toei Animation has denied it has licensed anything for Paris. It might want to reconsider: In manga-mad France such a destination would surely find an eager audience.

But why is no one talking about building a *Dragon Ball* park where the franchise was born: Japan? Three of the world's seven most visited are in Japan, a theme park-crazy country even before it began experiencing an unprecedented tourism boom. More than 40 million visitors now arrive each year, with the government targeting 60 million by the end of the decade.

Its most successful attractions are dependent on foreign involvement. Tokyo Disney Resort pairs Walt Disney's characters with capital from Japanese operator Oriental Land. Meanwhile, Universal Studios Japan is owned by Comcast, but its revival has increasingly relied on home-grown intellectual property, including those of Nintendo. What's missing is the obvious bet: Japanese capital backing domestic IP at Disney-like scale. And that's from the country that holds many of the highest-grossing franchises in the world — from *Pokemon* and *Hello Kitty* to *One Piece* and *Godzilla*.

Neither Disney nor Universal Studios were obvious successes. Both required long-term, bold investment. Oriental Land was set up post-war to build a theme park in reclaimed land in Tokyo Bay. After scouting Disney's US venues for inspiration, executives decided that what they needed was the real thing, and they pursued the US firm for years before clinching a deal. It's one that has been highly successful for both sides and is set to continue until as late as 2076.

Universal Studios Japan is almost the inverse: US-owned, but increasingly powered by Japanese IP. After its Hollywood-heavy lineup ran into trouble, the park embraced local franchises from *Hello Kitty* to *Resident Evil*, and later *Nintendo*. It now draws more visitors than either Tokyo Disney; its owner was reported to plan spending \$1.9 billion to expand it.

Despite these success stories, Japan has become reluctant to make such bold bets. Recent affairs seem deliberately modest: The newly opened *Pokemon* park, based on what is often called the world's most successful IP, is not a sprawling Disney rival, but instead tucked away in Yomiuriland, a small venue owned by Japan's best-selling newspaper. Ghibli Park in Aichi prefecture actively eschews theme-park attractions, with annual attendance estimated at less than 10% of Universal Studios.

The caution is perhaps understandable. The nation's post-bubble Lost Decades scarred developers. Ambitious projects soured, with Seagaia becoming a symbol of the excesses. The operator of the lavish indoor resort in Kyushu, featuring a vast artificial beach and the world's largest indoor pool, collapsed in just a few short years.

Being capital-light is a model that made sense during the economic doldrums, and can be a smart business choice for an individual company like Toei Animation, enabling it to pass most of the risk to Saudi Arabia. But Japan loses the multiplier effect of jobs and spending, as well as building a destination for the millions of tourists who visit. And it leaves value for others to capture: Look at how Japan's ski resorts are increasingly being purchased by foreigners as local firms didn't recognise their worth.

The events capture the central argument of the administration of Prime Minister Sanae Takaichi: When corporate investment turns too cautious, the government needs to pick up the slack. She has made content a top growth priority, along with robotics and quantum computing; one of her top economic advisors has even explicitly backed the need for large-scale investment in anime theme parks.

If Japan wants to capture more economic value from its soft power, great IP isn't enough. It also needs capital, operators and ambition. Otherwise, *Dragon Ball* or not, someone else will do it for them — and keep much of the value for themselves.

BRICS SUMMIT

ENSURING IT DELIVERS PRACTICAL GAINS WITHOUT BECOMING AN ANTI-WESTERN BLOC IS THE REAL TEST

India's difficult balancing act

WHEN INDIA HOSTS the 18th BRICS Summit in New Delhi on September 12-13, it will lead a bloc

that is economically powerful but politically divided. China, Russia, and Iran want the 11-member group to expand rapidly, challenge the dollar, and become a stronger anti-Western alliance. India opposes this approach. It sees BRICS as a non-aligned platform for economic cooperation, equal governance, and the interests of the Global South — not as a vehicle for Chinese leadership or conflict with the West.

India assumed the BRICS chairmanship in January and will hand it over to China next year. It faces a difficult balancing act at the summit. As chair, it must bridge differences within a diverse group that includes Russia and Iran, both under US sanctions. It must also prevent China from dominating the agenda while ensuring that India's position in BRICS does not conflict with its role in the Quad and its other Western partnerships.

India must also be cautious about proposals for a BRICS currency or other similar initiatives that Washington may see as an attack on the dollar. The US has already threatened BRICS countries with 100% tariffs for pursuing de-dollarisation.

These challenges leave little room for bold initiatives. Trade in local currencies offers a safe way forward. It could reduce transaction costs by 2-5% without threatening the dollar's global role. The US cannot prevent two sovereign countries from using local currencies or a payment system of choice, but within the BRICS agreement on a preferred system won't be easy.

China supports mBridge, a blockchain-based network that uses central bank digital currencies (CBDCs) for cross-border payments. Its participants include China, Hong Kong, Thailand, the UAE, Saudi Arabia, and Malaysia. More than 95% of its settlement volume reportedly uses China's digital yuan.

India may instead propose the Project Nexus model. Nexus is designed to con-

AJAY SRIVASTAVA

nect the instant-payment systems of India, Singapore, Malaysia, the Philippines, and Thailand. It does not require a common blockchain and is expected to begin live operations around mid-2027.

China may push its Cross-Border Interbank Payment System (CIPS) as an alternative to SWIFT, the dominant messaging network banks use to conduct international payments. Since CIPS operates outside Western control, it attracts countries seeking protection from sanctions. Its use is growing, especially as Gulf oil exporters accept more payments in yuan.

India may separately propose linking the CBDCs of BRICS members for trade and tourism. New Delhi will present this as a way to make payments faster and cheaper — not as an effort to weaken the dollar.

Beyond payment systems, the summit will discuss a BRICS Startup Innovation Fund and a Network on Digital Agriculture. It will also cover resilient supply chains, clean energy, green finance, and reforms of the IMF, World Bank, and UN. As chair, India must reconcile differences and forge consensus on a joint declaration.

BRICS began modestly. Goldman Sachs economist Jim O'Neill coined the term "BRIC" in 2001 for four promising emerging economies — Brazil, Russia, India, and China. They formed a group in 2006 and held their first summit in Yekaterinburg, Russia, in 2009. South Africa joined in 2010, turning BRIC into BRICS, which has since expanded to include Eg-

ypt, Ethiopia, Iran, the UAE, and Indonesia, and Saudi Arabia.

Western countries closely watch BRICS because of its collective strength. Its 11 members account for about 30% of global GDP, nearly half the world's population, a quarter of global merchandise exports, and a fifth of imports. The glue holding this diverse group together is a shared dissatisfaction with Western dominance. Its members object to their limited voice in global institutions and oppose the use of the dollar, financial networks, and unilateral sanctions as tools of pressure.

BRICS has several achievements. Its Shanghai-based New Development Bank (NDB) has approved more than \$30 billion for infrastructure, sustainable development, and green-energy projects. The group also created the \$100-billion Contingent Reserve Arrangement to help members handle balance-of-payments pressures. It has promoted local-currency trade, established the BRICS Vaccine R&D Centre, and strengthened South-South cooperation.

Deep divisions prevent BRICS from acting as a united global power. India and China have territorial and strategic tensions. Members disagree on whether BRICS should remain non-aligned or become an anti-Western bloc. Their political systems and views on global issues also differ. China's economic dominance creates fears that Beijing could control BRICS institutions.

BRICS has no permanent secretariat,

India must keep the group focused on the Global South, open to the world, and free from domination by any single country

When new capital inherits old problems

RAJNISH KUMAR

Former Chairman, State Bank of India

SOMEWHERE IN MY second decade at State Bank, an older colleague told me that a loan file will tell you everything about a company except the one thing you need to know. He meant the promoter. You can read a balance sheet in an afternoon. Working out whether its controller will still be worth lending to in five years takes longer, and often you get it wrong. Every credit committee I ever sat on began with that question: Who is running this, and what are they like?

I was reminded of it while reading about the Delhi High Court's recent order in the enforcement proceedings that Dai-ichi Sankyo has been pursuing against Malvinder Mohan Singh and Shivinder Mohan Singh over an arbitral award. The court has called for a forensic audit into the shareholding the two brothers once held in Fortis Healthcare, the change of control that followed, and the role of various stakeholders.

Two things struck me. First, the court has been explicit that this is a fact-finding exercise, and that questions of liability are to be considered after the facts have been established. Nothing I say here should be read as a view on the merits or conduct of anyone before the court. Second, the order raises a question that goes beyond the parties: how far should the consequences of a former controller's conduct travel with a company after control has changed?

Every banker knows the textbook answer. A company is a continuing legal entity. Promoters come and go, boards are reconstituted, and management is replaced. That continuity is the basis on which contracts and guarantees mean anything. But the principle cuts both ways. Pus-

hed far enough, corporate continuity can blur the distinction between what former controllers did and what new owners, directors, and managers are answerable for. Alender wants to know the risks attached to the borrower. An investor wants to know what liabilities it is acquiring.

The Fortis chronology is relevant. The Singh brothers resigned from the company's board in February 2018. In April, following pressure from activist shareholders, the board was reconstituted and shareholder-nominated independent directors were inducted. By June, Fortis had itself initiated action against the brothers to recover more than ₹500 crore. The company was therefore already moving away from its former promoters and taking action in relation to them before the subsequent change in control.

Whenever a resolution came up under the Insolvency and Bankruptcy Code (IBC), serious bidders would ask a basic question before committing capital: what exactly are we buying?

The IBC was designed to provide an answer. Once a resolution plan is approved, the applicant is expected to know the liabilities it is taking on. The Supreme Court has described this as the "clean slate" principle: the successful applicant should be able to run the business without previously unknown claims appearing after resolution.

There is a broader lesson. If a change of

ownership outside the IBC can leave a new investor facing potentially open-ended consequences for conduct attributed to former controllers, while an IBC resolution provides a statutory route to finality, the message to the market is odd: that there may be no reliable way to acquire a troubled or legacy-laden business other than through insolvency. That cannot be good for the market for corporate assets or for lenders seeking buyers for viable businesses.

Fortis also illustrates what a change of hands can mean operationally. On the company's disclosures, it had around 4,800 beds in March 2018. By March 2026, the network had roughly 6,100 operational beds across 36 facilities. Reported capital expenditure rose from about ₹300 crore in FY23 to around ₹600 crore in FY24, excluding specified acquisitions, and around ₹700 crore in FY25 and FY26. Those are operating theatres, ICU beds, imaging equipment, and the doctors and technicians who go with them. India does not have nearly enough of any of it.

Management attention is finite, as is the attention of boards and lenders. When it remains unclear for years where investigation ends and liability begins, the cost of that uncertainty does not stay in the courtroom. It can affect how lenders price risk, how investors value a business, and how readily capital is committed to expansion.

The order itself points to a way

Responsibility should attach to what a person or entity did, rather than simply to the fact that the corporate entity remained in existence after its ownership and management changed

Daiichi-Fortis case: The past must remain open to examination. But a business that has genuinely changed hands must also be allowed to build a record of its own

through. It draws on an earlier Supreme Court decision in which a forensic audit of certain banks was directed even though they were not judgment debtors, with questions of their rights and liabilities held over until the facts were established. The sequence seems right: establish what happened, then decide who answers for it.

None of this is an argument for going easy. A legitimate claim should be pressed to the end, and a change of ownership must not become a place to hide. If the audit establishes improper conduct, the law should pursue it wherever it leads. Equally, ordering an audit is not itself a finding against everyone whose transactions or role may be examined.

My point is narrower. Responsibility should attach to what a person or entity did, rather than simply to the fact that the corporate entity remained in existence after its ownership and management changed. That is a balance corporate India will increasingly have to strike. The past must remain open to examination. But a business that has genuinely changed hands, along with its governance and management, must also be allowed to build a record of its own.

We need capital to go into companies being repaired, expanded, or put under better management rather than started from scratch. That capital will come where two things are clear: that the past will be accounted for, and that investors, lenders, and managers can understand who is answerable for what today.

In banking we would simply call that trust. It is the only thing we ever really deal in.

LETTERS TO THE EDITOR

Space developments

Apropos of "Space for all" (FE, September 9). The opening of India's space sector to private players is welcome, but the transition must not weaken public accountability. The Indian Space Research Organisation's

research and national missions require sustained support, while private firms can bring investment, innovation, and specialised manufacturing. The immediate need is a clear division of responsibilities, especially where commercial interests overlap with strategic priorities. Employees

moving from public institutions to private companies should also receive fair treatment and clarity about their roles. A transparent framework for technology transfer, licensing, and data-sharing would encourage participation without compromising national interests. Space

development should be measured not merely in terms of investment or the number of launches, but by scientific progress, public benefit, and the creation of skilled employment. —Durga Arunkumar, Coonoroor

GCCs hit a talent wall

THE SHIFT TO MORE COMPLEX TASKS IS EXPOSING A DEEP SKILL GAP

SUDHIR CHOWDHARY

INDIA'S MORE THAN 2,100 global capability centres (GCCs) face a growing talent problem: the more complex the work, the harder it is to find the right people. More than half plan to expand their workforce in FY27, but demand for skills in AI, data, cloud, cybersecurity and product engineering is outpacing the available talent. As GCCs take on bigger and more strategic roles, the hiring challenge is no longer about numbers — it is about finding professionals who combine technical depth with business understanding and experience.

