WORKING ON STICKING POINTS, SAYS USTR

India-US deal not imminent: Greer

MUKESH JAGOTA
New Delhi, October 2

USTR REPRESENTATIVE Jamieson Greer on Thursday cautioned against expectations of an early India-US trade deal, saying an interim agreement is “not imminent” despite negotiations being in the final stretch and the two sides having identified the remaining sticking points.

“We are in the short strokes. So I think we're toward the end of it,” Greer said, but added: “At the same time I don't think there's something imminent.”

The statement came a day after Greer held talks with Commerce and Industry Minister Piyush Goyal on the sidelines of the G20 Trade Ministers' Meeting in Milwaukee, with both sides pushing for an interim agreement under the broader India-US Bilateral Trade Agreement (BTA).

“We truly have identified the universe of items that are sticking points. We are working diligently toward them,” Greer said, describing his conversation with Goyal as “very constructive.”

“Minister Goyal and myself, our staff are meeting right now. Since they are in the country and we are here, we are continually trying to finish the trade deal with

India,” he said.

The comments followed Goyal's statement after Wednesday's meeting that the two sides had a “productive discussion” towards the “early conclusion of a mutually beneficial interim agreement” under the BTA.

Greer's assessment also followed a phone conversation between Prime Minister Narendra Modi and US President Donald Trump. The two leaders reviewed bilateral

cooperation, including trade, defence, energy and critical technologies, with Greer describing the call as “very constructive”. He indicated that Modi and Trump could speak again soon to assess progress.

“My sense is that the President, the Prime Minister may have another call very soon on this just to assess progress and where we are,” Greer said.

Loans against FDs move up 43%, fastest in over 3 years

KSHIPRA PETKAR
Mumbai, October 2

A **SURGE** IN leveraged trades involving FCNR(B) deposits is likely to have propelled loans against fixed deposits to their fastest growth rate in more than three years, with outstanding advances jumping 43.2% year-on-year to ₹2.04 lakh crore in August, according to Reserve Bank of India (RBI) data. The last time growth was higher was in June 2023, when such loans had risen 47%.

Advances against fixed deposits rose by around ₹42,750 crore in just one month, from ₹1.62 lakh crore at the end of July. Compared with August last year, when outstanding advances stood at ₹1.43 lakh crore, the increase was around ₹61,500 crore.

“My sense is that a large part of this is driven by the various leveraged trades which have been done by NRIs on

LEVERAGED BETS

■ Outstanding advances jumped to ₹2.04 lakh crore in August compared to ₹1.62 lakh crore in July

■ Banks offered leverage of up to nine times against FCNR(B) deposits

■ Analysts expect the sharp rise to continue in Sept as more transactions get reflected

these FCNR(B) deposits,” said Prakash Agarwal, partner at Gefion Capital.

Payment aggregators seek bigger slice of UPI MDR pie

ANEES HUSSAIN
Bengaluru, October 2

PAYMENT AGGREGATORS (PAs) are negotiating with their sponsor banks for a larger share of the acquiring bank's cut of the new merchant discount rate (MDR) on UPI transactions, with discussions centred on PAs retaining 50-80% of the bank's share, people aware of the matter said. The negotiations are expected to conclude before the new MDR takes effect on October 15. Under the framework notified by the government and the National Payments Corporation of India (NPCI), merchants will pay an MDR of 0.4% on UPI transactions above ₹2,000. Of this, 0.12% will accrue to the acquiring bank, with the PA's share carved out of the bank's portion.

A ₹10,000 UPI transaction, for instance, would generate ₹40

NEW REVENUE MODEL

■ A **₹10,000** UPI transaction from Oct 15 would generate ₹40 in MDR

■ Out of this, the acquiring bank would receive ₹12

■ At the rates being negotiated, the Payment aggregators (PA) could retain **₹6-9.60** of this amount

■ The outcome of these negotiations is likely to depend on the business PAs bring to banks

in MDR, of which the acquiring bank would receive ₹12. At the rates under discussion, the PA could retain ₹6-9.60 of this amount. Since the framework does not provide a separate, direct share of MDR for payment aggregators, they are negotiating commercial arrangements individually with banks.

The outcome is likely to

depend on the business each PA brings to its sponsor bank. Aggregators with large transaction volumes, sizeable merchant floats and deeper technology relationships with banks are expected to have greater bargaining power, a senior executive at a payment aggregator said.

Bond issues surge ahead of RBI meet

CHRISTINA TITUS
Mumbai, October 2

INDIAN COMPANIES ARE making a dash for the bond market, seeking to lock in borrowing costs before a potential interest-rate hike makes money even more expensive.

Corporate bond issuances surged to ₹1.34 lakh crore in September, the highest monthly mobilisation since May 2025, according to Prime Database. This took total issuances in the first six months of FY27 to ₹5.63 lakh crore, nearly matching the ₹5.65 lakh crore raised during the corresponding period last year.

The rush comes despite elevated bond yields. Market participants said issuers who had stayed on the sidelines in recent months — deterred by high yields and the availability of relatively cheaper bank funding — are returning to

Drug panel rejects cap on wholesale licences

MANU KAUSHIK
New Delhi, October 2

A **NATIONAL DRUG** regulatory panel refused to cap wholesale drug licences, arguing that a national limit could be impractical. However, it asked state drug regulators to be more vigilant about the potential misuse of these licences for high-margin retail sales.

Several pharmacist bodies sought to regulate wholesale licences based on the number of retail licences, but the panel said such a uniform approach might not work across different markets. Licensing needs vary across regions, the panel noted, telling state drug authorities to assess local requirements.

The issue was considered at the 70th meeting of the Drugs Consultative Committee (DCC) where the body was examining a representation from the pharmacists' associations seeking a review of the framework for granting retail and wholesale drug licences, including a proposal to regulate the ratio between the two categories.

The proposal was aimed at addressing concerns over the possible misuse of wholesale licences for retail sales. For instance, a wholesale licence allows a business to supply medicines to authorised entities, while retail licences cover sales to consumers. In some cases, wholesalers would sell medicines directly to consumers. This can blur the line between wholesale and retail sales, it was highlighted.

“Members observed that the requirements differ considerably between urban, rural, industrial and geographically remote areas and that a uniform numerical ratio would not be practicable throughout the country,” the panel noted.

iPHONES NEARLY 87% OF THE SPIKE IN SMARTPHONE EXPORTS IN PLI YEARS EVEN AS THE LARGER ECOSYSTEM PLAYS CATCH-UP

Smartphone export boom has an Apple-sized catch

RISHI RAJ
New Delhi, October 2

FIVE YEARS OF the government's production-linked incentive (PLI) scheme have certainly transformed the country into a major smartphone export base, but almost 87% of the increase in smartphone exports during the period has come from Apple.

Smartphone exports surged from \$5.5 billion in FY22 to \$29.36 billion in FY26, but the non-Apple portion rose only 74%, from about \$4.2 billion to \$7.4 billion. Apple's iPhone exports, in contrast, jumped nearly 17-fold from about \$1.25 billion to around \$22 billion, making the company the overwhelming driver of the

export surge.

That Apple-led expansion has, in turn, transformed the broader electronics export basket, although at a different pace. Electronics exports rose from \$23.55 billion in FY23 to \$29.12 billion in FY24 and \$38.6 billion in FY25, before reaching about \$48 billion in FY26, more than doubling in three years. Smartphones have accounted for an increasingly large share of this basket, rising from about 47% of electronics exports in FY23 to 61% in FY26. The contrast is significant: while Apple has driven a spectacular expansion in one product category, the wider electronics ecosystem has been growing at a slower, more incremental pace.

The scale of Apple's rise

PACE SETTER

becomes clearer when the five-year PLI period is viewed as a whole. India added nearly \$24 billion to its annual smartphone exports between FY22

and FY26. Apple alone added about \$20.75 billion, while all other manufacturers together contributed roughly \$3.1 billion. As a result, Apple's share of

smartphone exports has risen sharply during the period, from about 23% in FY22 to more than 75% in FY26. The shift reflects the rapid expansion of

India pushes for supply-chain rejig, G20 defers call on 'overcapacity'

● Goyal mounts strong defence of MFN principles

MUKESH JAGOTA
New Delhi, October 2

INDIA HAS PUSHED for diversification of global supply chains and production capacities at the G20 Trade Ministers' Meeting, rather than focusing narrowly on industrial "overcapacity," as consensus on the contentious issue remained difficult to achieve.

Commerce and Industry Minister Piyush Goyal, speaking at the concluding day of the G20 Trade Ministers' Meeting in Milwaukee, said industrial capacity by itself was not the problem, but distortions could arise when production becomes geographically concentrated because of hidden subsidies and other forms of support.

Overcapacity in the G20 and multilateral contexts refers to one country producing more goods than domestic or global demand can absorb, which could depress prices and displace producers in other nations. The issue has gained traction at G20 particularly over China's alleged overcapacity in assorted industries, which puts manufacturers

Union Commerce and Industry Minister Piyush Goyal with Australia's Trade and Tourism Minister Senator Don Farrell in a bilateral meeting on the sidelines of the G20 Trade Ministers Meeting ANI

elsewhere at a disadvantage. Beijing stubbornly refutes the charges, and contends that comparative advantage and market demand are the deciding factors,

US Trade Representative (USTR) Jamieson Greer said, "We couldn't reach consensus on a statement on this issue to address structural excess capacity and production."

Addressing excess production capacities built on the back of state support was one of the key agenda items of the meeting set by the US. Other issues were eliminating forced labor in global supply chains, updating the most-favored

nation (MFN) principle and denouncing the weaponization of trade in food.

A consensus was reached on weaponisation of food, but eluded on forced labour in global supply chains. "Believe it or not, we have countries in the G20 that do not want to commit to having a prohibition on the import of goods," Greer said.

At the session on excess capacities Goyal said, "Diversification of production and supply chains is a legitimate objective, but cannot be used as a pretext for measures outside World Trade Organization (WTO) rules or for shifting the

burden of adjustment onto developing countries.

Goyal said India did not have structural excess capacity in the sectors identified by the G20 presidency. He acknowledged concerns that trade-distorting support in some economies could result in dumping and predatory pricing, but said these should be addressed through WTO-consistent instruments. "Industrial capacity in itself is not the issue," Goyal said, adding that the focus should instead be on distortions arising from hidden subsidies and geographical concentration of production.

Stout defence of MFN

Goyal also mounted a strong defence of the MFN principle, as the US pushes for a rethink of the WTO's long-standing non-discrimination framework.

He said India's trade with G20 members depended on a transparent, non-discriminatory and rules-based trading system, with MFN treatment serving as a key guarantee that the same terms apply to all trading partners. The principle, he said, ensures that "the same terms apply to the smallest trader and the largest trader", reinforcing predictability in international commerce.

He called for restoration of the WTO's two-tier dispute settlement system which has been non-functional since December 2019 as the US has blocked the appointment of judges to the appellate body.

On forced labour in global supply chains, Goyal said India's commitment to eliminating forced labour was "absolute and unconditional". At the same time, he cautioned against trade measures based on broad assumptions about entire countries, regions or sectors. Border measures like trade curbs, he said, must be based on specific and verifiable evidence, follow due process and comply with WTO rules.

Link MSP with oil content in seeds: Panel

SANDIP DAS
New Delhi, October 2

THE COMMISSION FOR Agricultural Costs and Prices (CACP) has recommended linking the minimum support price (MSP) of oilseeds with oil content, based on scientifically determined benchmarks, to boost domestic production and reduce import dependence of cooking oil.

"Oilseed lots with oil content above the benchmark should receive a proportionate price premium," the CACP in its price policy report for rabi crops for marketing season (2027-28) said. The commission, which recommends MSPs for 23 crops to the government, suggested augmenting oilseeds production from alternative domestic sources such as rice bran given the 'abundance' of availability.

Currently, the government announces the MSP for kharif and rabi oilseed variants-soybean, groundnut, mustard and safflower-aimed at boosting domestic output. For encouraging crop diversification, MSP of oilseeds such as mustard and safflower has been hiked to 10% for the 2027-28 marketing season (April-June). However, current mandi prices are ruling above MSP rates.

CACP has also recommended a comprehensive strategy to enhance edible oil productivity including increasing oilseeds yield through improved technologies and agronomic practice, developing seed varieties with higher oil content and incentivising farmers to cultivate high oil-content variants of seeds.

India imports about 58% of its cooking oils consumption, mostly palm, soybean and sunflower. Imports were valued at \$18.3 billion in 2024-25 oil year (October-September). Mustard enjoys the highest share among edible oils (45%), followed by soybean (24%), groundnut (7%) and others.

TAKING STOCK

■ Move to boost domestic output and cut import dependence of cooking oil

■ India imports about 58% of its cooking oils consumption

■ CACP has also flagged several issues being faced by agencies such as Nafed and NCCF

"The high dependence on edible oil imports is largely due to the rapid increase in domestic consumption and relatively slower growth in edible oil production compared to oilseeds production," the report said.

The commission also said pulse procurement faces challenges such as delays in the commencement of purchase in some states, insufficient storage and warehousing infrastructure, limited procurement centres, inadequate awareness among farmers regarding procurement procedures, etc.

"In some states, procurement of pulses is linked to land records and cropping databases, and therefore, any discrepancies in land records and cropping pattern databases affect timely procurement," the CACP report said. The commission has noted 'time lags' between the approved date of the states' proposal for procurement by the agriculture ministry under the price support scheme (PSS) and the actual start of procurement by the state.

The country imported around 18% to 20% of its annual pulses consumption valued at \$3.57 billion in FY26.

Centre achieves 46% of FY27 capex target

ON TRACK

■ Centre's capital expenditure reached **₹5.63 lakh cr** as on September 22

■ For FY27, the Centre has budgeted capex of **₹12.22 lakh cr**

■ No curbs on capex despite pressure on govt finances

■ Capex drive will be led by Railway Board and National Highways Authority of India

PRASANTA SAHU
New Delhi, October 2

THE CENTRE'S CAPITAL expenditure reached ₹5.63 lakh crore, or 46% of the FY27 target, as on September 22, sources said, adding that the capex programme is on track.