The Taggd-CII GCC Talent Lab report puts the mismatch in sharp focus. While 52% of GCCs plan to expand their workforce, only 42.6% of graduates meet industry employability standards. Nearly half of critical roles take more than 60 days to fill, with almost one in five taking more than 90 days. Quality mismatch has emerged as the biggest hiring constraint, ahead of compensation and candidate availability. The gap is particularly significant for GCCs because many of the newer roles require experience that cannot be acquired through conventional classroom training alone.

The toughest roles are increasingly specialised. Cybersecurity leads the list, particularly cloud security, application security and zero-trust architecture. Demand for these skills is growing 32% annually, while supply of professionals with three to eight years of relevant experience has not kept pace. AI governance, prompt engineering, generative AI and ML operations, modern data engineering, and site reliability and platform engineering are also proving difficult to staff. These are fast-changing areas where employers increasingly want professionals who have worked on real enterprise deployments rather than simply completed courses or experimented with individual tools.

“The real requirement today is beyond technical proficiency,” says John Dawber, VP and MD, Novo Nordisk Global Business Services. “GCCs increasingly need people who can combine technology skills with domain knowledge, regulatory understanding, judgement and learning agility.”

AI governance and prompt engineering remain relatively new disciplines, with job definitions still evolving and limited pools of experienced

20% GCC salaries are higher than similar non-GCC s roles

JACOB GEORGE, SENIOR DIRECTOR & HEAD OF HR, TRANSUNION GCC INDIA

Demand remains strong for fast-evolving skills, making continuous learning critical

candidates. Generative AI and MLOps pose a similar challenge because companies want professionals who have deployed and managed large language models and agentic AI systems, not just experimented with them. Modern data engineering and platform roles are also demanding expertise in areas such as Kubernetes, multi-cloud and cloud security.

“As enterprises look to GCCs to drive AI-led reinvention, the challenge is no longer access to talent alone,” says Arundhati Chakraborty, global finance and GCC lead, Accenture. “They need talent ready to operate at enterprise scale,” particularly across AI engineering, data science, cloud architecture, cybersecurity and product engineering.

That shift is being driven by the changing role of GCCs, which are moving beyond technology support to take on product development, engineering, analytics and business functions for global organisations. Jacob George, senior director and head of human resources, TransUnion GCC India, describes the chal-

lenge as “not simply talent availability, but talent readiness”. In areas such as advanced analytics, cloud, cybersecurity, data and product engineering, expertise changes so quickly that continuous learning is becoming as important as hiring.

The shortage is already showing up in pay packets. GCC salaries are around 20% higher than comparable non-GCC roles, says Devashish Sharma, CEO and co-founder, Taggd. AI and ML professionals command about 1.7 times the usual benchmark, while pay for AI, cloud, data and cybersecurity professionals in Bengaluru and Mumbai has risen by as much as 40% in a year.

Entry-level salaries in tier-1 metros have climbed 25-33%, while senior compensation has crossed ₹50 lakh annually, up from about ₹40 lakh last year. For GCCs, this creates a double challenge: attracting specialised talent is becoming more expensive even as the supply of experienced professionals remains constrained.

There is another problem: much of the hiring is simply moving talent

around. About 78% of GCC hiring is sourced externally, with IT services accounting for 41% of that pool, other GCCs 32%, and startups and product companies 27%. Hiring from another GCC may fill a vacancy, but it does little to expand the overall talent pool and can add to salary pressure. It also means that a new GCC entering an established market can find itself competing for the same experienced professionals as existing centres.

“AI strategy is increasingly a talent strategy,” says Madhulika Vedula, head of human resources, Providence India. Future roles, she says, will need to combine human strengths such as judgement, deep thinking and empathy with AI and technical capabilities. For the GCC sector, the talent problem will therefore not be solved by hiring more people alone. The next phase of growth will require stronger campus pipelines, internal mobility, reskilling and domain-led training. The winners may be those that can build the talent they need faster than they can hire it.

A new way of working

BUSINESS PROCESS SERVICES (BPS) are entering a new phase. Enterprises are moving away from traditional robotic process automation (RPA) and investing in autonomous AI agents capable of analysing data, making decisions and executing actions across business functions. Agentic BPS has the potential to reshape how organisations operate at scale.

As AI adoption accelerates, these systems are transforming from simple action assistants to autonomous, decision-making partners. As per Gartner, by 2028, at least 15% of day-to-day work decisions will be made autonomously by agentic AI. Agentic systems represent a cultural shift by coordinating workflows, collaborating across business functions, learning from feedback and adapting decisions based on outcomes.

A key design principle emerging from enterprise AI implementation is the use of closed-loop operating models.

The first is the intelligence layer (Presto), which analyses enterprise data, workflow patterns and performance metrics to identify opportunities for automation while flagging areas of risk. Monitoring autonomous agents can reveal inefficiencies, deviations from normal operation and potential compliance gaps. This helps enterprises build transparency in agentic AI operations, improving trustworthiness and adoption.

As organisations move from RPAs towards agentic AI, a parallel shift is underway towards services-as-software (SaaS), a modular, scalable and subscription-based model delivering packaged, outcome-focused capabilities. At its core is agentic business process as a service (BPaaS), involving AI agents that autonomously run business processes from start to finish.

ROHIT PURI

Pairing this with the closed-loop model ensures that they remain transparent, auditable and aligned to business objectives. This enables agility and faster time-to-value.

Agentic AI is already reshaping business process services. Contact centres use AI agents to summarise calls and resolve issues, escalating to human judgement when necessary. Insurance providers can run real-time eligibility checks and assess claims. AI agents in finance reconcile accounts, flag anomalies and maintain audit trails. Human resource teams can automate onboarding and resume screening.

The second is the orchestration layer (DICE), which governs the lifecycle of agentic systems. It embeds guardrails, policies and audit capabilities into the design and deployment of autonomous agents, making their actions visible, adjustable and aligned with evolving business conditions and changing operational needs.

Despite advances in autonomy, AI will not replace humans but amplify the speed and scale of decision-making. Human oversight remains essential for defining strategic intent, setting goals, risk tolerance and ethical boundaries; providing judgement on edge cases; and ensuring accountability for decisions.

Agentic BPS is not just a technology upgrade, but an operating model shift. With human oversight, closed-loop models can orchestrate agents responsibly, achieving speed without chaos, scale without risk amplification and innovation without eroding trust. The future belongs to organisations that place human oversight at the centre.

AI tackles the scaling challenge

INDIA'S AI MISSION-BACKED startup Shodh AI has developed LUCAN, a new AI model designed to help industries turn laboratory discoveries into products that can be made reliably in factories. The model is built to understand how molecules, materials, chemicals and biological processes behave under different manufacturing conditions. Shodh says its solution has helped identify process changes in a specialty-chemicals application that increased output by 17% using the same amount of raw material.

Insurer expands digital capabilities

AXA HAS PARTNERED with Publicis Sapient to scale its Global AI Hub, a common platform that will help the insurer deploy AI tools faster and more securely across its businesses. The platform provides shared infrastructure for developing and managing AI applications, with security,

compliance and human oversight built in.

Autoliv advances virtual crash testing

AUTOMOTIVE SAFETY COMPANY Autoliv has introduced its Human Body Model (HBM) Safety Suite, a virtual crash-testing platform that uses a digital model of the human body to assess injury risks. Toyota is the first automaker to evaluate the technology. The platform allows engineers to simulate complex crashes and study occupant responses earlier in vehicle development. Autoliv plans to make it available more widely later this year.

Explainer

● What is double deflation? How does it help measure GDP?

DOUBLE DEFLATION ESTIMATES real value added by separately adjusting output and input values for changes in prices. Unlike the single-deflation method, which uses one price measure for both, it accounts for differences in how output and input prices move, providing a more realistic measure of sector-wise economic activity.

It helps improve measure real GDP more accurately because it separates changes in quantities from changes in prices on both sides of production. Real economic growth depends on the volume of output created after accounting for intermediate inputs. When input and output prices move differently, a single deflator can either overstate or understate real value added. This issue becomes important during commodity, energy or supply-chain shocks, when input costs may change sharply. Double deflation captures these relative price movements more directly. International statistical standards regard it as the preferred approach for industry-level volume estimates.

● What role do input and output prices play in GDP numbers?

STATISTICIANS FIRST ESTIMATE gross output and intermediate consumption at current prices. Output is then deflated using output price indices. Intermediate consumption is deflated using separate input price indices. Real value added is calculated as real output minus real

intermediate consumption. Producer Price Indices (PPI) play a central role since they track prices received by producers and prices paid for production inputs. The distinction matters because output and input prices do not always move together. For example, a manufacturer may see the

price of its products rise by 5%, while the cost of raw materials increases by 10%. Looking at output prices alone would overstate the improvement in real activity. Double deflation captures these differences and improves estimates of underlying production volumes.

GDP NUMBERS

Why double deflation matters for measuring real growth

India's revised GDP series has brought renewed attention to double deflation, a tool for converting nominal magnitudes into real ones. By separately adjusting output and input values for price changes, it aims to provide a more accurate picture of the underlying real economic growth, writes *DK Srivastava*

● What are the challenges in collecting reliable producer price data?

DOUBLE DEFLATION REQUIRES detailed and timely data on both output and intermediate-input prices across industries. Input baskets often differ significantly between firms and can change over time because of technology, imports, quality improvements or shifts in sourcing patterns. Services-sector inputs can be especially difficult to price. Statistical agencies therefore need robust producer price systems, regular updates of weights and transparent documentation of methods. International experience shows that data availability is often the main constraint on wider use of double deflation. Transparency improves when national statistical agencies regularly publish methodologies, classifications, source data principles and revision practices.

● Can adoption of double deflation lead to higher real GDP estimates?

DOUBLE DEFLATION DOES not mechanically increase or decrease real GDP. Its effect depends on relative movements in output and input prices and on industry structure. In some periods, real growth may be revised upward if input prices rise faster than output prices. This leads to a lowering of the real value of inputs and therefore increases the excess of value of output over value of input in real terms. In other periods, growth may be revised downwards if input prices rise at a rate

● What are the pros and cons of using Producer Price Indices?

PRODUCER PRICE INDICES (PPI) provide prices that are directly linked to production activities, making them suitable for estimating real output and intermediate consumption. However, collecting these prices can be challenging because businesses use different inputs and production methods, which also change over time. In India, Wholesale Price Indices (WPI) were used as producer prices were not being compiled. The WPI included elements such as indirect taxes, subsidies and margins. The introduction of PPIs is an improvement because they reflect producer-level price movements better. However, the effectiveness of PPIs depends on adequate coverage, data quality, regular updates and inclusion of a wider range of services.

slower than output prices. Supporters argue that PPIs produce more accurate volume estimates and aligns better with international standards. Double deflation is used for industry-level volume GVA estimation, across the UK, Canada, Australia, the European statistical system and the United States, although implementation details differ depending on data availability and compilation frameworks.

OIL MARKETS RATTLED AS ATTACKS MOUNT ON SHIPS NEAR HORMUZ

Iran, US trade biggest-ever tanker attacks since Feb

ENAS ALASHRAY, IDREES ALI & JANA CHOUKEIR
Cairo/Washington/Dubai, September 9

IRAN SAID ON Wednesday it had attacked 10 ships near the Strait of Hormuz after the US sank five Iranian oil tankers, in the biggest declared wave of tit-for-tat attacks on shipping by both sides since the start of the six-month-old war.

The attacks sent the price of oil surging, with benchmark Brent crude futures breaching \$100 a barrel for the first time since July. At least one seafarer aboard a tanker was reported killed and another listed as missing.

Iran also said it had fired ballistic missiles at a base used by US forces in Jordan. Attacks by both sides since the end of August have shattered a month of relative calm, with the US and Iran hitting military, shipping and energy assets.

The Revolutionary Guards said they would sharply esca-

late their response to any further attacks, hitting 20 targets if the enemy struck two or three. Iran would soon release maps of a new, enlarged off-limits zone at sea that would extend as far as Chabahar on the far reaches of Iran's coast near Pakistan, the Guards said.

Recent days have also seen an escalation in fighting between Saudi Arabia and the Houthis in Yemen, a second theatre of war that threatens global energy supplies from West Asia.

The Americans said they destroyed five Iranian oil tankers overnight, releasing video of ships ablaze before they sank. The US military's Central Command called its attacks a response to Iran's Islamic Revolutionary Guard Corps targeting a US Navy warship twice with ballistic missiles over the previous two days. No Americans were harmed, the US said.