Usually, the Centre spreads capex evenly, with half the annual target achieved in April-September. So, based on the trend through September 22, the Centre's capex will be around 50% by September 30.

"So, it is progressing fine," a senior official told FE.

Sources said there are no curbs on capex despite pressure on the government finances due to excise duty cuts on petrol and diesel and additional expenditure pressure.

According to data released by the Controller General of Accounts (CGA), the Centre's capex has reached ₹5 lakh crore or 41.7% of the annual target, as against 38.5% of the relevant annual target in the year-ago period.

For FY27, the Centre has budgeted capital expenditure (capex) of ₹12.22 lakh crore, a 14.3% increase from the previous year.

Effective capital expenditure, including grants-in-aid to states for asset creation, is estimated at ₹17.1 lakh crore. In FY26, the Centre spent around ₹10.7 lakh crore, or 98% of its revised capex target of ₹10.96 lakh crore.

As in recent years, the capex drive in FY27 will be led by the Railway Board and the National Highways Authority of India, which together account for 37% of the Centre's total capital expenditure. Budgetary support for these two departments is estimated at around ₹4.5 lakh crore in FY27.

Explainer

● What are the main GST procedures that need a relook?

SINCE ITS INCEPTION in July 2017, the GST procedures such as registration, return filings, refund claims, etc., have undergone multiple changes and after the expected initial hiccups, they are now more or less stable. However, due to increase in the number of taxpayers (from 7.20 million in July 2017 to about 16.80 million now) a complete rehaul of the procedures is required.

● Why is a single GST registration needed?

CURRENTLY, A SINGLE income tax PAN holder having business operations in multiple states has to apply for a GSTIN in every state. Further, all the GST related compliances such as e-way bills, filing of returns, refund claims, etc., are to be done separately for these GSTINs in various states. The procedures, forms, etc., are similar in every state; however, a multi-state business owner has to separately keep track of GST liability, input tax credit balances, refund claims, etc. This raises the cost of GST compliance and results in blocking of working capital as there could be a net GST payable in one or more states and net GST receivable in other states. A single GST registration valid across the country would solve these issues. This is possible with the advent of automation in the GST processes and adoption of technological advances by the GSTN. In the back end, the GSTN can apportion the share of the consumption state.

57TH GST COUNCIL MEETING

The procedural changes that India Inc seeks in the GST rules

The Goods and Services Tax (GST) Council will meet on October 7.

While the agenda for this meeting is believed to be procedural reforms, manufacturers & traders are hoping that the Council will facilitate compliance through changes in rules, processes & policies.

Rahul Renavikar explains the procedures that call for a rethink

● Issues with inverted duty structure

INVERTED DUTY STRUCTURES have led to refunds for many taxpayers after the GST rate rationalisation. An automatic refund route needs to be provided as is the case for refund to exporters and that too for GST paid on inputs, input services and capital goods. Currently, the refunds on account

of inverted duty structure are limited to GST paid only on inputs. Globally, the GST/VAT functions as a genuine value-added tax and restoring input tax credit neutrality would reduce manufacturing costs, improve compliance and strengthen export competitiveness.

16.8 mn
TAXPAYERS AT PRESENT AGAINST 7.2 MILLION IN JULY 2017 WHEN GST CAME INTO FORCE

POST THE GST RATE RATIONALISATION, INVERTED DUTY STRUCTURES HAVE RESULTED IN HUGE REFUNDS BUT AN AUTOMATIC REFUND ROUTE IS MISSING

● How can the GST input tax credit mechanism be made better and simple?

THERE ARE TWO different issues in the existing GST input tax credit mechanism. Firstly, the schema itself is very complex and consists of disallowances and distortions. Input tax credit on all supplies should be allowed if procured for business with a small negative list.

Secondly, unless the tax paid on purchases made by the taxpayer matches 100% with the data uploaded by the vendor, ITC isn't allowed. Moreover, even if the

taxpayer has paid the vendor full amount for the purchases effected (including the input tax), if for some reason the vendor fails to deposit the tax in the government treasury, the taxpayer is required to reverse the ITC so claimed and can even be liable for interest. This causes a lot of hardship to the taxpayer despite no fault of his/her. The rights of a bonafide and genuine buyer need to be protected while heavily penalising the defaulting vendor.

● What are the complexities in e-invoicing?

CURRENTLY, GST REGISTRANTS having annual turnover above ₹5 crore are required to issue e-invoices for business-to-business (B2B) and business-to-government (B2G) supplies. For business-to-customer (B2C) supplies and export transactions, e-invoice is not mandatory. This results in a complex process of aggregating the turnovers, which leaves room for errors to creep in. Also, large taxpayers have to manually track input tax credit quantum for supplies received from smaller taxpayers. If e-invoices are made compulsory for every taxpayer, it will help in getting the full data into the GSTN servers at source, thus reducing the possibility of errors to a very large extent.

● Why is there a call for revision in various thresholds?

THE THRESHOLDS FOR compulsorily GST registration, composition schemes, exemption to members of co-operative housing societies on monthly maintenance charges, room rent tariffs, etc., had been fixed 10 years ago. These need to be revised upwards, given the rate of inflation and to keep the GST taxpayers' register simple and lean for the government to manage it better.

The micro, small, medium enterprises (MSME) sector also should be freed of complex GST compliances. A six-monthly GST return form should be introduced for small taxpayers as was the case in the erstwhile service tax regime.

Pharma, EVs seek GST fix for duty inversions

SHUBHAM RANA
New Delhi, September 30

PHARMACEUTICALS, TEXTILES, FOOTWEAR, fertilisers, renewable energy and electric vehicles (EVs) could be among the sectors seeking relief from accumulated input tax credit (ITC) as the GST Council considers process reforms at its October 7 meeting.

The September 2025 overhaul, which reduced the number of Goods and Services Tax slabs from four to two, simplified the indirect tax regime for consumers but widened inverted duty structures in several sectors, experts said.

An inverted duty structure arises when the GST rate on inputs is higher than that on finished products, resulting in ITC accumulation. While the rate cuts reduced the tax burden on several products and services, businesses in sectors facing such inversions continue to have large amounts of credit locked up.

“One of the unfinished agenda under GST is the accumulation of unutilised input tax credit, particularly in sectors facing inverted duty structures such as pharmaceuticals, textiles, footwear, fertilisers, renewable energy and electric vehicles,” said Manoj Mishra, partner, Grant Thornton Bharat.

“While refunds are available

ITC RELIEF IN FOCUS

■ **Inverted duty:** 18% input tax vs 5% output GST locks up ITC

■ **Working capital blocked:** Large ITC remains locked in credit ledgers

■ **Refund gap:** Input services and capex ITC remain excluded

■ **October 7 meeting:** GST Council may consider ITC-related process overhaul

■ **Structural fix:** Correct inverted duties and widen ITC refunds

In specified cases, the current framework does not fully address credit arising from input services and capital expenditure, which results in significant working capital blockage for prolonged periods,” Mishra said. The GST Council is expected to take up several process reforms at its upcoming meeting, including issues related to ITC.

The government has previously sought to address accumulated ITC through rate rationalisation and the introduction of risk-based provisional refunds for inverted duty structure cases. However, faster refunds only address the timing issue, while the underlying accumulation remains in sectors where the rate inversion is structural, Mishra said.

“In some businesses, the quantum of such unutilised credit can be substantial and remain locked for years,”

he added.

In several industries, ITC accumulation is primarily attributable to input services and capital goods that continue to attract GST at 18%, while outward supplies face a 5% tax.

This mismatch leaves significant amounts of ITC locked in electronic credit ledgers, increasing working capital requirements and gradually becoming an embedded cost in the value chain. This can adversely affect domestic manufacturing competitiveness and future investment, said Bipin Sapra, partner and indirect tax policy leader, EY India.

ITC accumulation is also a significant challenge for businesses undertaking large capital investments, experts said.

“During the set-up and expansion phase, companies accumulate substantial GST credits on plant, machinery and

related services. These credits often remain locked for long periods as the current refund framework under inverted duty structures does not adequately address credits arising from capital expenditure. The result is significant working capital being trapped in the tax system,” said Nitin Vijaiavergia, partner, Price Waterhouse & Co LLP.

Mishra said the GST Council should consider a two-pronged approach: correcting persistent inverted duty structures at source and reviewing the refund mechanism for genuine accumulated credit, including credit attributable to input services.

“Allowing a refund of accumulated credits arising from rate inversion and attributable to input services and capital goods would improve liquidity, reduce tax cascading and support domestic manufacturing growth,” Sapra said.

Why Aditya Birla’s Ultravolt foray sent jitters through cable stocks

● **Bigger near-term concern is margin pressure: Experts**

AKASH MANDAL
Mumbai, October 2

ADITYA BIRLA GROUP announced its foray into the wires and cables business with the launch of Ultravolt on September 3, with an initial output of ₹1,800 crore.

The company said Ultravolt would be the second-largest player in the wires segment by capacity at launch, and aims to become one of the top two players in the segment within five years. But the announcement unsettled the existing players in the segment, hitting their stock prices.

Polycab India, which holds around a 22% market share of the domestic wires and cables market, tanked 15% in September. KEI Industries has nosedived nearly 22%, while Havells India and RR Kabel have dropped 14-18%.

According to an Aditya Birla Group statement, India’s wires and cables industry has reached a market size of ₹1,24,085 crore and is projected to grow at 14.50% annually up to 2035, led by housing, infrastructure,

industrial investment, and electrification. The strong growth outlook makes the group’s entry into the sector timely.

Experts say the bigger near-term concern is margin pressure rather than a sharp hit to revenues. Copper prices could also be a key factor in determining the impact.

The Aditya Birla Group has businesses across several sectors, allowing it to use existing manufacturing and distribution networks that most companies do not have. In this case, Hindalco Industries and UltraTech Cement give it a key advantage.

“The Hindalco relationship gives Ultravolt access to high-purity copper and greater supply-chain control but not a guar-

anteed structural price advantage as copper is a globally traded commodity,” according to Manish Valecha, Co-head of Research at Anand Rathi Institutional Equity. However, in an environment where copper prices have already shot through the roof, this accessibility may come in handy for Ultravolt.

When a big conglomerate with deep pockets enters an industry, it can initially unsettle existing players.

The concern is that its financial strength will allow it to scale up quickly and take market share from established companies. When Reliance Jio launched in 2016 with the promise of free internet, it had sent the share prices of existing

players such as Bharti Airtel and Vodafone Idea crashing up to 10% within a single day.

In fact, the Aditya Birla Group had had a similar effect on the paints industry with the launch of Birla Opus Paints in February 2024. The brand had launched with a “blitzkrieg” strategy, driven by aggressive pricing, massive capital expenditure commitments, and a host of benefits to dealers and distributors, helping it capture a 5-6% market share in the decorative paints segment in a short time. UltraTech’s massive distribution network was a key ingredient in that case.

The consensus is that Ultravolt’s margins will impact existing players. The effect is likely to be first seen in margins getting aggressively squeezed.

“The more immediate risk is margin pressure. Incumbents may have to increase dealer incentives, advertising and promotional spending to protect their retail position and limit price hikes, particularly with copper prices rising,” explained Valecha of Anand Rathi.

“This is particularly relevant for Havells and the house-wire portion of Polycab/KEI. So, the near-term revenue disruption looks manageable, while margin pressure is the bigger concern,” he added.

Forex reserves log record weekly drop on rupee defence

INDIA’S FOREIGN EXCHANGE reserves dropped the most on record as the central bank’s support for the rupee weighed on the stockpile.

Reserves fell \$18.34 billion to \$747.56 billion in the week of September 25, data released on Friday showed. This is the biggest fall in a week on record.

The central bank has sold dollars to shore up the rupee, while also conducting sell-buy swaps in the foreign-exchange market, depleting reserves.

The swaps usually involve the RBI selling dollars to banks for rupees, and agreeing to buy the US currency back later.

Shipping Corporation expects ₹2K-cr profit in FY27

PRESS TRUST OF INDIA
Mumbai, October 2

NAV RATNA PSU and the country’s largest shipping company, Shipping Corporation of India (SCI), is expecting to deliver a profit after tax (PAT)

of ₹2,000 crore this fiscal, Union Minister Sarbananda Sonowal said on Friday.

He also said the company is also looking to induct 30 vessels and other 51-container vessels in the fleet.

On a standalone basis, SCI

reported a PAT of ₹1,352.92 crore for FY26 on standalone operating revenue of ₹5,778.1 crore, according to its FY26 financial report.

“Last year, the profit margin after tax was Rs 1,326 crore. This year, in the first quarter, it

exceeded ₹600 crore in PAT. Going by this, SCI is going to post more than ₹2,000 crore in PAT this fiscal,” Sonowal said on the sidelines of SCI’s 65th Foundation Day celebration event.

Currently, SCI has 58 vessels in the fleet.

Fieldmarshal eyes 10-15% share in tractor segment

RAJKOT-BASED DIESEL engine manufacturer Fieldmarshal PM Diesels, looks to corner around 10-15% market share in the below-20 HP tractor segment in next three years, a top official said on Friday. New engines are compliant with the latest Tractor Emission Stage V norms, and are approved by the Automotive Research Association of India (ARAI).

Paras Dairy eyes ₹5,000 cr revenue in next five years

Derives 70% of top line from B2B segment

VIVEAT SUSAN PINTO
Mumbai, October 2

VRS FOODS, THE New-Delhi-based firm that owns dairy brand Paras, is targeting a turnover of ₹5,000 crore over the next five years, as it looks to tap growing demand for value-added dairy and protein products while expanding its consumer-facing portfolio and pushing its presence into new markets, Chief Marketing Officer VPS Malik said in a conversation with FE.

The company, which currently generates about ₹3,000-3,200 crore in annual turnover, derives 70% of its top line from the institutional or B2B segment. The B2C segment gives

8% TECH SPENDING GROWTH OUTPACES 4% IT REVENUE GROWTH

BFSI tech spend rises, but share of IT services shrinks

Banks directing more of their tech budgets towards AI, cloud, software

POULOMI CHATTERJEE
Bengaluru, October 2

BANKS AND FINANCIAL institutions are increasing their technology spending, but Indian IT services firms are capturing a shrinking share of the incremental wallet as a larger portion of their budgets shifts towards AI infrastructure, software, cloud, cybersecurity and in-house engineering capabilities.