US says Alibaba, DeepSeek siphoned its AI models

● China hits back at US claims

MICHAEL SHEPARD
September 9

US SECURITY AGENCIES accused China's top AI companies including DeepSeek and Kimi maker Moonshot AI of systematically extracting proprietary knowledge from American firms and warned Silicon Valley developers to protect their work.

The Chinese firms have used a technique known as distillation since at least 2024 to access and draw information from US AI models "at an industrial scale" to train their own systems, according to a joint statement issued on Tuesday by the National Security Agency, FBI and Cybersecurity and Infrastructure Security Agency. The agencies specifically accused DeepSeek, Moonshot, Alibaba Group Holding, MiniMax, StepFun and Z.AI of the practice.

Issued weeks before President Donald Trump is scheduled to welcome his Chinese counterpart Xi Jinping to Washington for a high-stakes summit, the accusations threaten to intensify friction between the world's two largest economies. AI has increasingly moved to the center of the US-China rivalry, with each side seeking to dominate the market for the technology.

Trump administration officials and American AI developers alike have accused Chinese firms of distilling from US AI models in the past to build their own products. The practice,

■ The agencies alleged the firms are likely siphoning information from models "with knowledge of the Chinese government"

SCOTT BESSANT, US TREASURY SECRETARY

There is no day after tomorrow if China wins at this. If they were to pull away from us on AI, then nothing else would matter

which can be legitimately deployed by an AI developer that uses its state-of-the-art model to effectively teach a more power-efficient version, is seen as an improper shortcut when done without approval.

Tuesday's security alert takes those accusations one step further, detailing which US systems were distilled by each of the Chinese companies and for what reasons, including to improve their own models' abilities to solve math problems and review code.

The security agencies went as far as to say the companies are likely siphoning information from American models "with knowledge of the Chinese government" and accused the firms of intentionally skirting US companies' use restrictions to access their systems.

"China-based AI companies route distillation requests through multiple pathways to gain unauthorised access, consequently violating US AI companies' terms of use," they said in the notice.

China rejects US claims

In an emailed statement, Chinese embassy spokesperson Liu Chang rejected the US accusations, calling them a "deliberate attack on China's development and progress in the AI industry." He added that "China opposes politicising and instrumentalising trade and tech issues. Such actions will only stifle global AI advances and serve no one's interests."

Google to invest \$15 bn in Finland AI infrastructure

ESSI LEHTO
Helsinki, September 9

ALPHABET'S GOOGLE WILL invest at least €13 billion (\$15.1 billion) in AI infrastructure in nippy Nordic country Finland over the next two years, its biggest European investment, including a major deal for the supply of nuclear power.

The US firm said on Wednesday the AI infrastructure build-out would involve the development of three new data centres in the country's north, where the temperature can drop well below minus 10 degrees Celsius (14 degrees Fahrenheit) in winter.

The deal marks a major push for Google in Europe, where colder climates and stable grids in the Nordics offer an

attractive location for energy- and water-intensive data centres that use huge amounts of energy to keep their computer servers cool. Freezing air can offer an efficient alternative.

Alphabet this year increased its global investment to between \$195 billion and \$205 billion as it seeks to capture growing AI computing demand. The Finland deal also

includes a 22-year purchase agreement for up to 50% of the energy output of one of the country's two nuclear plants, its operator Fortum said separately, which would help with electricity supply.

"We call this BYOP, bring your own power," Google's president and chief investment officer Ruth Porat told reporters in Helsinki. "This is Google's first nuclear energy deal outside of the United States."

Nuclear power, as a source of large amounts of low-carbon energy, is one of the attractions Finland offers as companies including Microsoft and TikTok owner ByteDance, as well as Google seek sites for data centres while containing energy costs and meeting climate goals.

SoftBank to repay \$40 bn bridge loan for OpenAI stake

BLOOMBERG
September 9

SOFTBANK GROUP WILL repay the balance on a \$40 billion loan it signed earlier this year to finance its investment in OpenAI, the Japanese conglomerate said on Wednesday, as it moves ahead with plans to refinance that deal with longer-term debt.

The company will pay down the entire outstanding balance of \$25.9 billion on September 15, according to a statement.

The loan is SoftBank's largest-ever borrowing denominated solely in dollars, reflecting founder Masayoshi Son's determination to position his company at the center of the global AI boom.

Amazon raises \$6 bn in first sterling bond sale

AMAZON RAISED £4.25 BILLION (\$5.76 billion) from its first-ever sterling bond sale on Wednesday, slightly more than initially expected, according to a bank managing the deal, as hyperscalers rush to diversify their funding sources to finance the AI boom. Amazon saw final demand of more than £10.65 billion for the four-part deal, according to one of the lead managers.

US to ban Canadian alcohol, motorcycle, dairy imports

THE UNITED STATES banned a broad swath of Canadian alcoholic beverages, motorcycles and dairy products from import on Tuesday, sharply escalating an already acrimonious trade spat. The import bans, which go into effect on September 29 and were published on the White House's website, came after Canada's own retaliatory tariffs on US goods took effect after midnight on Tuesday.

FROM THE FRONT PAGE

US deal likely to give India tariff edge

TALKING TO THE media on the sidelines of the Global Fintech Fest in Mumbai on Wednesday, the secretary said the deal has more or less been finalised but both sides are discussing a few remaining items before it is signed at an appropriate time.

Bangladesh, Vietnam, Indonesia and Malaysia are among India's key Asian competitors in the US market.

The new US architecture is in the form of tariffs under Section 301 of the Trade Act, Section 232 of the Trade Expansion Act and other measures. These were necessitated as the US Supreme Court invalidated reciprocal tariffs that differed for each trade partner and formed the basis of negotiations on trade deals.

In February, India and the US announced the framework for the first phase of the pact, but changes in the tariff landscape after the US Supreme Court

invalidated reciprocal tariffs have led to further negotiations between the two countries.

To take the negotiations forward, Commerce and Industry Minister Piyush Goyal would visit the US in late September to attend the G-20 Trade Ministerial in Milwaukee and hold bilateral talks with United States Trade Representative (USTR) Jamieson Greer, with trade pact issues to figure in the discussions.

Despite the delay in the deal India's trade with the US has been growing. In 2025-26 despite wild swings in US tariffs on India, the country's exports to the US grew a flat 0.92% year-on-year to \$87.3 billion. In April-July, exports to the US are up 3% to \$34.4 billion.

On the increase in freight rates and some disruptions in the availability of containers due to the West Asia war and possible support to exporters to deal with

it, Agrawal said all countries are facing this issue and these costs are being passed on to buyers. "However, having said that, we are working with the exporters. First, our objective is to see that they have enough access to ships and containers so that their cargos are not stuck. Then the second option is to create how much we can ensure that their costs are competitive, the cargo times are minimal," he added.

Earlier in his address, the commerce secretary said services exports have been growing 8-10% year after year and with this pace they will grow beyond the goods exports also. For future growth in services exports diversification is required. At present 50% of services exports are from IT and IT-enabled Service (ITes) and 30% from professional services.

"Financial services trade globally is also growing very fast.

Today it is more than \$670 billion. But India's contribution to that trade export is only around \$8 billion. We are around 1.2-1.3% of the global trade. And that is where I think fintech can actually make the change," Agrawal said.

"Now it's time to see whether we can use the unique experience (in fintech) to take these services across the world. If you look at the cross-border payments market, which is today at \$180-190 billion, that is projected to go up to \$360 billion by 2032. The cards and payment market is around \$1 trillion and expected to go to \$1.5 trillion by 2028-29," he said.

So there is a real growth in these sectors by 9-10% year after year. India has also some of the experiences where it has built fintech solutions at population scale, at a scale which is second to none, he added.

NSE eyes listing before Sept 25

THE EXCHANGE IS likely to price its shares at ₹1,700-1,785 apiece, below an earlier marked range of ₹2,000-2,100, according to people familiar with the matter.

Investors who piled into NSE shares ahead of the IPO face potential losses with the reduction in the price band. The stock has largely traded above ₹1,900 on most platforms for unlisted shares as investors bet on gains post listing, according to Bloomberg.

The exchange may also reduce the stake being offered to about 5.5% of the total equity capital from the originally planned 6%, after some shareholders backed out of selling their stakes at the lower price, Bloomberg reported.

At the top of the proposed range, the sale of a 5.5% stake would raise about ₹24,300 crore, below the ₹27,900 crore raised by Hyundai Motor India in 2024 in the country's largest-ever IPO. That would value NSE at as much as ₹4.42 lakh crore compared with a previously targeted valuation of as much as ₹5.26 lakh crore.

The exchange received the final regulatory approval for its IPO last week, clearing the way for a listing nearly a decade after it first set the process in motion. The IPO will be entirely an OFS, with 10 existing shareholders collectively selling 148.9 million shares.

The sellers include State Bank of India, Mauritius-based MS Strategic — an entity linked to Morgan Stanley — Canada

Pension Plan Investment Board and Bank of Baroda. Four public-sector insurers — General Insurance Corporation of India, New India Assurance Company, National Insurance Company and United India Insurance Company — will also pare their holdings through the offer.

US freezes Cognizant filings for green cards

EMPLOYERS ARE ALSO required to meet prevailing wage requirements.

The suspension is, therefore, significant for Cognizant's US-based workforce and foreign employees seeking permanent residency through the company. Cognizant employs around 357,700 people globally, including approximately 41,600 in the US. According to a PTI report, the company had filed 3,510 H-1B visa petitions through June 2026, while 3,622 H-1B extensions were approved in fiscal 2025. Cognizant did not respond to queries on the suspension and the allegations till the time of going to press.

The company has previously faced allegations concerning its treatment of non-Indian workers. In 2024, a US court found Cognizant had engaged in discriminatory employment practices against non-Indian workers, following litigation dating back to a 2013 trial. The company had denied the allegations and said it provides equal employment opportunities.

In April, former Cognizant executive Jean-Claude Franchitti also alleged that the company had a pattern of bias against non-South Asian employees. Cognizant was subsequently ordered to pay \$8.4 million in compensatory and punitive damages in the case. Franchitti had also alleged that he signed letters relating to US visa applications that fraudulently certified minimum wage compliance for Indian workers.

Oil breaches \$100; stocks and rupee slide

"HISTORICALLY, RETAIL FUEL price revisions have occurred when the Indian crude basket averaged around \$106/barrel. Therefore, unless crude prices sustain levels well above \$110/bbl, a further increase in retail fuel prices appears unlikely," Pankaj Srivastava of Rystad Energy told FE.

Dilip Parmar, senior research analyst, HDFC Securities, noted that the relentless four-day surge in global oil prices had reignited fears of inflation pushing the rupee into defensive territory. "Swift intervention by the Reserve

Bank of India through onshore dollar sales, coupled with expectations of central bank sell-buys swaps, helped the local currency trim its early losses," Parmar said.

Foreign portfolio investors who had turned buyers in August have sold close to \$750 million worth of shares in September so far. "Today's market sell-off reflects a combination of rising geopolitical risks, crude oil rising above the \$100-per-barrel mark and renewed FPI selling," said Vikram Kasat, chief business officer — advisory and dealing,

PL Capital.

The benchmark indices have declined in seven of the past eight sessions. During this period, the Sensex lost 3.24% while the Nifty fell 3.08%. Investors' wealth eroded by ₹8.62 lakh crore over these eight sessions, including ₹2.01 lakh crore on Wednesday alone. The total market capitalisation of BSE-listed companies stood at ₹484.20 lakh crore on Wednesday.

The broader indices, however, outperformed the benchmarks, with the BSE Midcap falling 2.06%, while the BSE

Smallcap gained a modest 0.34%.

All sectoral indices have declined over the eight-session period. The IT sector led the losers with a 7.6% fall, followed by auto, realty, consumer durables and financial services.

Around 2,400 stocks, or 60%, out of 4,100 actively traded stocks declined over the eight sessions. Barring three, all Sensex constituents declined, while 42 of the 50 Nifty stocks fell during the period. Indian benchmarks were the worst performers among major Asian equity indices on Wednesday.

Market experts observed that the spike in oil prices was expected to drive up prices of a range of imported good, especially oil derivatives, which could stoke inflation and results in a rise in interest rates.

The last price revision for auto fuels was undertaken on May 25, when state-run OMCs raised petrol and diesel prices, taking the cumulative increases since May 15 to around ₹7.5/litre. Since then, prices have remained unchanged, with petrol at ₹102.12/litre and diesel at ₹95.20/litre in New Delhi.

PUSH FOR GREATER MANAGEMENT CONTROL, GOVERNANCE RIGHTS

SLA to seek tougher terms for fresh Air India funding

REUTERS
Hong Kong, September 9

SINGAPORE AIRLINES, BACKED by state-owned investor Temasek, is expected to seek greater influence over management and stronger governance rights before approving a capital injection into Air India, said two people familiar with the matter.