Technology spending by banks grew 8% year-on-year in the first half of 2026, compared with 4% growth in BFSI revenue for IT services, according to data from ICICI Securities. The divergence reflects a structural change in the composition of technology budgets, with a growing share of spending going directly to technology and software providers rather than outsourced services.

“Total BFSI tech spending includes hardware, cloud consumption, software, cybersecurity products, and internal technology capabilities,” Ronak

WALLET SQUEEZE

IT services account for 40-50% of banks' technology budgets, while software accounts for 26-33%, according to Everest Group

The divergence reflects a structural change in the composition of technology budgets

Doshi, partner at Everest Group, told FE. IT services account for only 40-50% of technology budgets, while software represents another 26-33%, he said.

The shift is becoming more pronounced as banks direct incremental spending towards AI infrastructure, cloud consumption, cybersecurity products and software-led modernisation. While IT services firms can participate through integration, implementation and managed services, the associated services revenue is typically smaller and follows the initial technology investment, Doshi said.

“Banks and insurers are directing their technology dollars, with a growing share of incremental spend flowing to

software platforms, cloud hyperscalers, AI model providers, data platforms, and cybersecurity products,” Achyuta Ghosh, India research & advisory lead at HFS Research, said. This means that even as overall technology budgets rise, the portion available for outsourced application development, maintenance and infrastructure services is growing much more slowly, he said.

AI is also changing the economics of outsourced work. Rising expenditure on compute, tokens and models is putting pressure on routine technology operations, particularly work traditionally undertaken from lower-cost locations by Indian IT firms. Fixed and outcome-

Banks are building in-house technology capabilities, owing to security concerns around AI and sensitive financial data

The shift shows a growing share of spending going directly to technology and software providers rather than outsourced services

linked contracts can further shift the volatility of AI-related costs to service providers, affecting revenue and margins even when client relationships remain intact, Ghosh said.

Banks are building greater technology capabilities internally, partly because of security concerns around AI and sensitive financial data. Everest Group data showed that the offshore and nearshore banking GCC footprint grew around 36% between 2015 and the third quarter of 2025.

“The mandates are expanding beyond application delivery into core and payments modernisation, fraud, data, AI/ML and cloud engineering,” Doshi said.

Suzuki seeks weekly supplier shutdowns

ADITI SHAH
New Delhi, October 2

SUZUKI MOTOR HAS asked suppliers in India to halt production for one day a week for machine maintenance, as the Japanese vehicle maker aims to prevent unscheduled stoppages and maintain quality ahead of ramping up output, two people said.

The firm has issued such a directive to its suppliers for the first time, the people said, and it comes as its Indian unit Maruti Suzuki prepares to boost annual production to 4 million cars by 2030 from about 2.4 million currently. Suzuki Motor counts India as

its biggest market and, increasingly, a key manufacturing base from which it aims to increase exports to destinations including Japan and Europe.

In turn, Maruti Suzuki India is the biggest player in the world's third-largest car market but has seen its share slide after home rivals like Tata Motors and Mahindra & Mahindra launched feature-packed cars in quick succession. Maruti is preparing a series of launches in the run-up to 2030 to regain market share, and the production increase, with attendant risk management, is central to that goal.

Hindalco calls off AluChem acquisition

ADITYA BIRLA GROUP'S subsidiary Hindalco Industries has called off its proposed \$125-million (around ₹1,202 crore) acquisition of US-based AluChem Companies after extended delays in closing the transaction, according to a filing.

The two firms have jointly decided to terminate the equity purchase agreement for the proposed acquisition of AluChem and its speciality calcined and tabular alumina business, the Aditya Birla Group metals flagship said in a BSE filing late on Thursday.

Hindalco Industries, however, maintained that its strategy to expand the speciality alumina business through high-value, technology-led value-added products remains unchanged, and it will continue to explore opportunities, including in the US.

Adani's ₹2.6-L cr Maha investments underway

FE BUREAU
Mumbai, October 2

THE ADANI GROUP has completed or is executing investments worth about ₹2.6 lakh crore in Maharashtra, or 43% of the more than ₹6 lakh crore it has committed to the state, Pranav Adani, director, Adani Enterprises, said on Friday.

The group's investment commitments, made at the World Economic Forum in Davos and through partnerships with the state government, span sectors across critical and upcoming sectors like energy, aviation and aero-districts, urban regeneration, data centres and coal gasification.

“Our recent commitments reflect a quantum leap in nature, scale and conviction — at a time when the state aims to be a one-trillion-dollar economy by 2030, with the Mumbai Metropolitan Region playing a central role,” Adani said at the launch of the Invest Maharashtra event in Mumbai.

Among the group's key projects is Navi Mumbai International Airport, which Adani said is being developed as a major

Maharashtra Chief Minister Devendra Fadnavis inaugurates the Dharavi Experience Centre in the presence of Adani Enterprises Director Pranav Adani, BMC Commissioner Ashwini Bhide, and other senior officials, in Mumbai on Friday

infrastructure asset for the Mumbai Metropolitan Region and will eventually be capable of handling more than 90 million passengers annually. It also operates Mumbai's Chhatrapati Shivaji Maharaj International Airport and is developing integrated business and hospitality districts around the two aviation gateways.

Through Adani Electricity Mumbai, the group supplies power to more than 3 million

homes and establishments across Mumbai, with more than 60% of its power supply sourced from renewable energy, Adani said.

To insulate Mumbai from outages, the group has a 1,000 MW High Voltage Direct Current (HVDC) transmission link that complements their pumped-storage hydro initiatives across the state to guarantee 24x7 green baseload power, he said.

Maharashtra CM unveils Dharavi Experience Centre

FE BUREAU
Mumbai, October 2

MAHARASHTRA CHIEF MINISTER Devendra Fadnavis on Friday inaugurated the Dharavi Experience Centre, which shows how redeveloped Dharavi, touted as Asia's largest slum, will look like.

Adani Navbharat Developers (ANDPL), a joint venture of Adani Group and Maharashtra government's Dharavi Redevelopment Authority/Slum Rehabilitation Authority (DRP-SRA), is developing a 621-acre shantytown which houses over 1 million residents.

In the experience centre, residents can step inside sample homes, explore a 3D walk-through of the proposed township and see how housing, livelihoods, public amenities and open spaces are planned.

Spread across 22,500 sq ft, the centre gives residents a first-hand look at the redevelopment through life-size home models, digital displays and interactive exhibits. It brings together the different elements of the plan, from homes and

NEW AVATAR

Dharavi Experience Centre offers residents a 3D preview of the proposed redevelopment

Centre features life-size 350 sq ft and 500 sq ft sample homes, alongside plans for amenities and transport

Redevelopment plan includes a multimodal transport hub, 40,000 trees and a 3.3-km public riverfront

workplaces to transport and community infrastructure.

A detailed 3D walkthrough takes visitors through the wider neighbourhood, showing residential and commercial areas, roads, transport links, public amenities and open spaces. Interactive exhibits trace Dharavi's history and highlight the businesses and entrepreneurial activity that have shaped its identity

and contributed to Mumbai's economy.

At the heart of the centre are life-size sample homes. Visitors can walk through unfurnished and fully furnished 350 sq ft and 500 sq ft apartments, experience the proposed layout and understand how the spaces could be used.

Digital and assisted channels at the centre provide information on surveys, eligibility, documentation and rehabilitation, helping residents understand the provisions and processes that will shape their homes and livelihoods.

The redevelopment plan also includes a multimodal transport hub designed to bring different modes of transport together and improve connectivity for residents and other Mumbaiikars.

The centre also highlights the proposed rejuvenation of the Mithi river, around 40,000 trees across Dharavi and a 3.3-km public riverfront. The plan also provides for parks and open spaces, adding more greenery and public areas to the neighbourhood.

Young buyers take the wheel in pre-owned luxury car market

AKBAR MERCHANT
Mumbai, October 2

ASPIRATIONAL SHIFT

Buyers, aged around 35-40, are increasingly using pre-owned cars to enter luxury segment

Spinny's luxury-car deliveries rose 21% in H1 of 2026, while average selling price increased 25%

SUVs dominate demand, with diesel models preferred and ₹15-30 lakh is the sweet spot

continue to dominate demand, with diesel vehicles being preferred over petrol.

The ₹15-30 lakh price band has emerged as a sweet spot for luxury used-car buyers, with Mercedes-Benz and BMW among the preferred brands.

Jatin Ahuja, founder and managing director, Big Boy Toyz, said customers are increasingly opting for larger and better-equipped vehicles within similar budgets.

Demand remains strong for models such as the Mercedes-Benz GLC, GLE and GLS, BMW X1, X3 and X5, as well as for the Land Rover Defender, Range Rover Sport and Porsche Cayenne.

Pre-owned luxury electric vehicles are also beginning to

ASPIRATIONAL SHIFT

Buyers, aged around 35-40, are increasingly using pre-owned cars to enter luxury segment

Spinny's luxury-car deliveries rose 21% in H1 of 2026, while average selling price increased 25%

SUVs dominate demand, with diesel models preferred and ₹15-30 lakh is the sweet spot

Buyers are also focusing on vehicle age, service history, warranty, ownership costs and resale value

Demand is expected to strengthen in festive season, with Spinny projecting 30% QoQ growth in Oct-Dec

Buyers are also focusing on vehicle age, service history, warranty, ownership costs and resale value

Demand is expected to strengthen in festive season, with Spinny projecting 30% QoQ growth in Oct-Dec

The festive season could provide another boost to demand. Shaman expects sales to pick up during Navratri and Dussehra, although it expects full-year growth to remain flat or marginal.

Big Boy Toyz expects healthy demand through Diwali, particularly for well-maintained luxury SUVs, while Spinny expects October-December growth of around 30% compared with June-September.

The broader used-car market is also becoming more organised, with improved financing, documentation, and after-sales support helping pre-owned luxury vehicles gain credibility among younger buyers.

Sidharatha Mishra appointed ICICI Life Insurance MD & CEO

● To succeed Anup Bagchi, who will step down on Oct 13

NARAYANAN V
Chennai, October 2

ICICI LIFE INSURANCE has once again turned to its parent group to fill its top leadership position, naming Siddhartha Mishra, a group veteran who currently heads digital channels at ICICI Bank, as its next managing director and chief executive officer.

In an exchange filing, the insurer said its board had approved Anup Bagchi's resignation as MD & CEO with effect from October 13. Mishra will take charge from October 14, or the date of receipt of approval from the Insurance Regulatory and Development Authority of India (Irdai), whichever is later, for a five-year term. The board has also approved Mishra's appointment as chief operating officer from October 6.

A career ICICI banker, Mishra currently heads digital channels

LEADERSHIP CHANGE

■ Mishra to take charge from October 14, subject to Irdai approval

■ Mishra has also been appointed as chief operating officer effective October 6

■ The new CEO will serve a five-year term

■ He currently heads digital channels at ICICI Bank

■ In FY26, ICICI Life's premium income rose 9% to ₹53,120 cr

■ ICICI Life is continuing parent-group-led leadership succession

and partnerships, voice channel, customer service, NRI and IFIG groups at ICICI Bank. His elevation continues a succession pattern in which the life insurer has looked within the banking group for senior leadership.

From Shikha Sharma and Sandeep Bakshi to NS Kannan and Bagchi, ICICI Life has consistently drawn from the group's senior ranks to lead the insurer. Mishra's appointment follows the same model, but comes at a consequential time for the life

insurance industry as Irdai moves to reshape commission structures and distribution economics, potentially prompting insurers to reassess product and distribution strategies.

Irdai last week proposed reintroducing hard caps on commissions based on the segment, line of business, distribution channel, product complexity and the effort involved in selling and servicing policies.

The consultation paper proposes more than 30 product-

and channel-specific commission caps, including lower commissions for term insurance and savings plans.

For ICICI Life, which derives nearly a third of its business from the bancassurance channel, the proposed changes could increase the need to further diversify its distribution mix. The draft appears to favour agency-led distribution over bancassurance, brokers and web aggregators in certain product categories. The proposed commission range for life insurance agents is 6.25-25% of first-year premiums, compared with 5-20% for other channels, including brokers, bancassurance and web aggregators. Renewal commissions have also been recalibrated in favour of agency channels.

Mishra's experience in digital channels could prove relevant as the insurer seeks to broaden its distribution base.

In FY26, ICICI Life's total premium income grew 9% to ₹53,120 crore, slower than the 12% growth reported by HDFC Life Insurance and 14.6% by SBI Life Insurance.

MFIs turn cautious in Maha, Karnataka amid drought

NARAYANAN V
Chennai, October 2

MICROFINANCE INSTITUTIONS (MFIs) with significant exposure to Karnataka and Maharashtra are being advised to exercise caution in loan sanctions to avoid fresh slippages, as the state governments have declared droughts across large parts of these states, India's fourth- and fifth-largest microfinance markets.

The Maharashtra government last week declared drought in 265 of the state's 358 talukas, covering nearly 74% of the state. Karnataka is also facing a worsening drought, with 177 talukas officially being declared affected.

"Maharashtra is an important microfinance market, with around 4.59 million unique borrowers and ₹24,087 crore in loan amount outstanding as of June 2026, placing it among the top five states based on the criterion," Alok Misra, CEO and director, Micro Finance Industry Network (MFIN), one of the self-regulatory organisations (SROs) for the microfinance industry, said.

When drought is declared, the state level bankers' committee decide on relief measures in accordance with RBI's guidelines. These typically cover agricultural loans.

"While microfinance

LENDERS WARY

■ Maharashtra has around **4.59 mn** unique borrowers, with **₹24,087 cr** in loan amount outstanding as of June 2026

■ Karnataka had a gross loan portfolio of **₹28,989 cr** as of June 2026

■ Both states together account for over **16%** of the industry's **₹3.28 lakh-crore** outstanding portfolio

loans are not for agriculture/crop cultivation, considering the linkages to other related livelihoods, MFIN is keeping a close watch on the situation," Misra said.

"It is going to be a little bit challenging, but right now there are not many issues," said Jiji Mammen, executive director and chief executive of Sa-Dhan, a microfinance SRO. "We have already given advisories to our member institutions to

keep a watch on the situation and take careful decisions."

Mammen, however, said most microfinance borrowers are not entirely dependent on agriculture, having diversified into dairy, livestock and small businesses such as shops.

Karnataka had a gross loan portfolio of ₹28,989 crore as of June 2026, while the same for Maharashtra stood at ₹24,087 crore. Together, they accounted for over 16% of the industry's ₹3.28 lakh crore outstanding portfolio.

Microfinance institutions and NBFCs with significant portfolio concentration in Maharashtra, Karnataka and the northeastern states could see an increase in delinquencies, said K Ravichandran, chief credit rating officer at ICRA. However, the impact would need to be assessed on a case-by-case basis, he added.

ICRA has upgraded its outlook for the microfinance sector to stable from negative in its Credit Quality Trends and Rating Performance for H1FY27, citing a decline in delinquencies, improving asset quality, lower credit costs and a pick-up in disbursements.

The rating agency said multiple guardrails introduced by the two SROs have helped curb borrower overleveraging, while disbursements and AUM growth are recovering.

Bajaj Finance to raise up to ₹17,500 cr via QIPs, warrants

BAJAJ FINANCE'S BOARD of directors has approved proposals to raise up to ₹17,500 crore through a combination of qualified institutional placements (QIPs) and preferential issue of warrants, the company said in an exchange filing.

The board approved the proposals at its meeting held on Thursday, subject to regulatory and statutory approvals, including approval from the company's shareholders.

Under the proposal, Bajaj Finance will raise up to ₹11,700 crore through a QIP. The company has also approved a preferential issue of warrants for an aggregate amount of up to ₹5,800 crore. Together, the two proposed fundraising routes would allow Bajaj Finance to raise up to ₹17,500 crore.

The QIP will involve the issue of equity shares with a face value of ₹1 each, according to the exchange filing.

The company said the proposed issue will be carried out in accordance with the applicable provisions of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, the Companies Act, 2013 and other applicable laws.

For the preferential issue, the company will issue warrants convertible into an equivalent number of equity shares. ANI

● SADAF SAYEED, CHIEF EXECUTIVE, MUTHOOT MICROFIN

'Bank funding eases for MFIs amid surplus liquidity'

Muthoot Microfin has raised its assets under management (AUM) growth guidance for FY27 to 20%, from 12-15% at the beginning of the year. Chief Executive Sadaf Sayeed tells Narayanan V that the upward revision is driven by strong disbursements, lower borrowing costs and improving credit quality in the microfinance sector. Excerpts:

What are your full-year fundraising plans?

We have raised around ₹4,200 crore so far in this fiscal. We are looking at around ₹8,000 crore of disbursements in the second half. So, we would need another ₹7,000 crore during this period. It will be a mix of term loans, NCDs and some commercial papers. We already have around ₹5,000 crore of sanctions in hand. There is also a lot of interest from foreign investors in extending external commercial borrowings (ECBs), but we are waiting for the hedging cost to rationalise a little.

Banks have surplus liquidity post FCNR(B) deposit mop-up. Will it translate into

higher funding for MFIs?

Banks have become a lot more comfortable with microfinance. They have a lot of liquidity and are more than willing to deploy funds. The advantage with us is that we are able to negotiate better and get better rates. We have been able to bring down our cost of funds by 14 basis points last quarter. Our incremental cost of funds is 9.7%, while our overall cost was 10.13%.

This quarter, our costs will definitely drop to single digits for the first time. That said, the bulk of bank disbursements is restricted to around 12 (large) players. There will be a

little bit of a challenge for smaller ones, but the credit guarantee scheme under which some disbursements have taken place will help those entities improve their financial situation. Hopefully, there will be follow-on funding from banks.

How is your asset diversification plan coming along?

We were planning to have a 75:25 mix between joint liability group (JLG) and non-JLG loans by the fiscal end.

Our non-JLG portfolio has already reached 24%. It is driven by individual loans, which is now a ₹3,200-crore portfolio. Our gold loan portfolio is disbursing ₹100 crore per month. We have already disbursed ₹500 crore this year. Loans against property are touching ₹100 crore.

Overall, we are looking at 20% growth in assets under management (AUM) this year. The trends are quite positive, and asset quality is good. So, we have revised our growth target to 20%.

What prompted the ₹250-crore NCD fundraise? This latest fundraising forms part of our continued strategy to strengthen funding profile, diversify liability mix, and optimise the overall cost of borrowing. Around 50% of our borrowings come from banks, including term loans or structured products such as pass-through certificates and direct assignments.

Another 30% comes through NCDs and commercial papers. The NCD market has been quite supportive. This is our first issue after achieving the AA-rating. We issued the paper at 9.25%, and it was fully subscribed very fast.

WE ARE LOOKING AT 20% GROWTH IN ASSETS UNDER MANAGEMENT THIS YEAR. THE TRENDS ARE QUITE POSITIVE

Non Current Liabilities	38,726.40	28,898.55	38,128.80
Current Liabilities	86,809.42	88,224.10	1,11,180.71
Total Equities and Liabilities	2,02,836.84	194,381.53	1,98,747.35

d) Audited Cash Flow Statement for the three years immediately preceding the date of issue of circular or advertisement:

Particulars	As on 31.03.2026	As on 31.03.2025	As on 31.03.2024
Cash flow from operating activities	17,339.76	(133.49)	19,636.50
Cash flow from investing activities	(16,324.74)	(6093.97)	(4,513.07)
Cash flow from financial activities	(949.69)	6257.42	(15,066.33)
Net increase/(decrease) in cash and cash equivalent	65.33	29.94	57.10

e) Any change in accounting policies during the last three years and their effect on the profits and the reserves of the Company: No

5. A DECLARATION BY THE DIRECTORS THAT-

a) the company has not defaulted in the repayment of deposits accepted either before or after the commencement of the Act or payment of interest thereon;

b) the board of directors have satisfied themselves fully with respect to the affairs and prospects of the company and that they are of the opinion that having regard to the estimated future financial position of the company, the company will be able to meet its liabilities as and when, they become due and that the company will not become insolvent within a period of one year from the date of issue of the circular or advertisement;

c) the Company has complied with the provisions of the Act and the rules made thereunder;

d) the compliance with the Act and the rules does not imply that repayment of deposits is guaranteed by the Central Government;

e) the deposits accepted by the Company before the commencement of the Act have been repaid.

f) In case of any adverse change in credit rating, depositors will be given a chance to withdraw deposits without any penalty.

g) the deposits shall be used only for the purposes indicated in the Circular or circular in the form of advertisement;

h) the deposits accepted by the Company (other than the secured deposits, if any, aggregate amount of which to be indicated) are unsecured and rank pari passu with other unsecured liabilities of the Company.

Disclaimer: It is to be distinctly understood that filing of circular and circular in the form of Advertisement with the Registrar should not in any way be deemed or construed that the same has been cleared or approved by the Registrar or Central Government. The Registrar or Central Government does not take any responsibility either of the financial soundness of any deposit scheme for which the deposit is being accepted or invited or for the correctness of the statements made or opinions expressed in the Circular or the Circular in the form of advertisement. The depositors should exercise due diligence before investing in deposits schemes.

The second test

Markets now reward start-ups with real economics, not just deferred promises

THE STARTUP INITIAL public offering (IPO) boom seems to be entering a more consequential phase. With the primary market seeing a steady stream of new listings and a sizeable pipeline of new-age companies preparing to tap investors, the question is no longer whether public markets are willing to absorb startups. They clearly are. The more important question is what happens after the listing. The experience of around 54 startups that have already made the transition to the stock market offers some insights. At the September 28 close, 32 of them were trading above their issue price, while 22 were below it. That surely is a reasonably encouraging record. But the distribution of returns is far more revealing. Ten companies have more than doubled from their IPO price, while four have lost more than half their value. The divergence suggests that the public market is beginning to perform a function that the private funding ecosystem could sometimes postpone: separating businesses on the basis of their ability to create shareholder value.

That distinction matters because the startup label has historically carried considerable weight in private markets. Rapid revenue growth, a large addressable market, and the promise of eventual profitability could sustain high valuations even when current earnings and cash flows remained weak. The IPO changes the equation. Once listed, a company has to contend with a much broader investor base, quarterly scrutiny, and a valuation that is continuously tested by the market. The contrast among listed startups is therefore significant. Ather Energy, Eternal, and ESDS Software Solutions have risen more than threefold from their issue prices, while Fino Payments Bank, FirstCry, Tracxn, and Ola Electric have suffered steep declines. The lesson is that public investors are increasingly distinguishing between companies with credible long-term economics and those whose earlier valuations may have relied more heavily on future expectations.

A large pipeline of prospective IPOs means that the performance of earlier listings will inevitably shape expectations for the next generation. Companies approaching the market can no longer assume that a successful private funding history, a prominent brand, or a large issue will by itself secure a durable public-market valuation. Some of the largest startup offerings have struggled after listing, while companies that raised considerably smaller amounts have delivered substantial gains. What matters increasingly is whether growth can translate into improving unit economics, operating leverage, cash generation, and, ultimately, sustainable profits. This is not indiscriminate exuberance. Investors can accommodate current losses when there is a credible pathway to scale and profitability. What the market appears less willing to tolerate is a valuation whose justification remains perpetually deferred.

The startup IPO cycle should therefore be judged not merely by how many companies reach the exchange or how much capital they raise, but by whether public markets are able to impose greater discipline on the ecosystem. A vibrant IPO market is useful when it provides entrepreneurs and early investors with an exit, gives companies access to growth capital, and subjects their business models to a wider test of credibility. The sharp divergence in the performance of listed startups suggests that this process is already under way. For the startup ecosystem, that is a necessary next step in maturity. The first test was whether a company could attract capital and build scale. The second is harder: whether it can persuade public shareholders that the business can create value long after the excitement surrounding its IPO has faded.

Nike's China reset needs more than the Kardashians

WITH NIKE INC.'S North American turnaround starting to take root, the sportswear giant can now devote more attention to tackling its biggest problem: China. But fixing the second-largest market means accepting that the business will be smaller and less profitable in the long run. It has a long way to go. The retailer's quarterly sales declined 26% in China underscoring the scale of problems there. Group revenue fell by 5%. CEO Elliott Hill acknowledged on an earnings call on Thursday the company's most controversial decision in the market since launching a strategic reset — stopping its partners from selling online in the new year.

The logic appears straightforward at first blush. By taking digital distribution away from wholesalers who've been discounting too much, Nike hopes to restore its premium brand image and get consumers buying at full price. It's an expensive undertaking. Laurent Vasilescu of BNP Paribas estimates that the company stands to lose as much \$1 billion. That's because wholesalers account for 55% of Nike's revenue in the country. But the ways in which goods are sold isn't the main problem; it's the lack of desirability for Nike's shoes, sportswear and equipment. Two years after Hill pulled a Tom Brady and quit retirement to return to the athleticwear maker, it has yet to introduce any product that has truly made fans stand up and take notice.

It has some buzzy products to work with. WNBA star Caitlin Clark's first basketball shoe was launched in China in late September, a full week before being made available anywhere else. And Kim Kardashian, along with mom Kris and sister Khloe, was in Shanghai this week to promote the Nike Skims line of shapewear. But neither is a substitute for merchandise created specifically for Chinese consumers. Compression wear, in particular, may not resonate in a market where many women now favor loose-fitting clothing or even "dress like nuns."

In fact, the retailer's self-operated digital storefronts in China can be awash with markdowns. A recent check of Nike's e-commerce page on WeChat, a superapp used for everything from payments to shopping, showed the Vomero Plus sneaker discounted from 1,299 yuan (\$194) to 999 yuan. A pair of Air Jordan 1 Retro Flight was nearly 50% off at just 770 yuan.

There is nothing inherently wrong with markdowns. It's a normal part of any retail strategy that helps clear inventory and bring in revenue. But repeated price cuts over the years mean consumers in China have started to perceive Nike to be a discount brand, according to Jacques Roizen, co-founder of Shanghai-based retail consultancy Foresight Performance Partners.

Company executives are clearly aware of the problem. They've been talking about the importance of driving "full-price demand" since Hill's first earnings call as CEO in December 2024. The appointment of Cathy Sparks, a Nike lifer, as head of the China operations earlier this year was a move in the right direction, but the payoff is still some ways away.

Much is riding on a locally tailored strategy. Last month, the brand unveiled a sneaker collaboration with Chinese tennis player Zheng Qinwen based on the Zoom Vapor 12. Sparks told the Wall Street Journal that a locally created sportswear collection will hit stores this month. Still, a more comprehensive overhaul will take, at minimum, another year. Executives have said that China revenue would get worse for the rest of the financial year.

That brings Nike back to the lesson from Adidas' reset. After years of falling sales and losing ground to local rivals, the company gave its China operation greater freedom to develop products and marketing for local consumers. That has helped it to return to consistent growth in both revenue and margins without recreating the sprawling business of the boom years.

Nike shouldn't measure success by whether it can reclaim its former peak. A smaller China business that gets consumers excited about its products and willing to pay full price for them would count as a genuine turnaround.

Bloomberg

ENERGY SECURITY

Time for a heat pump mission

EVERY YEAR, INDIA spends hundreds of billions of dollars to import crude oil and natural gas. In the last financial year, the net oil and gas import bill was \$117.5 billion, roughly equal to the gross state domestic product of Punjab. Oil and gas imports, therefore, do not merely drain foreign exchange; they also expose the Indian economy to global price shocks and geopolitical risks, which we have experienced vividly in the last few months because of the US-Iran conflict.

There is now a broad consensus on the need to reduce this import dependence and make India more self-sufficient in energy. However, the policy conversation on reducing this dependence largely revolves around the visible frontiers of the energy transition — electric vehicles, green hydrogen, ethanol, and solar parks. But a large and largely ignored share of imported fuel is burnt for something far more mundane: heat. Diesel and furnace-oil boilers generating steam in factories, LPG and piped gas heating water in hotels and hospitals, and gas-fired ovens and dryers in automobile plants are all part of this hidden energy economy. In fact, about 40% of the energy used in Indian industry goes into generating heat — hot water, steam, and hot air.