The proposed conditions, which would be negotiated with Air India's majority owner Tata Sons, could include greater board voting power and requirements for the Indian carrier to narrow its losses, the people said. Temasek, Singapore Airlines' majority shareholder, would neither provide the capital itself nor intervene in the carrier's decisions concerning Air India, they added.

The discussion of conditions comes after Reuters last month reported Air India was seeking about \$1.5 billion in fresh equity from its owners.

Two other people said Tata had approved a \$1.1 billion infusion, representing its pro-rata share. Singapore Airlines holds the remaining 25.1% stake.

All four of the people declined to be identified as the information is not yet public.

In a statement, Singapore Airlines said its board would carefully evaluate any request

TIGHTER CONDITIONS

■ Singapore Airlines will weigh funding against Air India strategy, cash flow and capital needs

■ The proposed conditions would be negotiated with Air India's majority owner Tata Sons, sources say

■ Conditions may include greater board-level voting power and measures to narrow Air India's losses

■ Air India last month was looking to raise around \$1.5 bn in fresh equity from its owners

■ Tata Sons had approved a \$1.1-billion infusion, representing its pro-rata share

■ Air India posted \$2.33 bn loss in FY26, which weighed on SIA's profits

for additional capital, taking into account Air India's business strategy, the group's operating cash flow and its other capital requirements.

Temasek declined to comment on "speculation with respect to the points on Temasek." Tata and Air India also did not respond to requests for comment.

Limited influence

The push for tougher terms reflects growing pressure on Singapore Airlines to justify increasing its investment in Air India, which posted a \$2.33 billion loss in the financial year ended March, weighing directly on the Singaporean carrier's profits.

Singapore Airlines has lost money in several past overseas

investments, and Tata said in July that Air India's turnaround could take up to a decade. The Indian carrier has appointed former Ethiopian Airlines head Tewolde Gebremariam as its new CEO to replace former Singapore Airlines executive Campbell Wilson.

Singapore Airlines has limited formal influence over Air India. Under a 2022 merger agreement that folded its 49%-owned Indian carrier Vistara into Air India, it received a single board seat, taken up by its CEO Goh Choon Phong. Its stake of more than 25% does, however, give it the power under Indian company law to block special resolutions covering major corporate matters, including mergers, share buybacks and voluntary wind-

ing up.

Air India's funding request drew a call from an opposition lawmaker in Singapore for Temasek's funds not to be used to support the Indian airline.

Singapore Airlines said on Tuesday its investments in India will continue to be funded by its internal resources, noting that it had \$510.48 billion (\$8.29 billion) in cash reserves and \$53.24 billion in undrawn credit lines as of end-June. Temasek last month publicly backed Singapore Airlines' investment in the Indian carrier, saying it took a long-term view of the decision. Singapore's Senior Minister K Shanmugam said on Saturday any decision to invest in Air India lay with Singapore Airlines.

SC sends Cairn's ₹5.25-crore Sebi penalty case back to SAT

PRESS TRUST OF INDIA
New Delhi, September 9

THE SUPREME COURT on Wednesday remanded back to Securities Appellate Tribunal (SAT) a matter in which markets regulator Sebi had imposed a penalty of ₹5.25 crore on Cairn India, a part of Vedanta, for making a misleading announcement regarding the buyback of shares in 2014.

A bench of Justices J B Pardiwala and K V Viswanathan said the scrutiny of conflicting trading data, and the determination of which of the two versions is to be accepted is an exercise that properly belongs to SAT.

A buyback of shares is a corporate action where a company repurchases its own shares from existing shareholders.

"Having perused the impugned order, we find that SAT does not appear to have engaged with the discrepancy between the investigation report and the NSE's letter at all.

"Since this is a material infirmity going to the evidentiary root of the Adjudicating Officer's order, one which SAT itself never examined or adjudicated upon, we are of the view that the matter ought to be remanded to SAT so as to enable it to render a considered finding on this specific aspect, upon a proper examination of the record," the bench said.

The top court directed SAT to first determine, upon a

■ SAT failed to examine Sebi-NSE data discrepancies, says SC

proper scrutiny of the trading data placed before it by both parties including the data furnished by the NSE, as to which version of the historical trading data is free from discrepancy and accurately reflects the true position.

"Upon doing so, SAT shall record specific findings on each of the instances of discrepancy noted hereinabove, as also any other such discrepancy that may be brought to its notice," the bench said.

"In exercise of its powers under Section 15U(2) of the Sebi Act, SAT may summon and examine on oath the officers of the respondent company, the merchant bankers engaged by it and/or any other person acquainted with the facts of the matter..." it added.

The Securities and Exchange Board of India (Sebi) had imposed a penalty of ₹5.25 crore on Cairn India for making a misleading

announcement regarding the buyback of shares in 2014.

In addition, the regulator levied a fine of ₹15 lakh each on P Elango, who was the CEO and director of Cairn, Aman Mehta, who was the director on the company's board, and Neeraj Sharma, who was director (risk assurance) and company secretary, the market regulator had said.

These three officials had signed the public advertisement regarding the buyback in January 2014 and facilitated the company in making the misleading announcement. After a detailed investigation, Sebi found that Cairn did not place adequate buy orders despite the availability of adequate sell orders at NSE.

The regulator had further noted that Cairn was not able to fulfil at least 50 % of the buyback issue, despite the conditions were favourable to the company.

TCS launches India's first fully automated facility in Pune

FE BUREAU
Mumbai, September 9

TATA CONSULTANCY SERVICES (TCS) has launched what it calls India's first "lights-out" factory lab at its Sahyadri Park campus in Pune, as the IT services company looks to help manufacturers use artificial intelligence and robotics to automate factory operations.

A "lights-out" factory refers to a manufacturing facility where automated systems can run production with little human intervention.

The TCS Industrial Automation & Engineering Lab - Lights-Out Factory will demonstrate how a manufacturing assembly line can operate with minimal human intervention by combining AI, robotics, digital twins, factory control systems and real-time operational data.

The facility will simulate how self-optimising factories can automate operations using the TCS Human + AI Service Autonomy Model.

It houses a fully robotic battery pack assembly line and is designed to help manufacturers test and develop automation systems before deploying them in actual factories.

TCS said the lab will allow customers to explore different industrial scenarios, assess whether new technologies are suitable for production and reduce deployment risks.

Mumbai office realty to clock double-digit growth in 4 yrs

MUMBAI'S OFFICE REAL estate market is projected to record double-digit growth between 2027 and 2030, according to a new report.

Office demand is projected to grow at a compound annual growth rate (CAGR) of 12-15% during the period. Residential sales and industrial and logistics demand are expected to expand at CAGRs of 6-8% and 5-8%, respectively, according to a report released at the CII Real Estate Summit 2026 in Mumbai on Wednesday. Office remains the city's largest commercial segment by volume, with average annual demand of nearly 11.8 million sq ft between 2022 and 2026.

Total office stock is projected to grow 1.3 times by 2030. Mumbai accounted for nearly 16% of India's office inventory as of H1 2026.

"By 2030, Mumbai has the opportunity to emerge as one of the world's major economic engines," said Anshuman Magazine, chairman and CEO-India, South-East Asia, Middle East & Africa, CBRE.

Asepto sets up plant in Egypt as gateway to global markets

SUGANDHA MUKHERJEE
Ain Sokhna (Egypt), September 9

FLEXIBLE PACKAGING AND solutions company Uflex's aseptic liquid packaging business, Asepto, expects its newly-established manufacturing facility at Ain Sokhna, Egypt, to serve as a strategic gateway to six major international markets. The plant will reach full utilisation of its 12 billion-pack annual capacity by 2030.

The \$126-million greenfield facility, located on the Gulf of Suez close to the Suez Canal, is currently undergoing customer trials, with commercial production likely to begin by end of the calendar year.

"The plant is expected to operate at around 30% utilisation in the first year, rising to 70% in the second year and reaching 100% by 2030," said Ashwani Kumar Sharma, president and CEO of Uflex's liquid packaging business, on Wednesday. The 30-acre facility is Asepto's second manufacturing location after its 72-acre facility in Sanand, Gujarat. B

The difference in footprint reflects the higher degree of

ASHWANI KUMAR SHARMA, CEO, UFLX'S LIQUID PACKAGING OPS

A combination of trade deals & strategic location makes Egypt an exciting market

automation and integration built into the new facility, according to Sharma. The Ain Sokhna plant brings printing, inspection, extrusion lamination, slitting, material handling and final packaging into a single manufacturing operation, with equipment sourced from Germany, Austria, the Netherlands and Italy. Asepto is positioning Egypt as a single manufacturing node connecting Europe, the Commonwealth of Independent States (CIS), Africa, the Gulf

Cooperation Council (GCC) and West Asia, Latin America and North America.

The company is also pointing to Egypt's extensive network of free-trade agreements as an advantage for exports. These include preferential market access through the Common Market for Eastern and Southern Africa (COMESA), Greater Arab Free Trade Area (GAFTA) and the African Continental Free Trade Area (AfCFTA), as well as trade arrangements with markets covered by the Agadir Agreement, Turkey, MERCOSUR (Southern Common Market) and EFTA (European Free Trade Association).

"Egypt is in close proximity to the GCC, MENA and European markets. The total market size across these regions is \$25-26 billion and is likely to double in approximately eight years. Growth in this region is fantastic. We also have excellent trade agreements that give us access to these markets from Egypt. So, it is the combination of trade deals and Egypt's strategic location that makes it an exciting market..." said Sharma.

The ELC was listed on the Vadodra Stock Exchange (VSE), Ahmedabad Stock Exchange (ASE) and Madras Stock Exchange (MSE), collectively termed as Regional Stock Exchanges. Post the de-recognition / exit of Regional Stock Exchanges by SEBI, the ELC was shifted to the **Dissemination Board ("DB")** of the BSE Limited ("BSE"). SEBI vide the Exit Circular had stipulated the procedure for exit of Exclusively Listed Companies ("ELCs") from the DB. In terms of clause (i) of Annexure A of the Exit Circular, the Acquirer Shareholders have appointed Manish Kumar Bhagat, a IBBI Registered Valuer ("**Independent Valuer**") for valuation of Equity Shares of ELC and related services. The Independent Valuer after taking into account the applicable valuation methodologies has issued his valuation report dated July 27, 2026, and determined the Fair Value of one (1) Equity Share of ELC at Rs. 29/- only (Rupees Twenty Nine only). In the view of the above, the Acquirers have decided to offer exit to the Public Shareholders of **Tirupati Shelters Limited** at price of Rs 29/- only (Rupees Twenty Nine only)

The ELC has appointed Marwadi Chandarana Intermediate Brokers Private Limited, a SEBI registered Category I Merchant Banker as the Merchant Banker to carry out the Exit Offer Process.

Further, SEBI vide its letter MRD/OW/DSA/2017/17463/1 dated July 25, 2017 as communicated to the BSE and NSE ("SEBI Letter") inter-alia permitted that Public Shareholders / Investors who are willing to remain as Shareholders of the Company and do not want an exit may be allowed to do so and the Designated Stock Exchange (in the present case BSE) may obtain an undertaking from the investors who do not want an Exit. Consequently the Exit Obligation of the Acquirers will be reduced accordingly. In terms of the above-mentioned SEBI Letter, Public Shareholders who are willing to remain as shareholders of the ELC and do not want an exit shall send an undertaking to this effect in the format available at the website of Merchant Banker www.marwadichandranagroup.com either by registered post / speed post / courier at their own risk or by hand delivery at the Registered office of the Company situated at Green Park, Tirupati Nagar, Tokarkhada, Silvassa – 396230, India, within 15 days of the publication of this **Exit Offer Public Announcement ("PA")** i.e. on or before the closure of business hours on September 25, 2026.

Post the expiry of the aforementioned 15 days period, the Acquirers will initiate the process of Exit Offer to those Public Shareholders who have not opted to continue as Shareholders of the ELC ("**Remaining Public Shareholders**"). The Acquirers undertake that the offer Letter containing the relevant details relating to the Exit Offer including dates of Opening and Closing of Exit Offer, Offer Price, documents required to be submitted for participating in the Exit Offer shall be sent to the Remaining Public Shareholders for participating in the Exit Offer.

The Exit Offer shall initially remain open for a period of **5 working days**, commencing from **October 05, 2026** and closing on **October 09, 2026** ("Initial Exit Offer Period"), during which the Remaining Public Shareholders may tender their Equity Shares in accordance with the terms and conditions set out in the Exit Offer Letter. The Acquirers shall remain liable to provide an exit opportunity to those Remaining Public Shareholders who do not tender their Equity Shares during the Initial Exit Offer Period for a period of one year after the closure of the Exit Offer.

Accordingly, any Remaining Public Shareholder who does not participate in the Initial Exit Offer Period shall continue to have the right to tender their Equity Shares to the Acquirers at the same Exit Price of **₹29/- (Rupees Twenty-Nine only) per Equity Share** for a period of **one (1) year from the date of completion of the Initial Exit Offer** ("Continuing Exit Period"), in accordance with the applicable provisions of the Exit Circular and the applicable BSE Guidelines.