For all this heat, a proven and commercially available technology can slash fuel use starting today. This technology is the heat pump — and it is perhaps the lowest-hanging fruit in India's energy transition.

A heat pump does not generate heat; it moves it. It extracts warmth from the air, ground, or industrial waste heat and delivers it at useful temperatures. For every unit of electricity it consumes, it delivers two to four units of heat. No boiler or burner can match this efficiency arithmetic. And this is not a laboratory

CEO, iFOREST

promise; these are commercially available technologies.

Largely Indian-made heat pumps are already running on factory floors across the country — at automotive facilities in Pune, pharmaceutical factories in Bengaluru, textile plants near Bhubaneswar, and electronics plants near Chennai — reliably delivering hot water and steam at temperatures up to 120°C under real operating conditions. Heat pumps that can deliver even higher temperatures are also available, but they remain expensive and are not yet widely deployed.

Studies conducted by my colleagues and me show that wherever heat pumps displace diesel, furnace oil, LPG, or piped natural gas, heating costs fall by 50 to 75%. A motorcycle plant that replaced its diesel boiler saw its cost of heat drop from ₹8.6 to ₹3 per unit. An electronics manufacturer replaced LPG-fired heating at ₹10 per unit with heat-pump heat at ₹3.5 per unit. In industries requiring low- to medium-temperature heat, heat pumps typically pay for themselves in under three years. In large hotels, hospitals, and hostels using electric heaters or LPG boilers, payback periods often fall below two years.

Our assessment shows that the easiest and most economic case for heat

pumps today is precisely where they replace an oil or gas boiler or an electric resistance heater. Coal- and biomass-fired heat is harder to displace on cost today. But the imported-fuel segment — the one that matters most for India's trade balance — is bankable right now.

Consider what this means at a national scale. In industrial sectors dominated by MSMEs — dairy, textiles, pharmaceuticals, food processing, paper, and others — which require low- and medium-temperature process heat, heat pumps can easily meet one-fourth of the current energy demand at half the cost. This means higher profits for a highly stretched MSME sector and a lower import bill for the country.

In large hotels, hospitals, and hostels requiring hot water, heat pumps can eliminate almost all LPG, PNG, and diesel use. In colder regions, where the demand for hot water is high, the economics of replacing oil and gas boilers with heat pumps is even more attractive.

If we put all these demands together, India has a ready market to install 50 gigawatts (Gw) of heat-pump capacity over the next 15 years, significantly reducing the use of oil and gas in MSMEs and the commercial sector. It will also

The barriers are upfront capital costs, low awareness, dependence on imported compressors, and the absence of any dedicated policy

The charity that skips the poor

ANISH KUMAR

National Vice President, Bhartiya Loktantrik Party

India's record CSR spending is welcome, but its geography raises a harder question: is corporate philanthropy reaching the places where deprivation is greatest?

INDIA'S CORPORATE SOCIAL responsibility (CSR) regime has matured considerably since Section 135 of the Companies Act, 2013, made such spending mandatory for qualifying companies. What began as a compliance obligation is now a substantial, predictable stream of private development finance. Expenditure has touched a record ₹40,794 crore according to the latest government data, often cited as proof of a maturing culture of corporate citizenship.

The headline number, however, conceals a more uncomfortable question: Where is this money going? Does it go where it is needed most, or merely where it is easiest to spend?

A map that doesn't match need

The ministry of corporate affairs' state-wise filings point to a troubling pattern. CSR spending is heavily concentrated in states with a strong corporate presence, robust infrastructure, and established institutional capacity. Delhi, Maharashtra, Karnataka, and Gujarat draw disproportionately more than poorer, more populous states such as Bihar. The regions receiving the least corporate philanthropy are frequently those with the steepest deficits in education, health, and rural development — precisely the domains CSR is meant to strengthen.

Bihar illustrates the paradox. In 2023-24, it received ₹260.53 crore, against ₹6,065.95 crore for Maharashtra. Spread across its people, that is about ₹20 per person, versus roughly ₹470 in Maharashtra, a gap of nearly 24 times. Bihar's spending

has more than doubled since 2019-20, but from a very low base. Meanwhile, NITI Aayog's Multidimensional Poverty Index shows a sharp fall in Bihar's poverty between 2015-16 and 2019-21, yet 33.76% of its people remain multidimensionally poor, against about 14% nationally. The progress is real, but so is the gap.

Schedule VII of the Companies Act lists education, healthcare, sanitation, livelihood promotion, and rural development as eligible activities, areas where Bihar's needs are acute. But projects tend to cluster around established urban centres, where companies already have offices, staff, and institutional relationships. The result is a quiet but consequential distortion: Private development finance, instead of correcting regional inequality, ends up reinforcing it.

Not indifference, but incentives

It would be simplistic to call this corporate apathy. Working near existing factories and partners reduces overheads, eases monitoring, and builds genuine understanding of communities. None of this is unreasonable for a company managing shareholder money.

The problem lies not in any individual choice but in the sum of many. No single boardroom decides that Bihar deserves less than Maharashtra. Yet when thousands of companies independently opt for the convenient location, Bihar ends up

with far less than its need warrants. This is a textbook policy-design failure: Section 135 created a large pool of private development capital but no mechanism to steer it towards where need is greatest.

The pandemic showed CSR funds can be redirected swiftly when priorities are clear. The challenge is to replicate that responsiveness in ordinary times without turning CSR into a centrally dictated scheme.

Making the money visible

The first reform is better disclosure. State-level figures are too coarse to reveal the geography of giving within a state. Companies should be encouraged, and eventually required, to disclose CSR spending at the district level, with details of beneficiaries, sectors, and, where measurable, outcomes. NITI Aayog's Aspirational Districts programme already offers a ready framework, with rich district data on health, education, agriculture, and infrastructure. Armed with it, shareholders, regulators, and citizens could ask sharper questions: Where did the company spend, why there, and what changed?

Disclosure should also cover who implements the work. Much CSR money flows through foundations linked to a company's own promoters or directors. The law does not forbid this, and many such foundations do credible work, but independent verification and public reg-

reduce carbon dioxide emissions by 54 million tonnes every year by 2040. This is why heat pumps sit at the strategic intersection of energy security and climate action.

So why is India's installed heat-pump base still less than 1 Gw, with an annual market of only a few hundred crore rupees? The answer is not technology. Indian manufacturers already offer systems that can deliver heat up to 120°C. The barriers are upfront capital costs, low awareness, dependence on imported compressors, and the absence of any dedicated policy. India has national missions for solar, hydrogen, and electric mobility. It has none for the technology with arguably the fastest payback of them all.

But this policy gap can be fixed easily. Cutting GST on heat-pump water heaters from 18% to 5%, similar to solar water heaters, would reduce upfront costs. Interest subvention for commercial and MSME installations, similar to existing schemes run by the Bureau of Energy Efficiency to improve energy efficiency, would make heat pumps more attractive to small businesses. A production-linked incentive for high-temperature heat-pump manufacturing would help build a domestic compressor supply chain and make India self-sufficient in high-temperature heat-pump manufacturing. Similarly, minimum performance standards and star labels would allow buyers and lenders to trust the product.

None of this requires a technological breakthrough or a fiscal blowout. It requires recognising that the cheapest barrel of oil is the one we never import. India's factories, hotels, and homes are already proving that heat pumps work here — in Indian conditions and at Indian tariffs. The gap between today's less than 1 Gw and tomorrow's 50 Gw is not a technology gap. It is a policy gap, and it is ours to close.

isters naming ultimate recipients would keep the line between public benefit and private convenience bright.

Recognition must evolve too. CSR awards and environmental, social, and governance ratings reward scale, visibility, and polished storytelling more than reach or difficulty. A company investing in an underserved district faces higher costs and greater execution risk. It should be celebrated for taking on the harder task, not penalised for looking less efficient on a spreadsheet.

Bihar as the test case

Bihar need not become a compulsory destination for CSR funds, nor should CSR become an allocation formula dictated from Delhi. But Bihar can serve as a benchmark: A test of whether India's CSR architecture is closing development gaps or widening them. Boards and CSR committees should examine the geographic footprint of their giving, not just its quantum, and investors and rating agencies should press companies on whether social investment reaches communities that public systems have historically underserved.

India has every reason to celebrate the growth of corporate giving. But the next milestone should not be another record figure in annual reports. It should be credible evidence that more of that money is reaching the people and places that need it most, because that is the difference between spending responsibly and creating lasting social impact.

LETTERS TO THE EDITOR

CAFE-III's potential

Apropos of "Routes, not detours" (FE, October 2), the much-awaited notification on the third phase of Corporate Average Fuel Economy (CAFE-III) norms targets sales-weighted average of an automaker's fleet. The goal to reduce emission to 78.9 gCO₂/km from 91.7 gCO₂/km is a formidable task. Proposed current norms facilitate credit trading and the option to buy credits through Bureau

of Energy Efficiency (BEE), granting automakers the flexibility in managing compliance. However, there should not be any room for compromise for the failure to meet the standards prescribed within the set period. Besides flex fuel vehicles and highly-tuned Internal Combustion Engine based vehicles, a large number of EVs have hit the market. In a few years from now, discarding older versions of EVs will pose a challenge. It is high time that the Centre brought out clear

and updated Standard Operating Procedures on repairing used batteries, safe disposal, and more. —RV Baskaran, Pune

Walking a fine line

Apropos of "Good technology, bad credit" (FE, October 2), lending to data centres that consume both infra and working capital significantly needs a prudent balance between technological optimism and financial realism. Their capital requirements

and rapidly changing technology make recovery of loans dependent on sustained utilisation, cash flows and future competitiveness. Banks should assess project viability, repayment capacity and tech obsolescence carefully rather than lend merely on the promise of AI growth, but such disciplined lending should not dampen financing for innovative. —NR Nagarajan, Sivakasi

● TRAVEL: THE MOUNTAIN AND THE MOTORCYCLE

Chasing the Milky Way on a Himalayan 450

SPITI, WHERE JAGGED PEAKS AND STAR-FILLED SKIES SHOW INDIA'S RAW BEAUTY

ROSHUN POVAIAH

“THE MOUNTAINS are calling” is a cliché you hear from every other traveller. They certainly didn’t call out to me. Instead, I went chasing the stars in the remote corners of Spiti on my two-year-old Royal Enfield Himalayan 450, braving landslides, slush, gravel, freezing rain, and snow. Of course, I did get my fair share of good tarmac too on this week-long, 1,600-km round trip from Delhi to Spiti, going via Narkanda and returning via Manali.

4D on two wheels

Having done this loop in a 4x4 SUV 15 years ago, I’ve always wondered why bikers throw themselves to the elements. To me, it was about experiencing nature in 4D. When you are astride a motorcycle, every bump, curve, and gravel patch constantly lights up all your senses. There’s no time to daydream. It requires absolute concentration. Do that consistently over 1,600 km and it resets the mind. It’s meditation. Do it longer, and it will be nirvana.

Made for the mountains

The Himalayan 450 is a touring motorcycle built for this terrain — equipped with a single-cylinder, 450cc 40-bhp ‘Sherpa’ engine, six-speed gearbox, Showa suspension, and a 17-litre fuel tank.

Landslides and slush

The first day, I encountered rain while climbing towards Shimla, but the Himalayan’s 40 Nm of torque ensured I stayed ahead of traffic. But about 10 km short of my halt for the night, I faced my first landslide, which caused a two-hour delay.

The next day’s Narkanda to Kalpa ride was scenic, with lush green hillsides leading to the Sutlej River several thousand feet below. Just as I thought the roads were heavenly, a second landslide hit just

In Spiti, a high-altitude cold desert in Himachal Pradesh, clear nights reveal the Milky Way even to the naked eye, while daylight shows you a moon-like terrain — all at the heart of a 1,600-km round trip from Delhi

before Reckong Peo, forcing a 15 km detour over a slushy trail.

The third day was the long haul from Kalpa to Chicham, home to the highest suspension bridge in Asia. The roads are good until Tabo. But from Tabo to Kaza, the surface is terrible, and I had to stand on the footpegs and ride. The Himalayan handled it without a fuss (except for the saree guard that came loose).

Chasing the heavens

It was a clear night at Chicham, and the millions of stars and the Milky Way galaxy visible to the naked eye is a sight I will remember forever. I spent two days staring at the heavens, but the next two days saw me ride across the road to hell!

I caught the season’s first snowfall on the way up to Kunzum La pass, and then zero-visibility and

sub-zero temperatures, forcing me to abort a trip to Chandratol — the high-altitude crescent-shaped lake.

After a gruelling 111 km from Losar, I hit tarmac near the 9-km Atal Tunnel on the way to Manali, followed by a smooth ride till Delhi.

The Himalayan 450 is not a bike you’ll love at first ride (I did, and bought it). But it’s a revelation; it can comfortably cruise at 100 kmph on the highway and keep you comfortable on the bounciest of terrains.

Not once did it let me down. Not once did I let it down.

NEW SKODA SLAVIA

Ashish Gupta, Brand Director, Skoda Auto India

We have begun production of the new Slavia. It’s a sedan with timeless design and modern tech. We will announce its price on October 6.

● CAR REVIEW: RENAULT TRIBER TURBO TCE 100 MT

The budget MPV gets the power it deserved

HIGH ON POWER, BUT STILL LOW ON DESIRABILITY

VIKRAM CHAUDHARY

WHEN I TESTED the updated Renault Triber last October, my verdict was straightforward — it was practical, but painfully slow. The 72 bhp naturally aspirated engine left you changing gears frequently to keep up with traffic. But with the new Turbo Tce 100 MT — built on Renault’s updated platform architecture — the power deficit has been addressed. I tested it in Gurgaon, and on Delhi-Mumbai Expressway.

A surprise at traffic lights

Under the hood sits a 1.0-litre turbocharged engine (100 PS and 180 Nm of torque). At traffic lights in Gurgaon, it was usually the fastest off the line, and surprised others because its exterior design is quite uninspiring.

Noticeable turbo lag

This powerful performance takes a second or two to build up until the engine gets to 2,500 rpm. Once in the powerband, however, both initial and roll-on acceleration are good. On the Delhi-Mumbai Expressway, the car felt capable.

Refinement and dynamics

There are, however, trade-offs in cabin comfort. Push the engine hard, and a lot of sound enters the cabin. Road and tyre noise is also pronounced when driving over broken tarmac, though general tyre grip is decent. Adding turbo performance hasn’t ruined its everyday usability. Thanks to its sub-4-metre length, it retains city-friendly proportions that make navigating tight lanes and congested streets stress-free.

Cabin and practicality

Inside, the styling is functional rather than exciting, but space management is spot on. The first two rows offer generous legroom. The third row is strictly for children. For a family of four, removing the quick-release rear seats opens up a massive 625-litre cargo area. Practical touches like AC vents on all rows, an 8-inch touchscreen, and standard six airbags keep it competitive.

As soon as the engine gets in the powerband (starting 2,500 rpm and above), both initial and roll-on acceleration are good. The car felt capable on the Delhi-Mumbai Expressway

Pricing and verdict

Priced between ₹7.84 lakh and ₹8.99 lakh (ex-showroom), the Triber Tce 100 MT continues to enjoy small-car tax benefits while claiming a certified 21 kmpl fuel efficiency (my test car returned 14-16 kmpl in a mix of highway plus city). By fixing its flaw — a lack of usable engine power — Renault has turned a budget mover into a punchy MPV still on a budget.

(Standard Triber MT is priced ₹5.81-8.05 lakh, and the AMT for ₹8.53 lakh, ex-showroom.)

Personal Finance

PRIM’s edge: Timely rebalancing, smart use of SIFs & passive funds

OVER A FULL CYCLE THAT CAN MEAN BETTER RISK-ADJUSTED RETURNS

SAIKAT NEOGI

THE PORTFOLIO MANAGERS Route for Investing in Mutual Fund units (PRIM), approved by the market regulator recently, provides a structured approach to asset allocation in the underlying mutual fund framework. The edge is better allocation, timely rebalancing and fewer concentration risks.

In PRIM, the manager will build your portfolio with mutual funds, index funds, derivatives and specialised investment funds (SIF). The entry point is ₹25 lakh against ₹50 lakh for portfolio management services (PMS). So, the service layer broadens the funnel for retail investment across market segments and provides scope for customisation.

In fact, PRIM’s true contribution will be managing mutual funds investment better as most investors own an overlapping pile of schemes bought over the years without any portfolio approach. “PRIM will bring professional discipline to that clutter with proper asset allocation, deliberate fund selection and timely rebalancing,” says Gurmeet Singh Chawla, managing director, Master Capital Services.

Made for tough times

In a roaring bull market, a concentrated PMS can run ahead, but PRIM’s diversified approach will usually hold up much better when things get rough. The real edge will come by regular rebalancing, and smart use of

SIF and passive funds. Sonam Srivastava, chief executive officer, Wright Research, says, over a full cycle that can mean better risk-adjusted returns. “But if someone is selling PRIM as a way to beat a good equity PMS outright, that’s just setting the wrong expectation,” she says.

Customisation is the biggest advantage as it allows the portfolio manager to construct different combinations with dynamic allocation across market cycles. The portfolio can be built around an investor’s specific risk profile rather than following a one-size-fits-all allocation.

As index funds are cheap, transparent and easy to rebalance, these will form the core of most PRIM portfolios. “The key value proposition will

be how effectively the manager combines categories, rather than simply selecting the best-performing fund,” says Aditya Agarwal, chief investment officer, Avis Wealth Creators.

The market regulator has capped fixed management fee at 1% of assets under management along with a performance-linked fee. The underlying funds will also have their own expense ratios. But cost alone isn’t the full test, because PRIM portfolios will not share a single objective the way a mutual fund category does. One mandate may chase return; another may exist mainly to lower overall risk through conservative, low-volatility allocations. Since these will be customised rather than standardised products, each has to be

BESPOKE PORTFOLIO

■ PRIM allows portfolio manager to construct different combinations with dynamic allocation across market cycles

■ Allocation decisions should add enough alpha to justify the additional layer of fees

■ Every rebalancing will count as a redemption and trigger a taxable event

■ PRIM portfolios will not share a single objective unlike a mutual fund category

judged on its own stated purpose before investing.

PRIM is not necessarily a higher-return version of PMS. It offers better risk-adjusted returns and greater consistency, particularly for investors who do not want direct-stock concentration. “The key is whether the portfolio manager’s allocation decisions add enough alpha to justify the additional layer of fees,” says Anil Rego, founder, Right Horizons.

Tax implication

Every time the manager rebalances the PRIM portfolio, it will count as a redemption and trigger a taxable event. If the manager is too aggressive with rebalancing, a lot of the value added can get eaten up by tax drag.

● YOUR QUERIES: INCOME TAX

No tax-free threshold for senior citizens on dividend income

● Is there any tax-free threshold for dividends received by senior citizens?

—Rohan Chaudhary

Dividend income is taxable in the hands of investors at their applicable slab rates. There is no specific tax-free threshold or separate exemption exclusively for dividend income, including for senior citizens. However, senior citizens may benefit from the applicable basic exemption limit under their chosen tax regime. Under the default new tax regime, the basic exemption limit is ₹4 lakh, while it is ₹3 lakh under the old tax regime. So, if the taxpayer’s total income, including dividend income, falls within this limit, there would be no tax liability. Further, under the new regime, the Section 156 rebate effectively provides relief where total income does not exceed ₹12 lakh, subject to the prescribed conditions.

● As long-term capital gains from equity are tax-free up to ₹1.25 lakh a year, can I withdraw the gains up to that amount now? Also, if I have to set-off losses from some shares, what should I do?

—Rachit Goel

Long-term capital gains (LTCG) on listed equity shares and equity-oriented mutual funds are exempt up to ₹1.25 lakh per financial year. Therefore, you can sell shares to book gains up to this limit without paying any tax. For the set-off of losses, long-term capital losses can be set off only against long-term capital gains, whereas short-term capital losses can be set off against both short-term and long-term capital gains. Any unabsorbed capital losses can be carried forward for up to eight consecutive years, provided the ITR for the year in which the loss is incurred is furnished

within the prescribed due date.

● We have a joint home loan and the interest payout for this financial year will be around ₹5 lakh. Can I and my wife claim interest deduction of ₹2 lakh each?

—Vipul Kumar

A joint home loan does not, by itself, mean that both borrowers can automatically claim a deduction of ₹2 lakh each. Under Section 22 of the Income-tax Act, interest on borrowed capital for a qualifying self-occupied residential property is subject to a deduction limit of ₹2 lakh per taxpayer. Where the property is jointly owned by the husband and wife, the loan is jointly availed and their respective ownership and repayment contributions are identifiable, each may claim the interest attributable to their share, subject to the individual limit of ₹2 lakh. However, this deduction is not available under the new tax regime.

ANTHROPIC WARNS US GOVT ATTITUDES MAY HURT USERS

ANTHROPIC WARNED THAT US government attitudes toward the company and its technology could have broader implications for its business, including its relationships with commercial customers and partners, according to Reuters.

APOLLO TO BACK \$15-BN JAPAN AI INFRA PROJECT

APOLLO GLOBAL MANA-GEMENT will finance a \$15 billion AI infrastructure project in Japan, accelerating the private asset firm's push into AI sphere. Apollo will act as a partner for UK developer RHAEIM Holdings, which is teaming up with Jera and Dell Tech on the Chiba venture.

FINANCING TO BENEFIT ANTHROPIC, OTHER COMPANIES

Broadcom lines up \$60 bn to fund chips for Anthropic

● Banks to send out syndication letters for a \$42-bn tranche

PREETI SINGH & DINA BASS
October 2

BROADCOM'S WALL STREET syndicate is starting to gather \$60 billion of fresh artificial intelligence (AI) chip financing to benefit Anthropic PBC and other companies, according to people with knowledge of the matter.

Banks involved in the massive debt package are poised to send out syndication letters for a \$42 billion Class A senior-secured tranche, the people said, asking not to be identified discussing the deal, which has yet to be announced.

Blackstone is leading an \$18 billion tranche of Class B junior debt, committing \$9 billion from various funds

DEBT STRUCTURE

■ Blackstone leads \$18 billion Class B junior debt tranche, committing \$9 billion from various funds and plans to syndicate rest

■ Financing closely watched across Wall Street & Silicon Valley as a gauge of investor appetite for AI infrastructure

■ Broadcom seeks to expand chip and data-centre equipment sales, challenging Nvidia as AI firms such as Anthropic demand ever more computing capacity

with plans to syndicate the rest, the people said. Representatives for Broadcom and Blackstone declined to comment.

The financing, which has been taking shape for weeks, is being closely watched by professionals across Wall Street and Silicon Valley for reassurance that investors are still keen to back AI's buildup amid a public backlash against data-centre construction.

Broadcom is looking to sell more chips and other data-

centre equipment, challenging Nvidia, while AI companies like Anthropic need ever more computing capacity.

The potential deal would help firms including Anthropic access chips and other key AI infrastructure, people with knowledge of the talks said in August. It adds to the hundreds of billions of dollars of debt already raised to build out AI infrastructure. While much of that has gone toward data centres, deals financing chips and servers

have multiplied, too.

In August, Nvidia also announced a partnership with six of the biggest names in finance, including Blackstone, to mobilise more than \$500 billion for artificial intelligence, including helping customers fund their purchases of the company's chips.

Meanwhile, Blackstone's investment in Anthropic has helped boost the performance of its private equity fund catering to the wealthy.

World food prices near 4-year high in September: UN

WORLD FOOD PRICES rose in September to their highest in nearly four years as logistics disruptions and weather concerns affected crop markets, the United Nations' Food and Agriculture Organisation said.

Nike's business revamp tests investor patience

NIKE IS CUTTING jobs and embarking on a sweeping overhaul of the business as results deteriorate and test Wall Street's patience with Chief Executive Officer Elliott Hill. The company announced a restructuring plan on Thursday that it expects to save \$2.5 billion over the next five years.

Alibaba, Solaria in talks for Spanish data centre supply

ALIBABA GROUP HOLDING has held talks with Spanish clean-energy producer Solaria Energia y Medio Ambiente SA to supply power for a data centre in the Mediterranean country, according to sources.

AGENCIES

Nvidia hits 1st record since May; value nears \$6 trillion

NVIDIA SHARES HIT a record for the first time since May as investors pile back into the stock after a two-month selloff that wiped more than \$1 trillion off its market value.

Shares of the world's most valuable public company gained 2.9% on Friday, extending a nearly 25% rally from a late July low when fears surrounding the outlook for artificial intelligence pressured the stock.

The rally has been buoyed in recent weeks by optimism that AI agents like Meta Platforms's Muse could drive increased demand for semiconductors. Shares got a further boost after Nvidia announced on Monday that it was increasing the size of its buyback plan by a record \$150 billion.

Nvidia's rebound comes

after months of quickly shifting sentiment around the state of the AI landscape, including questions over the hundreds of billions of dollars being spent by firms on its infrastructure and safety risks that the tech-

nology could pose to humanity.

The Santa Clara, California-based chip developer unveiled a new double-layered AI security system on Monday, meant to stop AI agents from going awry. Nvidia said the new system would have stopped the recent breach of Hugging Face by OpenAI's models — at a time when investors have become more concerned with AI safety.

All told, Nvidia shares have gained about 27% so far this year, on track for their fourth consecutive year of double-digit returns. Its market capitalisation now stands at roughly \$5.7 trillion, leaving it less than \$300 billion away from becoming the first company in history to hit the \$6 trillion level.

Oil dips over \$3 on talks over diesel stock release

OIL PRICES FELL more than \$3 and European gasoil futures dropped over 4% on Friday after reports of talks in Europe on additional diesel and crude stock releases, easing concerns over tight global energy supplies. Brent was down \$3.06, or 3%, at \$99.25 a barrel at 1409 GMT. West Texas Intermediate dropped \$3.95, or 4.25%, to \$88.92 a barrel.

Both benchmark contracts were poised for a weekly decline, with Brent down about 4.7% so far for the week and WTI around 3.7% lower. European gasoil futures, a benchmark for diesel prices, fell 4.3% to \$1,386.75 a metric ton.

"The whole energy complex trades lower, led by gasoil and ULSD, as EU countries discuss releasing fuel and crude stockpiles to ease acute market tightness and help avert a potential US diesel export ban," Ole Hansen, head of commodity strategy at Saxo Bank, said.

European Union countries on Friday discussed a French proposal to release additional diesel stockpiles in response to US pressure on European nations to unleash more supplies, a source familiar with details of the discussion told Reuters on Friday.

US employment growth fails to meet expectation

JULIA FANZERES
October 2

THE US ADDED fewer jobs than expected in September and wage growth slowed, signaling some caution among employers amid rising costs.

Nonfarm payrolls increased 29,000 last month after a downward revision to the prior two months, according to Bureau of Labour Statistics data out Friday. That missed all estimates in a Bloomberg survey of economists. The unemployment rate rose to 4.2%, partly reflecting a growing workforce.

Robust consumer spending and vigorous business investment has supported hiring, but many cost-conscious employers have taken a measured approach to expanding headcount. That's led to uneven hiring from month to month. Even so, layoffs remain subdued, pointing to a relatively stable job market.

With unemployment still historically low, Federal Reserve officials can keep their attention focused on inflation as they consider when to raise interest rates again. Traders pared bets on a Fed rate hike this month following the data.

"For the Fed, this month should be the nail in the coffin for an October hike," Thomas

JOBS TRACKER

■ Nonfarm payrolls rose by 29,000 last month after downward revisions to the previous two months

■ Unemployment rate climbed to 4.2%, partly reflecting an expanding labour force

■ Local govt payrolls fell, along with employment in some industries most exposed to AI

Simons, chief US economist at Jefferies LLC, said in a note. "It now looks more likely that the policymakers emphasizing that they have some more time before another hike is needed will remain patient."

The S&P 500 stock index rose following the release. Treasury yields were lower and the dollar declined.