In accordance with the Exit Circular read with the Circulars / Notices issued by BSE ("BSE Guidelines"), the Acquirers will open an Escrow Account with a Scheduled commercial Bank and deposit an amount equal to / more than 100% of the Total Consideration (Offer Price Equity Shares * Remaining Public Shareholders) payable under the Exit Offer atleast one day before the dispatch of the Exit Offer Letter

Shareholding Details: As on the date of this PA, the paid-up share capital of the Company is Rs 2,63,26,000 (Rupees Two Crores Sixty-Three Lakhs Twenty-Six Thousand Only) consisting of 26,32,600 Equity Shares of Rs.10/- each (Rupees Ten Only). RISK TO INVESTORS

For details, refer to section titled "Risk Factors" on page 21 of the RHP.

- 1. Geographical Concentration Risk:** For Fiscals 2026, 2025 and 2024, 96.09%, 95.33% and 95.75% of our revenue from operations, respectively, was derived from India, Europe and United States collectively. An economic slowdown in these geographies/countries or tightening of laws or regulations may have an adverse impact on our business, financial condition, cash flows and results of operations.
- 2. End-industry concentration risk:** Our business is substantially dependent on the e-bike and two-wheeler industries in India and overseas. Any adverse changes in the conditions affecting these industries can adversely impact our business, results of operations, cash flows and financial condition.
- 3. Supplier Risk:** We depend on a limited number of suppliers for the

procurement of raw materials for our production. Any interruption in the supply of raw materials could adversely affect our business, financial condition, results of operations and cash flows. The table below provides the cost of raw materials consumed sourced from our top one, top five and top 10 suppliers in the years indicated:

Supplier	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Cost of Raw Materials (₹ million)	Percent-age of Total Expe-nses (%)	Cost of Raw Materials (₹ million)	Percent-age of Total Expe-nses (%)	Cost of Raw Materials (₹ million)	Percent-age of Total Expe-nses (%)
Top Supplier*	365.80	3.17%	324.44	3.03%	296.10	2.80%

...continued from previous page.

Supplier	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Cost of Raw Materials (₹ million)	Percentage of Total Expenses (%)	Cost of Raw Materials (₹ million)	Percentage of Total Expenses (%)	Cost of Raw Materials (₹ million)	Percentage of Total Expenses (%)
Top 5 Suppliers*	1,410.63	12.23%	1,403.56	13.09%	1,393.24	13.15%
Top 10 Suppliers*	2,405.32	20.85%	2,339.32	21.82%	2,278.95	21.52%

* Suppliers may vary for each Fiscal. Our top 10 suppliers/vendors did not contribute to more than 50% of the total cost of raw materials consumed for Fiscal 2026, 2025 and 2024 on a consolidated basis.

4. **Business Risk:** We are subject to stringent quality, tolerance and delivery requirements from customers. Failure to comply may result in recalls, warranty claims, loss of business share, or cancellation order.
5. **Customer Concentration Risk:** Our business largely depends on our top 10 customers which contributed 72.89%, 78.03% and 76.96% of our revenue from operations in Fiscals 2026, 2025 and 2024. The loss of any of these customers could have an adverse effect on our business, results of operations, financial condition and cash flows. The following table sets forth our revenues from our top ten customers in the periods indicated:

Cate- gory	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Revenue from Customers (₹ million)	Percentage of Revenue from Operations (%)	Revenue from Customers (₹ million)	Percentage of Revenue from Operations (%)	Revenue from Customers (₹ million)	Percentage of Revenue from Operations (%)
Top 10 Customers	8,661.40	72.89%	8,501.96	78.03%	8,191.86	76.96%

Note: Our top 10 customers are based on the revenue contribution of the relevant customer in the relevant Fiscals, as the case maybe

6. **Technology and Product-transition Risk:** We may not be able to anticipate and respond swiftly to changing technological and market trends, as well as to develop new products aligned with customer demands in the automotive sector, which could have an adverse impact on our financial condition
7. **Competition Risk:** We compete with established global players (ZF Friedrichshafen AG, Musashi Co. Ltd., BorgWarner Inc., GKN PLC, Bafang, Mahle, Shimano Inc, Rohloff, Badve Group, Sandhar Technologies, Magnum) in the powertrain solutions industry. Inability to compete effectively could adversely affect our business, financial condition, results of operations and cash flows.
8. **Hazardous operations Risk:** Our manufacturing operations involve

hazardous activities (storage of petroleum/compressed gases, chemical handling), which could result in accidents, operational suspension, or civil/criminal liability.

9. **Brand and Reputation Risk:** Our business depends on maintaining brand reputation and product quality perception and any failure to do so could adversely affect customer relationships and financial performance.
10. **Operating Risk:** We operate six manufacturing facilities (four in India – three in Ludhiana, Punjab and one in Gautam Buddha Nagar, UP; one each in United Kingdom and Thailand), with two more under construction. Any shutdown or disruption at these facilities could reduce sales and adversely affect our operations
11. The price to earnings ratio based on diluted EPS for Fiscal 2026 for our company at the upper end of the price band is 73.68 times. The average industry price-to-earnings ratio is 50.20.
12. The average cost of acquisition of Equity shares for Selling shareholders ranges from ₹0.03* per Equity share to ₹10.07 per Equity share and the offer at upper end of the Price Band is ₹84 per Equity Share.

*The weighted average cost of acquisition is ₹0.027 per Equity Share and has been rounded to ₹0.03.
13. Weighted Average Return on Net Worth for Fiscals 2026, 2025 and 2024 is 7.58%.
14. Weighted average cost of acquisition of all Equity Shares transacted in the last one year, 18 months and three years preceding the date of the RHP by the Promoters, Promoter Group, Selling Shareholders and Shareholders entitled with the right to nominate directors or other rights

BASIS FOR OFFER PRICE

The “Basis for Offer Price” on page 126 of the RHP has been updated with the above Price Band. Please refer to the website of the BRLMs: www.icicisecurities.com, www.damcapital.in, www.jml.com for the “Basis of Offer Price” updated for the above Price Band. (You may scan the QR code for accessing the website of ICICI Securities Limited)

The Price Band has been and Offer price will be determined by our Company, in consultation with the Book Running Lead Managers, on the basis of assessment of market demand for the Equity Shares offered through the Book Building Process and on the basis of quantitative, operational and qualitative factors as described below. The face value of the Equity Shares is ₹10 each and the Offer Price is [●] times the Floor Price and [●] times the Cap Price, and Floor Price is 7.9 times the face value and the Cap Price is 8.4 times the face value. Investors should also see “Risk Factors”, “Summary of Financial Information”, “Our Business”, “Restated Consolidated Financial Information”, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 21, 66, 253, 347, and 446, respectively, to have an informed view before making an investment decision.

Qualitative Factors

Some of the qualitative factors and our strengths which form the basis for computing the Offer Price are as follows:
Among India’s Leading Solutions Provider to Global E-Mobility Industry backed by Diversified Product and Service Offerings

We are one of India’s leading solutions providers to global e-mobility industry (Source: CRISIL Report) with our revenue from sales to e-mobility industry being ₹2,732.90 million, ₹1,755.92 million and ₹1,280.85 million, accounting for 23.00%, 16.12% and 12.03%, respectively of our revenue from operations for Fiscal 2026, 2025 and 2024, respectively. We are among the few companies globally that design high-performance transmission systems capable of handling tough torque needs while keeping components lightweight and meeting noise, vibration and harshness (“NVH”) requirements of electric vehicles.

Growing Market Presence in the Electric Bikes and Premium Two-Wheelers Segments

Over the last five years, we have expanded our market presence across automotive segments and have grown our business with premium two-wheeler OEMs globally. In the premium two-wheeler segment, we have partnered with OEMs such as BMW, Ducati and a leading American two-wheeler OEM among others, for Powertrain Solutions covering design, development, prototyping, validation and high-volume manufacturing. The global e-bike market is projected to reach 12.5 million to 14.5 million units by 2031 at a CAGR of 6% to 9% (from 2024 to 2031). E-bike sales in Europe are expected to grow at a CAGR of 5% to 8%, reaching 8 to 10 million units by 2031, while the U.S. market are expected to grow at a CAGR of 16% to 19%. The global two-wheeler industry is expected to witness a significant acceleration in electrification through 2031, with electric motorcycles and scooters gaining share across major markets. EV penetration in the motorcycle segment is projected to increase from 2.0% in 2025 to 10.5% to 12.5% by 2031, reflecting a robust CAGR of 34% to 38%, supported by improving battery technology, expanding charging infrastructure, and growing government support for electric mobility. Advancements in battery technology and design have made e-bikes a serious contender for commuting, recreation and utility cycling. (Source: CRISIL Report) The contribution of e-mobility to our sales accounted for 23.00% of our revenue from operations in Fiscal 2026.

Longstanding Relationships with Premier Global Original Equipment Manufacturers and Expertise in Delivering Solutions

We have a diverse and premium customer base, serving clients both in India and internationally. In the automotive sector, we collaborate with global two-wheeler OEMs including BMW, Ducati, and Hero MotoCorp; players from motor sport industries such as Formula Motorsport and HWA Engineering; global commercial vehicle and off-road OEMs such as Escorts, and envivo. Our customers in the non-automotive segment for both electric and non-electric powertrain and transmission systems include global OEMs such as B&S, and various e-powertrain applications for supercar manufacturers.

Our customer portfolio has been strategically diversified to reduce reliance on domestic customers. The table below provides revenue from operations generated from domestic customers as a percentage of revenue from operations for Fiscal 2026, 2025 and 2024:

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of Revenue from operations (%)	Amount (₹ million)	Percentage of Revenue from operations (%)	Amount (₹ million)	Percentage of Revenue from operations (%)
Revenue from operations from India	6,968.24	58.64%	6,434.91	59.06%	6,249.85	58.72%

Advanced Infrastructure with Geographically Diverse Operations

Our operational strength extends worldwide as we strategically establish manufacturing and assembly facilities to meet diverse market and customer demands. We believe that strategic geographic dispersion of our G&T facilities across India, the United Kingdom, and Thailand allows us to be in close proximity to our customers and offer cost competitive solutions.

We have generated significant revenues from international markets. The table below sets forth our revenue from operations from international customers:

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of Revenue from operations (%)	Amount (₹ million)	Percentage of Revenue from operations (%)	Amount (₹ million)	Percentage of Revenue from operations (%)
Revenue from operations from international customers	4,915.27	41.36%	4,461.02	40.94%	4,394.01	41.28%

Strong Research and Development Capabilities and Long-Term Partnerships

Over the years, we have expanded our capabilities to include design and engineering.

The table below provides our research and development expenses as a percentage of revenue from operations and as a percentage of total expenses for Fiscal 2026, 2025 and 2024:

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of Revenue from operations (%)	Amount (₹ million)	Percentage of Revenue from operations (%)	Amount (₹ million)	Percentage of Revenue from operations (%)

Quantitative factors

Some of the information presented below relating to our Company is derived from the Restated Consolidated Financial Information. For details, see “Restated Consolidated Financial Information” beginning on page 347 of the RHP.

Some of the quantitative factors which may form the basis for computing the Offer Price are as follows:

A. Basic and Diluted Earnings Per Equity Share (“EPS”) (face value of each Equity Share is ₹10):

Fiscal/Period Ended	Basic EPS (in ₹)	Diluted EPS (in ₹)	Weight
March 31, 2024	0.36	0.35	1
March 31, 2025	0.67	0.66	2
March 31, 2026	1.15	1.14	3
Weighted Average	0.86	0.85	

Notes:

- i) Weighted average = Aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x Weight) for each year/Total of weights.
- ii) Basic Earnings per Equity Share (₹) = Net profit after tax attributable to owners of the Company, as restated / Weighted average no. of Equity Shares outstanding during the year.
- iii) Diluted Earnings per Equity Share (₹) = Net Profit after tax attributable to owners of the Company, as restated / Weighted average no. of potential Equity Shares outstanding during the year.
- iv) Earnings per Share calculations are in accordance with the notified Indian Accounting Standard 33 ‘Earnings per share’.
- v) The figures disclosed above are based on the Restated Consolidated Ind-AS Financial Statements of the Company.

B. Price/Earning (“P/E”) ratio in relation to Price Band of ₹79 to ₹84 per Equity Share:

Particulars	P/E at the Floor Price (number of times)	P/E at the Cap Price (number of times)
Based on basic EPS for year ended March 31, 2026	68.70	73.04
Based on diluted EPS for year ended March 31, 2026	69.30	73.68

Notes:

- i) P/E ratio = Price per equity share / Earnings per equity share.