The latest jobs report is the last before the November midterm elections, in which the economy is expected to play a central role in how Americans vote. While the labor market is part of that picture, much of the focus has been on lingering concerns about the cost of living, even as consumers continue to spend.

Payrolls declined in local government, as well as in some of the industries most exposed to artificial intelligence, like information, professional and business services, and financial activities. Investment in data centers and other AI-related infrastructure helped support additional hiring in construction and manufacturing.

Healthcare and leisure and hospitality employment also increased. Meantime, average hourly earnings edged up a weaker-than-expected 0.1% from August and rose 3% compared with a year earlier — the slowest annual wage growth since 2021. Average weekly hours were unchanged.

—BLOOMBERG

Eurozone inflation jumps to 3.8% on rising energy costs

EUROZONE INFLATION surged more than expected in September and is likely to increase further in the coming months on soaring energy costs, keeping pressure on the European Central Bank to raise interest rates and governments to help struggling consumers.

Inflation in the 21 nations sharing the euro currency jumped to 3.8% in September from 3.2% a month earlier, exceeding expectations for 3.6% in a Reuters poll, driven primarily by fuel, natural gas, and to a lesser extent, food costs.

A closely watched 'core' figure, which excludes volatile food and fuel prices and signals underlying trends, accelerated to 2.5% from 2.4%, on a pick-up in services prices, data from Eurostat, the EU's statistics agency, showed on Friday.

Rising fuel costs are putting pressure on European governments to support households and businesses, and in some countries such as France have already triggered street protests, potentially stretching already precarious public finances.

While subsidies have been minor so far, totalling around 0.1% of the bloc's GDP, they are

PRESSURE ON ECB

■ Eurozone inflation in September at 3.8% vs 3.2% a month earlier

■ Core inflation rose to 2.5% from 2.4%

■ The number will bolster call for ECB to raise interest rates

■ Headline inflation in the 21-nation bloc was expected to rise to 3.6%

less targeted and temporary than hoped, suggesting more lasting budget pain.

For the ECB, the figures are likely to be seen as a mixed bag.

The rise in headline inflation further above its 2% target is worrisome and will bolster calls for rate hikes on top of the two moves this summer.

However, the muted increase in core figures indicates that high energy costs have yet to generate the sort of second-round impacts that could set off a hard-to-break inflation spiral.

These would suggest the ECB can stick to its 'measured' policy response, an undefined concept taken by markets to mean spaced-out rate hikes, perhaps to coincide with quarterly economic projections.

"September's (inflation) data don't alter our view that the ECB is most likely to wait until December to raise interest rates again," Jack Allen-Reynolds at Capital Economics said. "That said, if energy prices rose further in the next few weeks, an October hike would not be a big surprise."

Investors see up to three more hikes in the ECB's 2.5% deposit rate in the coming year but the odds of a move this month are seen as negligible and the next increase is not fully priced in until January.

These expectations change rapidly, however, and even policymakers acknowledge that their own projections are far too uncertain.

FROM THE FRONT PAGE

Bond issues surge ahead of RBI meet

WITH INFLATION RISKS rising and crude oil prices remaining elevated, a large section of the bond market expects the RBI to raise interest rates in its October monetary policy review, in line with the tightening underway across major global central banks.

"Entities are increasingly tapping the domestic debt market to lock in funding costs ahead of an anticipated rate hike. While some issuances have attracted strong demand, elevated yields have deterred borrowers, resulting in some issuances being cancelled or undersubscribed," said Soumyajit Niyogi, director, India Ratings.

RBI's Monetary Policy Committee (MPC) will meet during October 5-7 for the bi-monthly policy review.

Reliance Industries led the September rush, returning to the corporate bond market for the first time since November 2023. The company raised ₹25,000 crore — ₹13,000 crore through 10-year bonds and ₹12,000 crore through five-year bonds. Vedanta raised ₹2,000 crore during the month.

The top 10 issuers together

borrowed ₹55,100 crore, accounting for 41% of total bond issuances in September.

But the surge in fundraising masks a growing divide in the market. While highly rated borrowers continue to find takers, elevated yields are making fundraising increasingly difficult for smaller and lower-rated companies.

Some borrowers have even abandoned planned issuances. The Small Industries Development Bank of India (SIDBI), for instance, withdrew a ₹6,000-crore three-year bond issue after investors sought higher yields.

Rising global borrowing costs are also pushing issuers towards the domestic market.

Niyogi said the sharp rise in US Treasury yields, coupled with geopolitical uncertainty, has made overseas fundraising significantly more expensive.

"Overseas borrowing has become increasingly expensive. With US 10-year yields around 5.25%, hedging can push the effective cost of foreign-currency borrowing to 8.5-9% or more, making domestic funding more attractive, where AAA corporate bonds are available at roughly 7.7-8%," he said.

The preference for quality remains pronounced. AAA-rated borrowers accounted for about a third of September issuances, while AAA and AA-rated entities together constituted more than

90% of the market. For smaller or lower-rated borrowers, the bond market remains considerably more expensive, making bank loans a more attractive alternative.

At the other end of the market, insurers, pension funds and other long-term investors have provided a ready pool of demand for high-quality bonds, particularly at longer tenors.

"There has been natural demand from insurers, pension funds and other institutional investors for high-quality, longer-tenor bonds, particularly after limited supply. Recent issuances have enabled these investors to deploy their funds," said Ajay Manglunia, executive director, Capri Global.

That demand, however, has not been enough to prevent yields from climbing. Geopolitical uncertainty and rising global rates have kept the domestic debt market under pressure, Manglunia said, with cut-off yields for some AAA-rated public-sector issuers already crossing 8%. The yield on AAA-rated PSU bonds has risen around 30 basis points between April and September.

Drug panel rejects cap on...

FOR WHOLESALERS AND distributors, the move leaves room for licences to be added where the bond market remains considerably more expensive, making bank loans a more attractive alternative.

"The move could make it easier for manufacturers to maintain distribution networks suited to different markets. Drugmakers depend on wholesalers and distributors to get medicines to pharmacies, hospitals and other buyers. A fixed national limit could have made it harder to add distributors

where they are needed," said the spokesperson of a pharma association.

Though experts said that it could also put greater responsibility on state drug authorities

Smartphone export boom has...

ELECTRONICS EXPORTS ROSE 34% to \$26.66 billion in the same period, with Apple's iPhone shipments accounting for about half of the total.

The numbers point to two different outcomes from the electronics push. The PLI scheme has clearly created scale in mobile-phone manufacturing, attracted global companies and established smartphones as a major export engine. But

the extraordinary increase in smartphone exports has been concentrated overwhelmingly in one company, while the expansion of the wider electronics base has been more gradual. For turning the manufacturing scale into a deeper export ecosystem, the next phase will have to move beyond final assembly and into components and sub-assemblies.

The government has already

begun that shift with the Mobile Phone Manufacturing Scheme (MPMS), introduced after the PLI programme, with a greater focus on strengthening the domestic value chain. Alongside, the Electronics Component Manufacturing Scheme (ECMS) is aimed at building capacity in displays, camera modules, printed circuit boards, passive components and other critical parts.

India-US deal ...

THE NEGOTIATIONS ARE taking place against the backdrop of uncertainty over possible US action concerning countries buying Russian energy. President Trump signed the Lindsey O Graham Sanctioning Russia and Iran Act of 2026 into law on September 18, providing for possible tariffs of up to 100% on imports from countries meeting specified criteria relating to purchases of Russian crude oil.

Other than the uncertainty around Russian oil related tariffs, India is facing 10% additional tariffs under Section 301 of the Trade Act for allowing use of inputs made with forced labour for goods manufactured for export. There is another Section 301 probe that is ongoing on excess industrial production capacities fuelled by subsidies that could bring another layer of tariffs. India, a major buyer of Russian crude, has been closely watching the implications of the legislation for its trade relationship with Washington.

Goyal is in the US from September 29 to October 5 for the G20 Trade Ministers' Meeting and bilateral discussions.

CLOSEST CONTEST WON BY 19-PAISE/KM MARGIN

Fierce competition in PM-eBus Sewa tendering process

NITIN KUMAR
New Delhi, October 2

NEW ELECTRIC-BUS makers are turning up the heat in government tenders, with the closest contest in the latest PM-eBus Sewa procurement being decided by a margin of 19 paise per km. PMI Electro Mobility emerged as the biggest winner, securing 1,248 of the 4,054 buses on offer amid an intense tendering process.

PMI Electro, a new-age electric-bus manufacturer, quoted ₹53.60 per km for 390 buses in Madhya Pradesh, beating JSW's ₹53.79 per km bid by just 19 paise. In four tenders, winning bids were decided by margins of less than ₹1 per km. In three other cases, companies have bagged tenders by quoting less than ₹2 per km than the closest competitors.

The narrow bid gaps point to intensifying competition, as a growing pool of new players act aggressively for fleet orders. For government agencies, greater competition improves price discovery, while putting pressure on the margins of established players such as Tata Motors, Ashok Leyland and VE Commercial Vehicles.

A senior official at Conver-

TIGHT RACE

New entrants put pressure on players such as Tata Motors & Ashok Leyland

PMI Electro leads: Won 1,248 of 4,054 buses on offer
Sai Green won 1,236 buses, JSW 1,200, Eka Mobility 270

gence Energy Services, the government agency implementing the tender, said the procurement process was among the most competitive ones.

In Haryana, JSW's winning bid of ₹53.42 per km was 53 paise below of PMI Electro's ₹53.95 per km. In Kerala, Sai Green's ₹62.79 bid was 59 paise less than JSW's ₹63.38, while in Chandigarh, PMI's ₹50.55 bid was 93 paise lower than JSW's ₹51.48.

"The tight bidding benefits government-backed electric mobility programmes by improving price discovery and reducing the premium that may otherwise be embedded in bids," the official said.

PMI Electro secured buses across Rajasthan, Madhya Pradesh, Chandigarh, Arunachal Pradesh, Himachal Pradesh, Jammu & Kashmir and Ladakh. Sai Green Projects

emerged as the second-largest winner with 1,236 buses across Telangana, Andhra Pradesh, Punjab, Andaman & Nicobar and Kerala, while JSW won 1,200 buses across Karnataka and Haryana.

Eka Mobility secured 270 buses in Gujarat and Manipur, while Inventive Software Solutions won 100 buses in Goa and Dadra & Nagar Haveli.

For PMI Electro, the latest win comes as its electric-bus business scales up rapidly, backed by global investment firm KKR's \$310-million investment.

For JSW, which has launched electric buses under the Ampstar brand, the tender marks its first major government e-bus order, expanding its commercial-vehicle business beyond captive demand from the group's steel operations.

SHARE OF MANUFACTURING IN H1 PROJECTS FALLS TO 3-YEAR LOW

THE MANUFACTURING SECTOR'S share of new investment projects fell to 27%, or ₹8 lakh crore, in the first half of the current financial year—a three-year low. New projects in the sector contracted 23% year-on-year, against a high base of a 108% growth in H1FY26, according to the Centre for Monitoring of Indian Economy. Within manufacturing, new projects in textiles, chemicals, and food and agro products saw the sharpest declines, while consumer goods projects grew 150% year-on-year.

In contrast, the services sector's share of new projects rose to 39%, or ₹12 lakh crore in H1FY17. Within services, projects in

information technology, led by data centres, surged around 250% year-on-year to ₹9.5 lakh crore.

FCNR leverage propels...

UNDER SUCH TRANSACTIONS, an NRI depositor can borrow against an FCNR(B) deposit and redeploy the borrowed funds into deposits, effectively leveraging the original deposit.

Agarwal expects advances against fixed deposits to rise significantly further in September, as more such transactions get reflected in the data.

After the Reserve Bank of India allowed leverage against deposits, banks were providing leverage upto nine times to customers.

Sachin Sachdeva, vice president and co-group head, Financial Sector Ratings at Icria, also pointed to FCNR(B)-linked leveraging as a possible reason for the sudden spike. Banks provided leverage against deposits, with the borrowed funds being deployed back into FCNR(B) deposits, he said.

The spike coincides with a flood of FCNR(B) money into the banking system under the RBI's special window. Banks mobilised \$132.98 billion through the facility by August

31, following which the window was closed ahead of schedule. However, the precise contribution of leveraged FCNR(B) transactions to the surge cannot be established from the available data. The RBI's classification of advances against fixed deposits includes loans against FCNR(B), Non-Resident Non-Repatriable (NRNR) and other deposits, but does not provide a separate break-up for individual categories.

Despite the sharp rise,

loans against fixed deposits remain a tiny part of banks' overall loan books. At ₹2.04 lakh crore, they accounted for less than 1% of overall bank credit of around ₹224 lakh crore at the end of August.

Beyond FCNR(B)-linked trades, loans against FDs are generally used to meet short-term liquidity needs. Instead of prematurely breaking a longer-tenure deposit, a depositor can borrow against it while allowing the FD to continue earning interest, Sachdeva said.

Such loans are also considerably cheaper than unsecured personal loans because the deposit acts as collateral.

But they are less attractive for longer-term borrowing because the interest charged on the loan exceeds the return on the underlying deposit, creating a negative carry. According to Pais-abazaar, loans against fixed deposits are typically priced 50-200 basis points above the applicable deposit rate. SBI, for instance, charges 100 basis points above the applicable time-deposit rate.

Payment aggregators seek bigger share...

PAS THAT ALSO provide payment-processing technology to their sponsor banks could command the upper end of the 50-80% range, people aware of the discussions said.

The size and profile of a PA's merchant base will also determine how much it can earn. Large e-commerce merchants selling higher-value products generate more transactions above the ₹2,000 threshold and therefore more MDR income, the executive said. At the same time, categories such as railways, telecom, insurance and fuel, where the charge is a flat

₹5 per transaction, can provide aggregators with a more predictable stream of fee income.

The new revenue arrangement is therefore likely to intensify competition among large PAs such as Razorpay, Cashfree, PayU and Pine Labs, while smaller players could have less room to negotiate with banks. PAs already follow a similar model for card payments, where larger players are able to secure better commercial terms from acquiring banks because of the volumes they bring.