C. Industry Peer Group P/E ratio

Particulars	Industry Peer P/E	Name of the Company
Highest	76.50	Sona BLW Precision Forgings
Lowest	17.68	CiE Automotive India
Average	50.20	

The industry high and low has been considered from the industry peer set provided later in the section titled “Basis for Offer Price Comparison of Accounting Ratios with Listed Industry Peers” beginning on page 128 of the RHP.

The industry P/E ratio mentioned above is computed based on the closing market price of equity shares on BSE on September 07, 2026 divided by the Diluted EPS as on for the financial year ended March 31, 2026.

D. Return on Net worth (“RoNW”)

Fiscal/Period Ended	RoNW (%)	Weight
March 31, 2024	4.42	1
March 31, 2025	7.74	2
March 31, 2026	8.53	3
Weighted Average	7.58	

Notes:

- i) Weighted average = Aggregate of year-wise weighted RoNW divided by the aggregate of weights i.e. (RoNW x Weight) for each year/Total of weights.
- ii) Return on Net Worth (%) = Net Profit after tax, as restated / Restated net worth at the end of the year/period.
- iii) Net-worth: Net worth is the aggregate value of the paid-up share capital and all reserves created out of the profits, securities premium account, compulsory convertible cumulative preference shares, share application money pending allotment, demerger adjustment deficit account, shares options outstanding and debit or credit balance of profit and loss account as per the audited balance sheet, but does not include foreign currency translation reserve, capital reserve.
- iv) The figures disclosed above are based on the Restated Consolidated Ind-AS Financial Statements of the Company.

E. Net Asset Value (“NAV”) per Equity Share

Particulars	Amount (₹)
As on March 31, 2026	12.72
After the completion of the Offer	
- At the Floor Price	23.60
- At the Cap Price	23.83
Offer Price ¹	[●]

¹ To be updated prior to filing of the Prospectus with RoC

Notes:

- i) Net asset value per share represents Net assets divided by total number of shares at the end of the year.
- ii) Net assets is total assets minus current liability minus non-current liability minus capital reserve (including non-controlling interest reserve) minus foreign currency translation reserve minus non-controlling interest. Total number of shares at the end of the year is the number of equity shares outstanding at the end of the year.
- iii) Net assets calculation ‘after the completion of offer’ is based on (Net assets as on 31st March 2026 plus Amount received on Fresh issue of shares)/ (Pre-equity share capital as on the date of RHP plus Fresh issue of shares at Floor Price and Cap Price respectively).

F. Comparison of accounting ratios with Listed Industry Peers

Any under-subscription in the portion amounting to 6.67% reserved for Life Insurance Companies and Pension Funds may be allocated to domestic Mutual Funds. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (other than the Anchor Investor Portion) (the "Net QIB Portion"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only, subject to valid Bids being received at or above the Offer Price, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to QIB Bidders (other than Anchor Investors) including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is not less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining Net QIB Portion for proportionate allocation to all QIBs. Further, not less than 15% of the Offer shall be available for allocation to Non-Institutional Bidders (out of which one-third of the portion available to Non-Institutional Bidders shall be reserved for Bidders with an application size of more than ₹20.00 million and up to ₹1.00 million and two-thirds shall be reserved for Bidders with an application size of more than ₹1.00 million, provided that the unsubscribed portion in either of the aforementioned sub-categories may be allocated to Bidders in the other sub-category) and not less than 35% of the Offer shall be available for allocation to Retail Individual Bidders in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. All Bidders, other than Anchor Investors, are required to participate in the Offer by mandatorily utilising the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA Account and UPI ID in case of UPI Bidders, as applicable, pursuant to which their corresponding Bid Amounts will be blocked by the or by the Sponsor Banks under the UPI Mechanism, as the case may be, to the extent of respective Bid Amounts. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For further details, see "Offer Procedure" on page 513 of the RHP.

Bidders/Applicants should ensure that DP ID, PAN and the Client ID and UPI ID (for UPI Bidders bidding through UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID and UPI ID available (for UPI Bidders bidding through the UPI Mechanism) in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk.

Investors must ensure that their PAN is linked with Aadhaar and are in compliance with the notification issued by Central Board of Direct Taxes notification dated February 13, 2020 and read with press releases dated June 25, 2021, September 17, 2021 and March 28, 2023 and any subsequent press releases in this regard.

NOTICE OF THE 39th ANNUAL GENERAL MEETING AND REMOTE E- VOTING INFORMATION

Notice is hereby given that the 39th Annual General Meeting (AGM) of the Company will be held on Wednesday, September 30, 2026, at 11.30 AM (IST), through Video Conferencing (VC) / Other Audio Visual Means (OAVM) in compliance with the applicable provisions of the Companies Act, 2013 and the Rules made thereunder with Circulars issued by Ministry of Corporate Affairs and the Securities Exchange Board of India and other applicable circulars in this regard to transact the business as set forth in the Notice of the AGM.

In compliance with the above directions, the Notice of the AGM along with the Annual Report for the Financial Year 2025-26 have been sent through electronic mode on September 8, 2026 only to such Members whose email addresses are registered with their respective Depository Participants (DPs), in case shares are held in dematerialised form or the Company's Registrar and Share Transfer Agents (RTA) viz., Cameo Corporate Services Limited in case shares are held in physical mode to all shareholders whose email addresses are registered / available with the Company.

In terms of Section 108 of the Companies Act, 2013 (the Act) read with Rule 20 of the Companies (Management and Administration) Rules, 2014, (the Rules) as amended from time to time and Regulation 44 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (Listing Regulations), the Company is providing its members the facility to cast their votes, in the business terms proposed in the Notice of AGM, electronically from a place other than the venue of AGM (remote e-voting).

The Company has engaged the services of Central Depository Services India Limited (CDSL) as the Agency to provide e-voting facility. The remote e-voting facility shall commence on Sunday, September 27, 2026, at 9.00 a.m. (IST) and ends on Tuesday, September 29, 2026, at 5.00 p.m. (IST). The remote e-voting facility shall not be available beyond the said time and the module shall be disabled by CDSL for voting thereafter. Once the vote on a resolution is cast by the member, he/she shall not be allowed to change it subsequently or cast vote again. The facility for voting through electronic voting system shall also be made available on the day of the AGM i.e. Wednesday, September 30, 2026 and the members participating in the AGM through VC / OAVM, who have not already cast their vote by remote e-voting shall be able to exercise their right during the meeting. The members who have cast their vote by remote e-voting prior to the meeting may also attend the AGM through VC / OAVM but shall not be entitled to cast their vote again during the meeting.

A person, whose name appears in the Register of Members / Beneficial Owners as on the cut-off date, i.e., Wednesday, September 23, 2026, only shall be entitled to avail the facility of remote e-voting / voting at the Meeting. Any person who becomes member of the Company after dispatch of the Notice of the Meeting and holding shares as on the cut-off date may obtain user ID and password by sending an email to helpdesk.evoting@cdslindia.com with a copy to investor@waterbaseindia.com. The detailed procedure for obtaining User ID and password is provided in the Notice of AGM. However, if the member is already registered with CDSL for e-voting, then he/she can use his/her existing user ID and password for casting their vote.

Members may note that the notice of 39th AGM and the Annual Report for FY 2025-26 are also available on the Company's website www.waterbaseindia.com as well as on the website of the Stock Exchange (BSE) and E-Voting agency CDSL i.e. www.evotingindia.com also.

All grievances connected with the facility for voting by electronic means may be addressed to Mr. Rakesh Dalvi, Sr. Manager, CDSL, A Wing, 25th Floor, Marathon Futurex, Mafatlal Mill Compounds, N M Joshi Marg, Lower Parel (East), Mumbai - 400013 or send an email to helpdesk.evoting@cdslindia.com or Toll Free No: 1800 21 09911

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST ONLY RELY ON THE INFORMATION INCLUDED IN THE RED HERRING PROSPECTUS AND THE TERMS OF THE OFFER, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE OFFER AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THIS PRICE BAND ADVERTISEMENT FOR THE OFFER AND SHOULD NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION, MEDIA ARTICLES / REPORTS IN RELATION TO THE VALUATION OF OUR COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE BRLMS.

In accordance with the recommendation of the committee of Independent Directors of our Company, pursuant to their resolution dated August 09, 2026, the above provided Price Band is justified based on quantitative factors/KPIs disclosed in the 'Basis for the Offer Price' section on page 183 of the RHP vis-a-vis the weighted average cost of acquisition ("WACA") of primary and secondary transaction(s), as applicable, disclosed in 'Basis for the Offer Price' section on page 183 of the RHP and provided below in the advertisement.

RISK TO INVESTORS

For details, refer to section titled "Risk Factors" on page 27 of the RHP

1. **Dependence on retailing mobile phone:** We derive a significant portion of our revenue from operations from retailing mobile phones amounting to ₹20,261.05 million, ₹13,995.17 million and ₹10,656.62 million constituting 86.18%, 87.58% and 88.31% of our revenue from operations, in Fiscals 2026, 2025 and 2024, respectively. Factors such as an economic downturn, decrease in disposable income, decline in consumer confidence, fluctuations in exchange rates, increase in interest rates, inflation or taxes may affect consumer spending in the mobile phone industry (including the pre-owned smartphone industry) and the industries for accessories and other electronic items. Any such factor that impacts or reduces consumers' ability to purchase our products could adversely impact our operations.

2. **Dependence on top 10 suppliers:** We are significantly reliant on our arrangements with our top 10 Suppliers for procuring mobile phones, accessories and other electronic items. The amount of purchase of traded goods from our top 10 Suppliers was ₹17,194.29 million, ₹13,184.35 million and ₹9,977.05 million constituting 79.09%, 89.42% and 88.38% of our purchase of traded goods during Fiscal 2026, Fiscal 2025 and Fiscal 2024, respectively. As we typically do not enter into long-term or exclusive arrangements with our Suppliers, any failure or delay on

their part in supplying products, or the loss of business from one or more of them, could adversely impact our profit margins, competitive position and operations.

3. **Geographic concentration risk:** We derive a significant portion of our revenue from operations from our stores in the state of Maharashtra. As of March 31, 2026, we had 458 stores in Maharashtra constituting 91.05% of our total stores. During Fiscal 2026, Fiscal 2025 and Fiscal 2024, we derived ₹20,945.65 million, ₹14,752.63 million and ₹11,352.16 million constituting 89.09%, 92.32% and 94.07% of our revenue from operations from Maharashtra, respectively. Accordingly, we are subject to risks arising from changes in political, social and economic conditions of Maharashtra which could have an adverse effect on our business, financial condition, result of operation and cash flow.

4. **Franchisee model dependence risk:** We primarily focus on our COFO Model and FOFO Model which have cumulatively contributed ₹17,442.64 million, ₹12,468.36 million and ₹9,387.11 million constituting 74.19%, 78.03% and 77.79% of our revenue from operations during Fiscal 2026, Fiscal 2025 and Fiscal 2024, respectively. We depend on our franchisee partners to operate these stores, and a total of 26 stores under the COFO and FOFO Models were closed during Fiscal

Continued on next page...

...continued from previous page.

2026. If our COFO and FOFO Models are not successful in the future, or do not grow at the same rate or at all, or if stores operated under these models are closed, then our business growth, prospects and operations may be adversely impacted.
5. **Working capital requirements risk:** Our business is working capital intensive, primarily on account of inventory required to be stocked at our stores and warehouses. Our Company proposes to utilize ₹2,413.47 million out of the Net Proceeds towards our incremental net working capital requirements for Fiscal 2027 and Fiscal 2028. We may need to obtain additional financing to expand our operations, and any inability to manage our working capital requirements or raise such financing may adversely effect our business, revenue from operations and financial condition.
6. **Independent Director's securities market association risk:** One of our Independent Directors, Asit Chimanlal Mehta is associated as a shareholder, promoter or director with the entities associated with the securities market and by virtue of such association he may be subject to certain stringent obligations under securities laws. He is also involved in a proceeding currently pending before the Supreme Court of India, pertaining to an appeal filed by SEBI against an order of the Securities Appellate Tribunal quashing SEBI's adjudication order dated September 29, 2015. Any failure to comply with securities law or any adverse outcome in such proceeding could adversely affect his reputation, which may in turn impact our reputation, business and prospects.
7. **Risk related to performance of the Company as compared to listed peer companies:** Some of our listed peers have historically performed better than us in relation to certain key performance indicators such as Gross Profit margin, Operating EBITDA Margin, PAT Margin, ROE, ROCE and ROCE (post tax) between Fiscal 2024 and Fiscal 2026. We cannot assure you that we will in the future perform better than our peers in relation to these or other key performance indicators, or that we will continue to experience growth in our revenue from operations, profit, EPS and net worth.
8. **Risk related to stamp duty and registration compliance:** As of the date of the Red Herring Prospectus, out of 424 leased properties that we operate, the lease / leave and license agreements for 381 properties require registration of which the agreements for 82 properties are not registered. Certain of our property documents are also not adequately stamped, and such agreements may not be accepted as evidence in a court of law. This may affect our ability to enforce our rights and remedies under these agreements, and we may be required to pay penalties for non-registration and non-payment of or inadequate stamp duty.
9. **Company's P/E ratio in comparison to its listed peers:** The average Price to Earnings (P/E) ratio of our listed industry peers for Fiscal 2026 is 31.89 times. At the upper end of the Price Band our Company's P/E ratio is 46.54 times and at the lower end it is 44.24 times, representing a premium of 1.46 times and 1.39 times, respectively, over the average P/E of our peer set. We cannot assure you that this premium is justified or that we will be able to sustain or improve this P/E in the future.
10. **Risk related to negative operating cash flow:**
The table below sets forth our net cash flows from / (used in) operating activities for the Fiscals indicated:

Particulars	Fiscal 2026 (in ₹ million)	Fiscal 2025 (in ₹ million)	Fiscal 2024 (in ₹ million)
Net cash (used in) / generated from operating activities	325.22	14.17	(49.25)

Negative net cash flows from operating activities in the future could require us to increase our external borrowings, curtail our business operations, defer investments towards our operations all of which individually or collectively could have an adverse impact on our growth prospects.

BASIS FOR THE OFFER PRICE

(You may scan the QR code for accessing the website of Anand Rathi Advisors Limited)

("Basis for the Offer Price" on page 183 of the RHP has been updated as above. Please refer to the website of the BRLMs: www.anandrathiib.com and www.emkayglobal.com for the "Basis for the Offer Price" updated for the above)

The Price Band and the Offer Price will be determined by our Company, in consultation with the Book Running Lead Managers, on the basis of assessment of market demand for the Equity Shares offered through the Book Building Process and the quantitative and qualitative factors as described below and is justified in view of these parameters. The face value of the Equity Shares is ₹ 10 each and the Floor Price is 40.3 times the face value and the Cap Price is 42.4 times the face value. The Cap Price shall be minimum 105% of the Floor Price and shall not exceed 120% of the Floor Price.

Bidders should also refer to 'Risk Factors', 'Our Business', 'Restated Financial Information' and 'Management's Discussion and Analysis of Financial Condition and Results of Operations' on pages 27, 290, 399 and 477, respectively, to have an informed view before making an investment decision.

Investors should also refer to "Risk Factors", "Our Business", "Restated Financial Information", and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 27, 290, 399, and 477, respectively, to have an informed view before making an investment decision.

Qualitative factors: Some of the qualitative factors and our strengths which form the basis for computing the Offer Price are on page 183 of the RHP.

- Largest mobile phone retail chain in West India (i.e., Gujarat, Maharashtra, Goa, Madhya Pradesh, Dadra & Nagar Haveli and Daman & Diu) and in Maharashtra, and the 3rd largest in India, among our peers, retailing a wide variety of mobile phones, accessories and other electronic items.
- Differentiated COFO and FOFO Models with our Local Partners Approach which have helped us scale our operations.
- Established track record of operations and understanding of diverse markets, particularly tier II and tier III and beyond cities.
- A broad product mix with focus on mobile phones including pre-owned smartphones and a strong procurement model.
- Consistent track record of financial performance and growth
- Experienced promoter and management team with strong domain expertise.

Quantitative factors: Some of the information presented below relating to our Company is derived from the Restated Financial Information. For details, please see the section titled "Restated Financial Information" and "Other Financial Information" on pages 399 and 475 of the RHP.

Some of the quantitative factors which may form the basis for calculating the Offer Price are as follows:

1. Basic and Diluted Earnings Per Equity Share (EPS):

Fiscal ended	Basic EPS (₹)	Diluted EPS (₹)	Weight
Fiscal 2026 (Consolidated)	9.11	9.11	3
Fiscal 2025 (Standalone)	6.13	6.13	2
Fiscal 2024 (Standalone)	4.10	4.10	1
Weighted Average* (for the above three Fiscals)	7.28	7.28	

* Weighted Average = Aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x Weight) for each year/Total of weights.

Notes:

(1) EPS has been calculated in accordance with the Indian Accounting Standard 33 – 'Earning per share' notified under the Companies (Indian Accounting Standards) Rules, 2015. The above statement should be read with significant accounting policies and notes on Restated Financial Information.

(2) Basic EPS amounts are calculated by dividing the profit for the year attributable to equity Shareholders of the Company by the weighted average number of Equity shares outstanding during the year.

(3) Diluted EPS amounts are calculated by dividing the profit attributable to equity shareholders of the Company and adjusting the profit or loss for the effects of all dilutive potential ordinary share by the weighted average number of Equity shares plus the weighted average number of shares that would be issued on conversion of all dilutive potential ordinary shares into ordinary shares

2. Price Earning (P/E) ratio in relation to Price Band of ₹403 to ₹424 per Equity Share

Particulars	P/E at the lower end of Price Band (no. of times)	P/E at the higher end of Price Band (no. of times)
Based on basic EPS as per the Restated Financial Information for the financial year ended March 31, 2026	44.24	46.54
Based on diluted EPS as per the Restated Financial Information for the financial year ended March 31, 2026	44.24	46.54

3. Industry Peer Group P/E ratio:

Based on the peer group information (excluding our Company) given below in this section, the highest, lowest and industry average P/E ratio are set forth below:

Particulars	Industry P/E (based on diluted EPS)	Name of peer company
Highest	66.29	Aditya Vision Limited
Lowest	8.46	Umiya Mobile Limited
Average	31.89	

Notes:

The highest and lowest industry P/E shown above is based on the peer set provided below under 'Comparison with listed industry peers'. The industry average has been calculated as the arithmetic average P/E of the peer set provided below.

4. Return on Net Worth ("RoNW")

Fiscal ended	RoNW* (%)	Weight
March 31, 2026 (Consolidated)	32.60%	3
March 31, 2025 (Standalone)	32.82%	2
March 31, 2024 (Standalone)	30.21%	1
Weighted Average**	32.28%	

Notes:

*RoNW is calculated as Profit after tax attributable to equity shareholders divided by Average Net Worth

**The weighted average is a product of RoNW and respective assigned weight dividing the resultant by total aggregate weight.

Net Worth represents the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and debit or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation.

5. Net Asset Value (NAV) per Equity Share of face value of ₹ 10 each:

*Financial information of the Company has been derived from Restated Financial Information as at or for the financial year ended March 31, 2026. Financial information of the peers have been derived from their respective standalone / consolidated financial statements as at and for the financial year ended March 31, 2026.

Notes:

- NAV is computed as the Total Equity (sum of equity share capital, other equity) divided by the outstanding number of shares as per calculation of Diluted EPS in accordance with IND AS 33 as on March 31, 2026.
- P/E Ratio has been computed based on the closing market price of equity shares on September 4, 2026 on www.bseindia.com, divided by the Diluted EPS as on March 31, 2026. However, for shares which are listed only on NSE (i.e., Jay Jalaram Technologies Limited and Fonebox Retail Limited) the closing market price of equity shares on September 4, 2026 has been taken from www.nseindia.com.
- RoNW is computed as net profit after tax attributable to owners of the Company divided by average net worth. Net worth has been computed as the aggregate of share capital and reserves and surplus. In case the net worth is negative for a particular year, the same has not been considered.
- Net Worth represents the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and debit or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation.

For further details of non-GAAP measures, please see the section titled 'Other Financial Information' on page 475, to have a more informed view.

7. Weighted average cost of acquisition ("WACA"), floor price and cap price.

- The price per share of the Company based on the primary/ new issue of shares (equity / convertible securities)

Our Company has not issued any Equity Shares (excluding bonus shares) or convertible securities or employee stock options during the 18 months preceding the date of this RHP, where such issuance is equal to or more than 5% of the fully diluted paid-up share capital of the Company (calculated based on the pre-Offer capital before such transaction(s)), in a single transaction or multiple transactions combined together over a span of rolling 30 days.

- The price per share of the Company based on secondary sale/ acquisitions of shares (equity/ convertible securities)

There have been no secondary sale/ acquisitions of Equity Shares or any convertible securities, where our Promoter or the members of our Promoter Group are a party to a transaction, during the 18 months preceding the date of this Red Herring Prospectus, where either acquisition or sale is equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated based on the pre- Offer capital before such transaction(s) and excluding employee stock options granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days

Since there are no such transactions to report to under (a) and (b), the following are the details based on the last 5 primary or secondary transactions (secondary transactions where Promoter or members of the Promoter Group are a party to the transaction), not older than 3 years prior to the date of the Red Herring Prospectus irrespective of the size of transactions:

Last 5 primary issuances:

Name of Company	Number of Equity Shares allotted	Details of allottees	Face value per Equity Share (in ₹)	Issue price per Equity Share (in ₹)	Form of consideration	Nature of Allotment
August 25, 2025	100	Sagar Prashant Dambal	100	10,000.00	Cash	Private Placement
August 25, 2025	200	Shshank Beherrey	100	10,000.00	Cash	Private Placement

August 25, 2025	250	Vishal Agarwal	100	10,000.00	Cash	Private Placement

As certified by M/s Manek & Associates, Chartered Accountants (Firm No. 126679W), pursuant to a certificate dated September 8, 2026.

For further details in relation to the share capital history of our Company, see 'Capital Structure' on page 123 of the RHP.

Based on the above transactions, below are the details of the weighted average cost of acquisition, as compared to the Floor Price and the Cap Price:

Category of Transactions	Weighted average cost of acquisition (in ₹)*	Floor Price (in times)*	Cap Price (in times)*
Past 5 primary issuances, as disclosed above	250.00*	1.61 times	1.70 times

*The actual transaction price was ₹ 10,000 per share, however, the same has been adjusted for split and bonus issuance which happened after the date of these transactions and effect to the price is given as on the date of the Red Herring Prospectus.

*To be updated at Prospectus Stage

*As certified by M/s Manek & Associates, Chartered Accountants (Firm No. 126679W), pursuant to a certificate dated September 8, 2026.

8. Justification for Basis for the Offer Price

Set out is an explanation of Offer Price/Cap Price being 1.70 times of WACA of primary issuances of Equity Shares (as disclosed above) along with our Company's key performance indicators and financial ratios for Fiscal 2026, Fiscal 2025 and Fiscal 2024:

- Largest mobile phone retail chain in West India (i.e., Gujarat, Maharashtra, Goa, Madhya Pradesh, Dadra & Nagar Haveli and Daman & Diu) and in Maharashtra, and the 3rd largest in India, among our peers, retailing a wide variety of mobile phones, accessories and other electronic items.
- Differentiated COFO and FOFO Models with our Local Partners Approach which have helped us scale our operations.
- Established track record of operations and understanding of diverse markets, particularly tier II and tier III and beyond cities.
- A broad product mix with focus on mobile phones including pre-owned smartphones and a strong procurement model.
- Consistent track record of financial performance and growth.
- Experienced promoter and management team with strong domain expertise.

9. The Offer Price will be [a] times of the face value of the Equity Shares

The Offer Price of ₹[a] has been determined by our Company, in consultation with the BRLMs, on the basis of assessment of market demand from investors for Equity Shares through the Book Building Process and is justified in view of the above qualitative and quantitative parameters.

Bidders should read the above information along with 'Risk Factors', 'Our Business', 'Restated Financial Information' and 'Management's Discussion and Analysis of Financial Conditions and Results of Operations' on pages 27, 290, 399 and 477. The trading price of the Equity Shares could decline due to the factors mentioned in 'Risk Factors' or any other factors that may arise in the future and you may lose all or part of your investments.

TELCOS OPPOSE PROPOSAL TO OFFER ONLY VOICE & SMS FOR SHORTER DURATIONS

Trai weighs data-less mobile plans

OJASVI GUPTA
New Delhi, September 9

THE TELECOM REGULATORY Authority of India (Trai) is moving to finalise rules that will require telecom operators to offer voice-and-SMS-only mobile plans across shorter validity periods, including the widely used 28-day cycle, despite strong opposition from the industry, sources said.

The proposed regulations will require operators to offer a corresponding voice-and-SMS-only option for every validity period available under bundled plans carrying voice, SMS and data. The regulator is also looking at requiring such plans to be prominently displayed on recharge platforms, rather than being buried among other tariff options.

The move follows Trai's April draft amendment, which proposed that for every unique validity period offered under a voice, SMS and data special tariff voucher (STV), operators should provide a corresponding voice-and-SMS-only STV.

UNBUNDLE BID

■ The proposal will require operators to offer a corresponding voice-and-SMS-only option for every validity period available under bundled plans

■ The regulator is also looking at requiring such plans to be prominently displayed on recharge platforms

The regulator had also proposed that the tariff for the latter be reduced broadly in proportion to the data benefits removed.

Trai's intervention comes after the regulator's earlier 2024 rules requiring operators to offer at least one voice-and-SMS-only STV did not result in a wide range of such plans. Trai noted that only a few such vouchers were being offered, prompting representations for shorter-duration options.