"The larger aggregators have

always had that advantage, even in credit cards," said an executive at another large payment aggregator.

However, the negotiations could eventually lead to a larger structural change in the UPI ecosystem. Some payment

aggregators are considering approaching NPCI to seek direct membership as acquirers, which would potentially allow them to retain the entire 0.12% acquiring-bank share rather than splitting it with a sponsor bank, an executive at a payment aggregator said.

Such a move would require regulatory approval. Under the current arrangement, the acquiring bank provides the settlement account and connectivity to NPCI, while much of the technology and payment infrastructure is handled by the PA. Direct access, pay-

ment firms argue, could allow them to roll out new products and innovations faster. There is already a precedent in the card ecosystem. In July, Glomo, a payment service provider licensed in GIFT City, became the first non-bank acquirer in India to obtain principal membership of Visa, allowing it to process Visa transactions for merchants directly rather than through a bank's acquiring licence. Payment firms such as Adyen also operate as direct acquirers with Visa and Mastercard in several overseas markets.

THE ISSUE LESS MARKET MAKER RESERVATION PORTION I.E. ISSUE OF 27,99,000 EQUITY SHARES OF FACE VALUE OF ₹10/- EACH FOR CASH AT A PRICE OF ₹45/- PER EQUITY SHARE, AGGREGATING TO ₹ 1,259.55 LAKHS IS HERE IN AFTER REFERRED TO AS THE "NET ISSUE". THE ISSUE AND THE NET ISSUE WILL CONSTITUTE 28.02% AND 26.59% RESPECTIVELY OF THE POST ISSUE PAIDUP EQUITY SHARE CAPITAL OF THE COMPANY.

THE FACE VALUE OF THE EQUITY SHARE IS ₹10/- EACH AND THE ISSUE PRICE IS ₹ 45/- EACH i.e., 4.50 TIMES OF THE FACE VALUE OF THE EQUITY SHARES. THE MINIMUM LOT SIZE IS 3,000 EQUITY SHARES

THIS OFFER IS BEING MADE IN TERMS OF CHAPTER IX OF THE SEBI (ISSUE OF CAPITAL AND DISCLOSURE REQUIREMENT) REGULATIONS, 2018 (THE "SEBI ICDR REGULATIONS") READ WITH RULE 19(2)(b)(i) OF SCRR AS AMENDED. THIS ISSUE IS A FIXED PRICE ISSUE AND ALLOCATION IN THE NET OFFER TO THE PUBLIC WILL BE MADE IN TERMS OF REGULATION 253(3) OF THE SEBI (ICDR) REGULATIONS, 2018. (For further details please see "The Issue" beginning on page no. 49 of this Draft Prospectus.) A copy of Prospectus will be delivered for filing to the Registrar of Companies as required under sub-section 4 of Section 26 of the Companies Act, 2013.

In terms of Regulation 256 of SEBI ICDR Regulations read with the SEBI Master Circular No. SEBI/HO/CFD/PoD-1/P/CIR/2024/0154 dated November 11, 2024 all the potential investors shall participate in the issue only through an Application Supported by Blocked Amount ("ASBA") process providing details about the bank account which will be blocked by the Self Certified Syndicate Banks ("SCSBs") for the same. Further, pursuant to SEBI Master Circular No. SEBI/HO/CFD/PoD-1/P/CIR/2024/0154 dated November 11, 2024, Individual Investors applying in public issue may use either Application Supported by Blocked Amount (ASBA) process or UPI payment mechanism by providing UPI ID in the Application Form which is linked from Bank Account of the investor. (For details in this regard, specific attention is invited to "Issue Procedure" beginning on page no. 272 of the Draft Prospectus.)

This public announcement is being made in compliance with the provisions of Regulation 247(2) of the SEBI ICDR Regulations to inform the public that our Company is proposing, subject to applicable statutory and regulatory requirements, receipt of requisite approvals, market conditions and other considerations, to undertake an initial public offering of its Equity Shares pursuant to the Offer and has filed the Draft Prospectus on September 30, 2026 with SME Platform of BSE Limited (BSE SME). Pursuant to Regulation 247(1) of the SEBI ICDR Regulations, the Draft Prospectus filed with BSE SME shall be made public for comments, if any, for a period of at least 21 days, from the date of such filing by hosting it on the website of BSE SME at www.bseindia.com, on the website of the Company at www.carnetbooks.com and on the website of the Lead Manager, i.e. Finshore Management Services Limited at www.finsshoregroup.com. Our Company invites members of the public to give their comments on the Draft Prospectus filed with BSE SME, with respect to disclosures made in the Draft Prospectus. The members of the public are requested to send a copy of their comments to BSE and/or to the Company Secretary and Compliance Officer of our Company on email id: cs@carnetbooks.com and/or the Lead Manager on email id: investors@finsshoregroup.com within 21 days from the aforesaid date of filing of the Draft Prospectus with BSE SME.

Investments in Equity and Equity related securities involve a degree of risk and investors should not invest any funds in this issue unless they can afford to take the risk of losing their entire investment. Investors are advised to read the risk factors carefully before taking an investment decision in the Issue. For taking an investment decision, investors must rely on their own examination of our Company and the Issue including the risks involved. The Equity Shares issued in the Issue have not been recommended or approved by the Securities and Exchange Board of India ("SEBI"), nor does SEBI guarantee the accuracy or adequacy of the Draft Prospectus. Specific attention of the investors is invited to the section "Risk Factors" beginning on page 16 of the Draft Prospectus.

Any decision to invest in the Equity Shares described in the Draft Prospectus may only be taken after the Prospectus has been filed with the RoC and must be made solely on the basis of such Prospectus as there may be material changes in the Prospectus from the Draft Prospectus. The Equity Shares, when offered through the Prospectus, are proposed to be listed on the SME Platform of BSE Limited ("BSE SME").

For details of the share capital and capital structure and the names of the Signatories to the Memorandum of Association and the number of shares subscribed by them of our Company, please see the section titled "Capital Structure" beginning on page 66 of the Draft Prospectus. The liability of members of our Company is limited.

For details of the main objects of our Company as contained in the Memorandum of Association, please see the section titled "Our History and Certain Corporate Matters" beginning on page 147 of the Draft Prospectus.

For **CARNET BOOKS LIMITED**
On behalf of the Board of Directors
Sd/-
Alex Kuruvilla
Managing Director
DIN:01577902

CARNET BOOKS LIMITED is proposing, subject to the receipt of requisite approvals, market conditions and other considerations, to undertake an initial public offering of its Equity Shares and has filed the Draft Prospectus on September 30, 2026 with SME Platform of BSE Limited ("BSE SME"). The Draft Prospectus is available on the websites of the BSE SME at www.bseindia.com, the website of the Company at www.carnetbooks.com and the website of the Lead Manager, i.e., Finshore Management Services Limited at www.finsshoregroup.com. Any potential investors should note that investment in equity shares involves a high degree of risk and for details relating to such risk, please see the section titled "Risk Factors" on page 16 of the Draft Prospectus. Potential investors should not rely on the Draft Prospectus filed with BSE SME for making any investment decision.

This announcement has been prepared for publication in India and not to be released or distributed in the United States. This announcement is not an offer to sell or a solicitation of any offer to buy Equity Shares of our Company in any jurisdiction, including the United States. The Equity Shares have not been, and will not be, registered under the U.S. Securities Act 1933, as amended (the "Securities Act") or any state securities laws in the United States and may not be issued or sold within the United States or to, or for the account or benefit of, "U.S. persons" (as defined in Regulation S under the Securities Act), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, the Equity Shares will be issued and sold outside the United States in compliance with Regulation S of the Securities Act and the applicable laws of the jurisdiction where those Issues and sales occur. The Equity Shares have not been, and will not be, registered, listed or otherwise qualified in any other jurisdiction outside India and may not be issued or sold, and applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

TURNING THE HEAT ON POLL PANEL CHIEF

Police personnel detain protesters demanding resignation of Chief Election Commissioner Gyanesh Kumar near Jantar Mantar, in New Delhi, on Friday

India races to Asiad top-5 with six gold medals

AJAI MASAND & PHILEM DIPAK SINGH
Nagoya, October 2

THE WOMEN'S HOCKEY team's perseverance earned it a long-awaited gold as well as Olympic qualification, while boxers, archers and wrestler Sujet Kalkal also exceeded expectations as India surged into the Asian Games top-five with a brilliant six-gold haul on the penultimate day of competitions here on Friday.

India is now at the sole fifth position with 76 medals, including 16 gold, 25 silver and 35 bronze. India seems to be heading for a strong finish if the Friday show is any indication.

It was the end of a 44-year wait in women's hockey when India defeated defending champions China 1-0 in the final to secure the gold as well as a direct qualification to the 2028 Los Angeles Games.

Lalmremsiami's 10th minute strike was enough to close the day as brilliantly as it started when the women's recurve archery team clinched its maiden Asiad gold by shocking 10-time Olympic champions South Korea in the final.

The recurve trio of Ankita Bhakat, Kirti Sharma and 17-year-old Kumkum Mohod produced a composed performance under challenging conditions to stun the Koreans 5-3.

(Top) Indian women's hockey team celebrates its victory over China in the Asian Games final, and in the process, qualifying for the 2028 Los Angeles Olympics; Gold medalist Lovlina Borgohain poses after winning the women's 75kg boxing final at the 20th Asian Games, in Nishio, Aichi, Japan, on Friday

In between, Indian boxers were quite literally the 'Lords of the Ring' as Lovlina Borgohain (75kg), celebrating her 29th birthday, Parveen Hooda (65kg) and Ankush Panghal (80kg) outwitted higher-rated opponents to ensure three gold medals.

It was the best gold haul in Asiad boxing by India and can easily be considered the among the best performances of all time by the country's boxing contingent.

Sujet's detremination on the wrestling mat was exemplary as he took the men's 65kg category gold, defeating an Olympic champion en route to

the title and erasing a massive 2-9 deficit in the final.

Adding to the joy were the silver medals claimed by mixed and men's recurve archery teams and bronze medals from sailor Nethra Kumanan in women's dinghy and the men's quadrant team in sepak-takraw.

The late surge in the Games has bolstered India's overall campaign that had looked patchy due to the under-performance in disciplines such as shooting and badminton. The latter was particularly disappointing for failing to deliver beyond a men's team bronze this time.

India renames 28 Ladakh sites

SUDHI RANJAN SEN
October 2

INDIA RENAMED 28 places and geographical features in the northern territory of Ladakh, asserting its claims in a disputed region where the border with China has repeatedly strained ties between the Asian neighbours.

The locations — including peaks, mountains, glaciers, passes, valleys and land areas — were formally identified on official Survey of India maps, the home ministry said in a statement on Friday. The government said the exercise, carried out in consultation with the Ladakh administration, was aimed at standardising the names of the places and facilitating their accurate recognition and greater public awareness.

Some of the locations are in territory claimed by India but controlled by China, making the move particularly sensitive as the two sides seek to stabilise ties after years of tensions over the border.

The cartographic move comes more than six years after a deadly border clash in Ladakh that killed 20 Indian and at least four Chinese soldiers in June 2020. India subsequently imposed additional curbs on Chinese investments following the confrontation.

Relations have since gradually stabilised. Prime Minister Narendra Modi and Chinese President Xi Jinping last month welcomed "steady progress" in

BORDER CLAIMS

■ Peaks, mountains, glaciers, passes, valleys have been given new names on official Survey of India maps

■ Territorial claims: Some locations are in territory claimed by India but controlled by China

■ Exercise aims to standardise names, improve recognition: Govt

■ Move follows efforts by India, China to stabilise ties

bilateral ties and reiterated that differences should not become disputes. Modi also stressed that peace along the border remained essential to the broader relationship. Boundary negotiators have meanwhile agreed to pursue an "early and substantial harvest" of delimitation, according to an August statement.

In a similar exercise in August, India renamed 27 places and geographical features in Arunachal Pradesh, a northeastern region also claimed by China.

flydubai pilot tells PM: Did not want to let others die

PRESS TRUST OF INDIA
New Delhi, October 2

"I WAS FIGHTING for my life, but I was determined not to let others die," flydubai Captain Smit Machchhar told Prime Minister Narendra Modi on Friday while recounting the terrifying moments after being attacked by his co-pilot mid-air but still managing to save the aircraft. Modi spoke over the phone to the pilot, who is currently undergoing treatment at a hospital in the UAE.

Machchhar, who was stabbed and seriously injured by his co-pilot in the cockpit of flydubai flight FZ1073 while travelling from Dubai to Tel Aviv on Wednesday, gave a detailed account of the incident to the prime minister during the video call. Modi lauded the pilot's bravery, presence of mind and composure, and said Machchhar took a split-second decision that saved the lives of so many people.

Machchhar shared that whenever he faces difficulty, he recites the Hanuman Chalisa, a hymn devoted to Lord Hanuman. "I was lying on the floor (of the cockpit) injured. With whatever energy that was left with me, I managed to act properly and saved the plane," the pilot said. "I was fighting for my life, but I was determined not to let others die. It was such a crucial moment. There was a moment when I realised that if I don't do

SMIT MACHCHHAR,
CAPTAIN, FLYDUBAI

Because I was lying on the ground (in cockpit), I could feel that the aircraft was going down

NARENDRA MODI,
PRIME MINISTER

You have enhanced the honour of 140 crore Indians. I feel proud from the bottom of my heart

something — because I was lying on the ground (in cockpit), I could feel that the aircraft was going down," he said.

Machchhar said he was repeatedly beaten and sustained multiple injuries, but he told himself that he had to get up and act. "At that time, I thought if I don't get up... I have been flying planes for 17 years, I have been a Captain for the last 11 years, and I know what is happening in an aircraft even with my eyes closed. When I was lying down below, I knew for a fact that if I could make one last push — the

door was right there. Even while I was still taking blows, I could just open the door," he said.

Modi told Machchhar that the country can proudly say that Indians are not those who take lives, but those who are willing to risk their lives to save others.

"At that time, you received so many injuries and were engaged in a fight of life and death. But you ignored your own safety and were concerned about the safety of the passengers. You have enhanced the honour of 140 crore Indians. I feel proud from the bottom of my heart," he said.