The 28-day validity period has emerged as a key focus as it is among the most common

The operators are also concerned that cheaper voice-and-SMS plans could encourage some subscribers to shift away from bundled tariffs

■ The 28-day validity period has emerged as a key focus as it is among the most common recharge cycles in the prepaid market

recharge cycles in the prepaid market. The proposed framework, however, is broader and could require operators to create voice-and-SMS-only alternatives corresponding to other bundled validity periods as well.

The regulator is also examining how these plans are presented to consumers. Existing voice-and-SMS-only options are not always prominently displayed on operators' digital recharge platforms. Trai wants consumers to be able to find such plans easily, potentially through prominent placement

on the first page or in popular recharge sections.

Telecom operators have opposed the proposal, stating that tariff design should largely remain market-driven and that mandatory voice-only plans could disrupt existing pricing structures. Reliance Jio, Bharti Airtel and Vodafone Idea have all raised objections during the consultation process.

Jio has questioned the need for regulatory intervention, saying, "there is no need to mandate voice/SMS only plans" and that tariff forbearance should continue. It has

also said that modern 4G and 5G networks use a common IP-based infrastructure, making a regulatory separation of voice and data less straightforward.

Airtel has said that removing data could undermine digital adoption, saying that "taking away the benefit of data" could deprive consumers of digital empowerment. Vodafone Idea, meanwhile, has said that data-free packs could discourage some users from adopting digital services.

The operators are also concerned that cheap voice-and-SMS plans could encourage some subscribers to shift away from bundled tariffs, putting pressure on average revenue per user (Arpu). Jio has separately raised concerns that low-cost, short-validity plans could increase the scope for misuse in spam and fraudulent activities.

For consumers, the proposed rules would particularly benefit feature-phone users, elderly subscribers and those maintaining a secondary SIM primarily for calls, SMS, banking alerts and OTPs.

Anthropic researcher quits citing irresponsible AI use

PRESS TRUST OF INDIA
New Delhi, September 9

JACOB COXON, AN AI researcher at Anthropic, announced his resignation on Wednesday, alleging that leading technology firms, including OpenAI, are acting irresponsibly in an unchecked race towards developing superintelligence and 'gambling with our lives'.

Coxon, who spent the past three years conducting pre-training research across both OpenAI and Anthropic, said that the competitive rush between labs is being pursued without adequate safeguards.

Evan Hubinger, currently Alignment Science lead at Anthropic, acknowledged Coxon's concerns, saying that the San Francisco-based company does not yet have a plan to solve alignment for superintelligence.

WARNING SIGNS

■ Coxon spent the last three years conducting pre-training research at OpenAI, Anthropic

■ He has warned that tech is advancing rapidly towards superhuman systems

In a post on social media platform X, Coxon warned that the technology is advancing rapidly towards superhuman systems that can hack anything, revolutionise any field overnight, and acquire real power and resources. He added that no other human activity poses a

comparable level of danger.

"I resigned from Anthropic today. I spent the last three years doing pretraining research at both OpenAI and Anthropic. Neither company is acting responsibly. They are racing straight to self-improving superintelligence and gambling with our lives."

"At OpenAI, many have not deeply internalised the civilisational stakes. At Anthropic, the stakes are well-understood, but they are locked in a race to get there first but they believe no one else will act responsibly, so they must do it themselves, despite the risk. Accepting this race and entering the endgame is a hubristic gamble that should not be launched from a private company's Slack," he said, adding that many working in the sector earnestly believe AI could cause catastrophic harm by the end of the decade.

Better jobs drive 49% Indians to study abroad

PRESS TRUST OF INDIA
Mumbai, September 9

STUDENTS IN INDIA are becoming more outcome-focused, as nearly half of aspirants cite better job opportunities as their primary reason for studying abroad, a report said on Wednesday.

According to skilling and workforce development company upGrad's Transnational Education (TNE) Report 2026, around 49% of Indian aspirants revealed better job opportunities as the primary reason for studying abroad, compared to other factors like quality of education, permanent residency or lifestyle aspirations.

Students in India are significantly becoming more result-

THE PULL FACTOR

■ The upGrad report is based on insights from 53,800 counselled aspirants between January 2025 and June 2026

■ The respondent base was mainly made up of aspirants early in their professional journeys and fresh graduates, with 65.8% being freshers

■ Seven among 10 aspirants planning to pursue overseas education on a total budget of under ₹30 lakh

■ The report further revealed a growing interest in Europe due to rigid immigration policies and rising costs

oriented and are evaluating destinations based on ROI (Return on Investment), employment opportunities and long-term career outcomes over institu-

tional prominence, the report said.

The upGrad report is based on insights from 53,800 counselled aspirants between Janu-

ary 2025 and June 2026.

The respondent base was mainly made up of aspirants early in their professional journeys and fresh graduates, with 65.8% being freshers, while nearly 60% of aspirants hail from tier-II and III cities.

While traditional destinations like the US, the UK, Canada and Australia remain significant, the report further revealed a growing interest in Europe due to rigid immigration policies and rising costs.

Students are now opting for Germany, Finland, Spain and France due to their affordability, industry alignment and stronger employment-linked pathways, it added.

Meanwhile, the report found a clear shift towards more cost-

effective and value-driven global education pathways.

Affordability is emerging as a key driver of international education choices, with seven among 10 aspirants planning to pursue overseas education on a total budget of under ₹30 lakh.

"The study abroad landscape is undergoing a significant shift, with Indian students increasingly prioritising future employability, career outcomes and affordability. Europe's growing appeal reflects this evolving mindset, as learners seek destinations that combine quality education with strong workforce opportunities," Praneet Singh, Vice President, University Partnerships, upGrad Study Abroad, added.

BLOOMBERG
September 9

LIONEL MESSI IS set to buy a second Spanish football team, as the Argentine star increasingly focuses on his business interests ahead of the winding down of his playing career.

The 39-year-old footballer has reached a preliminary agreement to buy a majority stake in second division side Eldense, a spokesperson for the team told Bloomberg News. A final agreement is expected within days, pending due diligence, said a separate person familiar with the discussions. A representative for Messi

declined to comment. The tentative deal was reported earlier by news agency EFE.

The Argentine player, widely considered the best footballer ever, announced last month that he would stop playing international football for his national team, although he will continue playing for Inter Miami in the US Major League Soccer.

Messi has stepped up his commercial activities this year. He announced the acquisition of fifth-division Unió Esportiva Cornellà football club in April, and agreed to buy a well-known building in Barcelona in May. An Argentine restaurant chain he partially owns announced last month that it would expand to Spain.

Buying Eldense would add to the Argentine's growing club stable, as he expands his business activities. Messi's family founded a club in Argentina called Leones, he owns a stake in a Uruguayan club with teammate Luis Suárez, and he has an option to acquire a stake in Inter Miami after he retires.

RISK TO THE INVESTORS

Risk to investors summary description of key risk factors based on materiality. For details, refer to section titled "Risk Factors" on page 21 of the Red Herring Prospectus.

1. We are dependent on Tier-I vendors, whose demand is directly linked to OEM procurement cycles. Any reduction or discontinuance of their demand may adversely affect our business, financial condition and results of operations.
2. For our proposed new manufacturing facility, we are required to obtain certain statutory approvals, clearances, and permissions from the relevant authorities in connection with the planned capital expenditure. If we are unable to obtain such approvals in a timely manner, or at all, our proposed expansion may be delayed, which could adversely affect our business, results of operations, cash flows, and financial condition.
3. A substantial portion of our revenue is derived from customers located in the state of Gujarat. Any adverse developments in this region may materially and adversely affect our business and results of operations.
4. A significant portion of the Net Proceeds is proposed to be utilized towards funding our capital expenditure requirements including purchase of plant and machinery for our new manufacturing facility, for which certain orders have been placed. Any delay in procurement, delivery or installation of plant and machinery for our new manufacturing facility, including machinery for which purchase orders have been placed, may delay implementation, result in cost overruns and adversely affect our business operations and growth strategy.
5. We are dependent on the supply of raw materials approved by our customers, and any disruption or delay in procurement of such materials could adversely impact our production schedules, result in idle capacity, and affect our relationship with customers.
6. Any increase in raw material prices, volatility in supply or pricing, or failure by suppliers to fulfil their obligations may adversely impact our operations, financial performance, and business results.
7. There have been instances of delayed filings in the past with certain Regulatory Authorities. If the Regulatory Authorities impose any monetary penalties on us or take any punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.
8. We are significantly dependent on the automotive sector, and any downturn or change in demand in this sector may adversely affect our business, financial condition and results of operations.
9. Our cash flows from operating activities have fluctuated in the past and may continue to fluctuate due to changes in our working capital requirements. Any inability to generate sufficient cash flows from our operations may adversely affect our business, financial condition and results of operations.
10. Our lenders have charge over our movable and immovable properties in respect of finance availed by us and settlement arrangements may affect perceptions of our credit profile.

NOTICE FOR TRANSFER OF UNPAID DIVIDENDS / EQUITY SHARES TO INVESTOR EDUCATION AND PROTECTION FUND (IEPF)
ATTENTION: SHAREHOLDERS OF BHARAT FORGE LIMITED

NOTICE is hereby given that Bharat Forge Limited will be transferring shares to Investor Education and Protection Fund (IEPF), pursuant to applicable provisions of the Companies Act, 2013 read with the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, as amended (“**IEPF Rules**”). The IEPF Rules, inter alia, contain provisions for transfer of share(s) in respect of which dividend(s) have not been claimed by the shareholder(s) for seven (7) consecutive years or more, to Investor Education and Protection Fund (IEPF) established by the Central Government.

In compliance with the requirements set out in IEPF Rules, individual notices are being sent by the Company to all concerned shareholders whose shares are liable to get transferred to IEPF at their latest available address in the Company's records, requesting them to claim dividend amounts which have remained unpaid/unclaimed consecutively for a period of seven years. The details of such shareholders are also available on the website of the Company at www.bharatforge.com.

In case the dividends are not claimed on or before November 30, 2026, necessary steps will be initiated by the Company to transfer the equity shares along with the unpaid dividend amounts to IEPF without any further notice, in accordance with the IEPF Rules.

Please note that no claim shall lie against the Company in respect of the unclaimed dividend(s) and shares so transferred to IEPF.

After the shares have been transferred to IEPF, you can claim both, the unclaimed dividends and shares from IEPF Authority, by filing e-form IEPF-5, as prescribed under said IEPF Rules.

CORRIGENDUM: NOTICE TO INVESTORS
This Corrigendum should be read with the Red Herring Prospectus dated September 04, 2026 (the “Red Herring Prospectus”).
1. **Allocation of the Issue among categories of investors should be read as:**
In the Red Herring Prospectus, the number of Equity Shares available for allocation to each category of investors was denoted by “[+]", and the allocation of the Net Issue was inadvertently stated as “not more than 50%” to Qualified Institutional Buyers, “not less than 15%” to Non-Institutional Investors and “not less than 35%” to Individual Investors. The same shall be read as:

Category	Number of Equity Shares	Percentage
Issue	Up to 93,98,000*	100.00% of the Issue
Market Maker Reservation Portion	4,78,000	5.09% of the Issue
Net Issue to the Public	89,20,000	94.91% of the Issue
QIB Portion	Not more than 17,84,000	Not more than 20.00% of the Net Issue
Of which: Anchor Investor Portion (up to 60% of the QIB Portion)	Up to 10,70,400	–
– domestic Mutual Funds (33.33% of the Anchor Investor Portion)	Up to 3,56,764	–
– life insurance companies and pension funds (6.67% of the Anchor Investor Portion)	Up to 71,396	–
Of which: Net QIB Portion (assuming the Anchor Investor Portion is fully subscribed)	7,13,600	–
– Mutual Fund Portion (5.00% of the Net QIB Portion)	35,680	–
– Balance available to all QIBs, including Mutual Funds	6,77,920	–

– two-third: application size of more than ₹ 10 lakhs	23,78,666#	–
Individual Investor Portion	Not less than 35,68,000	Not less than 40.00% of the Net Issue

*Subject to finalisation of the Basis of Allotment.
#Subject to rounding off. The unsubscribed portion in either sub-category of the Non-Institutional Portion may be allocated to Bidders in the other sub-category of Non-Institutional Investors, subject to valid Bids being received at or above the Issue Price.

2. **Material Documents for the Issue should be read as:**
In the section “Material Contracts and Documents for Inspection” beginning on page 336 of the Red Herring Prospectus, under “Material Documents for the Issue”, Item 9 was inadvertently mentioned as “Due Diligence Certificate from Book Running Lead Manager dated September 25, 2025 addressing NSE”, and the same shall be read as “Due Diligence Certificate from Book Running Lead Manager dated September 30, 2025 addressing NSE”.
Save as stated above, all other disclosures in the Red Herring Prospectus remain unchanged. This Corrigendum shall form an integral part of, and be read together with, the Red Herring Prospectus.
